

Master of Science in Nutrition Post-Baccalaureate Preparatory Program 2013-2014

The Post-Baccalaureate Preparatory Program (“the post-bacc”) allows students missing a significant number of prerequisites to complete coursework in preparation for the MSN program at Bastyr University. **Admission into the post-bacc program does not guarantee admissions into the Master’s program.** See the reverse side of this page for a post-bacc timeline.

POST-BACC PREREQUISITES

The following courses must be completed prior to enrolling in the post-bacc program.

Bachelor’s Degree from a regionally accredited institution

College Algebra

Introductory Biology with lab

General Chemistry 1 & 2, science major level, with labs (Can be taken during the summer at Bastyr University prior to the post-bacc year—the prerequisite is Introduction to Chemistry)

POST-BACC CURRICULUM

While enrolled in the post-bacc program, students can plan to complete the following MSN prerequisites.

Organic Chemistry

Biochemistry 1 & 2

Anatomy & Physiology 1 – 3

Microbiology

Abnormal Psychology (*MSN CHP applicants*)

Developmental Psychology (*MSN CHP or MSN/DPD applicants*)

Nutrition (*Online*)

OTHER COURSES

Whole Foods Production

Post-bacc students have the option of taking this course at Bastyr (graduate level). It will take the place of Whole Foods Production in the MSN program the following year.

Post-Baccalaureate Program Timeline

Priority Deadline: March 15
