The *Bastyr University Catalog* is published annually. Information contained in this catalog is current as of July, 2010. Recognizing that funding, policies, personnel and curriculum may change, Bastyr University reserves the right to change, without prior notice, academic programs, courses, faculty, fees, policies and the academic calendar regulating admissions, registration, graduation and any other matters affecting the student body.

Nothing contained in this catalog shall constitute a contract, expressed or implied, between applicants or students and Bastyr University. The administration shall, at all times, retain the authority to withdraw from the University, any student failing to attain and maintain established levels of academic or clinical performance or who does not exhibit the personal and professional conduct required for the practice of medicine or related disciplines.

In meeting its professional educational requirements, Bastyr University is committed to its obligation to maintain a healthy environment commensurate with the standards set by federal, state or local regulatory agencies in the normal operations of its classrooms, laboratories, clinics and research facilities. Students should be aware, however, that health care practitioners and students training for these professions may be exposed to diseases and potentially toxic environments to a much greater extent than the general public.

Bastyr University is an equal opportunity institution. We do not discriminate in matters of employment or participation in programs, services or benefits on the basis of gender, race, creed, color, religion, national origin, age, sexual orientation, gender identification, individuals with disabilities or veteran's status. Our programs, services and facilities are accessible to individuals with disabilities. Please contact the University in advance if you require special accommodation due to a disability.

Bastyr University is accredited by the Northwest Commission on Colleges and Universities. For information about accreditation and approval of degree and certificate programs, see page 4.

Bastyr University Catalog 2010-2011

SCHOOL OF ACUPUNCTURE AND ORIENTAL MEDICINE

Combined Bachelor/Master of Science in Acupuncture
Combined Bachelor/Master of Science in Acupuncture and Oriental Medicine
Master of Science in Acupuncture
Master of Science in Acupuncture and Oriental Medicine
Certificate in Chinese Herbal Medicine
Doctor of Acupuncture and Oriental Medicine

SCHOOL OF NATURAL HEALTH ARTS AND SCIENCES

Bachelor of Science with a Major in Health Psychology
Bachelor of Science with a Major in Integrated Human Biology
Bachelor of Science with a Major in Nutrition
Bachelor of Science with a Major in Exercise Science and Wellness
Bachelor of Science with a Major in Nutrition with Didactic Program in Dietetics
Bachelor of Science with a Major in Nutrition and Exercise Science
Bachelor of Science with a Major in Nutrition and Culinary Arts
Combined Bachelor/Master of Science in Midwifery
Master of Science in Midwifery
Master of Science in Nutrition (Research)
Master of Science in Nutrition and Clinical Health Psychology
Master of Science in Nutrition with Didactic Program in Dietetics
Dietetic Internship

SCHOOL OF NATUROPATHIC MEDICINE

- Bachelor of Science with a Major in Herbal Sciences
- Certificate in Holistic Landscape Design
- Certificate in Naturopathic Midwifery (no longer enrolling new students)
- Doctor of Naturopathic Medicine

Curriculum and course changes in the 2010-2011 Bastyr University Catalog are applicable to students entering - during the 2010-2011 academic year. Please refer to the -appropriate catalog if interested in curriculum and courses required for any other entering year.

General Information

Introduction

Bastyr University, located in the beautiful Pacific Northwest, is a progressive, accredited, nonprofit university, internationally recognized as a pioneer in the study of natural healing. Since its inception, the University has based its educational, clinical and research programs on the following key principles:

- Treatment of the whole person.
- Prevention of disease.
- Teaching patients how to take responsibility for their own health.
- Enhancing each individual's inherent healing ability, using natural, nontoxic therapies.

Over the years the University has broadened its mission to integrate Western scientific standards with traditional natural healing methods from around the world. The University has expanded and strengthened the academic and clinical education of naturopathic medicine practitioners. It has developed unique academic degree programs in acupuncture and Oriental medicine, nutrition, exercise science and wellness, herbal sciences, integrated human biology, midwifery and health psychology, as well as specialized non-degree programs that reflect its founding philosophy.

The education of graduate natural health practitioners and highly qualified undergraduate students at Bastyr University emphasizes development of the scientific understanding of the structure and function of the human body and the disease process, balanced with a profound appreciation for, and ability to activate, the unique self-healing ability inherent in every human being. The University's educational approach is an integrated one, offering traditional didactic instruction combined with innovative, problem-based learning in a rigorous academic environment. The learning experience emphasizes academic excellence, the development of individual talents and mastery of critical competencies.

Students learn under the guidance of outstanding faculty. More than 90 percent of the University's health sciences core faculty members have earned doctoral degrees, and many are successful private practitioners who contribute a wealth of practical experience to the classroom. Laboratory experiments, demonstrations, clinical experience and case-oriented teaching help students develop practical, patient-oriented skills and understanding. Student clinicians are also trained to recognize when other modes of treatment are in the best interests of the patient and to make appropriate referrals to colleagues in other health care professions.

Bastyr University is dedicated to educating individuals to meet the challenges of the twenty-first century. In practice and research, these professional healers will continue to integrate scientific methodology with the wisdom and proven benefits of traditional healing methods, while calling forth the intangible, and often miraculous, healing power native to each individual and living system.

BASTYR UNIVERSITY VISION STATEMENT

As the world's leading academic center for advancing and integrating knowledge in the natural health arts and sciences, Bastyr University will transform the health and well-being of the human community.

BASTYR UNIVERSITY MISSION STATEMENT

We educate future leaders in the natural health arts and sciences. Respecting the healing power of nature and recognizing that body, mind and spirit are intrinsically inseparable, we model an integrated approach to education, research and clinical service.

BASTYR UNIVERSITY VALUES

Compassion

Community

Integrity

Connection to Nature

Whole Systems Health

In pursuit of its vision and mission, the University is characterized by:

- Academic excellence: curricula that present the cutting edge of natural medicine philosophy and practices; programs that facilitate students' development of high-level academic and/or clinical expertise; utilization of teaching methodologies that optimally facilitate student skill and knowledge base development and an educational environment that incorporates and models the principles of natural medicine.
- Pioneering research: foundational inquiry into the underlying concepts of natural medicine; iterative research that continuously

evaluates the efficacy of therapeutic strategies and agents; and research partnerships to deepen and broaden the kinds of possible inquiry.

- Renowned clinical services: cutting-edge natural medical care; teaching that helps students model ideal clinical practice behaviors; and collaborations that provide the opportunity to explore and develop integrated care protocols and clinical practices.

For the University to fully meet these commitments, it must think and act strategically. In December 2008, the University's Board of Trustees adopted and committed itself to the following core strategic initiatives:

Strategic Initiative #1: Convene essential generative conversations that inform the cultivation of practitioners and influence policy decisions that contribute to restoring the world's intrinsic health.

Strategic Initiative #2: Determine what academic programs are essential to a robust and universal education in the natural health arts and sciences and ensure that each program is focused on the achievement of excellence.

Strategic Initiative #3: Attract, support and retain world-class faculty and staff in the natural health arts and sciences.

Strategic Initiative #4: Attract, support and retain world-class students representing different cultures.

Strategic Initiative #5: Our methods of and access to instruction are innovative enough to attract the most diverse and qualified students, while maintaining the highest standards of academic, research and clinical excellence.

Strategic Initiative #6: Establish a secure base of financial support and appropriate physical assets so we can invest in and support those things that assure we will always lead the way in education, research and clinical practice of the natural health arts and sciences.

Bastyr University has played a major role in establishing the credibility of science-based natural medicine and helped initiate the current transformation of the health care system. We believe natural medicine has much to offer. In order to continue this leadership and for the full benefits of natural medicine to be realized, we will continue to evolve Bastyr University into a fully developed, well-financed, mature academic health center.

GLOBAL COMPETENCIES AT BASTYR UNIVERSITY

Bastyr University has developed global competencies in three major areas to help students succeed in their chosen field in the natural health sciences. The three major areas are communication skills, critical thinking and professional behavior. Students fulfill these global competencies through the curriculum of their chosen program and in their interactions with the Bastyr community. If students are having difficulties with any of the global competencies, they are encouraged to seek assistance from their instructors and the tutoring center. Faculty members may recommend remediation to students if warranted.

Communication Skills: There are five global competencies listed under communication skills: writing, listening, speaking, information literacy and public speaking.

Critical Thinking: There are six global competencies listed under critical thinking: synthesis and integration, reflective evaluation, problem solving, analytical skills, intuitive skills, and research skills.

Professional Behavior: There are five global competencies listed under professional behavior: medical and professional ethics, compassionate caring behaviors, respectful communication, personal health and wellness, and professional boundary skills.

LEGAL STRUCTURE OF BASTYR UNIVERSITY

Bastyr University is a nonprofit, tax-exempt corporation founded for the purpose of serving as an effective leader in the improvement of the health and well-being of the human community through education, research and community health care. The Articles of Incorporation are filed in the state of Washington. The University is governed by a Board of Trustees that has the final authority. The board appoints the president, who is ultimately

responsible for all academic and administrative policies and for financial management and planning. For a listing of University officers and members of the Board of Trustees, refer to page 147.

ACCREDITATION AND RECOGNITION

Bastyr University is accredited by the Northwest Commission on Colleges and Universities, 8060 165th Avenue NE, Suite 100, Redmond, WA 98052-3981, 425.558.4224. The NWCCU is an institutional accrediting body recognized by the U.S. Department of Education.

The Doctor of Naturopathic Medicine program is accredited by the Council on Naturopathic Medical Education, a specialized accrediting board recognized by the U.S. Department of Education. A copy of the *CNME Handbook of Accreditation for Naturopathic Medical Colleges and Programs* (2007 edition) is on reserve in the Bastyr University Library. For more information, contact the Council on Naturopathic Medical Education, P.O. Box 178, Great Barrington, MA 01230, or call 413.528.8877.

The Commission of Accreditation of Dietetics Education (CADE), 120 South Riverside Plaza, Suite 2000, Chicago, IL 60606-6995, education@eatright.org, website: www.eatright.org/cade, has accredited the Bastyr BS Didactic Program in Dietetics and the Bastyr MS Didactic Program in Dietetics and has accredited the Bastyr Dietetic Internship.

The Master of Science in Acupuncture (MSA), the Master of Science in Acupuncture and Oriental Medicine (MSAOM) and the Doctor of Acupuncture and Oriental Medicine (DAOM) are all accredited by the Accreditation Commission for Acupuncture and Oriental Medicine (ACAOM), 7501 Greenway Center Dr., Suite 760, Greenbelt, MD 20770, 301.313.0855. ACAOM is not currently recognized by the U.S. Department of Education with respect to doctoral programs in the field. However, Bastyr University is regionally accredited by the Northwest Commission for Colleges and Universities, 425.558.4224, and thus all degree offerings are accredited and DAOM students are eligible for Title IV funds.

The Master of Science in Acupuncture and Oriental Medicine and the combination of the Master of Science in Acupuncture and the Certificate in Chinese Herbal Medicine are approved for California licensure by the California Acupuncture Board.

Bastyr University is approved by the U.S. Immigration and Naturalization Service to accept and enroll foreign nonimmigrant students. Bastyr University's academic programs are approved by the Higher Education Coordinating Board's State Approved Agency (HECB/SAA) for enrollment of persons eligible to receive educational benefits under Title 38 and Title 10, U.S. Code.

Bastyr University has received approval from the state of Washington as a recognized midwifery training facility and provides education for midwives in two distinct programs - for naturopathic physicians who wish to earn a Certificate in Naturopathic Midwifery and for direct-entry midwifery students in the articulated Bachelors/Masters of Midwifery degree. Both programs are accredited through the Midwifery Education Accreditation Council (MEAC). Individuals who complete the University's naturopathic midwifery program and pass naturopathic medicine and midwifery licensing exams have dual licensure as naturopathic physicians and midwives in Washington and other states. Graduates of the Department of Midwifery are eligible to sit for licensure in Washington and other states, apply to the Canadian bridging program for provincial registration, and graduates from both programs may sit for the North American Registry of Midwives (NARM) exam to receive the Certified Professional Midwife (CPM) credential recognized in many states for legal practice of midwifery and reimbursement for services.

Bastyr University has received approval from Washington state to offer its acupuncture and Oriental medicine programs. Individuals who complete the Master of Science in Acupuncture or Master of Science in Acupuncture and Oriental Medicine are eligible to sit for Washington and other states' licensing or certificate board exams.

VISITING CAMPUS

Prospective students are invited to visit classes on the Bastyr campus, take a campus tour, speak with an advisor, and talk with students in order to further explore a career in the natural health sciences. Visitors should contact the admissions office at least a week prior to the visit to arrange for an appointment.

The admissions office is open weekdays from 8:30 a.m. to 5:00 p.m. Pacific Time, excluding holidays. Regular classes are in session from late September through early June. Upon request, the admissions office will send information about lodging in the area and transportation to the University from Seattle-Tacoma International Airport.

To schedule a visit, please call the admissions office at 425.602.3330 or e-mail admissions@bastyr.edu. Visit our website at www.Bastyr.edu/admissions.

Students

THE STUDENT BODY

Those who attend Bastyr University constitute a diverse group of learners. The average age of the 927 students enrolled at the University in the fall of 2009 was 30, with a range in age from 17 to 62.

The demographics across various programs are fairly similar. More than three-quarters of the students are women. About one-third of the student body is from the Pacific Northwest, and almost every U.S. state is represented. International students are an important part of the Bastyr community. In 2009-2010, 65 foreign national students, representing 29 countries, were enrolled.

STUDENT PARTICIPATION

The major focus of student participation is the Bastyr University Student Council. The council determines how student activity fees are spent, appoints students to various committees, represents student interests to the administration and allied professional organizations, and continually seeks to promote the University and meet the needs of students. The Student Council, like the University as a whole, relies upon student participation to create a more effective learning environment. The Student Council's constitution may be found online at MyBU.

The Student Council hosts numerous events during the year, including potluck dinners, dances, a talent show, graduation parties, and Bastyr Community Day. The council has made significant contributions to the University, including sponsorship of community events (visits by Tibetan monks), remodeling the movement room, providing remote viewing for some classrooms, equipment for the library and other University departments.

Each student is required to pay a \$25 student activity fee every quarter. These funds are administered by the Student Council and are used to support activities, student organizations, programs and services. With these funds, events like Bastyr Community Day, expansion of the herb garden, and free or partially subsidized concerts, lectures and workshops are made available to students. The funds are also used to purchase equipment for the University for general use, such as additional computers for the library, a laptop with LCD projector and video equipment.

The Student Council recognizes official student organizations. In the past several years these organizations have included the following:

- 12-Step Group
- Action Africa
- American Association of Naturopathic Physicians (AANP)
- Bastyr Environmental Action Team (BEAT)
- Bastyr Rock the Vote
- Bellydance Club
- Chamber Music Club

Christian Fellowship
Community Health Club
Culinary Roots Club
Ethnobotanical Student Association
Exercise Science Club
Hapkido Club
Herbal Ways
Jewish Student Union
Journal Club
Meditation Club
Nature Cure Club
Pediatrics Club
Physicians for Social Responsibility
Soccer Club
Sports Medicine Club
Student Midwifery Association
Student Nutrition Association
Sundo Circle
Tai Chi Club
Tibetan Medicine Student Club
Travel clubs
Ultimate Frisbee Club
Voice for Queer Natural Health
Washington Association of Naturopathic Physicians (WANP)
Yoga Club

Student affairs

The division of student affairs at Bastyr University provides support and services for students to meet personal and professional goals.

The student affairs staff at Bastyr University consists of the dean of students' office, admissions, financial aid, the registrar's office, the Student Resource Center, student housing, the Counseling Center, the Tutoring Center, marketing and media, career and alumni services, as well as services for international and veteran students and students who access services under the Americans with Disabilities Act. *Student Policies and Procedures* are available online at MyBU.

DEAN OF STUDENTS/VICE PRESIDENT FOR STUDENT AFFAIRS

The dean of students' office supervises student affairs and professional staff, plans and conducts orientation and commencement activities, advises student organizations, oversees the Student Resource Center, facilitates communications within and among the University's constituencies, and resolves grievances.

ADMISSIONS

The Office of Admissions works with all prospective students for degree and certificate programs at the University. In addition, the admissions department coordinates campus tours, information sessions, webinars, campus visits and off-campus events to highlight the academic opportunities at the University.

REGISTRATION

The registrar's office maintains students' academic records, manages course scheduling, handles academic registration and evaluation, records grades, produces transcripts and grade reports, and provides academic advising and evaluation, as well as international and veteran student services.

Bastyr University operates on the quarter system. The University's quarter is 11 weeks long. (Summer quarter classes are generally eight weeks; summer clinic is 11 weeks.) Eleven hours of class constitute one credit hour, and 22 hours of lab/practicum constitute one credit hour.

Continuing students preregister for courses and clinic shifts by submitting a preregistration form. The preregistration forms must be turned in before the registrar's office will register a student for classes or clinic shifts.

Registration for continuing students takes place in the spring for summer and fall quarters and in the fall for winter and spring quarters. New students are automatically registered for their fall quarter courses before orientation week. Non-matriculated students may register for courses after matriculated students have been registered. Priority for courses is given to matriculated students. Students taking a course for credit have preference over students auditing a course. Students auditing a course or clinic shift (regardless of matriculation status) will be withdrawn if the course is full and an eligible student elects to register for the course, for credit. Students taking a course that is required for their major have preference over those taking the course as an elective. Students may elect to audit a course or change their status in a course from an audit to a grade through the second week of the quarter. However, after the first week of the quarter, standard refund policies apply. After the second week, a student may not change from a graded option to an audit option or from an audit option to a graded option.

Course add/drop/withdrawal forms are obtained from and returned to the registrar's office. Classes may be added or dropped from a student's schedule through the add/drop period (ending the close of the first week of each quarter). After the first week of the quarter, all withdrawals will be noted with a W grade on the transcript (except in the case of weekend intensive classes or non-traditionally scheduled classes that have not yet begun). Assigned clinic shifts may be traded during the shift change period. Elective clinic shifts may be added during that same period. Clinic shift drops are accompanied by financial penalties (please see the registrar's office for additional information). Withdrawal from classes is not permitted during the final three weeks of a quarter (see the financial policies section for the refund policy and page 152 for a refund schedule). For courses with concentrated scheduling (not evenly spaced throughout a quarter), the timing of additions or drops varies. (In no case may students drop or withdraw from a course after the course has ended.) Students must check with the registrar for specific deadlines.

FINANCIAL AID

Prospective students, current students and alumni all work with the Office of Financial Aid on financial planning for their education. Students have access to a full range of state and federal financial aid programs. The financial aid office also distributes information about a wide variety of private scholarships available throughout the academic year.

STUDENT RESOURCE CENTER (SRC)

The Student Resource Center, located in the main hallway near the cafeteria, is a central location for information, where students can obtain information and assistance about student-related concerns, details on the student activity schedule and ask general questions. Students can also obtain lockers and identification cards at this center. There are more than 400 lockers available for student rental on campus, costing \$15 - \$20 per year. Student identification cards are provided to all new students, and cost of the card is included in the new student matriculation fee.

STUDENT HOUSING

The University offers on-campus housing in the Student Village, which opened in summer 2010. The village consists of 11 buildings, housing 12 students each in single-suite rooms. These LEED-certified buildings are green-constructed and designed to enhance the student experience while also reducing traffic congestion. Full information, including photos, pricing and move-in dates, are available on the website or via e-mail at

housing@bastyr.edu. Off campus postings for local apartments and home share opportunities are also available on the website and are updated often.

COUNSELING CENTER

The Bastyr University Counseling Center assists students with confidential personal and school-related counseling concerns. Short-term individual and couples counseling is provided by the center's director and staff counselors and is available throughout the academic year to students from all programs. A brochure describing the center's services is provided to new students at the beginning of each year. Informational brochures may also be obtained in the Counseling Center, rooms 54-62. Counseling is also available through Bastyr Center for Natural Health.

MARKETING & MEDIA

The Department of Marketing and Media works to increase the visibility of Bastyr University, coordinating all of the communications and public relations efforts for the University. The marketing office serves to recruit patients and students to the clinic and University and assists in producing all campus promotional materials and publications, including the website. The media & public relations office is the liaison between University representatives and members of the media and is responsible for handling proactive campaigns to gain publicity for the University.

TUTORING CENTER

The tutoring center organizes and sponsors tutoring sessions in which faculty-approved student tutors provide help to students in all course areas of the curriculum. Small group tutoring workshops are organized when helpful. The tutoring center also organizes the audio taping and note-taking programs through which additional study resources are made available to students. Students should make their request to the registrar's office.

CAREER CENTER

The Career Center is a resource for students during their active student years as they prepare to enter their career field and as they implement their job search activities. It is also a resource for graduates as they fulfill their career goals. During the course of students' studies, participation in self-understanding exercises helps them identify unique strengths that form the basis for excellent performance and a successful career. Preparation for job searching includes building a resume, which brings out accomplishments related to career goals, formulating letters, and learning to interact with people effectively by phone and in person so that both networking and job interviews will be successful. Job search support activities include individual coaching, videotaping, contact-development and transition support.

The Career Center also sponsors group activities such as the Health of Business, Business of Health practice success series, practitioner speakers for exploring career options, employer contact events and skill building workshops.

ALUMNI SERVICES

Bastyr is committed to supporting its graduates and to helping them stay engaged with the life of the University through a variety of programs. Communication services include an alumni e-newsletter, a website, an online public directory of alumni and professional opportunity listings on the web. Major benefits include access to group insurance rates, travel programs, and discounts with major car rental companies and hotel chains. The University also provides occasions for alumni to get together for career training, networking and social activities. Many other specific benefits are available for alumni to continue their studies at Bastyr, to use University facilities at special rates, and to be involved in the Bastyr community. For information about all

benefits including the alumni tuition benefit, visit www.Bastyr.edu/alumni.

AMERICANS WITH DISABILITIES ACT (ADA) SERVICES

Bastyr University will provide reasonable academic or other accommodations for students with known disabilities to the extent and according to the definitions provided by the Americans with Disabilities Act, Section 504. Individuals with disabilities must formally request accommodation under the ADA in order for the University to provide reasonable accommodations. Students shall make their request to the Office of the Registrar. Please see MyBU, under the Registrar's page, for more information.

INTERNATIONAL STUDENTS

The U.S. Custom and Immigration Service (USCIS) has approved Bastyr University to accept and enroll international, nonimmigrant students. Student I-20 forms are issued by the university upon admission. For more information, consult the admissions section in this catalog or contact the admissions office. The associate registrar in the registrar's office assists international students with the USCIS regulations.

HEALTH CARE SERVICES

The health center fee enables all students to visit Bastyr Center for Natural Health. (A co-pay is due at the time of each visit, as is typical with most health plans. Lab fees, dispensary items and certain medical procedures are billed separately.) Contact Bastyr Center for Natural Health for more information or to make an appointment: 206.834.4100.

The University contracts with an outside company to provide a student injury and sickness plan at a special rate for all Bastyr students and dependents. You may receive a brochure with registration and pricing information at the office of student affairs. You will enroll and do business specifically with the company, not with Bastyr. Also, Bastyr University has contracted with Firebird International Insurance group to offer a mandatory student accident and sickness plan for international students. All F-1 students must participate in this plan or provide proof of comparable coverage. Additionally, a domestic or international student participating in coursework outside of the U.S. may sign up and pay for this same coverage before travelling.

FOOD SERVICE

Bastyr University operates a cafeteria, which offers excellent, healthy meals and snacks. During the academic year, breakfast, lunch and dinner are available Monday through Friday; breakfast and lunch are served on weekends. The cafeteria is closed on weekends during the summer and quarter breaks. The bookstore on campus also provides beverages and snacks. Although the clinic has no food service, beverages and snacks are available in the dispensary.

BOOKSTORE

The Bastyr University Bookstore carries a unique selection of health-related books and supplies. All textbooks and materials needed for courses taught at the University are on hand, including books used in continuing education. In addition, the store stocks a wide selection of hard-to-find books on natural health. Topics found in the bookstore include acupuncture, cooking, herbal medicine, homeopathy, nutrition, Oriental medicine, psychology, physical medicine, spirituality, and books on specific diseases — all selected to emphasize Bastyr's focus on natural healing. Medical supplies can also be found in the bookstore, including acupuncture equipment, herbal tinctures, homeopathic formulas, as well as traditional medical equipment such as diagnostic sets and stethoscopes. Unique gifts and Bastyr apparel are also on display and for sale. Special orders for students, staff and faculty are always welcome.

The bookstore is the between-classes stop for quick snacks and drinks. Natural and organic treats to meet a variety of needs including gluten-free and dairy-free diets are always on sale.

Online services can be found at www.Bastyr.edu/bookstore. Reference books specific to natural health can be ordered; check out the naturopathic reference sections for books that cannot be found at any other site. Bastyr logo items including sweatshirts, T-shirts, hats, Frisbees, bumper stickers, water bottles and more are on sale and ready to be shipped nationwide.

Financial Policies

2010-2011 TUITION¹

Doctoral, Professional, Graduate, BS/MS Midwifery, BSOM/MSA/MSAOM Tuition

Students taking fewer than

12 credits.....	\$528 per credit
Students taking 12–16 credits.....	\$6,325 per quarter
Students taking more than 16 credits	\$6,325 + \$282 per credit for each credit over 16
Naturopathic Midwifery Program: Practicum (birth experiences) ²	\$157/birth (\$314/credit)
Dietetic Internship	\$615 per credit
Part-time certificate programs with fewer than 12 credits per quarter	\$450 per credit

Undergraduate Tuition

Students taking fewer than 12 credits	\$528 per credit
Students taking 12–16 credits.....	\$6,325 per quarter
Students taking more than 16 credits	\$6,325 + \$335 per credit for each credit over 16

For all students

Audit	\$230/credit
Audit for courses outside the region	\$305/credit

¹Due to the unique nature of summer quarter, summer rates vary from those listed above. Rates for summer quarter, 2011, have been tentatively set at \$445 per credit for credits up through 16, and \$282 for each credit over 16 for graduate/professional students and \$335 for each credit over 16 for undergraduate students.

²The Naturopathic Midwifery program is no longer enrolling new students.

Tuition is increased annually to adjust for program growth and inflation. Tuition is payable on or before the first day of classes each quarter. A signed promissory note is required if for any reason a payment cannot be made by the due date. A deferment fee is assessed for late tuition payments unless a waiver is obtained from the financial aid office. Interest is charged on outstanding balances unless waived by the financial aid office. If the amount of financial aid pending does not cover the full tuition balance, the total not covered by financial aid is due on the first day of the quarter.

If an account is sent to a collection agency, all collection agency fees, reasonable attorney fees and court costs (if legal action becomes necessary) will be imposed on the student's tuition balance.

2010-2011 FEES

Application Fees:

Undergraduate.....	\$60
Graduate and Professional	\$75
Holding Fees/Deposit: (credited toward tuition)	
Degree Programs	\$200
Certificate, Non-matriculated, Post-baccalaureate.....	\$100
Advanced Standing Evaluation Fee	\$75
Student Activity Fee	\$25/qtr
Late Registration Fee.....	\$25
Undergraduate Program Fee.....	\$150/qtr
MSN Program Fee.....	\$150/qtr
Add/Drop Fee (after completion of free add/drop).....	\$10
Clinic Shift Change/Drop Fee	\$10, \$25, \$50, \$100 ¹
Nonrefundable Course Deposit ²	Varies
Interest.....	1.0% per month

Deferment Fee	\$50
Health Center Fee	\$40 ³
International Student Accident/Sickness Plan ⁴	\$259/qr
Challenge Exam Fee.....	.50% of tuition
Competency Exam Fee.....	\$50
New Student Matriculation Fee ⁵	\$375
Locker Fee	\$15 or \$20/year
Official Transcripts (7-10 business days).....	\$5
Official Transcripts (1-2 business days).....	\$10
Graduation Fee (participation)	\$200/\$225 (after deadline)
Graduation Fee (non-participation).....	\$125
Certificate Fee.....	\$75
Diploma Replacement/Second Diploma Fee	\$50
NSF Check Fee.....	\$28
Stop Payment on Student Refund	\$20
Parking.....	\$40/qr (summer free)
Parking Citations-Vary according to infraction	\$10 - \$100

There may be additional fees.

¹Fee varies depending on date and shift type. Please see clinic registration staff for details.

²Nonrefundable course deposits are required when confirmed enrollment is essential prior to the start of a given quarter. Amount varies depending on the course.

³A co-pay is due at the time of each visit. Lab fees, dispensary items and certain medical procedures are billed separately.

⁴A plan may also be purchased for international student dependents.

⁵The new student matriculation fee includes costs for orientation, University publications, plus student ID cards, unofficial transcripts, and copies of official transcripts sent to licensing boards. Once orientation begins, this fee is nonrefundable.

PARKING AND TRANSPORTATION

All campus students and employees, including adjunct faculty, are required to register their transportation choices, whether driving a car or not. This must be done either online or by paper form within two weeks of the start of fall quarter (or whichever quarter is first attended by a student). This information allows us to monitor our usage, to track our carbon footprint, to offer resources and to leverage services for us through Metro Transit Agency and other entities.

Campus parking fees for fall, winter and spring quarters are \$40/quarter for those who are parking on campus three or more days per week. Parking two days or less per week costs \$20 per quarter. Carpooling two or more times per week is also \$20 per quarter. Parking one day or less per week is free. There is no fee in summer.

These fees help defray the large expenses of building and maintaining our parking stalls. Automatic inclusion of parking fees with tuition or by payroll deduction is strongly preferred, but payment by cash or check is accepted if auto deduction is not possible.

Citations range from \$10 to \$100 depending on the seriousness of the infraction. We do this to ensure that parking spaces are equally available for all. Citations are generally given to those who have not registered their transportation information, those who do not have the current Bastyr identification on their cars and those who are incorrectly parked. Parking fines are due within two weeks. After two weeks, the fine is automatically charged to the student's account.

For more information on transportation and parking issues, please see the Transportation web page on MyBU, which is within the Facilities section.

OTHER COSTS

Books and supplies cost approximately \$700-\$2,500/year, depending upon the program of study. Naturopathic medicine students are required to purchase diagnostic equipment at the beginning of NM6221 Physical/Clinical Diagnosis 1 at an estimated cost of \$1,000-\$3,000.

REFUNDS

Dropping all classes by or before the end of the first week of classes entitles a student to a 100 percent tuition refund. An add/drop fee is charged after the free add/drop period has ended. Any clinic drops are accompanied

by financial penalties. (See clinic registration staff in the registrar's office for more information.) Refund calculations for drops or withdrawals from classes after the first week of the quarter are found on the inside back cover of the catalog. For those students receiving federal financial aid, the federal calculation for the return of Title IV funds is required, and refunds will be returned on behalf of the student to the federal government. Amounts are determined by federal regulations.

Students with financial problems that will affect the payment of tuition and/or fees should contact the finance office at once to make satisfactory arrangements.

The deadline for contesting a charge on a student account is 90 days from the close of the quarter in which the charge is applied or 90 days from the actual posting, whichever is later.

Financial policies, like all policies of the University, are subject to change and revision by the management and/or Board of Trustees of the University. Notice of changes is published in MyBU.

Facilities

CAMPUS

Bastyr University's primary academic and administrative facilities are located in Kenmore, Washington. The 51-acre site adjoins Saint Edward State Park (with hiking trails leading down to the northern shore of Lake Washington) and includes a 186,000 square-foot building, playfields and forested areas. The building includes classrooms, research and teaching laboratories, exam rooms, an auditorium, a chapel, meeting rooms, faculty and administrative offices, the library, a bookstore and a cafeteria. Visitors are encouraged to enjoy the spacious grounds, tour the herb garden and visit neighboring St. Edward State Park.

A new student housing village opened in June 2010. This LEED-certified housing complex enables up to 132 students to reduce their carbon footprint by living on campus. Please see the Office of Student Affairs for more information or e-mail housing@bastyr.edu with questions.

BASTYR CENTER FOR NATURAL HEALTH THE TEACHING CLINIC OF BASTYR UNIVERSITY

Bastyr Center for Natural Health is the largest natural health clinic in the Northwest. As the teaching clinic of Bastyr University, Bastyr Center provides patient clinical services and student training in a professional clinical setting that emphasizes a holistic approach to care. Bastyr Center serves the health care needs of a diverse patient population, which includes young people, growing families and senior citizens from throughout the Puget Sound area. Bastyr Center for Natural Health provides care for approximately 35,000 patient visits yearly.

Services at Bastyr Center include naturopathic medicine, acupuncture, Chinese herbal medicine, nutrition counseling, homeopathy, mental health counseling and physical medicine. In an effort to meet the health care needs of our patients and to enhance the educational experience for our students, Bastyr Center provides specialized shifts throughout the year. These shifts are scheduled as needed and are subject to change. Current specialized shifts include an immune wellness program for people living with HIV/AIDS, diabetes and cardiovascular care, minor office procedures, ADHD, integrated pain management, biofeedback, and environmental medicine.

In winter quarter of 2006, Bastyr Center moved to a newly renovated building in the Fremont/Wallingford neighborhood, designed to provide an even more effective environment for promoting health and healing for patients, staff and students. The expanded Bastyr Center also features a Chinese herbal medicine dispensary and a larger natural medicine dispensary, offering a wide selection of natural health products and gifts. Bastyr Center recently became the first natural health clinic in the region to receive LEED-CI Certification from the U.S. Green Building Council for compliance with high environmental standards. LEED-CI is the recognized standard for certifying high-performance green interiors that are healthy and productive places to work, less costly to operate and maintain, and have a reduced environmental footprint.

Bastyr Center is located at 3670 Stone Way North. Parking is available onsite for patients and on the street for students, faculty and staff. For more information, please visit our website at www.BastyrCenter.org.

Bastyr University maintains numerous external clinical learning sites, creating tremendous diversity in students' clinical experiences. At each site, Bastyr faculty supervise the student clinicians. Sites are added continually; below is a list of active sites (at the time of publication of this catalog), the students participating and the populations served:

- Bastyr campus - naturopathic, acupuncture and nutrition students; general patient care/physical medicine.
- Carolyn Downs Clinic - naturopathic students; chronic disease and multi-ethnic/low income.
- Cascade Natural Medicine - naturopathic students; pediatrics.
- Consejo - naturopathic students; multi-ethnic/low income.
- Country Doctor Community Clinic - naturopathic students; multi-ethnic/sexual orientation, low income.
- Chronic Fatigue Clinic at Harborview Medical Center - acupuncture students; chronic fatigue/fibromyalgia.
- 45th St. Community Clinic - naturopathic students; homeless youth.
- Shoreline/Lake Forest Park Senior Center - naturopathic students; senior citizens.
- Ballard NW Senior Activity Center - naturopathic students; senior citizens.
- West Seattle Teen Health Center - naturopathic students; teens and staff at West Seattle High School.
- International Clinic at Harborview Medical Center - acupuncture students; U.S. immigrants.
- Madison Clinic at Harborview Medical Center - acupuncture students; HIV/AIDS.
- Mary's Place - naturopathic students; homeopathy, homeless and formerly homeless women and children.
- Providence Regional Medical Center Everett - acupuncture students; cancer treatment and pain management.
- Providence Marianwood - naturopathic students; senior citizens.
- Providence Mt. St. Vincent - acupuncture students; elderly and general community patients.
- Rainier Park Medical Clinic - acupuncture and naturopathic students; multi-ethnic/low income.
- Skagit Valley Hospital - doctoral acupuncture students; oncology patients.
- Snohomish Valley Senior Center - naturopathic students; senior citizens.
- YWCA - naturopathic students; homeless women.

Academic Policies and Procedures

This section on academic policies is intended to provide students with a working definition of some of the more important policies pertaining to their academic life at Bastyr University, inform students of their academic rights and responsibilities and outline administrative procedures. The detailed policies and procedures that apply to undergraduates are described in the catalog under Bastyr Undergraduate Programs. The *Academic Policy and Procedure Manual*, the *Student Policies and Procedures* section of MyBU and the *Student Clinician Handbook* also provide information concerning other academic policies and procedures.

ACADEMIC STATUS

The University uses the following terms to denote academic status:

Good Standing

Academic Warning

Probation

Final Probation

Suspension

Dismissal

A student whose status is anything other than Good Standing may be required to sign a learning contract and/or may be held to other sanctions. Students under Academic Warning, Probation or Final Probation must complete at least two successive quarters with no academic difficulty in order to petition for a change of status. A change of status is the decision of the each school's Academic Progress Committee (or the dean or dean's designee). Depending on the nature of the academic deficiency, the categories above are not necessarily followed sequentially.

ACADEMIC SUSPENSION POLICY

Academic suspension is used when the dean of the school believes the student will benefit from a period of time away from his/her program track, and when the student has sufficient opportunity to be successful upon his/her return from suspension. The terms of a suspension are unique to each student and will be decided by the dean. A suspension will last at least one quarter, and a student may be required to receive remedial academic assistance before being readmitted. Suspended students must petition the dean for reinstatement; they may be required to meet with the dean and must show that all terms of the suspension have been met before receiving approval to return to the University. If a student is unable to demonstrate that he/she has adequately resolved the issues that led to the suspension, the student may be eligible for dismissal.

Removal from a course or clinic shift may be warranted in the case of a student's failure to adhere to instructions/procedures/professional expectations that may lead to the compromised safety of a patient, student, staff or faculty member. Removal from a course or clinic shift constitutes a failure of the class or shift and is not eligible for remediation; however, the student has a right to appeal the final grade received.

RECOMMENDATIONS FOR DISMISSALS

Recommendations for dismissals from the University usually occur in the case of the following:

1. Failure to satisfactorily adhere to the terms of a learning contract
2. Failure of the same class twice
3. Failure of two clinic shifts
4. Three failures in the same quarter
5. A history of poor academic performance relevant to the appropriate department
6. Removal from a course/clinic shift in the case of student failure to adhere to instructions/procedures that may lead to the compromised safety of a patient or class partner

DISMISSAL POLICY

Each school of Bastyr University has a Student Promotions Committee that follows the individual school dismissal policy. Recommendations for dismissal are submitted to the provost for consideration. The provost will make the final decision on student dismissals.

APPEAL OF ACADEMIC SUSPENSION OR DISMISSAL

Appeal of a suspension or dismissal is made to the provost and can only be made in the event of factual error. The written appeal must be made to the provost within five working days of the date on the suspension or dismissal letter. The appeal must specify and include the alleged documented inaccuracy and the relevance of that fact(s).

The provost will respond within 10 working days to the appeal of academic suspension or dismissal and can only consider an appeal based on an error of fact. The decision of the provost is final and cannot be appealed.

LIMITS ON STUDENT CREDIT LOADS

Bastyr University degree programs are described under each school or department listing in the *Bastyr University Catalog*. The recommended didactic program for each year and track of the degree programs is specified. Elective courses and clinic credits are expected over and above the required didactic courses.

The *Student Policies and Procedures* section of MyBU specifies the requirements for full-time, half-time and less-than-half-time enrollment status for each program. Capable students may choose to exceed the full-time recommended enrollment in order to include important electives or special interests in their programs. However, the following are the maximum credit loads for which students may register in each program in any given quarter:

Bachelor of Science	20 credits
Master of Science in Nutrition (all tracks)	24 credits
Master of Science in Acupuncture	25 credits
Master of Science in Acupuncture and Oriental Medicine.....	25 credits
Doctor of Acupuncture and Oriental Medicine	30 credits
Doctor of Naturopathic Medicine	30 credits

Students who are seeking degrees in multiple programs must plan their registrations carefully so that they do not exceed the stated limits. Students in dual programs may use the credit limit of either program.

In extraordinary cases, very capable students may be allowed to exceed the maximum for their programs upon approval by their department chairs. Department chairs indicate their approval by signing the students' registration or add/drop forms and noting the credit load being approved. Any approved increase may not exceed 10 percent of the above totals.

ATTENDANCE POLICY

Course and Lab Attendance Policy

Bastyr University does not have a universal course and lab attendance policy. However, faculty members may establish attendance requirements in their course(s) or lab(s). Some state licensing boards and the Veteran's Administration require 90 percent attendance. Students receiving financial assistance from the Veteran's Administration or students who need to meet state licensing board requirements are responsible for notifying the faculty of their need to document attendance.

When a student has an excused absence, the faculty member may require that the student complete an assignment to make up for the time missed. An absence is considered excused if a student has a legitimate personal emergency, a serious illness or a documented birth (midwifery students), as long as the student calls the faculty member(s) or leaves a message for the faculty member(s) with the faculty services department informing them of the situation in advance (24-hour voicemail is available). Faculty may require documentation upon return from the excused absence. It is the student's responsibility to meet with the faculty member to discuss the absence and make up work upon return. Missing more than the stated attendance requirements for the class may affect the student's final grade, and a student may be required to take the course again. In addition to possible consequences for absences, habitual tardiness may be taken into account by faculty as part of the course grade and/or may be reported to the dean of students for disciplinary action under the Student Conduct Code.

Students cannot register for two courses or labs that are scheduled at overlapping times. Credit can only be applied to a single course at any one time. Students cannot attend a course without being registered for it and must attend the section of a course or lab for which they are registered. Failure to follow this policy may result in loss of course credit or a course grade of no show (NS).

Clinic Attendance Policy

All student clinicians are required to attend at least 80 percent of each assigned quarter shift in order to receive a grade of achieved competency (AC) for each shift. Holidays and emergency closures of the clinic do not figure into the total quarter attendance. A student who does not attend at least 80 percent of the shift (two excused absences) will receive a failure grade for that shift and lose all patient contacts and hours. The entire shift would need to be taken again. Exceptional circumstances resulting in a third absence may be approved at the discretion of the supervisor. Four or more absences will result in an automatic failure for that shift. Please note that 100 percent of the required clinical hours must be completed before recommendation for graduation. Please refer to the *Student Clinician Handbook* for details.

Religious or Spiritual Holidays

The University's policy is to attempt to accommodate the observance of religious practices. Religious absences will not count against any attendance requirement, but students are responsible for the information and material

covered. Students observing such holidays are required to notify faculty during the first week of classes as well as find substitutes for clinic shifts affected. Students should follow the reschedule exam procedures in the event an exam falls on a religious holiday. A rescheduled exam fee may be assessed. Bastyr University schedules clinical training and occasional required courses or intensives on weekends. A student with religious restrictions against attending classes on weekends needs to contact his/her program chair, in advance, when such a conflict occurs. Efforts will be made to resolve such conflicts, but a resolution cannot be guaranteed.

Convention, Conference, Seminar and Workshop Attendance Policy

Occasionally, there may be professional conventions or conferences offered during the academic year that programs encourage their students to attend. Students who wish to attend must receive permission from their instructor(s) in advance if there is an attendance requirement, exam or project due during that time. Students are responsible for the information and material missed. Students who receive permission must arrange with faculty to take missed quizzes and exams immediately upon return. Students must comply with the clinic absence policies. Please refer to the *Student Clinician Handbook* for details.

UNIVERSITY CLOSURE

In the event of unplanned school closures for weather or community emergencies, students are required to make up missed course requirements or clinic contact hours. Should the duration of the closure be too long or too late to make up missed requirements/hours in the time allotted, the university reserves the right to extend the quarter and/or year to allow for additional make up time. Please see the inclement weather policy/procedure on MyBU for more information regarding university closure.

CRIMINAL BACKGROUND CHECKS

Bastyr University requires national background checks for all students enrolling in clinical training courses. It is critical that background checks be completed prior to any student contact with patients at Bastyr Center for Natural Health, an affiliate clinic or a practicum or preceptor site.

Students will also be required to immediately notify the dean or department chair of their program and their clinical training program supervisors if charged with and/or convicted of a felony after the background check has been conducted. Students should also note that Bastyr University requires that all felonies be disclosed at time of application for admission. Failure to comply with these disclosure requirements may result in immediate dismissal from the University. See *Academic Policy and Procedure Manual* policy #10C-51 on “Background Checks” for more information.

POLICY ON TB TESTING AND HEPATITIS B IMMUNIZATIONS

These policies were enacted to protect the health and safety of employees and students who may be exposed to certain biohazards in the campus and clinic working environments.

Tuberculosis Screening

All faculty, staff and students who work or take shifts at Bastyr Center for Natural Health are required to be screened annually for tuberculosis (TB), and are responsible to provide documentation of their test results. Screening results can be submitted directly to the Facilities and Safety Office on campus, room 225, or to the TB Results box, outside the Medical Records service window at the clinic.

Students pay \$10 toward the cost of their PPD TB skin test at Bastyr Center. As an option, QFG blood testing is also available at the clinic at an approximate cost of \$110. If a chest x-ray is necessary, Bastyr University agrees to pay \$37.50 toward this cost. This is 50 percent of the cost for x-ray at Bastyr’s preferred radiology service.

Questions regarding TB screening or requests for forms can be addressed to the campus Facilities and Safety Office or to the Safety Coordinator at the clinic.

Hepatitis B Immunizations

All ND, AOM and clinical nutrition students, AOM and ND faculty and staff at Bastyr Center, and faculty or laboratory and operations assistants who are category I (those who have daily exposure to blood or body fluids) and category II (those who have occasional exposure to blood or body fluids) are required to either take the hepatitis B immunization series, provide documentation that they have had such immunizations in the past 10 years, or sign a waiver refusing the immunizations along with a release of liability form.

Bastyr University agrees to pay 50 percent of the cost of the hepatitis B immunization series for students..

Note: All students are required to pay in full for the cost of testing antibody levels for any of the agents listed above, if they choose to check for individual immunity, prior to waiving or taking any immunizations.

Commencement of the immunization series (or submission of a waiver) and TB screening shall occur before the first day of work for all faculty and staff, and before ND, AOM and clinical nutrition students begin their clinic shifts. Hepatitis immunization forms/waivers are distributed to students in one of their required clinical courses. Hepatitis immunization questions can be directed to the Blood Borne Pathogen Safety Officer.

Anyone who has elected to waive the immunization series has the option to change that election, at any time, and take the immunization series.

DEGREE AND CERTIFICATE REQUIREMENTS

To earn a degree at Bastyr University, a degree candidate must have completed the prescribed curriculum (refer to the specific academic program section), earned passing grades in all required courses and clinic shifts, satisfied the requirement for total degree or certificate credits and been recommended for graduation by the faculty. To be eligible to graduate, a master's degree or graduate-level certificate candidate must have a minimum GPA of 3.0; a bachelor's degree candidate must have a minimum GPA of 2.0. Students in the articulated bachelor's/master's AOM degree program must follow the degree requirements of that school.

A student is held to degree requirements in effect at the time of initial matriculation unless legal or accreditation standards mandate a change to an existing degree or certificate program. Those degree and certificate requirements are published in the edition of the *Bastyr University Catalog* that is in effect at the time of first matriculation. In rare circumstances, a course may be deleted from the required curriculum and/or curriculum substitutions may be made at the discretion of the school or the University.

A student who is readmitted after an absence of more than one calendar year may be held to the requirements in effect at the time of his/her return or may elect to graduate under degree or certificate requirements specified in a subsequent *Bastyr University Catalog* with written permission of the program dean/chair. Under no circumstances are the requirements from an earlier catalog applied.

Students in the ND and MSAOM programs must complete their degrees within six years. Students in the MSA and MS nutrition programs must complete their degrees within five years. There is no time limit on the completion of undergraduate programs, although additional coursework may be required to ensure currency of knowledge.

Students in all degree and certificate programs must have discharged satisfactorily all financial obligations to the University (tuition, fees, library fines, and all charges), including the graduation fee, for each program in which a degree or certificate is to be awarded. For students who have not met their financial obligations at the time of graduation, the earned degrees and certificates are posted to their records, but diplomas and official transcripts are held until the financial obligations are cleared.

DEADLINES FOR THE AWARDING OF DEGREES

The awarding and posting of degrees at Bastyr University are governed by the deadlines. These deadlines affect the actual awarding of degrees. Student participation in commencement ceremonies is governed by a separate policy. The dates for final examinations week each quarter and for commencement ceremonies are published in the *Bastyr University Catalog* and the registrar's quarterly calendar.

For all bachelor's degrees, master's degrees, and professional doctoral degrees awarded by Bastyr University:

- All coursework must be completed by the last day of the quarter for graduating students.
- Any IP, I or PC grades in coursework or clinic shifts must be replaced with passing grades no later than the last day of the quarter.
- If a student has any outstanding course or grade requirements on the last day of the quarter, his/her degree will be posted at the close of the subsequent quarter.

GRADING POLICY

Grades are assigned based on the grading system of the department/program offering the course, rather than by the academic program in which the enrolled student is matriculated. Core courses required for an academic program will be graded according to the normal grading policy for that program.

Naturopathic Medicine/Naturopathic Midwifery/Dietetic Internship

Bastyr University provides a competency-based learning format in the classroom for students in the naturopathic medicine and naturopathic midwifery programs, clinic courses and the dietetic internship program. A competency-based evaluation of student work and performance is structured on the premise of demonstrating competence of a well-defined set of information and/or skills.

With a competency system of grading, a student is aware of the learning objectives and core competencies for each course and clinic shift, knows how knowledge and understanding of these objectives and competencies is measured, and has the opportunity to demonstrate mastery by means of quizzes, exams, papers and/or practical application. The competencies established for each course reflect the goals and objectives of the appropriate program of study. Program and department chairs in the professional programs, in consultation with the faculty, determine the requirements and standards that students must meet in order to earn a grade of Achieved Competency, Partial Competency or Failure.

Naturopathic Medicine Degree Program, Dietetic Internship and Clinical Shifts

AC - Achieved Competency

PC - Partial Competency

F - Failure

I - Incomplete - Personal emergency or serious illness

W - Withdrawn -Withdrawal form must be completed, signed and filed in the registrar's office at least three weeks before the end of a given quarter. The W grade is transcribed for all course withdrawals after the first week of the quarter (with the exception of courses that have not yet met).

AW - Administrative Withdrawal

IP - In Progress - for clinic shifts, preceptorship, clinic entry, theses, didactic courses and internships

N - No Grade

CE - Challenge Examination

NS - No Show

AU - Audit

WV - Waived

ACHIEVED COMPETENCY (AC): A grade of AC indicates the student has gained the defined knowledge, information, skills and core competencies and has met the learning objectives as defined in the syllabi. Students must attain a level of achieved competency (AC) in all courses, clinic shifts, and internships. AC grades are not factored into the GPA.

PARTIAL COMPETENCY (PC): A grade of PC indicates that an aspect of the learning objectives or core competencies has not been achieved and there is need for further study to earn the required AC. Faculty determine the date by which a PC grade must be converted; however, PC grades must be converted no later than

the end of the break of the subsequent quarter in which the grade was received. Students may be required to complete a PC contract with the faculty member. Upon conversion of the grade, the instructor must submit a grade change form to the registrar's office. Grades of PC that have not been converted to AC grades by the deadline revert to F grades. The course, lab, clinic shift or internship must then be repeated. PC grades do not translate into partial credit on transcripts and are not factored into the GPA.

FAILURE (F): A grade of F indicates failure to meet the minimum level of competency for learning objectives or core competencies. A student who receives a failure in a required course, lab, clinic shift or internship must repeat that course, lab, clinic shift or internship.

INCOMPLETE (I): A student who is doing satisfactory work in a course but cannot complete the work because of a serious illness or personal emergency may receive an Incomplete grade by filing a request for incomplete grade form with the registrar. Faculty determine the date by which an I grade must be converted; however, I grades must be converted no later than the end of the break subsequent to the quarter in which the grade was received. Students may be required to complete an I contract with the faculty member. Upon conversion of the grade, the instructor must submit a grade change form to the registrar's office.

ADMINISTRATIVE WITHDRAWAL (AW): A student who is suffering from a serious illness or experiencing a personal emergency and is unable to withdraw from term-based classes within the appropriate time frame may be awarded an AW grade by the registrar. The AW grade is awarded for all incomplete courses in a given quarter. (See Administrative Withdrawal in the *Academic Policy and Procedure Manual* for more information.)

IN PROGRESS (IP): IP grades are indicated for didactic courses, clinic shifts, preceptorships, community practicum, clinic preparation, theses, internships, and clinic entry courses in which work may extend beyond the end of a quarter. If not converted to a passing grade, IPs may be converted to an F.

NO GRADE (N): N grades are assigned to indicate that a student is awarded no credit for a course but did not fail that course. N grades are administrative grades and are assigned only by the registrar. N grades are not refundable.

CHALLENGE EXAMINATION (CE): Please see Challenge Examinations in the *Academic Policy and Procedure Manual* for more information.

NO SHOW (NS): NS grades are assigned to indicate that a student did not attend class. NS grades are not refundable, and no credit is given.

AUDIT (AU): Students generally audit a course for their personal enrichment. No credit is given, and no academic grade granted. Courses taken for audit cannot serve as a prerequisite for a subsequent course.

WAIVED (WV): Courses are generally waived if a student has demonstrated competency in a particular subject matter but does not have the appropriate level of coursework from an accredited institution to allow a transfer of credit. There is no credit attached to a waived course, and a student is required to make up the corresponding credits waived with additional elective credits.

Undergraduate Degree Programs

For the undergraduate degree programs (except Oriental medicine) a student must maintain a 2.0 cumulative GPA in order to remain in good standing. Undergraduate students in the School of Acupuncture and Oriental Medicine must maintain a 2.5 GPA in their first year and a 3.0 GPA in their second year. Any required course in which a student receives a failing grade (of F) must be repeated.

The letter grading system for acupuncture and Oriental medicine*, integrated human biology, nutrition, exercise science, herbal sciences and health psychology undergraduate programs is as follows:

- A - 95 percent-100 percent or 4.0
- A- - 90 percent-94.9 percent or 3.7
- B+ - 87 percent-89.9 percent or 3.3
- B - 83 percent-86.9 percent or 3.0
- B- - 80 percent-82.9 percent or 2.7

- C+ - 77 percent-79.9 percent or 2.3
- C - 73 percent-76.9 percent or 2.0
- C-* - 70 percent-72.9 percent or 1.7
- D+*- 67 percent-69.9 percent or 1.3
- D* - 63 percent-66.9 percent or 1.0
- D-* - 60 percent-62.9 percent or 0.7
- F - Below 60 percent or 0.0

AC - Achieved Competency - for clinic shifts, preceptorship, community practicum, outreach and practical courses

PC - Partial Competency - for clinic shifts, preceptorship, community practicum, outreach, and practical courses

I - Incomplete - personal emergency or serious illness

W - Withdrawn -Withdrawal form must be completed, signed and filed in the registrar's office at least three weeks before the end of a given quarter. The W grade is transcribed for all course withdrawals after the first week of the quarter (with the exception of courses that have not yet met).

AW - Administrative Withdrawal

IP - In Progress - for didactic courses, clinic shifts, preceptorship, community practicum, outreach, clinic preparation, clinic entry, senior year projects and practical courses

N - No Grade

CE - Challenge Examination

NS - No Show

AU - Audit

WV - Waived

For explanation of grading terms, see professional degree programs.

*It should be noted that while a C-, D+, D and D- grades are passing, some courses require a C grade for professional standards.

Graduate Degree Programs: (DAOM, MSA, MSAOM, MS Midwifery, MSN, MSN/CHP, MSN/DPD)

The grading system used for graduate degree programs is identical to the undergraduate system, as shown above, except for the following: There is no grade of D+, D or D- for a graduate student, and the IP grade applies also to ongoing work on a thesis. For an explanation of grading terms, see the listing under the professional degree programs.

For the graduate degree programs, a student must maintain a cumulative GPA of 3.0 or better. Any required course in which a student receives a grade of F must be repeated.

Grade Change Policy

The grades of PC, IP and I are considered temporary grades and designed to be changed (see Grading Policy in the *Academic Policy and Procedure Manual*). The grades of AC, A, A-, B+, B, B-, C+, C, C-, D+, D, D- and F are considered permanent grades and can only be changed if a faculty error was made at the time of issuance.

The faculty member must submit documentation demonstrating the error to the registrar. Students are not allowed to submit additional work after the quarter has ended with the intent to raise an A- through F grade. The option of "extra credit" work must be written into the syllabus and collected prior to quarter's end.

F or PC in Sequential Courses

If a student has an F, or a PC that converts to an F, in a sequence course, the student will not be allowed to continue in the next sequential course. If a PC grade is not remediated by 5 p.m. on the Friday at the end of the second week of the quarter, the student will be withdrawn from the course.

INDEPENDENT STUDY POLICY

Independent study allows individual students to study areas of interest not included in the regular curriculum with the aid of an instructor or a selected resource person. Registration forms for independent study are available from the Office of the Registrar. The deadlines for registration, payment and grading of independent

study courses are the same as those for regularly scheduled courses. Required courses may not be taken by independent study. Students may take an independent study course only if they are in good academic standing.

ND students may request to do an independent study after they have completed at least 50 credits of their degree program. Acupuncture and Oriental medicine and nutrition students must have completed at least 30 credits of their degree program. Integrated human biology students must have completed at least 60 credits of their degree program. Psychology students must have completed at least 45 credits of their degree program. Students may apply a maximum of five (5) credits by independent study toward the completion of their degree program. Students pursuing two majors as an undergraduate may apply a maximum of ten (10) credits by independent study, five (5) toward each program.

Naturopathic midwifery students are required to complete two (2) credits of independent study as a part of their program. Each independent study credit should represent approximately 33 hours of work/activity.

TRANSFER, WAIVER AND SUBSTITUTION POLICY

Requests for transfer or waiver of credit must be submitted and reviewed within 12 months of a student's matriculation date or before the quarter in which the student is required to complete the course, whichever comes first. Courses taken prior to entry at Bastyr can only be transferred to Bastyr during a student's first year of attendance. After the first year, previous courses taken can only be considered for waiver of required Bastyr courses, and elective credits must be taken to make up the waived credit. If this timeline is not followed and a course is waived/transferred after the start of the quarter in which a student is registered for that course, the standard course refund policy will apply. The courses under consideration for waiver or transfer should generally be no older than seven years. Waivers and transfer credit will not be awarded for courses submitted for transfer after the quarter in which the student is expected to take the course at Bastyr University.

If an enrolled student wishes to complete a program requirement at another institution with the intent to transfer or waive the course at Bastyr, the student must request approval *in advance* by submitting a petition to waive, substitute or transfer credits along with the course description from the other institution. Courses submitted for transfer that have not received prior approval are not guaranteed transferability.

TRANSFER

Transfer credit recognizes coursework from another accredited institution as satisfying a Bastyr required course. Transfer credit grants credit for the Bastyr course and eliminates the need for the student to take that course. A petition to transfer may be requested by students who, at another accredited institution of higher education, have satisfactorily completed coursework that is the same in terms of content, level and credit as a specific Bastyr course, and meets or exceeds the academic objectives and competencies of a required course in Bastyr's programs. Transfer credit will generally not be granted for classes that are part of another earned degree or for classes that are taught at a different academic level. For courses taken prior to matriculation into Bastyr, transfer credit can only be granted within the first year of attendance.

Transfer credit may be granted from institutions accredited by regional accrediting agencies that are recognized by the American Council on Education Commission on Recognition of Postsecondary Accreditation and from institutions that are professionally accredited by the CNME, ACAOM and MEAC. Students who apply to Bastyr with credit from institutions outside the U.S. are required to have international transcripts assessed by an evaluation service recognized by Bastyr. Credits from schools outside the U.S. are evaluated according to nationally established norms.

WAIVER

A waiver does not grant credit; it only eliminates the necessity for taking the required course. Students are required to complete the equivalent number of credits approved via the waiver with elective credits. A petition to waive may be requested when formal training, coursework or experience has been earned at an

accredited or unaccredited institution. A student must provide documentation showing that the competencies of the Bastyr University course have been met.

In some cases a competency or challenge exam may be required before the waiver will be granted.

The waiver decision rests with the chair of the department responsible for teaching the curriculum. Appeals may be made to the dean of the school in which the student is enrolled, whose decision is final.

SUBSTITUTION

In some cases, students may request to substitute one Bastyr University course for another Bastyr course if the courses are the same in terms of content, level and credit and meet or exceed the academic objectives and competencies of the required course. Substitution both grants credits and eliminates the necessity for taking the required course.

For additional information regarding transfer, waiver or substitution of credit, please contact the advising/evaluations unit in the registrar's office.

DIVERSITY AWARENESS IN ACADEMICS

The faculty of Bastyr University is dedicated to the welfare of its students and patients as well as to promoting equal opportunity and access in education and health care. The faculty pledges its commitment to recognizing and responding to multicultural and minority health care perspectives in all academic programs, clinical training and patient services, including curriculum development, course content, and supervision. Specifically, wherever appropriate and feasible, the faculty considers and implements health care information and therapeutics pertaining to differences in age, race, color, religion, national origin, sex, sexual orientation, gender identification or expression, socioeconomic level, disability and physical/mental challenge.

WHERE TO FIND OTHER ACADEMIC POLICIES AND PROCEDURES

The complete *Academic Policy and Procedure Manual* is located on MyBU. Student clinicians are also held to the policies found in the *Student Clinician Handbook*.

Faculty

Bastyr University's location in the greater Seattle area has been a tremendous asset in developing a highly diverse, thoroughly qualified faculty. The greater Puget Sound area has dozens of higher education institutions, including at least five universities, many colleges and community colleges, medical and dental schools, and residency programs. Drawing full and part-time faculty from this rich educational environment, Bastyr University has brought creative teachers in a variety of disciplines together with a committed group of naturopathic doctors, nutritionists, acupuncturists, psychologists and midwives as active participants in the students' educational experience.

The University's employment standards for faculty recruitment give priority to individuals with both teaching experience and doctoral degrees in the areas they teach.

Teaching is the primary obligation of the Bastyr faculty. Faculty members are strongly encouraged to continuously upgrade their skills and knowledge through active participation in continuing education and faculty development activities. Teaching effectiveness is evaluated regularly, primarily through student course assessments, peer evaluation, portfolio development and supervisor-evaluation procedures. Faculty members participate on University-wide committees and meet regularly as a faculty assembly to discuss issues of mutual importance.

Listings of 2010-2011 faculty are located throughout this catalog, within each school section.

Continuing Education

Bastyr University's Department of Certificate, Community and Continuing Education (CCCE) offers a variety of training opportunities for health care professionals, as well as fun and interesting health-centered workshops for the general public. Many of the offerings provide continuing education units (CEUs) for acupuncturists, naturopathic physicians, nurses, massage therapists, counselors and a variety of other health care professionals. Courses include live seminars and home study (distance education) options.

For seminar descriptions or to register, please call CCCE at 425.602.3152 or go to www.Bastyr.edu/continuinged.

Bastyr University Research Institute

The activities of the Bastyr University Research Institute are devoted to the evaluation of natural medicine practices; the exploration, development and evaluation of new treatments for serious chronic diseases; the continued development of faculty research skills; and the training of students in research methods. The burgeoning interest in natural health care has precipitated a growing need for basic, applied and clinical research in naturopathic medicine, Oriental medicine, nutrition, herbal medicine and health psychology.

Research is a core element of the University's mission. As the nation's leading academic institution for the study of natural medicine, Bastyr University supports rigorous scientific investigation of empirically derived natural medicine practices in an ongoing effort to better understand their theoretical underpinnings, and encourages evaluation of new and promising therapies for a variety of diseases and conditions.

Bastyr University's research facilities include a fully equipped clinical research center with three exam rooms, two acupuncture/massage rooms, an interview room, a reception area, a practitioner's office and phlebotomy services. Also included are a biological sample processing facility, a sophisticated computerized data management system and the Tierney Basic Science Laboratory, which is equipped to perform analytical chemistry, molecular biology and tissue culture functions. Analytical chemistry instrumentation includes three HPLC units, including one unit with a coulometric array detector, as well as GC and FPLC instruments. Molecular biology instrumentation includes electrophoresis equipment for running DNA and RNA gels and western blots, and a PCR thermocycler. Adjunctive to our tissue culture facilities are an ELISA plate reader with fluorescent capabilities and microscopes with attached photodocumentation systems. The research lab also has an air displacement plethysmograph (commonly known as the BOD POD), which is used to measure body fat by percentage. Bastyr University has its own Institutional Review Board (IRB) for ensuring the safety and ethical treatment of human participants in clinical trials.

The commitment and expertise of the research faculty have been recognized by NIH/NCCAM and a growing number of foundations and natural health product manufacturers who have funded many projects over the years. Bastyr University's research faculty members continue to collaborate with researchers at major universities and research organizations, including the University of Washington, the University of Minnesota, the University of Mississippi, Purdue University, Group Health Research Institute and the Fred Hutchinson Cancer Research Center.

Research faculty members have conducted a variety of basic science and clinical studies. These include randomized clinical trials, larger observational studies and laboratory investigations on a variety of topics. Completed projects include an investigation of the cardiovascular effects of garlic, nutrient absorption, naturopathic treatment of HIV infection, homeopathic treatment of osteoarthritis, botanical treatment of menopausal symptoms, botanical and nutritional treatment for weight loss and diarrhea in HIV+ patients, hyperimmune bovine colostrum in the treatment of cryptosporidiosis, in vitro evaluation of botanicals and ultrahigh dilutions of chemotherapeutic drugs in breast cancer cells, homeopathic treatment of tinnitus, neurophysiological studies pertinent to consciousness science, evaluation of certain natural agents on prostate cancer cells, a novel telehealth delivery of a weight loss program in diabetes, investigation of the menopause effect in obesity, evaluation of siliphos for hepatitis C, a randomized controlled trial of guided meditation and

massage therapy complementing allopathic comfort care for persons with advanced cancer and AIDS, the relative influence of eating patterns versus dietary fat percentage on energy intake, the effects of mixed carotenoids in food or supplements on biomarkers of endothelial dysfunction following an inflammatory challenge, the impacts of Yi Ren Qigong on self-care, measurement of oral glutathione supplementation in healthy adults, and an investigation of whether probiotics can alter immune markers.

Studies currently underway include an assessment of various botanical medicines for clinical application to immune-related disorders, investigation of antitumor effects of botanical medicines, how the mushroom species *Trametes versicolor* may strengthen the immune response to breast cancer, the influence of Echinacea on cold prevention, a curriculum-based research training grant in the School of Naturopathic Medicine, the influence of a naturopathic diet on glycemic control, preclinical studies of CAM botanicals and iron overload, a study of the anti-tumor mechanisms of polysaccharide Krestin, an evaluation of the safety, tolerability and absorption of glutathione in Parkinson's disease, a comparison of the effects of three different Vitamin D supplements to correct Vitamin D insufficiency for the prevention and treatment of diabetes and cardiovascular disease, and a study that compares "disease free survival" and quality of life in cancer patients who are treated in the Integrated Oncology Research Center to patients living in Washington state who do not include complementary alternative or integrated therapies in their treatment plans. For more information on research at Bastyr University, see the Bastyr website at www.Bastyr.edu.

Center for Interdisciplinary Studies

The Center for Interdisciplinary Studies offers both required and elective courses in a variety of interdisciplinary subjects. The center also coordinates course offerings for the Center for Spirituality, Science and Medicine.

Center for Spirituality, Science and Medicine

Established in 2009, the Center for Spirituality, Science and Medicine's mission is to further Bastyr University's interest in and commitment to a multidisciplinary exploration of the deep questions that live at the heart of spiritual and scientific inquiry, and to contribute to the cultivation of wisdom and wholeness in the practice of medicine. The center will be home to a wide variety of courses, programs, symposia and conferences, and research projects.

Library

The Bastyr University Library supports the most diverse selection of accredited academic programs in the natural health arts and sciences in North America. Branches at both the campus and Bastyr Center for Natural Health provide resources and services to students, faculty, staff and alumni. Library staff members are eager to assist with reference and research questions; they also offer instruction sessions in research-related courses to teach critical thinking and information literacy skills.

The library catalog is available online at <http://library.bastyr.edu>. The print collection comprises more than 19,000 books in subject areas such as naturopathic medicine, botanical medicine, acupuncture and Oriental medicine, nutrition, psychology, and the basic and clinical sciences. Copies of all required textbooks and readings are available either for checkout or via the electronic reserve system.

The library subscribes to 240 journals and a suite of clinical and specialized databases, many of which are unavailable elsewhere in the area. Other resources include anatomy models, videotapes, DVDs and specialized conference proceedings on audiotape and CD. Students and faculty may also use the resources and services of

the University of Washington Library System, which includes the largest medical library in the Northwest region.

General Admissions

DEGREE AND CERTIFICATE PROGRAMS

Bastyr University offers degree programs in naturopathic medicine, nutrition, nutrition and clinical health psychology, acupuncture and Oriental medicine, integrated human biology, midwifery, exercise science and wellness, health psychology, nutrition and culinary arts, nutrition and exercise science, and herbal sciences; certificates in holistic landscape design and Chinese herbal medicine; and the option to pursue a registered dietitian credential through the Didactic Program in Dietetics and Dietetic Internship. Specific information regarding admission to the natural health sciences programs is included in the separate academic program sections.

Students wishing to enroll in Bastyr University's natural health science programs must complete and submit the Bastyr University application along with a nonrefundable application fee (\$60 for undergraduate programs and \$75 for graduate and professional programs). In addition, supplemental application materials must be submitted for each degree and certificate program.

ADDING ADDITIONAL PROGRAMS

Bastyr University has a significant number of students who plan to enroll in more than one degree or certificate course. New students must enter the University in a single degree or certificate program. Once enrolled, students who want to matriculate in an additional program must go through a formal admissions process. Information and application materials are available from the admissions office. See the section on Double Majors for Undergraduate Students on page 28.

For detailed information about the Didactic Program in Dietetics, see page 57 and 64. For information on the Dietetic Internship, refer to page 66.

For additional information regarding the ND/AOM dual track program, please see the School of Naturopathic Medicine section, page 87.

NONMATRICULATING AND NONDEGREE STUDENTS

Nonmatriculating or nondegree students are those who are not matriculated or formally admitted to a degree or certificate program. Such students may enroll in undergraduate classes through the registrar's office if the following conditions are met:

- 1) There is space available in the class upon completion of the initial add/drop period for matriculated students.
- 2) Students have successfully completed prerequisites for the course at an accredited college or university and attained a C grade or better or have program/department chair permission.

The registrar's office will check the prerequisites of non-matriculated students entering into undergraduate courses before registering them for the course.

POSTBACCALAUREATE PREPARATORY PROGRAM

Students who have earned a bachelor's degree may apply for admission to the postbaccalaureate preparatory program. This program is designed for students who are planning to apply for the MS in nutrition program at Bastyr University and intend to enroll in courses at the University totaling six (6) or more credits per term while fulfilling prerequisite requirements. Postbaccalaureate preparatory programs are individually designed to permit

students to meet outstanding prerequisite requirements and must be completed within one year. Students enrolled in a preparatory program must meet standards of satisfactory progress and minimum standards of admissibility for the degree program in which they wish to matriculate. Bastyr University offers only a limited selection of prerequisite coursework. For detailed information, contact the admissions office.

Students enrolled in the postbaccalaureate preparatory program are eligible for financial aid. Please contact the financial aid office for an application packet or additional information.

PREREQUISITE WAIVERS

Some prerequisite course requirements may be waived based on documented learning experience. Applicants who wish to request such a waiver must submit a completed petition to waive a prerequisite form to the admissions office.

APPLICATION DEADLINES

Bastyr University accepts applications on a rolling basis until all available spaces are filled. Application dates are as follows:

Naturopathic Medicine

Early decision - November 15

Priority deadline - February 1

BS/MS and MS Midwifery

Priority deadline - February 1

Master's and Bachelor's Programs

Priority deadline - March 15

Applications received after that time are welcome but are accepted on a space-available basis. Applicants who wish to apply for a quarter other than fall should first check with the admissions office to see if they qualify to begin courses out of sequence.

Applications for the Dietetic Internship program must be postmarked by the appropriate ADA February application deadline.

INTERVIEWS

Interviews are required for clinical, professional and certificate programs. Applicants are required to interview at the University's campus in Kenmore, Washington. Telephone interviews may be granted in exceptional circumstances.

SELECTION FACTORS

Bastyr University is committed to providing quality natural health education to all communities. Applications from individuals from underrepresented minority groups are encouraged. The University supports equality of educational opportunity and, therefore, does not discriminate on the basis of race, color, national origin, marital status, gender, sexual orientation, gender identification or expression, age, religion, creed, veterans' status or handicap in admission or access to its programs and activities.

The University encourages students of diverse backgrounds and experience to apply. For detailed program information, refer to the required skills and abilities section (if applicable) in the appropriate school section.

ACCEPTANCE

Following completion of the application process a letter of acceptance is sent to those students selected. Those students who are making satisfactory progress toward the completion of their prerequisite requirements may be accepted with conditions. For these students, matriculation is contingent on successful completion of the requirements outstanding at the time of acceptance. The applicant must return a nonrefundable deposit to hold a place in the class within two weeks of receipt of the acceptance letter. The deposit is credited toward tuition at registration. Applicants have six business days from the University's receipt of their deposit in which to request return of the deposit. Following this time, deposits are nonrefundable, even if applicants decide to reapply and enroll in a subsequent year.

Offers of admission are made for a specific quarter of a specific year. For most degree programs, students are admitted only in the fall quarter.

An admissions file may be examined by the student (with the exception of confidential recommendations) only after acceptance and enrollment. Files remain the property of the University, and information contained within cannot be returned to or copied for the student. Certain items submitted for admission to the University are not considered to be part of a student's permanent academic record. Those items are therefore purged from the file upon receipt by the registrar's office.

DEPOSITS

All candidates for admission who have been accepted into a program at Bastyr University are required to pay a nonrefundable deposit (\$200 for degree programs) to hold a place in the entering class. The deposit is credited toward the student's first quarter tuition. Applicants should be aware that the University may, without notice and at the discretion of the admissions committee, offer to another student the place of any applicant whose deposit has not been submitted within the specified time.

Accepted students who wish to take a summer course (i.e., general or organic chemistry), must pay a separate \$100 nonrefundable deposit to hold their place in the summer class. This summer quarter deposit is credited toward the student's summer tuition. Continuing students are not required to pay a deposit for summer courses.

Currently enrolled students who have been accepted into an additional program at the University are not required to pay a deposit.

DEFERRAL OF ENROLLMENT

Applicants who have accepted their offers of admission may request a deferral of their acceptance for up to one year. The admissions committee reviews the request and will either approve or deny the request. Those who are granted a deferral must pay the deposit by September 1 for the year in which they initially intended to enroll. Deferred-acceptance students must also pay the deposit for the next academic year by the priority application deadline for their program. If deferred-acceptance students fail to make the second deposit, the deferral is rescinded and the initial deposit forfeited. If deferred-acceptance students enroll, both deposits are credited to tuition. If deferred-acceptance students fail to enroll, both deposits are forfeited. Applicants who have not been admitted may request a deferral of their application.

GRADUATE-LEVEL TRANSFER CREDITS AND ADVANCED STANDING STATUS

Students who have completed professional programs may be considered for advanced standing status. Students who have attended, but not graduated from, similar graduate or professional programs may receive transfer credit for individual courses but are not considered advanced standing students. For transfer consideration, credits must be earned from an institution accredited by a regional accrediting agency that is recognized by the American Council on Education Commission on Recognition of Postsecondary Accreditation or from an institution accredited by the CNME, ACAOM or MEAC. Graduate and professional students must complete at least two-thirds of their credits at Bastyr University. Specific information regarding transfer and advanced

standing status policies for the naturopathic medicine program is included in that school's section (page 75). Specific information regarding transfer policies for AOM programs is included in the acupuncture and Oriental medicine section (page 34).

UNDERGRADUATE AND COMMUNITY COLLEGE TRANSFER CREDITS AND RESTRICTED COURSES

Bastyr University accepts undergraduate transfer credits earned at any regionally accredited college or university, provided the courses are similar in content and taught at the same level as courses within the curricula of Bastyr University. As the University is an upper-division institution, all undergraduates are transfer students. A maximum of 135 quarter credits or 90 semester credits may be transferred toward an undergraduate degree. Ninety quarter or 60 semester credits may be transferred from a community college. An additional 10 credits may be accepted from a community college in the following areas if the content of the courses is determined to be equivalent to the required courses at Bastyr University: organic chemistry, anatomy and physiology, microbiology, physics, statistics, developmental psychology, abnormal psychology, social psychology, and psychology of personality. Once a student has matriculated into Bastyr, additional credits over 90 will not be transferred from a community college. All entering undergraduate students are required to have at least a 2.25 cumulative grade point average, with a grade of C (2.0) or better in all required courses. An exception to this is the integrated human biology program; this program requires a 2.5 cumulative grade point average, with a grade of C (2.0) or better in all required courses upon entrance. Transfer students who hold an approved direct transfer associate degree from a Washington state community college are given priority consideration in accordance with the Washington Inter-College Transfer and Articulation agreement. Admission to Bastyr University is competitive. All applicants are evaluated on the basis of academic records, narrative statement and applicable experience.

Undergraduate students may transfer a maximum of three quarter credits of one-credit physical education credits toward the required 180 graduation credits. A maximum of 15 vocational, technical, CLEP or military credits may be applied to the elective credit total. Non-college level mathematics courses below college algebra, such as basic algebra and intermediate algebra, may be used to satisfy the basic proficiency entrance requirement in math, but the credits are nontransferable. Other non-college courses, such as remedial composition and English as a second language, are also nontransferable.

For further information refer to the Academic Policies section on page 13 and the Transfer of Credit to Bastyr University policy in the *Academic Policy and Procedure Manual*.

APPLICANTS WHOSE FIRST LANGUAGE IS NOT ENGLISH

All applicants for whom English is a second language must present evidence of proficiency in the English language in one of the following ways:

- Official TOEFL exam results of 213 on the computer-based test or 550 on the paper-based test. (PBT). Internet-based test (iBT) scores are currently set at 79 with a minimum of 20 in the speaking section. The new Internet-based test can satisfy the TSE requirement if the minimum score in the speaking section is met.
- Official IELTS exam results of 6.5 or higher.*
- Two quarters or semesters of enrollment in liberal arts courses taught in English, totaling at least 15 quarter credits of college transferable credits (not including vocational coursework or English as a second language), completed in an accredited U.S. or Canadian school, with a GPA of 3.00 or greater (no single course less than a C- grade or a 1.7 on a 4.00 scale).

In addition, applicants to naturopathic medicine or the acupuncture and Oriental medicine programs are required to present exam results for the following:

- Official TOEFL exam results of 213 on the computer-based test or 550 on the paper-based test or 79 on the Internet-based test (iBT) score.
- TSE (test of spoken English) with a score of 50 or greater. (Only students with paper-based or computer-based TOEFL exam scores will be required to complete this test).

TOEFL scores over two years old will not be accepted. The Bastyr University code for the TOEFL exam is #9839. Admitted students whose first language is not English may also be required to take additional elective credits and/or training to improve their language skills.

*The AOM program does not accept IELTS scores.

INTERNATIONAL STUDENTS

To be eligible for enrollment at Bastyr University, all international student applicants must submit an application, application fee, letters of recommendation, documentation of sufficient funds (see below), official transcripts or an evaluation sent from a foreign credential evaluation service, and a current photograph. Priority application dates for the natural health sciences programs are the following: February 1 for the naturopathic medicine program, March 15 for all other programs. Applicants who speak English as a second language are required to submit official exam results outlined in the section Applicants Whose First Language Is Not English. (See above.) Official transcripts from any college or university outside the United States or Canada must be translated and evaluated, course-by-course, by an independent evaluation service. The service forwards the evaluated transcript to Bastyr University, at the applicant's request. There is a charge for this evaluation. Forms are available from the service directly or through the admissions office at Bastyr University.

Housing is available on a first-come, first-served basis in our residence village. Most students rent an apartment or house in nearby areas.

International students must enroll as full-time, degree-seeking students and comply with all related immigration policies for the F-1 student visa program.

Federal laws require that international students maintain adequate health insurance while attending Bastyr University. All admitted F-1 students will be required to purchase coverage through Bastyr University or submit a waiver form providing documentation of comparable insurance coverage valid in the United States for the duration of study.

F-1 STUDENT VISAS

A nonimmigrant student and his/her spouse/children may be admitted into the United States in the F-1 classification during their course of full-time study. This does not include those applicants who hold dual citizenship, are lawful permanent residents (or have received confirmation from the U.S. Custom and Immigration Service [USCIS] of an adjustment of status to Lawful Permanent Resident), have a valid business visa, or, if by blood percentage, are 50 percent or more North American Indian. However, Bastyr University requires official documentation of such status. Students with current F-1 visas transferring to Bastyr University must forward a copy of their current I-20.

DOCUMENTATION OF SUFFICIENT FUNDS

To qualify for a student visa, applicants must provide complete and accurate documentation of sufficient funds to cover the cost of the first year of school, books and living expenses. Official bank statements, a signed letter of support or an affidavit of support (available from the USCIS), sponsor income verification, or other proof of liquid assets is required to document sufficient funds. The amount required to cover expenses for the first year is dependent upon the program of study and listed in the I-20 documentation work sheet, which is part of the application packet for international students.

FINANCIAL ASSISTANCE AND EMPLOYMENT

International students are not eligible for U.S. federal or state-funded student aid programs but may obtain private loans with a U.S. citizen or resident as a co-signer. Canadian students also have access to the Canadian federal student loan program and most provincial loans. Documentation of sufficient funding is required for F-1 students because off-campus employment is prohibited by the USCIS during the first year of study. International students are limited to no more than 20 hours a week of on-campus employment while school is in session and may work full time during vacation periods, as long as they have maintained status and intend to

register for the following term. Bastyr University has a very limited amount of international employment money available.

FINANCIAL AID

The role of the financial aid office at Bastyr University is to assist students in obtaining the funding they need to reach their educational goals.

Bastyr University participates in the full range of state and federal student financial aid programs. Student eligibility is determined following the state and federal regulations that apply to each particular aid program.

Graduate students primarily rely on federal educational loan programs, including subsidized and unsubsidized Stafford and Federal Direct loans, GradPLUS loans and loans from the Perkins loan program. Employment opportunities are provided by the federal and state work study programs.

Additional support is provided by scholarship programs administered by Bastyr University from both endowed programs and University resources.

Undergraduate students are also eligible for all of the programs mentioned above but are also eligible for federal grants (Pell grants and Supplemental Educational Opportunity grants) and state grants (Washington State Need Grant and the State Educational Opportunity Grant).

Private loan programs also provide a supplemental source of funding to students at market rate interest. These loans require a positive credit history and/or a co-signer with good credit.

All international students are eligible for University funded scholarships and grants and also for on-campus employment from University funds.

Financial Aid Deadlines: There are no formal University deadlines. However, undergraduate students are encouraged to apply by April 1 in order to receive consideration for several external grant programs with June deadlines. All students are encouraged to apply for financial aid at least 90 days before the first quarter of attendance.

Detailed information on application procedures, program costs, and financial aid funding patterns are published annually in the *Bastyr University Financial Aid Handbook*. You may request a copy from either the financial aid office or the admissions office. The *Bastyr University Financial Aid Handbook* and financial aid application are also located on the Bastyr website and the MyBU student portal.

Satisfactory Academic Progress for Financial Aid

Federal student aid regulations mandate that students who wish to be considered for financial aid must be making satisfactory progress in a degree or certificate program. This requirement applies to the entire period of enrollment at Bastyr University, even though students may not have received financial aid for some periods of enrollment. Satisfactory academic progress is currently reviewed at the end of each spring quarter. It is also students' responsibility to monitor their own progress.

All students must meet the published academic standards for their individual programs. Students placed on suspension or limited suspension are not eligible for financial aid.

Undergraduate students awarded a State Need Grant or State Educational Opportunity Grant must complete at least 50 percent of the credits for which they received funding for that quarter. Failure to complete the required number of credits each quarter will result in cancellation of subsequent disbursements. Satisfactory academic progress is monitored at the end of each quarter for these two programs.

See the student portal under Financial Aid menu option for the complete satisfactory academic progress policy for financial aid eligibility.

Bastyr Undergraduate Programs

MISSION STATEMENT FOR UNDERGRADUATE PROGRAMS

The mission of the Bastyr University bachelor's degree completion programs is to help each student build a strong foundation of basic knowledge and skills, as well as fostering a greater understanding of health of body, mind and spirit.

VISION STATEMENT FOR UNDERGRADUATE PROGRAMS

The Bastyr University bachelor's degree completion programs provide students with opportunities to develop competency in basic skills such as written and verbal communication, critical thinking and the ability to work cooperatively with others. The degree completion programs also provide students with opportunities to develop competency in the fundamental theories, models, core knowledge and skills of their major field of study.

The degree completion programs uniquely emphasize the importance of holism and the natural health sciences. The programs provide students with opportunities to develop a deeper understanding of the interconnections between body, mind and spirit and learn to foster wellness in themselves and others through approaches found in the natural health arts and sciences.

UNDERGRADUATE EDUCATION AT BASTYR UNIVERSITY

As Bastyr University continues to develop undergraduate degree offerings, we strive to maintain consistency across all programs in terms of admissions requirements, shared courses, double majors and undergraduate student support. The undergraduate experience at Bastyr encompasses a range of academic programs, which are coordinated by the undergraduate committee. Admissions requirements, the structure of interdisciplinary courses, double majors and general policy issues affecting undergraduates are all considered by this committee. The undergraduate committee works closely with the admissions office to ensure that applicants who meet all basic criteria are admitted to the University and to the undergraduate program of their choice.

THE UNDERGRADUATE MAJORS

Exercise Science and Wellness (Curriculum can be found on page 57.)

Health Psychology (Curriculum can be found on page 49.)

Integrated Human Biology (Curriculum can be found on page 47.)

Herbal Sciences (Curriculum can be found on page 70.)

Nutrition (Curriculum can be found on page 56.)

Nutrition and Culinary Arts (Curriculum can be found on page 60.)

Nutrition with DPD (Curriculum can be found on page 59.)

Nutrition and Exercise Science (Curriculum can be found on page 60.)

FULL-TIME EXPECTATIONS

The undergraduate curricula are designed for full-time participants. Students may complete a program on a part-time basis, but should recognize that there may be scheduling conflicts between required courses. It is the responsibility of a student who wishes to complete a program on a part-time basis to work with an advisor to arrange an appropriate schedule. Special sections will not be offered to accommodate the needs of part-time students.

DOUBLE MAJORS FOR UNDERGRADUATE STUDENTS

Bastyr University will allow students to complete two majors, provided students are in good standing at the time they wish to declare the second major. The second major cannot be declared until the second quarter of attendance. However, students may start attending courses required for the second major in their first quarter of attendance. Students must submit a declaration of double major form to the registrar's office at the time the major is declared. Students are required to have their program of study approved by the appropriate chair(s) and/or dean(s) at the time the double major is declared.

There are no predetermined schedules for the double majors. It is the student's responsibility to create appropriate schedules for double major combinations. Students must meet quarterly with the undergraduate advisor in the registrar's office for assistance in tracking the progress of the two majors.

Students are advised that declaring a double major will increase the amount of time it takes to graduate. The minimum amount of time to complete any double major is three years. If the required courses for any quarter exceed the limit on student credit loads as outlined in the Limits on Student Credit Loads policy of the *Academic Policy & Procedure Manual*, the student must obtain permission from the academic chairs of both majors.

Students earning a double major must usually complete no fewer than 220 credits. The credit requirement total for double majors is determined by the total of the prerequisite basic proficiency, science and general education credits, the major core credits in both programs (where duplication exists between the majors, it is not required to make up the credits represented by the duplication) and any elective credit requirement with defined parameters for one or both majors (for example, two activity credits required for exercise science and wellness majors).

UNDERGRADUATE POLICIES AND PROCEDURES FOR ACADEMIC PROBATION, DISMISSAL AND APPEALS

A. Introduction

1. The following are the policies and procedures for probation, dismissal and appeals relating to academic performance that apply to undergraduates at Bastyr University.
2. More specific standards, guidelines and practices may be developed and published by schools and/or programs of the University. The grade point average (GPA) required for graduation in each program and any additional guidelines are provided in the individual programs' sections of this catalog.
3. Notations of academic standing appear on the advisor's transcript for internal use, but, with the exception of suspension and dismissal statuses, are excluded from external transcripts.
4. The registrar will receive copies of all communications with students concerning changes in academic standing for the purpose of maintaining student records.

B. Academic Status

1. Good Standing: Requires that a student maintain a minimum cumulative GPA of 2.0 and satisfy other specific conditions established by schools and programs.
2. Probation: A student will be placed on academic probation if his/her GPA falls below a 2.0 or he/she fails to satisfy other specific conditions established by schools and programs (see section E below for examples).
3. Suspension: A student may be placed on suspension when his/her success in a program may be best facilitated by time away from the University (see section I below).

C. Notice of Academic Status

Each quarter the registrar will provide the dean or dean's designee with a list of students who have a cumulative GPA or quarterly GPA below 2.5. The dean or dean's designee of each school will review the status of each student's records to make decisions about probation no later than the last day of the first week of the subsequent quarter.

D. Notice of Probation

1. The dean or dean's designee will send the student notice of academic probation either by e-mail to the student's University e-mail address or via U.S. mail to the student's mailing address. Notices will be sent at the beginning of the quarter no later than the last day of the first week of the quarter. The date of the postmark on the envelope or the date stamp of the e-mail will serve as the date of notice.
2. A notice of academic probation should include the following information:
 - A statement that the student has been placed on academic probation

- The reason(s) that the student has been placed on academic probation
- A statement of the requirement that the student meet with his or her faculty advisor to develop an academic plan that the student must complete in order to be removed from academic probation
- A list of the potential consequences of not meeting the requirements outlined in the academic plan

E. Reasons for Academic Probation

A student may be placed on academic probation under the following circumstances:

- The student's cumulative GPA falls below a 2.0
- The student's GPA for the quarter is below that required for graduation, even if the student's cumulative GPA is above that required for graduation
- The student earned a grade lower than the minimum required by the school or program in a required course, internship or clinical rotation
- The student's record shows that he/she has failed a course more than once, or that the student has a number of incompletes and/or withdrawals that the dean or dean's designee considers to be of concern

F. Conditions During Academic Probation

A student placed on academic probation will be required to meet with a faculty advisor to develop an academic improvement plan that the student must complete in order to be removed from academic probation. The academic plan may require the student to do any one or more of the following:

- Earn a grade of C or above in all courses while on probation
- Reduce the number of credits taken while on probation
- Participate in academic initiatives such as tutorials and workshops aimed at improving study approaches
- Receive permission from the faculty advisor for taking incompletes or withdrawals
- Other requirements outlined by the school or academic program

G. Duration of Academic Probation

1. A student is generally placed on academic probation for one quarter. If the dean or dean's designee determines that the student has not satisfied the conditions of the probation, the dean or dean's designee will determine whether the student will be either:
 - Continued on probation and the circumstances for continued probation
 - Placed on suspension (see section I below)
 - Recommended for dismissal (see section J below)
2. The dean or dean's designee will notify the student each quarter that the student remains on probation and whenever the student's academic status has changed.

H. Appeal of Probation

1. A student placed on academic probation may not appeal the decision unless the student is able to produce specific documentation demonstrating a factual error.
2. A student may not appeal a decision to withdraw him or her from an internship, practicum, clinical site or service-learning placement unless there is a factual error.
3. If a student placed on academic probation has specific documentation demonstrating an error in the data underlying the probation decision, the student must submit that documentation to the dean or dean's designee within five (5) business days of receipt of the notice of probation.

I. Academic Suspension

1. Academic suspension is used when the dean or dean's designee believes the student will benefit from a period of time away from his/her program track and that the student has sufficient opportunity to be successful upon his/her return from suspension.
2. The terms of a suspension are unique to each student and will be established by the dean or dean's designee. A suspension will last at least one quarter, and a student may be required to receive remedial academic assistance before being readmitted.
3. Suspended students must petition the dean for reinstatement. They may be required to meet with the dean or dean's designee and must show that all terms of the suspension have been met before receiving approval to return to the University. If a student is unable to demonstrate that he/she has adequately resolved the issues that led to the suspension, the student may be eligible for dismissal.

J. Dismissal for Academic Deficiencies

1. Each school at Bastyr University has a Student Promotions Committee that follows the individual school dismissal policy. Recommendations for dismissal are submitted to the provost for consideration. The provost will make the final decision on student dismissals.
2. Academic dismissal must be preceded by at least one written warning notifying the student of the problem area(s) and providing an adequate time period for response and/or improvement before taking action. Academic probation is one such warning.
3. The provost or his/her designee will send the student notice of academic dismissal by e-mail to the student's University e-mail address or via certified U.S. mail, requiring confirmation of receipt, to the student's mailing address. Notices will be sent at the beginning of the quarter no later than the last day of the first week of the quarter (as published in the official academic calendar). The date of the postmark on the envelope or the date stamp of the e-mail will serve as the date of notice.
4. A notice of dismissal should contain the following information:
 - A statement of the decision to dismiss the student from the academic program
 - The reason(s) for dismissing the student
 - The student's right to appeal the decision

5. A student may be dismissed from Bastyr University:
 - If the student fails to fulfill the conditions of academic probation
 - After the second consecutive quarter on probation (including summer, if enrolled)
 - After the third quarter on probation (including summer, if enrolled); the quarters need not be consecutive
 6. Students who are dismissed will be dropped from all classes for which they are registered at the time of dismissal.
- K. Appeal of Dismissal
1. A student may appeal a decision dismissing the student for academic deficiencies only if the student is able to produce specific evidence demonstrating a factual error in the process.
 2. Appeal of a dismissal is made to the provost and can only be made in the event of factual error. The written appeal must be made to the provost within five working days of the date on the suspension or dismissal letter. The appeal must specify and include the alleged documented inaccuracy and the relevance of that fact(s).
 3. The provost will respond within ten (10) working days to the appeal of academic dismissal and can only consider an appeal based on an error of fact. The decision of the provost is final and cannot be appealed.
- L. Student Status Pending Appeal
- During the appeal process, the dean or dean's designee will determine whether the student will be allowed to register for classes and/or continue other activities available to students in good standing such as internships.

REMEDICATION IN PUBLIC SPEAKING AND/OR WRITING FOR UNDERGRADUATES

If a faculty member has concerns about a student's ability to progress satisfactorily in the area of writing proficiency and/or communication and public speaking and all efforts to provide assistance and remediation in the classroom have been unsuccessful, the student shall be referred to career services with a recommendation for remediation. It is up to the student to seek remediation and make continual efforts to improve competency in this area. Further recommendations for remediation may be made in future courses as needed.

SUMMER MESSAGE INTENSIVE

Bastyr University and the Bellevue Massage School Center for Healing Arts offer a summer massage training program that allows students to apply coursework taken at Bastyr University toward the Washington state requirements for licensure. This course cannot be audited. Students interested in further information may meet with their academic advisor in the registrar's office or with their department's program supervisor to discuss the program availability and the course prerequisites.

School of Acupuncture and Oriental Medicine

ADMINISTRATORS OF THE SCHOOL OF ACUPUNCTURE AND ORIENTAL MEDICINE

Terry Courtney, MPH, LAc, Dean
Steve Given, DAOM, LAc, Associate Dean, Clinical Education; DAOM Program Director
Molly Pritchett, Program Supervisor

OVERVIEW

The field of acupuncture and Oriental medicine in America is rooted in the traditional medicine of China that has evolved over the past several thousand years. The contemporary model of natural health care education and practice in China is the combined system of traditional Chinese medicine (TCM) and Western medicine. This system has strongly inspired the current programs in acupuncture and Oriental medicine (AOM) at Bastyr University.

Established in 1988, the School of Acupuncture and Oriental Medicine currently offers the following degree/certificate options:

- Bachelor of Science in Natural Health Sciences/Master of Science in Acupuncture (BS/MSA) (see page 34)
- Bachelor of Science in Natural Health Sciences/Master of Science in Acupuncture and Oriental Medicine (BS/MSAOM) (see page 34)
- Master of Science in Acupuncture (MSA) (see page 34)

- Master of Science in Acupuncture and Oriental Medicine (MSAOM) (see page 35)
- Certificate in Chinese Herbal Medicine (CCHM) - postgraduate offering (see page 40)
- Doctor of Acupuncture and Oriental Medicine (DAOM) - postgraduate offering (see page 41)

These programs are closely interrelated and require the same foundational studies in traditional Chinese medicine.

MASTER'S PROGRAM MISSION STATEMENT

The mission of the acupuncture and Oriental medicine program at Bastyr University is to prepare excellent practitioners. This is accomplished through rigorous training in traditional Chinese medicine with an emphasis on collaborating with other health care disciplines. The program is committed to producing graduates who are respected among their health care peers, dedicated to service in their community, and prepared for lifelong learning in the field

The educational objectives of the AOM master's program are focused on training graduates to be:

- 1) Safe and effective in the care of patients by demonstrating in-depth ability in the following areas:
 - a. Knowledge of traditional Chinese medicine diagnostic strategies and their application to individual cases.
 - b. Skill in the traditional methods of assessment of patients including interviewing, palpation and observation.
 - c. Competence in selecting the appropriate treatment modalities and plans for a patient utilizing acupuncture, tui na, Chinese herbs (relevant to the MSAOM) and lifestyle counseling.
 - d. Skill in the application of acupuncture techniques in an appropriate and safe fashion for each patient.
- 2) Able to integrate Eastern and Western paradigms of medicine for the purposes of informing the practice of traditional Chinese medicine, communicating with other health care professionals and patients, and making appropriate medical referrals when necessary.
- 3) Professional in their approach to setting up and maintaining a private practice, collaborating with other health care professionals, working in an integrated health care setting and providing leadership within the acupuncture and Oriental medicine field.
- 4) Capable of accessing research information and critically assessing the value of published clinical research in the field.
- 5) Able to provide health prevention measures based on traditional Chinese medicine theory (such as tai chi, qigong, and therapeutic nutrition) to support the well-being of their patients and themselves.
- 6) Qualified to pass national and state acupuncture and/or herbal exams.

RECOGNITION AND LICENSURE OF ACUPUNCTURE AND ORIENTAL MEDICINE

The Master of Science in Acupuncture (MSA), the Master of Science in Acupuncture and Oriental Medicine (MSAOM) and the Doctor of Acupuncture and Oriental Medicine (DAOM) degree programs at Bastyr University are accredited by the Accreditation Commission for Acupuncture and Oriental Medicine (ACAOM), 7501 Greenway Center Dr., Suite 760, Greenbelt, MD 20770, 301.313.0855. ACAOM is not currently recognized by the U.S. Department of Education with respect to doctoral programs in the field. However, Bastyr is accredited by the Northwest Commission for Colleges and Universities, 425.558.4224, and thus all degree offerings are accredited and DAOM students are eligible for Title IV funds.

The Master of Science programs are approved by the Washington State Department of Health. Graduates of Bastyr University's MSA and MSAOM programs are eligible to apply for licensure in acupuncture in Washington state, as well as in most other states offering similar licensure. Applications for licensing in Washington can be obtained by contacting the Washington State Department of Health, Professional Licensing - Acupuncture, P.O. Box 47868, Olympia, WA 98504-7868, 360.236.4700. Applications for licensing in California can be obtained by contacting the Department of Consumer Affairs, Acupuncture Board, 444 N. Third Street, Suite 260, Sacramento, CA 95814, 916.445.3021.

Currently, acupuncture is recognized in 44 states and the District of Columbia. The actual requirements for licensure can vary from state to state, with the majority of states requiring the successful completion of the National Certification Commission for Acupuncture and Oriental Medicine (NCCAOM) exam. If a student is interested in licensure in a state other than Washington or California, it is imperative for the student to know the licensing requirements of that particular state in order to ensure that there are no outstanding academic requirements at the time of graduation. Academic advising is available to help students who may have additional requirements to meet.

ACUPUNCTURE AND ORIENTAL MEDICINE ADMISSIONS

For general information on the admissions process, please refer to the admissions section in this catalog. The information below refers only to the acupuncture and Oriental medicine programs. Applicants will significantly enhance their application status if they have previously experienced acupuncture and/or a traditional Chinese medicine treatment. Additionally, applicants will also benefit from reading about and researching the field of Oriental medicine via the mainstream press and Internet.

REQUIRED ABILITIES/SKILLS FOR ACUPUNCTURE AND ORIENTAL MEDICINE PROGRAM ADMISSION

A candidate for the acupuncture and Oriental medicine degree must be able to demonstrate appropriate observational and communication skills, motor function, intellectual-conceptual, integrative and quantitative abilities, and behavioral and social maturity. A candidate should be able to perform in a reasonably independent manner.

Observation: A candidate must be able to observe a patient accurately at a distance and close at hand. Observation necessitates the functional use of the sense of vision and somatic sensation. These are enhanced by the functional use of the sense of smell.

Motor: Candidates should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion and other diagnostic maneuvers. A candidate should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients such as CPR and application of pressure to stop bleeding and the opening of obstructed airways. Such actions require coordination of both gross and fine muscular movements, equilibrium and functional use of the sense of touch and vision.

Observation and motor skills must be in coordination with each other in order to safely practice many of the diagnostic and clinical techniques specific to Oriental medicine. A combination of observation and motor skills are required for acquiring diagnostic information from patients as well as for the clinical portion of the training which includes the safe insertion and manipulation of acupuncture needles, cupping, moxibustion, etc.

Communication: A candidate should be able to speak, to hear, and to observe patients in order to elicit information, describe changes in mood, activity, and posture, and perceive nonverbal communications. A candidate must be able to communicate effectively and sensitively with patients. Communication includes not only speech but reading and writing. The candidate must be able to communicate effectively and efficiently in oral and written form with all members of the health care team.

Intellectual-Conceptual, Integrative and Quantitative Abilities: These abilities include measurement, calculation, reasoning, analysis and synthesis. Problem solving, which is a critical skill for health care practitioners, requires all of these intellectual abilities. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

Behavioral and Social Attributes: A candidate must possess the emotional health required for full utilization of her/his intellectual abilities, the exercise of good judgment, the prompt completion of all responsibilities attendant to the diagnosis and care of patients, and the development of mature, sensitive and effective relationships with patients. Candidates must be able to tolerate physically taxing work loads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to

learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal skills, interest and motivation are all personal qualities that are assessed during the admissions and education processes.

TRANSFERS

Students who wish to transfer from other acupuncture and Oriental medicine programs are accepted on a space-available basis and must meet the same entrance requirements at the class level they seek to enter. Transfer credit is evaluated on an individual basis following completion of the application process. Transfer applicants must submit a \$75 transfer evaluation fee.

COMBINED BACHELOR'S/MASTER'S PROGRAM

Students who have completed at least two years at the undergraduate level (60 semester credits or 90 quarter credits) have the opportunity to earn their bachelor's degree in combination with either the Master of Science in Acupuncture or the Master of Science in Acupuncture and Oriental Medicine. Master's program prerequisites must also be met prior to matriculation. The bachelor's degree is awarded at the time of graduation from the master's program.

PREREQUISITES FOR BS/MSA OR BS/MSAOM

Entering undergraduates must have earned at least a 2.25 cumulative grade point average, with a grade of C or better in all basic proficiency and science requirement courses. Prior to enrolling, students must have completed 90 quarter credits (60 semester credits) including a minimum number of credits in basic proficiency, science and general education categories. Surplus credits not used to satisfy basic proficiency or science requirements may be applied to the appropriate general education requirements. Note that students may apply to the program while completing prerequisite coursework.

Students entering the BS/MS program as undergraduates are required to maintain a minimum 2.5 GPA for the first year of their studies, regardless of credits. Starting with the second academic year, students are required to maintain a minimum 3.0 GPA. Please see the Academic Status and Graduation Requirements section for additional information on grading.

BASIC PROFICIENCY AND SCIENCE REQUIREMENTS

English literature or composition	9 quarter credits
Intermediate algebra	1 course ¹
General psychology	3 quarter credits
General chemistry (with lab) (health science major level)	4 quarter credits ²
General biology (with lab)	4 quarter credits

¹Intermediate algebra is not college level, and the credits will not transfer in toward degree completion.

²Survey level class that covers inorganic chemistry.

GENERAL EDUCATION REQUIREMENTS

Natural sciences and mathematics	12 quarter credits
Arts and humanities	15 quarter credits
Social sciences	15 quarter credits
Speech communication or public speaking	3 quarter credits
Electives	25 quarter credits ¹

¹The number of elective credits may vary depending upon the exact number of quarter credits earned in the other prerequisite categories. Total prerequisite credits must equal at least 90 quarter credits.

MASTER OF SCIENCE IN ACUPUNCTURE

The MSA provides the didactic and clinical training necessary for eligibility for the National Commission for the Certification of Acupuncture and Oriental Medicine (NCCAOM) board exam, which is the basis for licensing in most states. The MSA program is a three-calendar-year course of study.

MASTER OF SCIENCE IN ACUPUNCTURE AND ORIENTAL MEDICINE

The MSAOM is the model comprehensive degree program. It includes all the didactic and clinical training of the MSA but also includes training in Chinese herbal medicine and an introduction to Chinese medical language. The MSAOM program is a three-and-a-half-calendar-year course of study.

PREREQUISITES FOR MSA/MSAOM

Entering students must have a bachelor's degree and must have completed the following courses or their equivalent:

Intermediate algebra 1 course

General chemistry (health science major level) . 1 course¹

General biology (with lab) 1 course

General psychology 1 course

Note: All students must complete a CPR-C level course or equivalent prior to entering intern clinic.

¹Survey level class that covers inorganic chemistry and includes a lab component. Intended for students in allied health majors.

CLINIC

The core of the program's clinical training takes place at Bastyr Center for Natural Health, the University's teaching clinic. Bastyr Center is a comprehensive, multidisciplinary clinic providing quality training for students in all of the University's programs. Within the acupuncture and Oriental medicine clinic, students receive clinical training in acupuncture and Chinese herbs. In addition to training at the University clinic, students have the opportunity to train at several community medical sites that provide clinical experience in working with diverse populations.

The clinical training program begins in the first year and is comprised of three observation shifts, one preceptorship and either 14 (MSA) or 16 (MSAOM) internship shifts. The three observation shifts can be performed in any of the five quarters preceding intern status. All observation hours, shifts and interim observation hours must be completed prior to starting as an intern. Internship shifts start in spring of the second year and continue throughout the program. The preceptorship shift may be performed in either the observation or internship phase of training. A minimum of one observation shift must be completed in order to do a preceptorship. Students in the MSAOM program or the CCHM program also take eight Chinese herbal shifts and two Chinese herbal dispensary shifts in the latter portion of their program. On a space available basis, students are welcome to take additional clinic shifts for elective credit. However, elective shifts cannot be used to make up missing hours in core shifts due to prior or future absences.

Admission as an intern to the AOM student training clinic at Bastyr Center for Natural Health is based on: 1) good academic standing, 2) completion of a bachelor's degree or being enrolled in or graduated from an acupuncture master's program, 3) completion of the required prerequisite curriculum, 4) successful passage of the clinic entry written and practical exam, 5) current CPR for health care provider certification, and 6) certification in Clean Needle Technique (CNT).

Please be aware that the opportunity to intern at one of the external clinics offered through Bastyr University is contingent on the student's ability to provide documentation of a vaccination history. If this documentation is unavailable or out of date, students will need to update their vaccines at either local health centers or through their personal physicians. The community clinic rotations are outstanding clinical experiences in working with underserved and special patient populations, including developing skills working via medical translators. Students who are unable to provide vaccine documentation will not be eligible for this rotation and clinical training may be restricted to the Bastyr student clinic. Students are also required to submit to a national criminal background check. For more information, see Background Checks in the *Academic Policy and Procedure Manual*.

CHINA INTERNSHIPS

Students in good academic standing are encouraged to apply for advanced studies in China. Students receive eight (8) clinical internship credits at Chengdu University of Traditional Chinese Medicine or Shanghai University of Traditional Chinese Medicine, upon successful completion of the China program. Permission to attend is at the discretion of the School of AOM and depends on a number of additional factors, such as interpersonal skills, maturity and depth of clinical skills. For an application, see the AOM clinic section in the student web portal under MyBU > clinic information. Students who plan to study in China are required to take the one-credit elective OM6820 Clinic Entry for China in summer quarter of their third year, just preceding their China internship.

SUMMER MASSAGE INTENSIVE

Bastyr University and the Bellevue Massage School Center for Healing Arts offer a summer massage training program that allows students to apply coursework taken at Bastyr University toward the Washington state requirements for massage licensure. This course cannot be audited. This program of study is an excellent future practice builder. The schedule for this training works particularly well for MSA students. Students interested in further information may meet with their academic advisor in the registrar's office to discuss the program availability and the course prerequisites.

BASIC SCIENCES CURRICULUM WITHIN ACUPUNCTURE AND ORIENTAL MEDICINE

Basic science courses within acupuncture and Oriental medicine include Anatomy and Physiology, Organic Chemistry, Biochemistry, Microbiology, Pathology, and Pharmacology. These courses serve as a foundation for an understanding of the human body and provide students with the necessary skills and competency to pursue coursework in the AOM program. In addition, a portion of the AOM Anatomy and Physiology course is taught in Bastyr's cadaver anatomy lab, thus giving students the unique opportunity to study anatomy in greater depth. Basic science courses in the doctoral program include Pathology of Cancer, Pharmacology and Advanced Living Anatomy.

The basic sciences faculty encourages and expects students to advance beyond the simple learning of scientific facts and to integrate systematically the information from basic science disciplines into a unified model of human organization and function. This educational scheme requires students to assume an active role in the learning process and encourages them to adopt this inquisitive behavior for a lifetime. Problem solving, clinical cases and examples are an integral part of the basic science curriculum. This educational process is an expression of Bastyr University's basic philosophy of a holistic approach to human behavior, health and therapeutics. The basic sciences faculty encourages students to pursue an integrated approach to learning and understanding. Instructors are readily available to facilitate this process on an individual basis.

The department also offers General Chemistry in a summer intensive format, which is a prerequisite requirement for the AOM program.

COUNSELING AND HEALTH PSYCHOLOGY CURRICULUM WITHIN ACUPUNCTURE AND ORIENTAL MEDICINE

The counseling and health psychology curriculum trains students in understanding and effecting change in the emotional, mental and spiritual dimensions of human functioning.

Students in acupuncture and Oriental medicine MS programs are required to take the following:

- PS5205: Patient Communications - 3 credits
- PS6100: Motivational Interviewing - 2 credits

Students in the DAOM program are required to take the following:

- PS8110: Counseling in Chronic Pain and Chronic/Terminal Illness - 3 credits

For additional counseling and health psychology courses available as electives to matriculated students, please see the course listings in this catalog or the current quarterly schedule of classes.

ACADEMIC STATUS AND GRADUATION REQUIREMENTS

A grade of C or higher is required to pass all AOM/CCHM courses. Students entering the BS/MS program as undergraduates are required to maintain a minimum GPA of 2.5 for the first year of their studies, regardless of credits. Starting with the second academic year, undergraduate students are required to maintain a minimum GPA of 3.0. Students entering the master's program as graduate students or entering the certificate in Chinese herbs (CCHM) must maintain a minimum of a 3.0 GPA to be in good academic standing. Academic sanctions occur when the quarterly or cumulative GPA drops below the minimum level or when a student receives PC, D or F grades. Students with a quarterly GPA below the minimum will be placed on academic warning status. Students who receive a PC, D or F in any one quarter, regardless of GPA, may be placed on probation status. Academic tutoring and support is available to assist students to return to good academic standing.

Students accepted into the Master of Science in Acupuncture (MSA) program must complete a total of 151.5* quarter credits with a minimum of 101 quarter credits in residence at Bastyr University. Students must maintain a minimum 3.0 grade point average.

Students accepted into the Master of Science in Acupuncture and Oriental Medicine (MSAOM) program must complete a total of 216.5* quarter credits with a minimum of 144 quarter credits in residence at Bastyr University. Students must maintain a minimum 3.0 grade point average.

Students earning the MSA must complete their degree requirements within five years and MSAOM within six years, including any credits completed as a bachelor's student and applied toward the master's. Students must complete at least two-thirds of their credits in residence at Bastyr University.

Students earning the DAOM must complete their degree within five years. Students must complete at least two-thirds of their credits in residence at Bastyr University.

The Certificate in Chinese Herbal Medicine (CCHM) program has a total of 62 required credits of coursework and clinical training. To earn the certificate, at least 41 credits must be completed in residence. To maintain good academic standing, students in the CCHM program must maintain a term and/or cumulative GPA of 3.0 or better. The CCHM is a graduate course of study and there is no grade of D+, D or D-.

Students accepted into the combined Bachelor of Science in Natural Health Sciences and the Master of Science degree program receive their bachelor's degree upon graduation from the master's program. If a student voluntarily or involuntarily leaves the program prior to completion of the master's, she/he may be eligible for a bachelor's degree if the student has a combined upper and lower division quarter credit total of 180 credits (specific course requirements also apply. See the dean for further information.) Furthermore, a student must have a minimum of 45 quarter credits in residence at Bastyr University.

In order to receive a license to practice acupuncture in the majority of states a student must earn either an MSA or MSAOM degree, pass the NCCAOM licensing exam and meet any additional state requirements. Several states require Chinese herbal medicine training for licensure (e.g., CA, FL, NM, TX). Students graduating with an MSA degree may need to consider taking the CCHM program as a postgraduate option to meet this requirement.

**Credits do not include prerequisites/corequisites.*

Students may enter their course of study either into the combined BS/MS programs or directly into the MS programs. (The programs described below include required curriculum for the Bachelor of Science programs.)

ELECTIVES

The School of Acupuncture and Oriental Medicine continually develops and adds to its special topics and elective course curriculum. These courses are included in the course description section of the catalog.

The MSA requires completion of nine elective credits. The MSAOM requires completion of six elective credits. For dual track (ND/AOM) students, please see the dual track program requirements listed in the School of Naturopathic Medicine section.

The curriculum tables that follow list the tentative schedule of courses each quarter. Next to each course are the number of credits per course (Crdt.), the lecture hours each week (Lec.), the lab/clinic hours each week (L/C) and the total contact hours for the course over the entire quarter (Tot).

MASTER OF SCIENCE IN ACUPUNCTURE (MSA) AND PREREQUISITES/COREQUISITES 2010-2011

¹Prerequisite/corequisite courses to the MSA program: The MSA curriculum has been designed so students missing one or more of these prerequisites may take a missing course(s) as a corequisite after matriculating at Bastyr University.

²Observation 1-3 can be taken in any of the five quarters preceding intern status.

³Preceptorship can be taken during observation or intern phase, once Observation 1 is completed.

⁴Students are required to complete a total of 36 interim clinic hours. (Usually students staff the shifts they were assigned to in the quarter just ended.) Students register and pay for this shift in their last quarter of attendance.

⁵All students who plan to study in China must take the one-credit required elective Clinic Entry for China in summer quarter of year three, just preceding their China internship. This course may be counted toward the nine required elective credits.

Elective Requirements: MSA

CERTIFICATE IN CHINESE HERBAL MEDICINE (CCHM)

The Chinese herbal medicine certificate program is designed for those seeking comprehensive training in the field of Chinese herbal medicine. This program is a postgraduate course for licensed acupuncturists.

The CCHM curriculum enables students to gain skills and knowledge in the principles of Chinese herbology, including materia medica, formulations, prepared medicines, dispensary, herbal therapeutics and clinical training at the Chinese herbal medicine teaching clinic. The CCHM curriculum covers a minimum of 300 herbs and other therapeutic substances and a minimum of 150 herbal formulas. Case studies are presented to enhance the learning process. Students also gain skills in understanding drug/herb interactions — a very relevant topic for today's practitioners. At the conclusion of the certificate program, graduates have enhanced their academic skills through clinical training and have gained the traditional Chinese medicine diagnostic skills to assess and diagnose syndromes relevant to traditional Chinese medicine. They also are prepared to determine and use appropriate Chinese herbal therapies within the appropriate professional scope of practice.

Prerequisites: The CCHM is a postgraduate course of study that includes both didactic and clinical training.

Applications for the certificate program are taken from licensed acupuncturists throughout the year, with admission starting in summer quarter. An interview may be required.

California licensure requirements: The CCHM curriculum is designed to meet the current Chinese herbal medicine requirement portion for California acupuncture licensure. (The California licensing exam requires comprehensive

training in acupuncture as well as CHM.) Those interested in California licensure should complete the MSAOM program or complete the MSA and return to the CCHM program as a postgraduate student.

China Study: Students in the CHM certificate program may also choose to study in China. (Please see the China Internship section in the master's program description.) Students who choose to do the China internship must take an additional one-credit elective course, Clinic Entry for China, in the summer quarter just preceding their trip.

The curriculum tables that follow list the tentative schedule of courses each quarter. Next to each course are the number of credits per course (Crdt.), the lecture hours each week (Lec.), the lab/clinic hours each week (L/C) and the total contact hours for the course over the entire quarter (Tot).

ACUPUNCTURE AND ORIENTAL MEDICINE DOCTORAL PROGRAM

MISSION STATEMENT

The mission of the Doctor of Acupuncture and Oriental Medicine degree program at Bastyr University is to train qualified practitioners in an integrated clinical approach to oncology and advanced pain management. This is accomplished through: 1) rigorous training in advanced concepts of traditional Chinese medicine (TCM) and biomedical theory and 2) an emphasis on training practitioners to be able to work in collaborative clinical settings. The program is committed to producing graduates who are prepared for lifelong learning in the field.

EDUCATIONAL OBJECTIVES

Graduates of the School of Acupuncture and Oriental Medicine's clinical doctoral program will have the skills to:

- 1) Develop an advanced TCM diagnosis and treatment plan including acupuncture, herbs, TCM nutrition, exercise and home self-care plans for oncology patients and patients with chronic pain, compatible with patients' levels of health and mobility.
- 2) Demonstrate an understanding of the clinical and biochemical rationale for various allopathic oncology and pain treatment protocols.
- 3) Discuss treatment planning issues as part of an integrated medical team with other health care providers or as part of a supervisory team working with master's program AOM students.
- 4) Demonstrate appropriate professional behaviors at all times with patients at various stages of illness.
- 5) Conduct research that demonstrates knowledge and skills in the areas of designing/critiquing approaches to scholarly inquiry utilizing qualitative and/or quantitative methods.

The AOM clinical doctorate is focused on training students in cancer care and advanced pain management and treatment with an emphasis on training in integrated clinical settings. Students develop skills in clinical research and teaching with an in-depth focus on a medical specialty. Courses include advanced Chinese medical classics, advanced acupuncture techniques, Chinese herbs and therapeutics classes. Basic science classes focus on oncology and pain conditions pertaining to pathology and pharmacology. The curriculum also includes nutrition, grand rounds and counseling courses. A capstone research project is required.

The degree title is "DAOM," Doctor of Acupuncture and Oriental Medicine. At the present time, there is no change in scope of practice for DAOM graduates. Students would choose to pursue this training if they are 1) interested in a doctoral degree in traditional Chinese medicine, 2) interested in oncology and management of advanced pain conditions and /or 3) interested in learning to conduct clinical research. This is a clinical doctoral degree, not a PhD program.

CLINICAL COMPONENT

The DAOM program emphasizes clinical training in integrated care settings, with rotations at Bastyr Center for Natural Health, Seattle, Washington; Providence Regional Medical Center, Everett, Washington; and Skagit Valley Hospital Regional Cancer Care Center, Mount Vernon, Washington. In their final quarter of study, DAOM students travel to China to intern at Chengdu and Shanghai Universities of Traditional Chinese Medicine. Students take a one-credit elective course, Clinic Entry for China, in spring quarter of their second year in preparation for the China internships.

There are additional expenses associated with the China internship other than tuition, including travel, lodging and living expenses, and laboratory fees assessed by institutions in China. With planning, these expenses can be covered by financial aid. Bastyr University holds fundraising events to support China studies. DAOM students

may choose to participate in these fundraising events to help defray travel expenses in China. See the DAOM program director for more details.

CAPSTONE PROJECT

As part of the program of study, DAOM students must complete a capstone research project. Capstone projects may take a variety of formats, including clinical or basic research, surveys, translation, systematic review or theoretical analysis. Students are expected to conduct and complete their capstone project, including final acceptance of their capstone paper, by the time all other program requirements are completed. If additional time is needed for completion and all other program requirements are finished, then students will be assessed an additional fee (equal to 1 credit of tuition) on a quarter by quarter basis until completion. Please see OM8199 Capstone Continuation and/or the *Capstone Project Handbook* for further details.

PREREQUISITES

Minimum prerequisites for the doctor of acupuncture and Oriental medicine degree are a master's degree in acupuncture or acupuncture and Oriental medicine or a certificate of acupuncture with 10 years of documented clinical experience. Applicants with AOM master's degrees must have graduated from an ACAOM-candidate or -accredited program.

If doctoral applicants completed their previous AOM training through a certificate program, then at a minimum, they are required to obtain 90 quarter credits (60 semester credits) of undergraduate college work. If applicants do not have a Chinese herb background, then they must complete the Certificate in Chinese Herbal Medicine as a prerequisite. The CCHM can be considered as a corequisite if the didactic portion of the certificate has been completed prior to matriculation in the doctoral program.

Applicants to the doctoral program who need to complete undergraduate hours must include the following didactic coursework:

BASIC PROFICIENCY AND SCIENCE REQUIREMENTS

English literature or composition9 quarter credits
Intermediate algebra 1 course¹
General psychology3 quarter credits
General chemistry
(health science major level)4 quarter credits²

¹Intermediate algebra is not college level math, and the credits will not be included in the 90 undergraduate credit total required.

²Survey level class that covers inorganic chemistry and includes a lab component. Intended for students in allied health majors.

GENERAL EDUCATION REQUIREMENTS

Natural sciences and mathematics 12 quarter credits
Arts and humanities 15 quarter credits
Social sciences 15 quarter credits
Speech communication or
public speaking 3 quarter credits
Electives25 quarter credits¹

¹The number of elective credits may vary depending upon the exact number of quarter credits earned in the other prerequisite categories. Total prerequisite credits must equal at least 90 quarter credits.

Doctoral applicants must have a background in the basic sciences that is comparable to what Bastyr University requires at the master's level. Applicants may be required to take competency exams in the basic sciences in order to determine whether further remediation is required. This would potentially include exams in anatomy and physiology, surface anatomy, biochemistry, Western pathology, pharmacology, microbiology, and Western clinical sciences. If remediation is required, then a student must complete the prerequisites associated with that course, which may include part or all of the following:

Intermediate algebra 1 course

General chemistry (health science major level) . 1 course¹

General biology (with lab) 1 course

General psychology 1 course

Note: The minimum grade for the above prerequisites is a C. The minimum GPA for any past college-level education is a 2.25.

¹Survey level class that covers inorganic chemistry, includes a lab component and is intended for students in allied health majors.

Doctoral applicants who are licensed acupuncturists but do not hold a master's degree in AOM will also be evaluated for competency with the master's level AOM curriculum. An applicant's bachelor's degree will be assessed for meeting all general education requirements. Challenge exams covering material in upper level AOM courses may be required in order to assess whether further remediation is required. It is entirely possible that some returning practitioners who do not have a master's degree in AOM will need to take a year or more to complete the master's level curriculum before advancing to the doctoral level curriculum. The goal of the admissions process is to provide a supportive and respectful atmosphere for returning practitioners while maintaining rigorous academic standards.

The curriculum table that follows lists the tentative schedule of courses each quarter. Next to each course are the number of credits per course (Crdt.), the lecture hours each week (Lec.), the lab/clinic hours each week (L/C) and the total contact hours for the course over the entire quarter (Tot). This table reflects a full-time course of study. A part-time option is also available.

Curriculum and course changes in the 2010-2011 Bastyr University Catalog are applicable to students entering during the 2010-2011 academic year. Please refer to the appropriate catalog if interested in curriculum and courses required for any other entering year.

NATUROPATHIC MEDICINE/ACUPUNCTURE AND ORIENTAL MEDICINE DUAL TRACK

Students in the Bastyr University naturopathic medicine program who are academically in good standing have the opportunity to apply to the Master of Science in Acupuncture (MSA) or the Master of Science in Acupuncture and Oriental Medicine (MSAOM) program in October of their second year of the four-year track. This requires a formal application to the acupuncture and Oriental medicine program through the admissions department, followed by a joint interview by both the AOM and ND schools. Please see page 87 in the “School of Naturopathic Medicine” for a complete program description for dual track studies.

FACULTY

The program’s foundation of teaching, clinical supervision, and AOM strategic planning rests on 11 full-time faculty members, assisted by approximately 25 adjunct AOM academic and clinical faculty, as well as seven basic sciences and nutrition faculty.

WITH HIGHEST DEGREES, LICENSES OBTAINED AND DEPARTMENTAL AFFILIATIONS

School of Natural Health Arts and Sciences

ADMINISTRATORS OF THE SCHOOL OF NATURAL HEALTH ARTS AND SCIENCES

Gerald Porter, PhD, Dean
Debra Boutin, MS, RD, Chair, Nutrition and Exercise Science
Lynelle Golden, PhD, Chair, Basic Sciences
Charles E. Smith, PhD, Chair, Counseling and Health Psychology
Tiffany Reiss, PhD, Program Director, Exercise Science and Wellness
Hatha Gbedawo, ND, Cadaver Anatomy Program Director
Jeanne Garthwaite, Program Supervisor, Nutrition and Exercise Science
Andrea Larson, Program Coordinator, Basic Sciences
Eileen Newsom, Program Coordinator, Counseling and Health Psychology
Chris Vires, Manager, Lab Services

The School of Natural Health Arts and Sciences is comprised of the Department of Basic Sciences, the Department of Counseling and Health Psychology, the Department of Nutrition and Exercise Science, laboratory services, and the cadaver anatomy program.

The mission of the School of Natural Health Arts and Sciences is to facilitate the development of a scientific foundation for students to investigate the individual and the natural world. We inspire students to reach their full potential in education, research and health care.

The vision of the School of Natural Health Arts and Sciences is to produce leaders in the art and science of natural health through the development of relevant and innovative programs that build on a foundation of science and integrate mind, body and spirit.

The core values of the School of Natural Health Arts and Sciences are:

To practice critical and integrative thinking.

To honor and celebrate diversity.

To promote professional ethics and behavior.

To communicate respectfully.

To foster a lifelong quest for knowledge.

To pursue excellence.

The Department of Basic Sciences offers a Bachelor of Science degree with a major in integrated human biology. The department also provides science curriculum for most graduate and undergraduate programs. It also houses the University's laboratory services and the cadaver anatomy program. The courses offered by this department emphasize the scientific knowledge required for success in each of these programs.

The Department of Counseling and Health Psychology offers a Bachelor of Science degree with a major in health psychology with tracks in either health psychology and human biology or general health psychology. The department also provides coursework and training for the Master of Science degree in Nutrition and Clinical Health Psychology (see page 63 for details), and counseling coursework and training for the School of Naturopathic Medicine and the School of Acupuncture and Oriental Medicine.

The Department of Nutrition and Exercise Science offers a Bachelor of Science degree with a major in nutrition, a major in nutrition and exercise science, a major in exercise science and wellness and a major in nutrition and culinary arts. In conjunction with the Bachelor of Science in nutrition, the department offers a Didactic Program in Dietetics (DPD) that meets the American Dietetic Association (ADA) academic requirements leading to eligibility to apply for a dietetic internship. There are three Master of Science offerings in the Department of Nutrition and Exercise Science: the MS in Nutrition (Research), the MS in Nutrition with Didactic Program in Dietetics (DPD) and the MS in Nutrition and Clinical Health Psychology (CHP). The Dietetic Internship based on the ADA's standards of education is offered to provide performance requirements for entry-level dietitians through supervised practice. The department also provides coursework for students in the School of Naturopathic Medicine and the School of Acupuncture and Oriental Medicine.

Department of Basic Sciences

The Department of Basic Sciences offers a Bachelor of Science degree with a major in integrated human biology. The department also provides courses for most of Bastyr University's programs. The basic sciences curriculum is designed to meet the specific competencies and learning objectives within each program.

The basic sciences department's mission is to promote an optimal learning environment in which Bastyr University students can develop a strong foundation of knowledge and skills that will serve their continued development in their chosen fields of endeavor.

The basic sciences faculty encourages and expects students to advance beyond the simple learning of scientific facts and to systematically integrate the information from basic science disciplines into a unified model of human organization and function. This educational scheme requires students to assume an active role in the learning process and encourages them to adopt this inquisitive behavior for a lifetime. Problem solving, clinical cases and examples are an integral part of the basic science curriculum. This educational process is an expression of Bastyr University's basic philosophy of a holistic approach to human behavior, health and therapeutics. The basic sciences faculty encourages students to become totally absorbed in an integrated approach to learning and understanding. Instructors are readily available to facilitate this process on an individual basis.

BASIC SCIENCE COURSES WITHIN OTHER DEPARTMENTS

Basic science courses within the School of Acupuncture and Oriental Medicine include Anatomy and Physiology, Organic Chemistry, Microbiology, Pathology, and Pharmacology. These courses serve as a foundation for an understanding of the human body and provide students with the necessary skills and competencies to pursue coursework in the AOM school. In addition, a portion of the AOM Anatomy and Physiology course is taught in Bastyr's cadaver anatomy lab, giving students the unique opportunity to study anatomy in greater depth.

Basic science courses within the School of Naturopathic Medicine (naturopathic medicine program) emphasize Anatomy, Physiology, and Biochemistry as the foundation for further basic sciences and all clinical courses. Further courses include Histology, Pathology, Pharmacology, Immunology, Infectious Diseases, Embryology, Neuroscience and Fundamentals of Research Design. Basic science courses within the herbal sciences program include Anatomy and Physiology, Organic Chemistry, Biochemistry, Microbiology, Pharmacology, and Disease Processes. These courses serve as a foundation for an understanding of the human body and provide students with the necessary skills and competencies to pursue coursework in their chosen field.

Basic science courses within the School of Nutrition and Exercise Science include Anatomy and Physiology, Organic Chemistry, Biochemistry, and Disease Processes. (Anatomy/Physiology, Organic Chemistry and Biochemistry are all prerequisite courses for the master's program.)

Basic sciences courses within the clinical health psychology program include Anatomy and Physiology, Living Anatomy, Organic Chemistry, and Biochemistry.

The department also offers science courses that satisfy prerequisite requirements, including courses in General Chemistry, Organic Chemistry, College Algebra/Precalculus and Physics.

LAB SERVICES

Laboratory Services provides laboratory set-up and support for all laboratory courses in all academic programs. Laboratory Services also trains TAs and work-study students for academic and research labs and maintains safety oversight of all laboratories.

BACHELOR OF SCIENCE WITH A MAJOR IN INTEGRATED HUMAN BIOLOGY

The innovative integrated human biology program is designed to connect concepts from physiology, anatomy, cell biology and genetics rather than separating the concepts into courses by discipline. This distinct approach allows students to achieve a unified understanding of the structure and function of the human body. The curriculum encourages both individual and collaborative learning and fosters the development of communication skills. The program emphasizes scientific process and research skills through inquiry-based labs

and research-methods courses. Interested students will also have an opportunity to work with a faculty mentor to complete an original research project. Students may also take elective coursework in psychology, nutrition, herbal sciences and other disciplines that provide a broad perspective on human health.

The integrated human biology degree provides a firm foundation in biological science and fosters the development of critical thinking skills that are an excellent foundation for careers in medicine and research

ADMISSION

For general information on the admissions process, please refer to the admissions section in this catalog. The information below refers only to the Bachelor of Science with a Major in Integrated Human Biology.

PREREQUISITES

Entering undergraduates must have at least a 2.5 cumulative GPA with a grade of C or better in basic proficiency and science requirement courses. Prior to enrolling, students must have completed 90 quarter credits (60 semester credits), including a minimum number of credits in the specific proficiencies and science requirements listed below. Students may apply to the program while completing prerequisite coursework.

BASIC PROFICIENCY AND SCIENCE REQUIREMENTS

- English 10 credits
 - Pre-calculus 5 credits
 - General biology (with lab) 15 credits
 - General chemistry (science major level with lab) 15 credits
 - Organic chemistry (science major level with lab)¹ 10 credits
 - Psychology 3 credits
- ¹ At least one of the organic chemistry courses must include a lab.

GENERAL EDUCATION REQUIREMENTS

- Arts and humanities 15 credits
 - Social Sciences 9 credits
 - Speech communication or public speaking 3 credits
 - Electives (Intro to Nutrition recommended) 5 credits¹
- These prerequisites are consistent with the Washington state Biology Major Related Program Direct Transfer Agreement (DTA/MRP) as long as students include appropriate organic chemistry in their science coursework.
- ¹The number of elective credits earned may vary depending upon the exact number or quarter credits earned in other prerequisite categories. Total prerequisite credits must equal 90 quarter credits.

GRADUATION REQUIREMENTS

Upper-division Bachelor of Science students enrolled at Bastyr University must complete a minimum of 180 credits (inclusive of credits transferred into Bastyr). To graduate, Bachelor of Science students must have a minimum 2.0 grade point average with a minimum of 45 credits in residence at Bastyr University.

The curriculum tables that follow list the tentative schedule of courses each quarter. Next to each course are the number of credits per course (Crdt.), the lecture hours each week (Lec.) and the lab/clinic hours each week (L/C).

CADAVER ANATOMY

Bastyr University offers a unique opportunity for students and licensed health care practitioners to review anatomy and study the underlying structures of the human body through its Cadaver Anatomy program. Each

Cadaver Anatomy course is designed to meet the specific needs of the students attending. There are a variety of options taught by highly experienced, qualified instructors in the Bastyr University cadaver anatomy lab. The course is structured to enhance the student or practitioner's knowledge of anatomy and physiology, as well as kinesiology. Cadaver Anatomy courses specifically benefit students with licensure or who are in training for the following programs: massage therapy, rolfing, physical therapy, acupuncture, midwifery, sports medicine, rehabilitation medicine, nursing, dental hygiene and allied health care fields. Cadaver Anatomy is also recommended for those individuals who teach such subjects as yoga, massage and acupuncture.

PREREQUISITES

It is highly recommended that the prospective student have preparation in anatomy and physiology. For further information contact the cadaver anatomy program director at 425.602.3138.

CURRICULUM

In all courses the following topics are discussed and demonstrated in the lab:

- The muscles and structures of the back.
- The upper extremity.
- The brain and structures of the head and neck.
- The thorax and abdomen.

Department of Counseling and Health Psychology

The Department of Counseling and Health Psychology offers a Bachelor of Science degree with a major in health psychology. The department also offers a Master of Science degree in nutrition and clinical health psychology, in conjunction with the Department of Nutrition and Exercise Science (for details, see the description under the graduate nutrition program, page 63), as well as providing coursework and training in counseling for the School of Naturopathic Medicine and the School of Acupuncture and Oriental Medicine.

The Department of Counseling and Health Psychology supports the mission of Bastyr University by providing leadership to enhance the psychological health and well-being of the human community through education, research and community mental health care. Within the study of counseling and health psychology, students apply wellness and preventive approaches to complementary health care practices.

BACHELOR OF SCIENCE WITH A MAJOR IN HEALTH PSYCHOLOGY

The curriculum in the health psychology program explores the integration of mind, body and spirit. The program is designed to enhance students' capabilities to blend the study of psychology with health, the healing arts, wellness and fitness. This Bachelor of Science degree also provides a solid undergraduate foundation for pursuing both professional studies and graduate degrees. Graduates are prepared to critically evaluate the scientific literature and to incorporate current research and advances in health psychology as they relate to the fundamental principles of health and healing.

The health psychology track system provides students with options that enable them to tailor their undergraduate experience to meet their needs more fully. Students in the health psychology major enroll in either the health psychology or the psychology and human biology (psychology premed) track. Students in the health psychology major, human biology/pre-med track have the option of participating in the summer massage training program.

ADMISSION

For general information on the admissions process, please refer to the admissions section in this catalog. The information below refers only to the Bachelor of Science with a Major in Health Psychology with two tracks: general health psychology, and psychology and human biology/psychology pre-medicine.

PREREQUISITES

Entering undergraduates must have at least a 2.25 cumulative GPA with a grade of C or better in basic proficiency and science requirement courses. Prior to enrolling, students must have completed 90 quarter credits (60 semester credits), including a minimum number of credits in specific proficiencies and general education requirements. Students may apply to the program while completing prerequisite coursework.

BASIC PROFICIENCY AND SCIENCE REQUIREMENTS

English literature or composition9 quarter credits

General psychology3 quarter credits

Intermediate algebra¹ 1 course

General biology (with lab)4 quarter credits

General chemistry (science major level

with lab)8 quarter credits²

¹Intermediate algebra is not college level and the credits taken will not transfer in toward degree completion. College algebra is highly recommended and will become the required prerequisite beginning fall 2012.

²These credits are required for the psychology and human biology track only.

GENERAL EDUCATION REQUIREMENTS

Natural science and mathematics 12 quarter credits

Arts and humanities 15 quarter credits

Social sciences 15 quarter credits

Speech communication or public speaking³ quarter credits

Electives29 quarter credits¹

¹The number of elective credits may vary depending upon the exact number of quarter credits earned in the other prerequisite categories. Total prerequisite credits must equal at least 90 quarter credits.

GRADUATION REQUIREMENTS

Upper division BS students enrolled at Bastyr University must complete a minimum of 180 credits (inclusive of credits transferred into Bastyr). To graduate, BS students must have a minimum 2.0 grade point average with a minimum of 45 credits in residence at Bastyr University.

The curriculum tables that follow list the tentative schedule of courses each quarter. Next to each course are the number of credits per course (Crdt.), the lecture hours each week (Lec.) and the lab/clinic hours each week (L/C). (Students should note that changing tracks may jeopardize finishing their degree program in two years.)

SUMMER MESSAGE INTENSIVE

Bastyr University and the Bellevue Massage School Center for Healing Arts offer a summer massage training program that allows students enrolled in the health psychology major, human biology/pre-med track to apply coursework taken at Bastyr University toward the Washington state requirements for massage licensure. Students interested in further information may meet with their academic advisor in the registrar's office or with their department's program supervisor to discuss the program availability and the course prerequisites. This course cannot be audited.

DEPARTMENT OF MIDWIFERY

ADMINISTRATORS OF THE DEPARTMENT OF MIDWIFERY

Suzy Myers, LM, CPM, MPH, Chair

Mary Yglesia, Program Supervisor

MISSION STATEMENT

The mission of the Department of Midwifery is to educate and inspire leaders in the profession of midwifery.

PROGRAM OBJECTIVES

The Department of Midwifery educates midwives to conform to national and international standards of midwifery competence and to:

- practice autonomously in a variety of settings, which may include the home, birth centers, clinics and hospitals.
- promote birth as a normal process requiring a minimum of intervention.
- function within the health care system, consulting and referring appropriately.
- qualify for licensure or registration in a variety of jurisdictions, including certification by the North American Registry of Midwives (NARM).
- promote midwifery through state, provincial and national professional organizations, the political process, research activities and policy development.
- work in partnership with the women they serve in a way that promotes personal responsibility, validates knowledge and experience, and encourages life-long learning.
- promote the Midwives Model of Care™.

PROGRAM OVERVIEW

Bastyr University is pleased to offer a Master of Science in Midwifery and a combined Bachelor/Master of Science in Midwifery. The midwifery program at Bastyr is unique. Based on the combined expertise of Bastyr University and the former Seattle Midwifery School, the department has developed a rigorous, proven curriculum using state-of-the-art technologies and an extensive network of clinical sites around the globe.

Bastyr's direct-entry midwifery program is designed to prepare students in all aspects of midwifery care based on the competencies established by the Midwives Alliance of North America (MANA). This robust program is intended for students with little or no background in midwifery. Upon completion of the three-year program, students are eligible to sit for an examination to become licensed as a midwife in Washington or other states or provinces and to become nationally certified by the North American Registry of Midwives (NARM) as a Certified Professional Midwife. In the United States, direct-entry midwives attend mainly out-of-hospital births.

The department welcomes students who have previous midwifery training or practicing midwives who have not attended a formal midwifery educational program and/or want to obtain a degree. All students in the program must meet the transfer credit requirements and complete at least two-thirds of the program and all of the practicum while enrolled at Bastyr.

MIDWIFERY MASTER'S, COMBINED BACHELOR'S/MASTER'S PROGRAM

The Master of Science in Midwifery is available to students who already hold a bachelor's degree and who complete the program prerequisites prior to entering the program. The combined Bachelor/ Master of Science in Midwifery option is available to students who have completed at least two years at the undergraduate level (60 semester or 90 quarter credits), including the basic science and proficiency prerequisites and general education requirements.

LOW RESIDENCY MODEL

One of the most exciting aspects of this program is its low-residency model. This hybrid delivery system allows students to remain in their communities and commute to the Bastyr campus three times for onsite learning each quarter. When not physically on campus, students use the Internet classroom to correspond with classmates and instructors, participate in discussions, complete homework assignments, and take tests.

Each cohort of students (determined by year of entry) attends the same onsite weeks together, which allows for the face-to-face learning experience that is vital to midwifery training and allows students to build strong relationships with classmates and faculty.

When not attending classes onsite, students are engaged in learning activities in the virtual classroom using our online learning system as a guide and point of interaction. Learning activities include extensive reading, video viewing, research projects, worksheets, quizzes and online discussions. Students need to be self-directed, self-motivated and have good time management skills in order to be successful in this low-residency program.

MIDWIFERY CURRICULUM

The midwifery curriculum is enhanced by studies in related fields such as epidemiology, nutrition, pharmacology, genetics, embryology, counseling and education. The Midwifery Care courses are the foundation of the program. All courses build skills necessary for the practice of midwifery through the use of case questions, skills practice labs, role-plays, discussion, student presentations and research projects. Clinical skills and judgment capabilities are honed during practicum with practicing midwives. The midwifery program addresses both the art and science of midwifery by integrating theory with clinical experience.

CLINICAL EXPERIENCE

The Department of Midwifery places all students in qualified clinical training sites. The program replicates the age-old apprenticeship model, where students work side-by-side with experienced preceptors who are licensed midwives and other professionals. Department staff work closely with each student in the process of arranging these clinical placements. Students need to live within a one-hour commute of a qualified clinical faculty and must be prepared to relocate temporarily if the community where they reside does not have adequate clinical training opportunities. This requires flexibility and the support of the student's family, as it may mean separation and economic challenges.

The clinical practicum begins in the third quarter of the program. Students start off very slowly, primarily observing for the first few months. What students are able to do in their preceptorships mirrors what they are learning in the classroom. Basic clinical skills, such as performing blood draws, IVs, physical/ vaginal exams, pap smears, neonatal resuscitation, etc., are all taught in the classroom first. Students will be required to obtain training in adult CPR, have a TB test, be rubella immune and pass a criminal background check.

Students may obtain their clinical experience in gynecology/family planning clinics, prenatal/postpartum clinics, homebirth settings, birth centers and hospitals in North America as well as overseas. (See Graduation Requirements for more specifics about clinical training requirements.) Students may work with licensed midwives, certified professional midwives, certified nurse-midwives, nurse practitioners, foreign midwives,

naturopathic doctors, physician assistants or physicians. Clinical faculty must be practicing legally and have sufficient obstetrical/gynecological volume to adequately instruct, supervise and evaluate students' clinical training. The Department of Midwifery screens and approves all potential clinical faculty.

ADMISSION

For general information on the admissions process, please refer to the admissions section in this catalog. The information below refers only to the Department of Midwifery Master of Science in Midwifery and Bachelor/Master of Science in Midwifery degree.

PREREQUISITES

A minimum cumulative GPA of 2.25 is required to be considered for admission. A grade of C or better is required in all science prerequisites. For students applying for the BS/MS program, a grade of C or better is also required in all basic proficiency courses. Students may apply to the program while completing prerequisite coursework, but all prerequisites must be completed prior to enrollment in the program.

MASTER OF SCIENCE IN MIDWIFERY

(FOR APPLICANTS WITH A BACHELOR'S DEGREE IN ANY FIELD)

Psychology 3 quarter credits
Introductory nutrition 3 quarter credits
General biology w/ lab 4 quarter credits
General chemistry w/ lab
(allied-health-major level)..... 4 quarter credits
Microbiology 4 quarter credits
Anatomy and physiology series 8 quarter credits
Intermediate algebra Required Competency
Labor support course/doula training
(DONA or ALACE approved) not a college course
Childbirth educator training
(ICEA or Lamaze approved) not a college course

BACHELOR/MASTER OF SCIENCE IN MIDWIFERY

(FOR UNDERGRADUATE APPLICANTS)

BASIC SCIENCE AND PROFICIENCY PREREQUISITES

English literature or composition 9 quarter credits
General psychology 3 quarter credits
Public speaking 3 quarter credits
Introductory nutrition 3 quarter credits
General biology w/ lab
(science-major level)..... 4 quarter credits
General chemistry w/ lab
(allied-health-major level)..... 4 quarter credits
Microbiology 4 quarter credits
Anatomy & physiology series 8 quarter credits
Intermediate algebra¹ Required Competency
Labor support course/doula training
(DONA or ALACE approved) not a college course
Childbirth educator training
(ICEA or Lamaze approved) not a college course

¹Intermediate algebra is not college level and the credits taken will not transfer in toward degree completion. College algebra is highly recommended and will become the required prerequisite beginning fall 2012.

GENERAL EDUCATION REQUIREMENTS

Natural science and mathematics 8 quarter credits
Social sciences 15 quarter credits

Arts and humanities..... 15 quarter credits
 Electives14 quarter credits¹

¹The number of elective credits may vary depending on the exact number of quarter credits earned in the other prerequisite categories. Total prerequisite credits must equal at least 90 quarter credits.

For BS/MS applicants, please visit the Bastyr University undergraduate admissions page for information about transfer credits at www.bastyr.edu/admissions/info/ugtg.asp.

GRADUATION REQUIREMENTS

Graduates must demonstrate proficiency in the midwifery program Core Competencies as shown by:

- satisfactory completion of all didactic and clinical courses with a grade of 80 percent or better. (Some non-core courses can be passed with a grade of 75 percent or better.)
- satisfactory completion and presentation of the Master’s Research Project.
- satisfactory completion of all sections of the comprehensive written and clinical exams in the last year of the program.
- completion of 40 hours of community service for the University or the profession of midwifery.
- demonstration of the qualities of a professional midwife as determined by the Student Progress Committee.

Graduates must also meet the following minimum clinical requirements:

Participation in 60 births¹, including at least:

- 30 births in which the student functions in the role of primary midwife under supervision
- 20 births in which the student is actively involved in the client’s care
- 10 births in which the student is observing
- 30 births in an out-of-hospital setting
- 25 births in the U.S. or the student’s country of origin

¹An additional 40 observed births (total of 100 births) are required for Washington state licensure.

Participation in 1,500 hours (the equivalent of 50 credits) of clinical work, including at least:

- 400 hours of intrapartum experience
- 800 hours of clinic time in prenatal, postpartum and gynecological care
- Participation in 720 client contacts, including at least:
 - ⊙ 300 prenatal exams
 - ⊙ 100 postpartum visits
 - ⊙ 50 newborn exams
 - ⊙ 50 follow-up newborn exams
 - ⊙ 50 gynecological exams

Clinical training for at least one year at a minimum of two clinical sites in the U.S. or the student’s home country. All clinical training is supervised by adjunct clinical faculty who are practicing legally in their region and incorporates:

- at least one preceptorship in which the clinical faculty member is a midwife.
- one site for at least six months and 15 births (involved and supervised primary) in an out-of-hospital setting.
- one site for at least three months and 10 births.
- satisfactory completion of all levels of clinical evaluation.
- demonstration of continuity of care by providing these continuous care services to at least 10 women:
 - ⊙ four prenatal visits
 - ⊙ three postpartum visits
 - ⊙ In three of the 10 cases the student must function as primary midwife under supervision.

The curriculum table that follows lists the tentative schedule of courses each quarter. Next to each course are the number of credits per course (Crdt.), the approximate hours spent in the onsite and virtual classroom with faculty each quarter (Clsm), the lab/practical hours each quarter (L/P), and the total contact hours for the course over the entire quarter.

Department of Nutrition and Exercise Science

The mission of Bastyr University's Department of Nutrition and Exercise Science is to promote well-being, through food and activity, that nourishes and sustains the individual, the community and the earth. The department's vision is to be the leader in advancing a holistic view of nutrition and exercise through excellence in education, research and clinical practice.

The Department of Nutrition and Exercise Science is founded upon the holistic origins of the Greek word *diaira* (diet), "made of life," and Latin *diaeta*, "daily fare." The department emphasizes the study of the physiological, biochemical, socioeconomic, political and psychological aspects of human nutrition and physical activity.

The Department of Nutrition and Exercise Science prepares graduates to critically evaluate scientific literature and to incorporate current research and advances in nutrition and exercise science. The nutrition program within the Department of Nutrition and Exercise Science is unique in its emphasis on whole foods and multicultural, political and ecological dimensions of diet and world food supply within the overall context of basic, clinical and community nutrition. These aspects of nutrition, blended with biochemistry and physiology, reflect the University's natural health sciences philosophy.

The concept of food as medicine and the concept of diet as a critical component in healing are fundamental to natural therapeutics, optimal health and whole-person healing. The exercise science and wellness program approaches health and wellness from a holistic perspective unique to Bastyr University. This focus on overall wellness, combined with the science behind it, provides students with a broad education in health and wellness from a preventative viewpoint.

The Department of Nutrition and Exercise Science offers a Bachelor of Science degree with a major in nutrition, a major in exercise science and wellness, a major in nutrition and culinary arts, and a major in nutrition and exercise science. In conjunction with the BS in Nutrition, the department offers a Didactic Program in Dietetics (DPD) that meets the American Dietetic Association (ADA) academic requirements leading to eligibility to apply for a dietetic internship.

There are three Master of Science offerings in the Department of Nutrition and Exercise Science: the MS in Nutrition (Research), the MS in Nutrition with Didactic Program in Dietetics (DPD) and the MS in Nutrition and Clinical Health Psychology (CHP).

In addition, the Dietetic Internship based on the ADA's standards of education is offered to provide performance requirements for entry-level dietitians through supervised practice.

The following programs are offered by the Department of Nutrition and Exercise Science:

REQUIRED ABILITIES/SKILLS FOR NUTRITION/EXERCISE SCIENCE PROGRAM STUDENTS

A nutrition and/or exercise science student must be able to demonstrate appropriate communication skills, intellectual-conceptual, integrative and quantitative abilities, and behavioral and social maturity. A student should be able to perform in a reasonably independent manner.

Communication: A student must be able to communicate effectively and sensitively with others, including with patients if the student is in a clinical program. Ability to communicate respectfully and thoughtfully, even in situations of disagreement or stress in the classroom or clinic, is important. Communication includes not only speech but reading and writing. The student must be able to communicate effectively and efficiently in both oral and written form.

Intellectual-Conceptual, Integrative and Quantitative Abilities: These abilities include measurement, calculation, reasoning, analysis and synthesis. Problem solving, which is a critical skill for nutritionists or exercise scientists in both clinical and research settings, requires all of these intellectual abilities.

Behavioral and Social Attributes: A student must possess the emotional health required for full utilization of her/his intellectual abilities, the exercise of good judgment, the prompt completion of all responsibilities attendant to the academic and clinical program, and the development of mature, sensitive and effective relationships with others. A student must be able to tolerate physically taxing work loads and to function effectively under stress. He/she must be able to adapt to changing environments, to display flexibility and to learn to function in the face of uncertainties inherent in both clinical and research problems the student may face. Compassion, integrity, concern for others, interpersonal skills, interest and motivation are all personal qualities that are assessed during the admissions and education processes.

UNDERGRADUATE PROGRAMS

BACHELOR OF SCIENCE WITH A MAJOR IN NUTRITION

The Bachelor of Science degree with a major in nutrition prepares students for positions such as dietetic technicians and nutrition educators under the supervision of health care professionals, or for graduate work in related health science fields.

ADMISSIONS

For general information on the admissions process, please refer to the admissions section in this catalog. The information below refers only to the nutrition undergraduate programs.

PREREQUISITES

Entering undergraduates must have at least a 2.25 cumulative GPA with a grade of C or better in all basic proficiency and science requirement courses. Prior to enrolling, students must have completed 90 quarter credits (60 semester credits), including a minimum number of credits in the basic proficiency, science and general education categories. Surplus credits not used to satisfy basic proficiency or science requirements may be applied to the appropriate general education requirements.

Note: Students may apply to the program while completing prerequisite coursework.

BASIC PROFICIENCY AND SCIENCE REQUIREMENTS

English literature or composition 9 quarter credits
 General psychology 3 quarter credits
 Intermediate algebra¹ 1 class
 General chemistry (science-major
 level with lab) 8 quarter credits
 General biology (with lab) 4 quarter credits
 Introductory nutrition
 (should include metabolism) 5 quarter credits

¹Intermediate algebra is not college level and the credits taken will not transfer in toward degree completion. College algebra is highly recommended and will become the required prerequisite beginning fall 2012.

GENERAL EDUCATION REQUIREMENTS

Natural science and mathematics 12 quarter credits
 Arts and humanities 15 quarter credits
 Social sciences 15 quarter credits
 Speech communication or
 public speaking 3 quarter credits
 Electives 16 quarter credits¹

¹The number of elective credits may vary depending upon the exact number of quarter credits earned in the other prerequisite categories. Total prerequisite credits must equal at least 90 quarter credits.

GRADUATION REQUIREMENTS

Upper division BS students enrolled at Bastyr University must complete a minimum of 180 credits (inclusive of credits transferred into Bastyr). To graduate, BS students must have a minimum 2.0 grade point average with a minimum of 45 quarter credits in residence at Bastyr University.

The curriculum table that follows lists the tentative schedule of courses each quarter. Next to each course are the number of credits per course (Crdt.), the lecture hours each week (Lec.) and the lab/clinic hours each week (L/C).

Curriculum and course changes in the 2010-2011 Bastyr University Catalog are applicable to students entering during the 2010-2011 academic year. Please refer to the appropriate catalog if interested in curriculum and courses required for any other entering year.

BACHELOR OF SCIENCE WITH A MAJOR IN EXERCISE SCIENCE AND WELLNESS

The exercise science and wellness program provides a strong foundation in traditional exercise physiology, supplemented by study in nutritional, mental and emotional aspects of wellness. One of the primary goals of the program is to prepare graduates to sit for the certification examinations of the American College of Sports Medicine and the National Strength and Conditioning Association. This preparation is accomplished through the rigorous scientific study and subsequent application of physiological changes and adaptations that occur during various modes of physical activity in clinical, preventative and performance settings.

A graduate of the exercise science and wellness major may develop a career as cardiac/pulmonary rehabilitation physiologist, exercise physiologist, group exercise coordinator, exercise specialist, corporate wellness manager, strength and conditioning coach or personal trainer.

ADMISSIONS

The admissions standards and prerequisites are the same as those outlined on page 56 for the undergraduate nutrition program.

GRADUATION REQUIREMENTS

Please see the graduation requirements for the undergraduate nutrition program on page 56.

BASIC SCIENCES CURRICULUM WITHIN EXERCISE SCIENCE

Basic science courses within the exercise science program include Anatomy and Physiology, Living Anatomy, Organic Chemistry, and Biochemistry. Please see page 46 for more details about this curriculum in our undergraduate programs.

COUNSELING AND HEALTH PSYCHOLOGY CURRICULUM WITHIN EXERCISE SCIENCE

Students in the Bachelor of Science with a Major in Exercise Science and Wellness (BSExSc) are required to take the following:

- PS3128: Psychology of Sports and Exercise - 2 credits

- PS4112: Creating Wellness - 3 credits

The curriculum table that follows lists the tentative schedule of courses each quarter. Next to each course are the number of credits per course (Crdt.), the lecture hours each week (Lec.) and the lab/clinic hours each week (L/C).

Total Requirements	90	65	62

¹General elective courses may be from any program or department. There is also a graduation requirement of Advanced First Aid and CPR.

²Two one-credit activity courses are required (e.g. tai chi, aerobics, yoga, tennis, etc.).

Curriculum and course changes in the 2010-2011 Bastyr University Catalog are applicable to students entering during the 2010-2011 academic year. Please refer to the appropriate catalog if interested in curriculum and courses required for any other entering year.

BACHELOR OF SCIENCE WITH A MAJOR IN NUTRITION WITH DIDACTIC PROGRAM IN DIETETICS (BSN/DPD)

The Didactic Program in Dietetics (DPD) is a term used by the American Dietetic Association (ADA) to describe a program that is accredited by the Commission on Accreditation for Dietetics Education (CADE), which meets academic competencies. Currently, in the United States, the registered dietitian (RD) is the only

professional credential in nutrition recognized by all 50 states and with reciprocity in five countries. Verified completion of the DPD and a minimum of a bachelor's degree from a regionally accredited institution enable a student to apply for a dietetic internship, to write the registration examination to become an RD after completing the Dietetic Internship and to become an RD after successfully passing the registration examination.

The mission of the program is to graduate students who will promote nutrition and well-being through food that sustains the individual, the community and the earth.

ADMISSION REQUIREMENTS AND PREREQUISITES

Application for admission to the BSN/DPD at Bastyr University is separate from application to the degree programs. BSN/DPD application packets can be requested from the Bastyr University Office of Admissions at the beginning of spring quarter between the junior and senior year. Acceptance requires the following prerequisites *in addition* to those for the Bachelor of Science with a Major in Nutrition: public speaking (if general or speech communication, then must include public speaking practice independent of any matriculation agreement standards) and current enrollment at Bastyr University. To be eligible for acceptance into the BSN/DPD, students must have completed their junior year and must meet all prerequisites for the BSN completion degree. To be competitive for admission into the BSN/DPD, the following GPAs are required (cumulative from all colleges and universities attended):

Cumulative overall GPA – total of all courses ≥ 3.00

Cumulative science GPA – biology, organic chemistry, anatomy and physiology, and biochemistry courses only ≥ 3.00

Cumulative nutrition GPA – all nutrition courses ≥ 3.00

A minimum of 150 hours of volunteer and/or paid work experience is required prior to being admitted to the BSN/DPD. Documentation of hours with signature of sponsor is required. Specific information and forms for documenting these experiences is available from the admissions department.

The following is a breakdown of the volunteer and/or paid work hours required for admission:

Minimum of 50 hours clinical nutrition (in-patient hospital and/or long-term care)

Minimum of 50 hours food service management

Minimum of 50 hours community nutrition

ADMISSION TO CLINICAL TRAINING

In order to enroll in clinical dietetic practicum, students must have successfully completed TR4207, RD4302, must be enrolled in TR4303 as a corequisite, and must have met the criteria for behavior and attitude as outlined in the *Nutrition Student Clinician Handbook*. Students are also required to pass a national criminal background check (see *Academic Policy and Procedure Manual* for more information) and show proof of completion of a list of activities prior to the first scheduled clinic shift.

GRADUATION REQUIREMENTS

In their final year, it is recommended that BSN/DPD students meet with the DPD director for academic advising each quarter prior to registration to discuss academic progress and as part of the dietetic internship application process. A total of 300 hours of volunteer and/or paid work experience is required to graduate from the BSN/DPD (inclusive of the 150 hours obtained prior to admission to the program). The following is a breakdown of those hours:

Total of 100 hours clinical nutrition (in-patient and/or long-term care direct patient contact)

Total of 100 hours food service management

Total of 100 hours community nutrition

Leadership by participation in the Bastyr University Student Nutrition Association (SNA) is strongly encouraged, and becoming a student member of the American Dietetic Association (ADA) is required.

A signed verification statement is required to enable students to be eligible for entry into an accredited dietetic internship. In order to receive a signed verification statement, 300 nutrition-related volunteer and/or paid hours must first be completed, signed, and verified by the DPD director. Second, students must pass the DPD exit exam with a passing grade of 70 percent. Third, students must complete all the required coursework with a

graduating cumulative GPA of ≥ 3.0 . Completion of the DPD program does not guarantee acceptance into a dietetic internship. All other policies and procedures related to the BSN/DPD program are located on MyBU under the Department of Nutrition and Exercise Science.

ACCREDITATION

The BS Didactic Program in Dietetics (DPD) at Bastyr University is accredited by the Commission on Accreditation for Dietetics Education (CADE) (120 South Riverside Plaza, Suite 2000, Chicago, IL, 60606-6995, 800.877.1600, ext. 5400, education@eatright.org), a specialized accrediting body recognized by the U.S. Department of Education and the Council for Higher Education Accreditation.

The curriculum table that follows lists the tentative schedule of courses each quarter. Next to each course are the number of credits per course (Crdt.), the lecture hours each week (Lec.) and the lab/clinic hours each week (L/C).

BACHELOR OF SCIENCE WITH A MAJOR IN NUTRITION AND EXERCISE SCIENCE

A graduate of the Bachelor of Science degree with a major in nutrition and exercise science may develop a career in community health and fitness, as a strength and conditioning coach, or as a personal trainer. This degree also prepares students for graduate work in related health science fields.

ADMISSIONS

The admissions standards and prerequisites are the same as those outlined on page 55 for the undergraduate nutrition program.

GRADUATION REQUIREMENTS

Please see the graduation requirements for the undergraduate nutrition program on page 56.

BASIC SCIENCES CURRICULUM WITHIN NUTRITION AND EXERCISE SCIENCE

Basic science courses within the nutrition and exercise science program include Anatomy and Physiology, Living Anatomy, Organic Chemistry, and Biochemistry. Please see page 46 for more details about this curriculum in our undergraduate programs.

The curriculum table that follows lists the tentative schedule of courses each quarter. Next to each course are the number of credits per course (Crdt.), the lecture hours each week (Lec.) and the lab/clinic hours each week (L/C).

BACHELOR OF SCIENCE WITH A MAJOR IN NUTRITION AND CULINARY ARTS

The Bachelor of Science degree with a major in Nutrition and Culinary Arts is designed to provide a strong foundation in the application of whole food principles together with rigorous training in nutrition science. Graduates of this program may have enhanced career opportunities in areas requiring both nutrition and culinary skills.

ADMISSIONS

The admissions standards and prerequisites are the same as those outlined on page 55 for the undergraduate nutrition program.

GRADUATION REQUIREMENTS

Please see the graduation requirements for the undergraduate nutrition major on page 56.

BASIC SCIENCES CURRICULUM WITHIN NUTRITION AND EXERCISE SCIENCE

Basic science courses within the nutrition and culinary arts program include Anatomy and Physiology, Living Anatomy, Organic Chemistry and Biochemistry. Please see page 46 for more details about this curriculum in our undergraduate programs.

The curriculum table that follows lists the tentative schedule of courses each quarter. Next to each course are the number of credits per course (Crdt.), the lecture hours each week (Lec.) and the lab/clinic hours each week (L/C).

SUMMER MESSAGE INTENSIVE

Bastyr University and the Bellevue Massage School Center for Healing Arts offer a summer massage training program that allows students to apply coursework taken at Bastyr University toward the Washington state requirements for massage licensure. This course cannot be audited. Students interested in further information may meet with their academic advisor in the registrar's office or with their department's program supervisor to discuss the program availability and the course prerequisites.

Graduate programs

The Department of Nutrition and Exercise Science offers three MS in nutrition graduate programs that are consistent with the overall focus and mission of the department. The first option is the Master of Science in Nutrition (Research), which culminates in a research thesis (MSN/Research). The second option is the Master of Science in Nutrition and Clinical Health Psychology (MSN/CHP), which is a degree that combines training

in nutrition and clinical health psychology. The third option is the Master of Science in Nutrition with the Didactic Program in Dietetics (MSN/DPD). This option provides the academic part of the requirements to become a registered dietitian.

The MSN/DPD at Bastyr University is accredited by the Commission on Accreditation for Dietetics Education (CADE) (120 Riverside Plaza, Suite 2000, Chicago, IL 60606-6995, 800.877.1600, ext 5400, education@eatright.org), a specialized accrediting body recognized by the U.S. Department of Education and the Council for Higher Education Accreditation.

After initial selection of a degree program, a student must receive approval from the chair of the department in order to change programs.

MASTER OF SCIENCE IN NUTRITION (RESEARCH)

The purpose of the Master of Science in Nutrition (Research) is to provide students with a solid overview of nutritional science, theory and research in preparation for future doctoral study or for employment in research and development, public policy, or the prevention and wellness field. Graduates with this degree are eligible in some states for certification as nutritionists with a limited scope of practice. Training in critically evaluating and conducting nutrition-related research is emphasized.

ADMISSIONS

For general information on the admissions process, refer to the admissions section in this catalog. Information below refers only to the nutrition program.

PREREQUISITES

Entering students must have a bachelor's degree, an average of 3.0 GPA or higher in their undergraduate degree and must complete the following courses with a C or better in each class:

Human Physiology¹5 qtr credits

Chemistry (science major level with lab)3 courses
(must include at least one organic chemistry course)

Nutrition 5 qtr credits or 3 semester credits

Biochemistry² 1 course

Intermediate algebra³ 1 course

¹Ten credits of anatomy and physiology will meet this requirement.

²The biochemistry course must be upper-level and must cover intermediary metabolism.

³College algebra is highly recommended and will become the required prerequisite beginning fall 2012.

GRADUATION REQUIREMENTS

MSN (Research) students must complete a minimum of 78 credits. All MSN (Research) students must have a minimum 3.0 GPA with a minimum of 52 credits in residence. MSN (Research) students must complete their degree within five years following matriculation into the program. A research thesis is required for graduation.

THESIS CREDIT AND CONTINUATION POLICY

Students who have not completed their thesis by the end of their last quarter of attendance at Bastyr University but who have already been registered for the number of thesis credits required for their program will be required to register for Thesis Continuation. Thesis Continuation is a 0.0 credit "course" that maintains the student's enrollment at Bastyr University; it carries a thesis continuation fee equivalent to the tuition for one credit. The registration and payment deadlines for Thesis Continuation are the same as those published for regular

registration activities. Students who do not register for Thesis Continuation or fail to pay the thesis continuation fee are not permitted to utilize faculty time or other University resources.

Students must enroll in at least one credit in each quarter (apart from summer) in order to continue in the program. Otherwise, students must apply for a leave of absence. Students may consult with the registrar's office or see *Student Policies and Procedures* for details about applying for a leave of absence.

The curriculum table that follows lists the tentative schedule of courses each quarter. Next to each course are the number of credits per course (Crdt.), the lecture hours each week (Lec.) and the lab/clinic hours each week (L/C).

MASTER OF SCIENCE IN NUTRITION (RESEARCH) 2010-2011

YEAR I

Qtr.	Cat. No.	Course Title	Crdt.	Lec.	L/C

MASTER OF SCIENCE IN NUTRITION AND CLINICAL HEALTH PSYCHOLOGY (MSN/CHP)

The MSN/CHP was developed to respond to the need for an integrated program that provides opportunities to ultimately obtain licensure as a mental health counselor and credentials to practice as a nutritionist in some states. This three-year graduate program provides interdisciplinary education in nutrition and clinical health psychology for students who want a fully integrated mind-body approach to human health.

ADMISSIONS

For general information on the admissions process, refer to the admissions section in this catalog. Information below refers only to the MS in Nutrition and Clinical Health Psychology program.

REQUIRED ABILITIES/SKILLS FOR NUTRITION PROGRAM ADMISSION

Please see description on page 55.

PREREQUISITES

Entering students must have a bachelor's degree with an average of 3.0 GPA or higher in the undergraduate degree, and must have completed the following courses with a C or better in each class:

Human Physiology¹ 5 qtr credits

Chemistry (science major level with lab) 3 courses
(must include at least one organic chemistry course)

Nutrition 5 qtr credits or 3 semester credits

Biochemistry² 1 course

Abnormal psychology 1 course

Developmental psychology 1 course

Intermediate algebra³ 1 course

¹Ten credits of Anatomy and Physiology will meet the Physiology prerequisite requirements.

²The biochemistry course must be upper-level and must cover intermediary metabolism.

³College algebra is highly recommended and will become the required prerequisite beginning fall 2012.

ADMISSION TO CLINICAL TRAINING

In order to enroll in the Clinic Shift series, students must have successfully completed TR5136, BC5132, TR5321, PS5202, PS5301, TR5803, PS6315 and have met the criteria for professional behavior and attitudes. Students are also required to pass a national criminal background check (see *Academic Policy and Procedure Manual* for more information) and show proof of completion of a list of activities prior to the first scheduled clinic shift.

GRADUATION REQUIREMENTS

MSN/CHP students must complete a minimum of 118 credits and must have a minimum 3.0 GPA with a minimum of 79 credits in residence. MSN/CHP students must complete their degree within six years following matriculation into the program. A graduation requirement of the MSN/CHP program is that students must complete 600 hours of supervised counseling (including hours in counseling classes at BCNH and its satellites and external practicum sites), of which 100 hours need to be in nutrition counseling.

In addition to the didactic and clinical experience, MSN/CHP students are required to complete 10 hours of individual counseling or therapy before their first counseling shift at BCNH. Counseling may occur at the Bastyr Counseling Center or with a private counselor of the student's choice. Documentation of these hours is required.

EXIT EXAM

Successful completion of a clinical competency exit examination is a requirement for students in the third year of the MSN/CHP. This examination tests the minimal knowledge and skills required to perform nutritional and mental

health counseling with diverse clients. The examination does not cover the whole curriculum and cannot substitute for any part of regular course requirements. Students are eligible to schedule the exit exam if they are in good academic standing, have completed or are concurrently registered for all required (non-elective) courses by the end of the term in which they want to take the exam, and are making satisfactory progress in the practicum.

EXPECTED COMPETENCIES

Students are required to maintain a 3.0 GPA in their graduate coursework. Bastyr graduates are qualified to provide exceptional nutrition and counseling services to individuals and institutions and contribute positively to the nutritional and mental health education of the community.

Students are expected to stay on track with the counseling curriculum. Students who wish to go off track must have permission from the director of clinical training.

The curriculum table that follows lists the tentative schedule of courses each quarter. Next to each course are the number of credits per course (Crdt.), the lecture hours each week (Lec.) and the lab/clinic hours each week (L/C).

Curriculum and course changes in the 2010-2011 Bastyr University Catalog are applicable to students entering during the 2010-2011 academic year. Please refer to the appropriate catalog if interested in curriculum and courses required for any other entering year.

MASTER OF SCIENCE IN NUTRITION WITH DIDACTIC PROGRAM IN DIETETICS (MSN/DPD)

The purpose of the MSN/DPD is to train students who are primarily interested in becoming registered dietitians. The program's mission is to educate future dietetic professionals who will be agents of change in bringing the perspective of whole foods, environmental awareness of food choices and complementary medicine into their dietetic-related practices. The MSN/DPD program at Bastyr University is accredited by the Commission on Accreditation for Dietetics Education (CADE). The competencies outlined by CADE are over and above the requirements for a master's in nutrition as outlined by the University and prepare dietetic students to be eligible to apply for a dietetic internship accredited by CADE and, subsequently, to be eligible to sit for the registration examination for dietitians.

ADMISSIONS

For general information on the admissions process, refer to the admissions section in this catalog. Information below refers only to the graduate nutrition program.

To be competitive for admission into the MSN/DPD, the following GPAs are required:

- 3.25 in prerequisite coursework (classes listed as specific prerequisites)
- 3.0 cumulative in science coursework
- 3.0 cumulative undergraduate coursework
- 3.0 in nutrition coursework

PREREQUISITES

Please see prerequisites for the Master of Science in Nutrition listed on page 62. In addition to the prerequisites listed on page 62, Introduction to Psychology is also required.

ADMISSION TO CLINICAL TRAINING

In order to enroll in the Clinical Practicum, students must have successfully completed BC5132, TR5136, TR5207, TR5320, TR5321 and TR5803, and have met the criteria for behavior and attitudes as outlined in the *Nutrition Student Clinician Handbook*. Students are also required to pass a national criminal background check (see *Academic Policy and Procedure Manual* for more information) and show proof of completion of a list of activities prior to the first scheduled clinic shift.

GRADUATION REQUIREMENTS

MSN/DPD in Nutrition students must complete a minimum of 78 credits. All MSN/DPD students must have a minimum 3.0 GPA with a minimum of 52 credits in residence. MSN/DPD students must complete their degree within five years following matriculation into the program. MSN/DPD students are recommended to meet with the DPD director for academic advising each quarter prior to registration to discuss academic progress. A total of 300 hours of approved paid and/or volunteer nutrition-related work is required to graduate from the MSN/DPD. The following is a breakdown of those hours:

Total of 100 hours clinical nutrition (in-patient, ambulatory care, and/or long-term care direct patient contact).

Total of 100 hours food service management.

Total of 100 hours community nutrition.

Leadership in the area of dietetics by participating in the Bastyr University Student Nutrition Association (SNA) is strongly encouraged, and becoming a student member of the American Dietetic Association is required.

Once coursework for the MSN/DPD and the 300 volunteer and/or paid required hours are completed, signed and verified by the DPD director, the student is eligible to sit for the DPD exit exam. A pass rate of 70 percent on the DPD exit exam is required to receive the verification statement that will enable the student to be eligible to complete an accredited dietetic internship. Completion of the DPD program does not guarantee acceptance into a dietetic internship. All other policies and procedures related to the MSN/DPD program are located on MyBU under the Department of Nutrition and Exercise Science.

ACCREDITATION

The MSN/Didactic Program in Dietetics (MSN/DPD) at Bastyr University is accredited by the Commission on Accreditation for Dietetics Education (CADE), 120 South Riverside Plaza, Suite 2000, Chicago, IL 60606-6995, 800.877.1600, ext. 5400, education@eatright.org, website: www.eatright.org/cade, a specialized accrediting body recognized by the U.S. Department of Education and the Council for Higher Education Accreditation.

The curriculum table that follows lists the tentative schedule of courses each quarter. Next to each course are the number of credits per course (Crdt.), the lecture hours each week (Lec.) and the lab/clinic hours each week (L/C).

Total Requirements	78	66.5	23

DIETETIC INTERNSHIP

The Bastyr University Dietetic Internship is designed to meet the eligibility requirements and accreditation standards for dietetic internship programs as defined by the American Dietetic Association, with the intention that those who successfully complete the program will have met the performance requirements for entry-level dietitians through supervised practice. The internship provides an interactive set of educational experiences in which participants perform the Nutrition Care Process in a variety of settings, demonstrate professional skills, perform continuous self-assessment, and develop collaborative relationships to achieve desired outcomes. The program includes didactic coursework via seminars, group projects and individual self-enrichment experiences.

Interns gain experience in medical nutrition therapy, community nutrition and food service administration. Interns develop insight into the unique nutritional needs of populations from all stages of the life cycle and in various degrees of health through rotation sites that include acute care and outpatient clinics, WIC programs and food service departments.

The Bastyr University Dietetic Internship has a concentration in natural medicine and whole food nutrition. Interns have the opportunity to practice with clinicians in the naturopathic program and in the acupuncture and Oriental medicine program at the University's teaching clinic, Bastyr Center for Natural Health. Interns create whole-foods menus and consider the environmental impacts of food choices.

The internship is a full-time program (minimum of 40 hours per week) meeting the requirements for 1200 minimum supervised practice hours. The program also includes didactic hours, enrichment hours, and hours for orientation and evaluation, as well as vacation and holidays.

Interns are required to register for 15 graduate credits, which may be applied toward the elective requirements of the Master of Science in Nutrition degree at Bastyr University upon acceptance into the master's program. The graduate course content is structured to complement the supervised practice component of the internship. The internship graduate courses follow, listed in the order taken:

Cat. No.	Course Title	Crdt.	Qtr.
DI5100	Introduction to the Practice of Dietetics	1	Fall
DI5101	Community Nutrition	1	
DI5801	Community Practicum	2	
DI5103	Food Service Administration	1	
DI5104	Medical Nutrition Therapy	1	Win
DI5814	Food Service Practicum	4	
DI5820	Medical Nutrition Therapy Practicum	5	Sp
	Total Credits	15	

Note: Community Practicum, Medical Nutrition Therapy Practicum and Food Service Practicum are incorporated into the supervised practice experience.

ADMISSION REQUIREMENTS FOR DIETETIC INTERNSHIP

Applicants must have a minimum of a baccalaureate degree in nutrition, dietetics or an equivalent program from an accredited educational institution. A strong background in science and high academic performance are essential. A GPA of 3.0 or higher is required for acceptance into the program.

It is highly recommended that students have paid or volunteer experience in all three areas of clinical nutrition, community nutrition and food service administration.

Effective February 2011, all applicants must complete an internship application via the Dietetic Internship Centralized Application Services (DICAS) system. The following items will be uploaded by each applicant to the DICAS site:

- Completed ADA Dietetic Internship application.
- One-page typed letter of application.
- Three letters of recommendation (ADA Waiver and Recommendation Form are to be included): one reference is to be related to work experience and two references are to be related to academic performance.
- All official transcripts.
- DPD Verification Statement or Declaration of Intent.

Supplemental application materials to be sent directly to the Bastyr University Admissions Office include:

- Completed Bastyr University application for certificate and non-degree programs, available for download on the Bastyr University website.
- Nonrefundable \$75 application fee, with check written to "Bastyr University."

All application materials must be received by the February computer matching deadline established by the American Dietetic Association. Interns begin the program in September and complete the program in June. Applicants are informed of acceptance through the computer matching system.

EXPECTED COMPETENCIES

Interns are required to pass all internship graduate courses with a grade of achieved competency (AC) and must have demonstrated competency in all learning outcomes. (The achieved-competency based grading system is explained on page 17 of this catalog.) Graduates of the program meet eligibility requirements to write the registration examination to become a registered dietitian (RD). Bastyr internship graduates are qualified to provide exceptional nutrition and dietetic services to individuals and institutions and contribute positively to the nutrition awareness and health education of the community.

ACCREDITATION STATUS

The Bastyr University Dietetic Internship is accredited by the Commission on Accreditation for Dietetics Education of the American Dietetic Association (CADE), 120 South Riverside Plaza, Suite 2000, Chicago, IL, 60606-6995, (800) 877-1600, ext. 5400. E-mail: education@eatright.org. Website: www.eatright.org/cade, a specialized accrediting body recognized by the U.S. Department of Education and the Council for Higher Education Accreditation.

Additional program information, including program philosophy, goals and content may be found at www.Bastyr.edu/education/nutrition/degree/DI.asp. Program policies and procedures are made available to accepted applicants in the annually-revised *Bastyr University Dietetic Internship Handbook*.

School of Naturopathic Medicine

ADMINISTRATORS OF THE SCHOOL OF NATUROPATHIC MEDICINE

Jane Guiltinan, ND, Dean

Deborah S. Lantz, ND, Associate Dean
Debra Brammer, ND, Associate Dean for Naturopathic Clinical Education
Jana Nalbandian, ND, Chair, Clinical Science, Interim Director of Naturopathic Midwifery
Sheila Kingsbury, ND, RH (AHG), Chair, Botanical Medicine
Richard Mann, ND, Chair, Homeopathy
Dean Neary, ND, Chair, Physical Medicine
Gary Garcia, MD, Director of Community and Post Graduate Medicine
Katherine Martin, ND, Interim Assistant Director of Naturopathic Midwifery
Kristine Arena, Program Supervisor

The School of Naturopathic Medicine consists of the botanical medicine department (which offers a Bachelor of Science with a Major in Herbal Sciences), the homeopathy department, the physical medicine department, the clinical sciences department and the clinical education department. The School of Naturopathic Medicine also offers a Certificate in Naturopathic Midwifery, which is currently in a teach-out phase and is no longer enrolling new students.

MISSION

We educate future naturopathic physicians who care for the health and well-being of their communities and advance our profession.

VISION

The School of Naturopathic Medicine will be a leading academic center for inspired and scholarly learning in the cultivation of naturopathic doctors. It will accomplish this through education, research, professional leadership, community and clinical services that bridge the worlds of science, nature and spirit.

PROGRAMS OFFERED

Certificate in Holistic Landscape Design page 71 Bachelor of Science, Major in Herbal Sciences page 70
Doctor of Naturopathic Medicine page 72
Certificate in Naturopathic Midwifery (currently in a teach-out and no longer enrolling new students) page 84

BACHELOR OF SCIENCE WITH A MAJOR IN HERBAL SCIENCES

BOTANICAL MEDICINE DEPARTMENT MISSION

We inspire students and colleagues to carry forward the traditions and enrich the knowledge of botanical medicine with integrity.

BOTANICAL MEDICINE DEPARTMENT VISION

We facilitate learning about plants and plant-centered medicine, guiding students to apply this knowledge toward growing, harvesting, manufacturing and clinical practice. The inclusive range of knowledge runs from traditional wisdom to contemporary scientific information, emphasizing critical and creative thought and discovery.

A Bachelor of Science degree completion program with a major in herbal sciences is designed to provide a thorough, scientifically rigorous and inspiring exploration of herbalism and its applications. The curriculum of the herbal sciences major does not include the diagnosis and treatment of disease, but rather introduces the student to concepts of disease prevention and health maintenance using medicinal herbs. The curriculum addresses economic, historical and sociopolitical perspectives regarding herbal sciences. Additionally, issues related to herbal product manufacturing and quality assurance/quality control introduce the analytical aspects of herbs and herbal products. This program offers a substantial breadth of perspectives and approaches in the herbal sciences.

The program is based upon scientific inquiry in the herbal sciences. Courses in Anatomy and Physiology, Organic Chemistry, Biochemistry, and Botany occur during the first year of this program. Beginning in the first year and heavily concentrated in the second year are courses exploring various aspects of the herbal sciences. Introduction to Herbal Sciences, Herbal Preparations, and Herbal Medicine History and Traditions lay a foundation in the junior year. In Research Methods for Herbal Sciences, the student learns to interpret scientific literature on medicinal herbs. In Ethnobotany, the door opens to the connection between people and plants in indigenous cultures, old and new. The senior year includes Pharmacology, Pharmacognosy and Medicinal Actions of a core of Materia Medica, deepening the knowledge base. Northwest Herbs and First Aid for Herbalists lend hands-on experiences. In additional courses, the student becomes familiar with environmental, economic and political issues surrounding the herbal sciences. There are electives available that cover a wide array of topics including diverse field courses.

Additionally, students are required to complete a 44-hour practicum with herbal manufacturers, herb growers, wildcrafters, practitioners or researchers. Upon completion of this program, each student is uniquely qualified to enter the herbal industry, enter a clinically based program or pursue further education in a related field.

ADMISSION

For general information on the admissions process, please refer to the admissions section in this catalog. The information below refers only to the herbal sciences program.

PREREQUISITES

Entering undergraduates must have at least a 2.25 cumulative GPA with a grade of C or better in all basic proficiency and science requirement courses. Prior to enrolling, students must have completed 90 quarter credits (60 semester credits), including a minimum number of credits in the basic proficiency, science and general education categories.

Note: Students may apply to the program while completing prerequisite coursework.

BASIC PROFICIENCY AND SCIENCE REQUIREMENTS

English literature or composition 9 quarter credits
General psychology 3 quarter credits
Intermediate algebra¹ 1 course
General chemistry (science-major-level
with lab) 8 quarter credits
General biology (with lab) 4 quarter credits
Botany 3 quarter credits

¹Intermediate algebra is not college level, and the credits taken will not transfer in toward degree completion. College algebra is highly recommended and will become the required prerequisite beginning fall 2012.

GENERAL EDUCATION REQUIREMENTS

Natural science and mathematics 12 quarter credits
Arts and humanities 15 quarter credits
Social sciences 15 quarter credits
Speech communication or
public speaking 3 quarter credits
Electives 18 quarter credits¹

¹The number of elective credits may vary depending upon the exact number of quarter credits earned in the other prerequisite categories. Total prerequisite credits must equal at least 90 quarter credits.

BASIC SCIENCES CURRICULUM WITHIN HERBAL SCIENCES

Basic science courses within the herbal sciences program include Anatomy and Physiology, Organic Chemistry, Biochemistry, Microbiology, Pharmacology, and Disease Processes. These courses serve as a foundation for an understanding of the human body and provide students with the necessary skills and competency to pursue coursework in their chosen field.

The basic sciences faculty encourages and expects students to advance beyond the simple learning of scientific facts and to integrate systematically the information from basic science disciplines into a unified model of human organization and function. Problem solving, clinical cases and examples are an integral part of the basic science curriculum.

GRADUATION REQUIREMENTS

Upper division BS students enrolled at Bastyr University must complete a minimum of 180 credits (inclusive of credits transferred into Bastyr). To graduate, BS students must have a minimum 2.0 grade point average with a minimum of 45 credits in residence at Bastyr University.

The curriculum table that follows lists the tentative schedule of courses each quarter. Next to each course are the number of credits per course (Crdt.), the lecture hours each week (Lec.) and the lab/clinic hours each week (L/C).

Total Core Course Credits and Hours	87	68	40

Total Elective Credits and Hours	3	3	0
Total Requirements	90	71	40

Curriculum and course changes in the 2010-2011 Bastyr University Catalog are applicable to students entering during the 2010-2011 academic year. Please refer to the appropriate catalog if interested in curriculum and courses required for any other entering year.

Current Electives: Cascade Herb Experience, Island Herb Experience, Herbal Medicine in Italy, Organic Gardening, Clinical Pharmacognosy, Flower Essences, Herbs and Ayurvedic Medicine, Herbal Medicine throughout Oregon, Plants in Ceremony, Clinical Formulations and Applications of Botanical Medicine, Food and Medicinal Mushrooms, Medicine Making for All, Plant Identification and Medicinal Field Botany, Foundations of Aromatic Medicine, and Introduction to Gemmotherapy.

SUMMER MESSAGE INTENSIVE

Bastyr University and Bellevue Massage School Center for Healing Arts offer a summer massage training program that allows students to apply coursework completed at Bastyr University toward the Washington state requirements for licensure. This course cannot be audited.

Students interested in further information may meet with their academic advisor in the registrar's office or with their department's program supervisor to discuss the program availability and the course prerequisites.

CERTIFICATE IN HOLISTIC LANDSCAPE DESIGN (CHLD)

Mission: The Certificate in Holistic Landscape Design program allows students to build upon their knowledge of medicinal and edible plants and apply this knowledge to building sustainable landscape solutions that benefit the earth and the human community.

The courses in this certificate program are offered on evenings and weekends. The program instructs students on permaculture concepts and cultivation of medicinal and edible plants. Students who complete the program will be able to develop sustainable landscapes that benefit the environment and provide utilitarian resources for the community as a whole.

PREREQUISITES

Prior to enrolling, students must have completed 90 quarter credits (60 semester credits), including a minimum number of credits in basic proficiency in English literature or composition (9 quarter credits), intermediate algebra (1 course), general chemistry (8 credits) and biological science (6 credits), to include a course in Organic Gardening and a course in either Introduction to Botany or Introduction to Horticulture. General education requirements to round out the 90 credit requirement include courses in natural science and mathematics, arts and humanities, social sciences, speech and general electives.

LEARNING OBJECTIVES

- Ability to create a landscape design that enhances the natural landscape and reflects the health of all of the beings that utilize it as well as the health of the planet.
- Apply sustainable landscape measures creatively, designing for biodiversity, therapeutic utility and aesthetics.
- Integrate permaculture techniques and principles for sustainably modifying land and implementing designs.
- Understand importance and elements of soil science and how to utilize this knowledge in horticultural methods
- Enhance knowledge of practices that support seasonal and sustainable cultivation of food and medicinal plants
- Practice therapeutic plant propagation and cultivation from native and analogue climates for landscape design as well as nursery or market production.

DOCTOR OF NATUROPATHIC MEDICINE

DEFINITION AND DESCRIPTION OF NATUROPATHIC MEDICINE

Naturopathic medicine is a distinct profession of primary health care, emphasizing prevention, treatment and the promotion of optimal health through the use of therapeutic methods and modalities which encourage the self-healing process, the *vis medicatrix naturae*.

The U.S. Department of Labor defines naturopathic physicians as doctors who “diagnose, treat, and help prevent diseases using a system of practice that is based on the natural healing capacity of individuals. May use physiological, psychological or mechanical methods. May also use natural medicines, prescription or legend drugs, foods, herbs, or other natural remedies.”

Most naturopathic physicians provide natural medicine primary care through office-based, private practice. Many receive additional training in disciplines or modalities such as midwifery and acupuncture and Oriental medicine.

Naturopathic diagnosis and therapeutics are supported by scientific research drawn from peer-reviewed journals from many disciplines, including naturopathic medicine, conventional medicine, European complementary medicine, clinical nutrition, phytotherapy, pharmacognosy, homeopathy, psychology and spirituality. Information technology and new concepts in clinical outcomes assessment are particularly well-suited to evaluating the effectiveness of naturopathic treatment protocols and are being used in research, both at naturopathic medical schools and in the offices of practicing physicians. Clinical research into natural therapies has become an increasingly important focus for naturopathic physicians.

A NATUROPATHIC MEDICINE GRADUATE OF BASTYR UNIVERSITY’S SCHOOL OF NATUROPATHIC MEDICINE WILL:

- Be an empowered, strong practitioner.
- Be trained to the standards of a primary care physician as accepted by the profession.
- Be a provider of excellent and consistent, quality patient care.
- Practice the principles of naturopathic medicine.
- Be an integrated, active participant in the community.

PRINCIPLES OF NATUROPATHIC MEDICINE

The Healing Power of Nature (*Vis Medicatrix Naturae*)

Identify and Treat the Causes (*Tolle Causam*)

First Do No Harm (*Primum Non Nocere*)

Doctor as Teacher (*Docere*)

Treat the Whole Person

Prevention

Wellness

SCOPE OF PRACTICE

Naturopathic medicine is defined by principles rather than by methods or modalities. Diagnostic and therapeutic methods are diverse. The current scope of practice for a naturopathic physician covers the general practice of naturopathic medicine, as a primary care physician. This scope of practice includes, but is not limited to, the following diagnostic and therapeutic modalities: nutritional science, natural hygiene, botanical medicine, naturopathic physical medicine, homeopathy, counseling, spirituality, minor office procedures and methods of laboratory and clinical diagnosis. The scope of practice is defined by state or provincial statute. The curriculum at Bastyr University matches the requirements listed by the Washington State Department of Health. Students have the responsibility to be informed on licensure and scope of practice in the legal jurisdiction in which they choose to practice.

LEGAL STATUS OF NATUROPATHIC MEDICINE

Naturopathic physicians are licensed or registered as health care providers in Alaska, Arizona, California, Connecticut, Hawaii, Idaho, Kansas, Maine, Minnesota, Montana, New Hampshire, Oregon, Utah, Vermont, Washington, District of Columbia and the U.S. territories of Puerto Rico and the Virgin Islands. Legal provisions allow the practice of naturopathic medicine in several other states. Efforts to gain licensure elsewhere are currently underway. Forty-two states and territories in the United States have professional associations for naturopathic medicine. Naturopathic physicians are also recognized in British Columbia, Manitoba, Ontario, Nova Scotia and Saskatchewan, and there are 11 provincial and territorial professional associations.

NATUROPATHIC MEDICINE LICENSURE REQUIREMENTS

All states and provinces with licensure laws require a resident course of at least four years and 4,100 hours of study from a college or University recognized by the Council on Naturopathic Medical Education (CNME). A copy of the CNME handbook is available in the Bastyr Library. To qualify for a license, the applicant must satisfactorily pass the Naturopathic Physicians Licensing Examinations (NPLEX), which include basic sciences, diagnostic and therapeutic subjects and clinical sciences. Applicants must satisfy all licensing requirements for the state or province to which they have applied.

PROFESSIONAL ORGANIZATIONS

The American Association of Naturopathic Physicians, based in Washington, D.C., represents the interests of the profession of naturopathic medicine in the U.S.

- American Association of Naturopathic Physicians, 4435 Wisconsin Ave NW, Suite 403, Washington, D.C., 20016, www.member.services@Naturopathic.org, 202.237.8150.
- The Canadian Association of Naturopathic Doctors is the professional association in Canada. Contact them at 20 Holly Street, Suite 200, Toronto, Ontario, Canada M4S 3B1, 416.496.8633. E-mail: info@cand.ca.

Web: www.cand.ca.

Contact the appropriate national association for further information.

NATUROPATHIC MEDICINE PROGRAM ADMISSIONS

For general information on the admissions process, please refer to the admissions section in this catalog. The information below refers only to the naturopathic medicine program.

NATUROPATHIC MEDICINE PREREQUISITES

In selecting applicants for admission, the Bastyr University naturopathic medicine program seeks those qualities of motivation, intellect and character essential to becoming a physician. Applicants are considered on the basis of academic performance, maturity and demonstrated humanitarian qualities. Work and/or volunteer experience in health care coupled with an awareness of the field of natural medicine is strongly recommended. The following coursework is the minimum required preparation for the study of naturopathic medicine. Applicants may apply with coursework still in progress, but prerequisites must be completed prior to matriculation.

Please note: If in doubt about a specific prerequisite, contact an admissions advisor before taking the course.

The admissions office may require a course description to verify content. Descriptions may be read over the phone, e-mailed, faxed or sent by regular mail.

Overall Preparation

Completion of a bachelor's degree is expected. No specific major is advised. In addition to a strong preparation in the sciences, a broad background in the humanities and liberal arts is encouraged. Prerequisite coursework is used to determine a student's preparation for the naturopathic program. No credit is given for prerequisite coursework earning a C- or lower.

Prerequisite Coursework

College-level Algebra..... 1 course

Chemistry (science-major level)at least 4 courses

Must include a minimum of either two sequential courses in organic chemistry or one course in organic chemistry and one course in biochemistry. The chemistry sequence should include an introduction to biological molecules. (The standard prerequisite for science-major level organic chemistry is one year of general chemistry.) Appropriate lab work required.

General Biology

(science-major level)..... 2 semesters or 3 quarters

Must cover concepts in cellular biology and genetics. Appropriate lab work required. Individual courses in the biological sciences may count if the above competencies are met, i.e., anatomy, physiology, microbiology and botany.

Physics.....at least 1 college-level course

Many institutions do not cover all required concepts in one course; required concepts include mechanics, optics, electricity and magnetism. Course may be algebra-based, and lab is not required.

Psychology 1 course

Introduction to psychology is recommended.

Strongly Recommended Courses

Though not required for admission, faculty recommend students complete biochemistry, anatomy and physiology, and botany coursework in addition to the prerequisite requirements. These courses will substantially enhance students' ability to master the naturopathic course material.

Other Suggested Courses

Biomedical ethics, philosophy of science, public speaking and English composition.

Age of Course

Required chemistry and biology courses not taken within seven years of matriculation into the program are subject to review by the admissions committee. Additional coursework may be required.

Credit by Examination

Applicants may submit AP, IB and CLEP scores for prerequisite consideration for math, psychology and physics. Students who have had prior AP or IB coursework in chemistry and biology may submit AP or IB scores for biology or chemistry exams. Students must submit either the original score received directly from the testing center or a copy of their high school or college transcripts showing the score results. Decisions regarding credit are assessed on a case-by-case basis. The admissions committee reviews test scores within the context of an applicant's academic history. All equivalency decisions made by the admissions committee are final.

REQUIRED ABILITIES/SKILLS FOR NATUROPATHIC MEDICINE PROGRAM ADMISSION

Bastyr University is committed to providing equal opportunities for differently abled persons. The following policy has been adapted from the American Association of Medical Colleges guidelines to ensure that prospective students have the physical and mental capacities to perform the required duties of a naturopathic physician.

A candidate for the naturopathic medicine degree must be able to demonstrate appropriate observational and communication skills, motor function, intellectual-conceptual, integrative and quantitative abilities, and behavioral and social maturity. Technological compensation can be made for some disabilities in certain of these areas, but a candidate should be able to perform in a reasonably independent manner. The use of a trained intermediary means that a candidate's judgment must be mediated by someone else's power of selection and observation.

Observation: The candidate must be able to observe demonstrations and experiments in the basic sciences, including but not limited to microbiologic cultures and microscopic studies of microorganisms and tissues in normal and pathologic states. A candidate must be able to observe a patient accurately at a distance and close at hand. Observation necessitates the functional use of the sense of vision and somatic sensation. These are enhanced by the functional use of the sense of smell.

Communication: A candidate must be able to speak, to hear, and to observe patients in order to elicit information, describe changes in mood, activity, and posture, and perceive nonverbal communications. A candidate must be able to communicate effectively and sensitively with patients. Communication includes not only speech but also reading and writing. The candidate must be able to communicate effectively and efficiently in oral and written form with all members of the health care team.

Motor: Candidates should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion and other diagnostic maneuvers. A candidate should be able to do basic laboratory tests (urinalysis, CBC, etc.), re-position a patient, carry out diagnostic and therapeutic procedures and read ECGs and x-rays. A candidate should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment required of physicians are cardiopulmonary resuscitation, the administration of intravenous medication, application of pressure to stop bleeding, the opening of obstructed airways, the suturing of simple wounds, and the performance of simple obstetrical maneuvers. Such actions require coordination of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision.

Intellectual-Conceptual, Integrative and Quantitative Abilities: These abilities include measurement, calculation, reasoning, analysis and synthesis. Problem solving, a critical skill demanded of physicians, requires

all of these intellectual abilities. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

Behavioral and Social Attributes: A candidate must possess the emotional health required for full utilization of her/his intellectual abilities, the exercise of good judgment, the prompt completion of all responsibilities attendant to the diagnosis and care of patients, and the development of mature, sensitive, and effective relationships with patients. Candidates must be able to tolerate physically taxing work loads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal skills, interest and motivation are all personal qualities that are assessed during the admissions and educational processes.

ADMISSIONS CRITERIA

The admissions committee of the naturopathic medicine program determines the processes and procedures that guide the selection of candidates for the naturopathic program. The committee reviews undergraduate and graduate (if applicable) academic records and performance in the required prerequisite courses. The personal statement, references, resumes and in person interviews are also evaluated for evidence of the abilities and skills required of naturopathic physicians. The interview also explores the candidate's awareness of the practice of naturopathic medicine. Bastyr University's naturopathic medicine program is academically challenging. While no minimum GPA is specified, the mean GPA for entering students in the last five years has exceeded 3.3.

INTERVIEWS

Qualified applicants who submit complete applications and meet the prerequisites may be invited to interview. Applicants are expected to interview at the University's campus in Kenmore, Washington. A limited number of exceptions are made to accommodate special circumstances.

TRANSFER STUDENTS

Bastyr University accepts transfer students from naturopathic, medical, osteopathic and chiropractic schools and other accredited professional programs on a space-available basis. For transfer consideration, credits must be earned from an institution accredited by a regional accrediting agency or from an institution accredited by the Council on Naturopathic Medical Education (CNME). Transfer students are considered for admission in accordance with the following general guidelines:

- Applicants must meet the same entrance requirements as candidates for the first-year class.
- Applicants who wish to transfer credits from prior coursework must demonstrate satisfactory completion of courses that are equivalent in content and quality to courses given at the University. Satisfactory completion equals a grade of achieved competency, a C or above, or a 2.0 or above.
- Applicants must provide an official transcript from the college or program from which the transfer is being requested, demonstrating that they are leaving in good academic standing and should be prepared to submit additional documentation to support a thorough evaluation.
- Transfer applicants must submit a \$75 transfer evaluation fee.

ADVANCED STANDING STATUS BASED ON PRIOR MEDICAL EDUCATION

Applicants who have completed professional programs may be considered for advanced standing status. Those applicants who graduated from accredited chiropractic, medical or osteopathic colleges may be eligible for advanced standing in the Bastyr University naturopathic medicine program. All advanced standing students must complete at least two-thirds of the program and do all of their clinical work at Bastyr University. They are eligible for a maximum of 103 credits toward advanced standing. In those instances where the maximum number of advanced standing transfer credits is granted, it will take a minimum of three years (11 quarters) to

complete the program. Placement depends upon the amount of coursework completed in the original program, similarity of the course content and credits, age of the courses and performance in these courses. A student must provide documentation which shows the competencies of the Bastyr University course have been met. Course waivers and/or credit transfers are considered only for those courses in which applicants demonstrate a grade of achieved competence, a C or above, or a 2.0 or above. An exam to determine competency may also be required. Advanced standing applicants must complete all of the course and credit requirements in effect at the time of their enrollment in the Bastyr University naturopathic medicine program. Final waiver and/or transfer credit decisions rest with the dean of the school in which the curriculum is taught.

Advanced standing is determined on a case by case basis and depends on the type of degree program completed, the courses taken and the number of years in practice.

Applicants who are eligible for advanced standing must submit a \$75 advanced standing evaluation fee.

Applicants must submit a catalog of course descriptions for the years they attended their professional program and should be prepared to submit additional documentation to support a thorough evaluation. If an advanced standing student is found to be deficient in some areas of study, he/she may be required to complete additional courses. For more information on advanced standing status admission policies and procedures, contact the admissions office.

BASIC SCIENCES CURRICULUM WITHIN NATUROPATHIC MEDICINE

Basic science courses within the naturopathic medicine program emphasize anatomy, physiology and biochemistry as the foundation for further basic sciences and all clinical courses. Further courses include Histology, Pathology, Pharmacology, Immunology, Infectious Diseases, Embryology, Neuroscience and Research Design.

The basic sciences faculty encourages and expects students to advance beyond the simple learning of scientific facts and to integrate systematically the information from basic science disciplines into a unified model of human organization and function. This educational scheme requires students to assume an active role in the learning process and encourages them to adopt this inquisitive behavior for a lifetime. Problem solving, clinical cases and examples are an integral part of the basic science curriculum. This educational process is an expression of Bastyr University's basic philosophy of a holistic approach to human behavior, health and therapeutics. The basic sciences faculty encourages students to become totally absorbed in an integrated approach to learning and understanding. Instructors are readily available to facilitate this process on an individual basis.

The department also offers science courses that satisfy prerequisite requirements, including courses in General Chemistry and Organic Chemistry.

COUNSELING AND HEALTH PSYCHOLOGY CURRICULUM WITHIN NATUROPATHIC MEDICINE AND NATUROPATHIC MIDWIFERY

The counseling and health psychology curriculum serves naturopathic medical students in understanding and effecting change in the emotional, mental, and spiritual dimensions of human functioning.

The naturopathic medicine program includes five core counseling and health psychology courses. These courses are designed to build the following competencies:

- Study of the nature and process of healing.
- Development of therapeutic counselor characteristics and communication skills.
- Development of comfort in the role of counseling physician and a sense of counseling style and skills.
- Ability to select and implement holistic counseling interventions and strategies.
- Ability to assess and stimulate psychological wellness.
- Ability to understand and utilize the body/mind/spirit interaction in the healing process.
- Ability to assess psychological functioning and make clinical judgments regarding the appropriateness of treating individuals in naturopathic practice.
- Ability to make appropriate psychological referrals.

Naturopathic principles and cross-cultural perspectives are woven throughout all counseling and health psychology courses in the naturopathic medicine program.

The following core courses are required of all naturopathic medicine students:

- PS6305: Naturopathic Counseling 1 - 3 credits
- PS6306: Naturopathic Counseling 2 - 3 credits
- PS7200: Psychological Assessment - 2 credits
- PS7203: Addictions and Disorders - 2 credits
- PS7315: Naturopathic Counseling 3 - 2 credits

The following core elective is required for students in the naturopathic midwifery certificate program and is strongly recommended for all naturopathic medicine students:

- PS6303: Sexuality and Sex Therapy - 2 credits

For additional counseling and health psychology courses available as electives to matriculated students, please see the course listings in this catalog or the current quarterly schedule of classes.

Departments Within the Naturopathic Medicine Program

BOTANICAL MEDICINE

(For Department of Botanical Medicine Mission and Vision, see page 69.)

Botanical medicine is a core modality for naturopathic physicians to use in optimizing the health and well-being of their patients. Medicinal plants have been used as food and medicine by all peoples on all continents. The importance of plants to humans has been recorded in cave paintings 60,000 years old. A contemporary renaissance in herbal medicine weaves traditional use and wisdom with modern analytical methodologies for optimal medical applications for today. Empirical knowledge of plant therapeutics is based on Western and holistic thought rather than reductionistic paradigms and is linked with contemporary scientific knowledge.

The core curriculum in botanical medicine for naturopathic medical students covers fundamental plant identification and nomenclature, pharmacognosy, therapeutic actions, extraction principles, dosage considerations, contraindications, toxicology, herb-drug interactions, clinical applications and treatment regimens. Clinical therapeutics draw from traditional uses, naturopathic formulae and use, and from international scientific and clinical research, as well as advances in phytotherapy. Several of the materia medica courses are linked with a laboratory experience in the botanical medicine lab on campus. Completion of the required curriculum, along with the required clinical experience, prepares the student for effective and safe clinical utilization of preventive and therapeutic botanicals.

A variety of botanical medicine elective and special topic courses are offered to students in the naturopathic medicine program and other programs, along with independent study options.

The Bastyr garden is managed by the botanical medicine department, with support from the University and donations. It is maintained primarily by a staff garden supervisor and work-study students. The botanical medicine department continues to build an herbarium, although the vast University of Washington herbarium is used as one of Bastyr's teaching venues. The department supports a botanical medicine lab to expand class experience and provide a space for students to continue exploring their work and passion for herbs.

HOMEOPATHIC MEDICINE

Homeopathic medicine is a broad therapeutic modality that is integral to naturopathic medicine. Homeopathy is based on the law of similars. This principle states that a substance that is capable of producing symptoms of disease in a healthy person can cure an ill patient presenting a similar pattern of disease symptoms. Homeopathic medicines stimulate a person's inherent defense mechanism. The entire range of mental, emotional and physical symptoms is considered with each patient. A single medicine is then chosen that addresses the complex pattern of the patient, while emphasizing the uniqueness of the individual.

The homeopathic curriculum at Bastyr University includes the basic principles and philosophy of homeopathy, materia medica of commonly used homeopathic medicines, use of the homeopathic repertory, taking a homeopathic case, homeopathic case analysis and practical therapeutics for common medical situations.

All naturopathic students are required to take three courses in homeopathy, HO6300, HO6301, and HO6302 (Homeopathy 1-3). There are three additional elective courses, HO9301, HO9302, and HO9303 (Homeopathy 4-6), which explore, in more depth, the areas of homeopathic philosophy, materia medica, case analysis and management, and homeopathic therapeutics. Naturopathic students, upon successful completion of Homeopathy 1-3, may register for shifts in the Homeopathy Specialty Clinic at Bastyr Center for Natural Health. Students registered for a homeopathy shift must register concurrently for Homeopathy Grand Rounds.

PHYSICAL MEDICINE

Physical medicine is an integral part of naturopathic medicine. It includes various modalities such as hydrotherapy, osseous and soft tissue manipulation, sports medicine and therapeutic exercise. The course of study and clinical training in physical medicine enable students to develop a solid foundation for entry into the practice of naturopathic medicine. The curriculum offers sufficient hours in manipulation to satisfy the state of Washington's licensing requirement as a naturopathic physician.

The physical medicine curriculum begins by teaching students the art of touch and palpation, introduction to basic Swedish massage techniques and soft tissue manipulation, and then progresses to osseous manipulation.

SUMMER MESSAGE INTENSIVE

Bastyr University and Bellevue Massage School Center for Healing Arts offer students a summer massage training program that allows them to apply coursework taken at Bastyr University toward the Washington state requirements for massage licensure. This course cannot be audited.

Students interested in further information may meet with their academic advisor in the registrar's office or with their department's program supervisor to discuss the program availability and the course prerequisites.

NATUROPATHIC MEDICINE CLINIC ENTRANCE PREREQUISITES

Naturopathic medicine students must complete and achieve competency in all required classes prior to entering clinical training. This includes all classes in the first and second year if the student is on the four-year track. It includes all classes of the first three years of the 5A track and the first two years of the 5B track. Questions about didactic prerequisites for clinical ND training should be addressed to the registrar's office on campus. Students must also have completed TB screening, received a hepatitis B vaccination or signed a waiver, have a current CPR card, and submit to a national criminal background check. The criminal background check will be conducted prior to enrolling in clinical shifts. For more information, see *Academic Policy and Procedure Manual*.

CLINIC REQUIREMENTS

Registration in eight consecutive quarters is required to complete the clinic training requirements. Students are expected to begin their clinical training during the summer following the completion of their preclinical courses. Students will be registered for six training during their first year (four quarters) in clinic. After completing six shifts (Patient Care and Physical Medicine), students become primary clinicians. Students must be enrolled in at least one Patient Care shift each quarter throughout their clinical training.

The clinic faculty are currently in the process of developing a system of skills evaluation similar to, or including, the Objective Skills Clinical Exams (OSCE). These exams are designed to evaluate students' clinical skills and clinical decision making in a standardized manner. Students will be required to participate in an OSCE, or other clinical evaluation procedures, during each year of their clinical training.

GRADUATION REQUIREMENTS

The curriculum of the naturopathic medicine program requires completion of 310.5 credits for graduation. This includes 249.5 core course credits, 14 elective credits and 47 clinical credits. Students must achieve competency (grade of AC) in all 310.5 credits required in the curriculum. Students must complete all required clinical competencies in order to graduate. Students must complete at least two-thirds of their credits in residence at Bastyr University.

ELECTIVES

Students in the naturopathic medicine program are required to complete 14 elective credits (included in the 310.5 credit totals) during their course of study. Up to five of these credits may be satisfied by independent study. It is recommended that elective credits be spread out over the length of the student's program. Courses designated as elective and special topics may fulfill this 14-credit requirement, as well as additional clinic shifts during the student's clinical training. A maximum of nine elective credits from any one discipline may be used to satisfy the Naturopathic Medicine program elective requirement. The rule of a nine-credit maximum does not apply to elective credits being taken to satisfy waived credits. Elective credits covering waived course credits may be from any discipline. A student may take elective credits from any program/department.

NATUROPATHIC MEDICINE PROGRAM TRACKS

Students who are accepted into the program and decide not to complete the program in four years must choose one of the following approved options:

- Five-Year Track-Option A.
- Five-Year Track-Option B.
- Combined Five-Year Track-Option A and B (for a total of 6 years).

These are the only program track options. Bastyr offers no part-time status. At the time of enrollment, most naturopathic medicine students are registered for the four-year track. Students who wish to change to one of the five-year tracks must complete the ND change of status form (available in the registrar's office) and then meet with an advisor/evaluator, room 249. Changes may affect financial aid packages as well as the sequencing of courses. Naturopathic medicine students wanting to add a second program must switch to one of the five-year tracks.

As long as a student remains on an approved program track, there will be no course scheduling conflicts.

Students must remain on track in order to graduate on time. Students may not register off track or register ahead of track without approval from the dean's office.

For additional information regarding combining naturopathic medicine with acupuncture and Oriental medicine, please contact the admissions office.

The curriculum tables that follow list the tentative schedule of courses each quarter. Next to each course are the number of credits per course (Crdt.), the lecture hours each week (Lec.), the lab/clinic hours each week (L/C) and the total contact hours for the course over the entire quarter (Tot.).

CERTIFICATE IN NATUROPATHIC MIDWIFERY

Please note that, as of May 2010, new students are no longer being enrolled in the Certificate in Naturopathic Midwifery program. Please refer to the Department of Midwifery section of this catalog (page 50) for information on the new Master of Science in Midwifery program.

The naturopathic midwifery program provides training leading to a Certificate in Naturopathic Midwifery.

The vision of the naturopathic midwifery program is:

- *To preserve naturopathic childbirth within the scope of naturopathic medical practice and to promote naturopathic midwifery nationwide.*
- *To improve the quality of care provided to childbearing women and their families.*
- *To preserve the normalcy of childbearing and promote natural childbirth.*

Graduates are uniquely qualified among naturopathic physicians and among midwives. As comprehensive naturopathic family physicians, they enjoy an extended scope of practice in the provision of care to the birthing woman and her family. In their role as naturopathic midwives, they augment the midwives' model of care with the naturopathic principles of practice and exceed the midwifery scope of practice by providing ongoing pediatric, gynecological and family care. The depth and breadth of naturopathic medicine is wholly embodied in the naturopathic doctor specializing in maternity care.

Upon completion of our program the graduate will be able to:

- Implement an integrated, comprehensive knowledge and skill base to competently provide independent, evidenced-based, naturopathic midwifery care according to the midwives Alliance of North America (MANA) core competencies, MANA standards and qualifications for the art and practice of midwifery as well as AANP naturopathic principles and code of ethics, within prescribed legal boundaries.
- Practice interdependently with other members of the health care team.
- Advocate for the client as an integral member of the health care team with distinct rights and responsibilities, facilitating empowerment and promoting health.
- Provide culturally sensitive care integrating knowledge and wisdom about the biophysical, psychosocial and spiritual aspects of childbearing according to MANA statement on values and ethics.
- Participate in formal and informal quality assurance mechanisms and pursue lifelong learning.

This certificate adds to the Bastyr naturopathic medicine program 71.5 additional classroom and lab credits, which includes approximately 1,350 clinical hours. At least one year of clinical training is required. These additional requirements may be done concurrently with, or after finishing, a CNME-accredited program in naturopathic medicine. (If taken after completing a naturopathic medicine degree, the program will take one to two years to complete.)

The program is open to graduates of any naturopathic medical program that is accredited by the Council on Naturopathic Medical Education (CNME). The program is fully accredited by the federally approved Midwifery Education Accreditation Council. The naturopathic midwifery program fulfills the MANA core competencies for midwifery practice and exceeds minimum clinical standards set by both the American College of Nurse Midwives and the North American Registry of Midwives (NARM). Graduates are eligible for licensure as midwives in the state of Washington and may be able to demonstrate eligibility in other states that license midwives. Graduates may also sit for the ACNO (American College of Naturopathic Obstetricians) specialty licensure exam in states that include natural childbirth within the scope of the naturopathic physician. In addition, graduates are eligible to sit for the NARM certified professional midwife (CPM) exam.

Note: New students are no longer being enrolled in the Naturopathic Midwifery program.

DIDACTIC TRAINING

The naturopathic midwifery program is not a freestanding curriculum. It is interwoven with the naturopathic medicine curriculum. It adds approximately one year to the naturopathic medicine program when taken concurrently. Students planning to complete the midwifery program are advised to choose the 5B naturopathic medicine curriculum track in order to allow for the additional clinical and classroom hours required.

Note: Students not enrolled in the 5B track will not be placed in high volume, local internship sites.

Many courses in the naturopathic medicine program are prerequisites for the naturopathic midwifery program. Students enrolled in the naturopathic midwifery program may apply nine credits of required midwifery coursework toward the 15 elective credits required in the naturopathic medicine program. Students entering the naturopathic midwifery program have no requirement for midwifery electives; however, students are strongly encouraged to take electives offered by the naturopathic midwifery department and those electives offered by other departments that are applicable to family, maternal, infant and pediatric care.

Students are assessed by classroom faculty and clinical faculty for proficiency in course-specific and clinical competencies as well as the Bastyr global competencies. (See catalog introduction.)

CLINICAL TRAINING

The naturopathic midwifery program requires extensive supervised clinical experience, including the care of women and their babies throughout pregnancy and into the postpartum period. The addition of this program greatly deepens and broadens clinical expertise via at least 1,350 additional hours of supervised patient interactions, physical examinations, charting, lab procedures, etc.

While enrolled in the academic program, students are required to manage 75 prenatal visits (20 must be the initial prenatal visit), 20 newborn visits, 50 postpartum visits, actively participate in at least 25 births and manage 50 births, all under the supervision of an approved preceptor. (Students receive 100 percent supervision during all aspects of clinical training.) In order to enter a birth internship, students must be admitted into the naturopathic midwifery program and have successfully completed all basic science courses and MW7320 Normal Maternity. Prior to managing births or performing any skills independently at births, students must have completed MW7303 Labor Complications.

Of the 50 births managed, 15 must be with one preceptor and 15 must be births at home or in an out-of-hospital setting. To satisfy continuity of care requirements, at least four of these managements must be with women for whom the student has provided primary care during at least four prenatal visits, the birth, a newborn exam and one postpartum exam. In addition, the management of 20 newborn exams must be documented. Students are required to train in at least two different preceptor sites. Each of the 75 birth experiences counts as one-half credit, for a total of 37.5 credits. Advanced clinical standing status may be approved by the naturopathic midwifery department chair.

All clinical experience is gained in internships secured by students with approved physicians or midwives practicing in the U.S. or abroad. Each student is responsible for arranging his/her own internship with guidance from the naturopathic midwifery department. All preceptors must be practicing legally within their state or country and must be approved by the department chair. Approval can take as long as eight weeks for out-of-state sites. Advanced students may be placed in an overseas, high-volume birth site. These sites are hospital-based and require at least a one-month commitment. See the financial aid office for loan information.

Students are required to obtain training in neonatal resuscitation, adult CPR, a TB test, a federal background check, and must complete a criminal history disclosure form before beginning their internships. (See *Academic Policy and Procedure Manual* for more information.) Information about times and locations of neonatal resuscitation workshops is available through Seattle Children's Hospital. Students must keep resuscitation trainings current throughout the clinical training experience and are responsible for the costs incurred.

Once placed in an internship, students are required to meet with the naturopathic midwifery department chair each quarter to review evaluations and to register births. If students are interning at a distance, they must

maintain timely contact with the chair each quarter by whatever means appropriate. Those admitted to the program who are not involved in internships are also expected to schedule and attend a quarterly advising session with the department chair.

GRADUATION REQUIREMENTS

Students enrolled in the naturopathic midwifery program are required to complete the Bastyr University naturopathic medicine program or be a graduate of a CNME-accredited naturopathic college or program, and are required to complete 32 credits of specialized naturopathic midwifery courses, 2 credits of midwifery independent study, and 37.5 credits of birth practicum. A student shall be issued the Certificate in Naturopathic Midwifery when all the following requirements have been met:

- Receipt of the doctor of naturopathic medicine degree.
- Satisfactory completion of all naturopathic midwifery program courses.
- Compilation of approved clinical practice guidelines.
- Completion of all naturopathic midwifery program clinical requirements.
- Recommendation from the naturopathic midwifery department chair.

Bastyr students who enter the program while enrolled in the naturopathic medicine program have three years from their ND graduation date to complete the naturopathic midwifery program. Those with an ND degree from Bastyr or any other CNME-accredited program have three years to complete the naturopathic midwifery program.

LICENSURE

In most states that license naturopathic physicians to provide intrapartum care, practitioners must have graduated from a maternity care specialty program offered within a CNME-accredited naturopathic medicine program. In addition, they are required to pass the American College of Naturopathic Obstetricians (ACNO) exam. In states using the North American Registry of Midwives (NARM) exam, our graduates are eligible to be licensed or registered as midwives or as certified professional midwives (CPMs).

The curriculum table that follows lists the tentative schedule of courses each quarter. Next to each course are the number of credits per course (Crdt.), the lecture hours each week (Lec.) and the lab/clinic hours each week (L/C).

¹Electives are subject to change and may not be offered every year.

²Also required in the naturopathic medicine curriculum

³Students are required to take 2 credits of independent study (MW7901, MW7902 or MW7903). Students are permitted to study more than one topic but must register using a separate course number for each topic.

⁴Upon completion, Childbirth Practicum will total 37.5 credits, 12.5 credits as an active participant and 25 credits as the primary midwife under supervision (“managements”).

Total Requirements: Naturopathic Midwifery Program

Totals below do not include credit requirements for the naturopathic medicine program or elective credits.

	Crdt.	Lec.	L/C
Total Core Course Credits and Hours	34	28	8
Total Practicum Credits and Hours	37.5	0	var

Curriculum and course changes in the 2010-2011 Bastyr University Catalog are applicable to students entering the naturopathic midwifery program during the 2010-2011 academic year. Please refer to the appropriate catalog if interested in curriculum and courses required for any other entering year.

NATUROPATHIC MEDICINE/ACUPUNCTURE AND ORIENTAL MEDICINE DUAL TRACK

Students in the Bastyr University naturopathic medicine program who are academically in good standing have the opportunity to apply to the Master of Science in Acupuncture (MSA) or the Master of Science in Acupuncture and Oriental Medicine (MSAOM) program in October of their second year of the four-year track. This requires a formal application to the acupuncture and Oriental medicine program through the admissions department, followed by a joint interview by both the AOM and ND schools.

ND students who are considering applying to the School of AOM as their second program are strongly encouraged to be enrolled as four-year track students during their first two years of attendance. In essence, the dual track program requires that students have successfully completed their pre-clinical ND training before they add a second degree program. Students who are accepted into the AOM program must switch their naturopathic program to the five-year track in order to carry a combined program load. Students with advanced medical training, e.g., DC, DO or MD, must successfully complete the first year of study in their original program before acceptance into dual status. Dual program applicants are able to utilize their basic science coursework in the naturopathic program toward their MSA or MSAOM.

Please note that some states require Chinese herbal training for acupuncture licensure. Please see the School of Acupuncture and Oriental Medicine master’s program description for complete information on degree and licensing requirements.

DUAL TRACK ELECTIVE CREDITS

Dual track students must complete nine elective credits. Four of the elective credits must be from Oriental medicine or Chinese medicine and five credits from other disciplines. If a dual track student has waived a required course from either program, core course credit from the *opposite* program cannot be used to cover the waiver. Use of core credits would result in a shortage of overall credits.

The curriculum tables that follow list the tentative schedule of courses each quarter. Next to each course are the number of credits per course (Crdt.), the lecture hours each week (Lec.), the lab/clinic hours each week (L/C) and the total contact hours for the course over the entire quarter (Tot).

DOCTOR OF NATUROPATHIC MEDICINE/MASTER OF SCIENCE IN ACUPUNCTURE (MSA) OR ACUPUNCTURE AND ORIENTAL MEDICINE (MSAOM) 2010-2011

Note: Since a naturopathic medicine student enters the dual program after completion of the 2nd year of the NM program, the curriculum that follows reflects the NM curriculum from the 2008/2009 catalog and the MSA/MSAOM curriculum from the 2010-2011 catalog.

¹BC6204: Usually also offered in summer. Summer enrollment is recommended for dual track students.

²BC6209 and BC6305: Offered in winter and spring

Eligible to take NPLEX basic science exams after the successful completion of the second year.

See clinic entrance prerequisites, page 78.

Note: The didactic courses that follow in italics are the additional courses required for the MSAOM degree. The shifts that follow in italics represent the distribution of shifts for the MSAOM degree. For those students in the MSA program, please follow the shift distribution in regular text.

¹NM8206 and NM8207: Both offered summer and fall

²NM8308: Offered fall and spring

³NM8325: Offered in fall, winter and spring

⁴Physical Medicine shifts may be distributed differently; two shifts fulfilling ND requirements will be assigned in each of the last four quarters of the program.

⁵NM8101: Offered fall and winter

⁶NM8212 and NM8213: Both offered winter and spring

⁷Students are required to complete a total of 44 NM interim Patient Care hours and 36 AOM Internship Vacation hours. (Usually students staff the shifts they are assigned to in the quarter just ended.) Students register for and pay for this shift in their last quarter of attendance.

YEAR VI

Qtr. Cat. No.	Course Title	Crdt.	Lec.	L/C	Tot.
Su	CH6411	<i>Chinese Herbal Therapeutics 4</i>			
	Quarterly Subtotal	4	4	0	44
	AOM Clinic Internship 13-14	4	0	8	88

F	<i>AOM Clinic Internships 15-16</i>				
		4	0	8	88
	<i>CHM Shifts 7-8</i>	4	0	8	88

For students who choose to take advantage of the optional clinic experience in China, up to eight (8) credits (16 lab hours) may be applied toward AOM Clinical Internship requirement. Acupuncture and CHM shifts will be distributed differently if a student goes to China. All students who plan to study in China must take the one-credit required elective OM6820 Clinic Entry for China in summer quarter of year five just preceding their China internship. This course may be counted toward required AOM elective credits.

Elective Requirements: Naturopathic Medicine/Acupuncture and Oriental Medicine

Qtr. Cat. No.	Course Title	Crdt.	Lec.	L/C	Tot.
variable	variable	9	9	0	99
	Elective and Special Topics	9	9	0	99
	Elective Totals	9	9	0	99

Note: Four of the nine elective credits must be from either the OM or CH disciplines. The remaining five credits must be from other disciplines such as NM, HO, BO, PS or TR.

Curriculum and course changes in the 2010-2011 Bastyr University Catalog are applicable to students entering during the 2010-2011 academic year. Please refer to the appropriate catalog if interested in curriculum and courses required for any other entering year.

Bastyr Center for Natural Health

THE TEACHING CLINIC OF BASTYR UNIVERSITY
CLINICAL EDUCATION PRACTICUM

Jamey Wallace, ND, Clinic Director

The mission of Bastyr Center for Natural Health is to create an extraordinary environment committed to excellence in health care and clinical education that assists and empowers individuals and the community to achieve better health and a higher quality of life.

All students in the Doctor of Naturopathic Medicine program (ND), Doctor of Acupuncture and Oriental Medicine program (DAOM), Master of Science in Acupuncture program (MSA), Master of Science in Acupuncture and Oriental Medicine program (MSAOM), Master of Nutrition program (MSN/CHP and MSN/DPD), Certificate in Chinese Herbal Medicine program (CCHM), and BS Didactic Program in Dietetics (BSN/DPD) receive clinical training at Bastyr Center for Natural Health - Team Care. The program deans/chairs or their designates in conjunction with the clinic medical director oversee the clinical education and training of the students and work closely with each program's lead administrator.

The clinical training in Team Care is modeled upon mentorship. The average faculty/student ratio is 1:6, which includes three primary clinicians/interns and three observing clinicians/interns. Each student pair is assigned to a room throughout the quarter. Each clinic shift begins with case preview during which the students present to the supervisor their preparations for the patients they will see that day. During each patient visit, the supervisor spends time in the room with the student team and the patient. Also, during each visit, the supervisor and student team discuss the patient in the consult rooms, reviewing the assessments and treatment recommendations. Each clinic shift concludes with case review where all the students and supervisors meet jointly to discuss selected cases seen that day.

Clinical course numbers and descriptions for each program's required and elective clinical offerings are found in the course description section of the catalog under the appropriate program heading. The narrative section of the catalog provides further information regarding clinical training, under each program and curriculum section.

Students in each program receive a *Bastyr Center for Natural Health Student Clinician Handbook* prior to entering clinic. This required manual serves as the student's clinic textbook and contains information on clinical education requirements, policies and procedures, learning objectives and clinical competencies.

External clinical training opportunities have been developed for each program, in order to provide a broader educational experience for students. At each external site, Bastyr faculty supervises the student clinicians. For a description of these sites, see Bastyr Center facilities listing on page 11 in this catalog.

Students have a preceptorship requirement where they work with a variety of licensed, practicing health care professionals in various practice settings. These placements provide students with valuable clinical experience. The combination of external training sites, the preceptor experience and clinical rotations in the main clinic assures diversity in each student's clinical experience.

Bastyr Center for Natural Health has a well-established CNME-credentialed naturopathic residency program, as well as a residency program in acupuncture and Oriental medicine. Currently, there are eight naturopathic residency positions and one AOM residency position. These programs are highly competitive and attract graduates from other educational institutions as well as from Bastyr. The residency programs at Bastyr are closely supervised programs of mentorship. Each resident progresses from a purely observational role into an independent role over the course of the year. This progression is monitored and facilitated by a faculty mentor and by the program dean/chair or their designate. A second year of residency offers clinical supervision and continued skill development. All residents have multiple opportunities to do rotations in other local clinics (allopathic, naturopathic, acupuncture and Oriental medicine, etc.). The office of the director of graduate and community medicine is responsible for the administration, development and expansion of the naturopathic residency program. The University is committed to the goal of providing residency opportunities for every graduate.

Course Descriptions

Curriculum and course changes in the 2010-2011 *Bastyr University Catalog* are applicable to students entering during the 2010-2011 academic year. Please refer to the appropriate catalog if interested in curriculum and courses required for any other entering year.

Program, Department and Course Designation Codes

AV: Ayurvedic Medicine
BC: Basic Sciences
BO: Botanical Medicine/Herbal Sciences
CH: Chinese Herbal Medicine Certificate
DI: Dietetic Internship
EX: Exercise Science and Wellness
HO: Homeopathic Medicine
IS: Interdisciplinary Studies
MW: Midwifery
NM: Naturopathic Medicine
OM: Acupuncture and Oriental Medicine
PM: Physical Medicine
PS: Counseling and Health Psychology
RD: Didactic Program in Dietetics
TR: Nutrition

COURSE NUMBERING SEQUENCE KEY

The first digit indicates the year/level at which the course is offered:

1xxx Freshman prerequisite courses
2xxx Sophomore prerequisite courses
3xxx Junior BS Program
4xxx Senior BS Program
5xxx-8xxx Graduate and Professional level courses
9xxx Electives (undergraduate and graduate)

The second digit indicates the type of course:

x1xx General courses
x2xx Diagnostic courses
x3xx Diagnostic/therapeutic courses
x4xx Therapeutic courses
x5xx Special topics courses
x8xx Clinic and clinical courses
x9xx Independent study

Note: In the following descriptions, commonly used abbreviations in reference to Bastyr programs include the following: acupuncture and Oriental medicine (AOM), midwifery/natural childbirth (MW), naturopathic medicine (ND), and nutrition (NTR).

Ayurvedic Medicine

AV9110 Fundamentals of Ayurvedic Medicine

2 credits

This elective course is an introduction to Ayurvedic medicine. It considers concepts of recognizing Ayurvedic body type and psychological personality, customizing the health plan to suit the unique constitution, Ayurvedic nutrition and diet therapy, Ayurvedic herbology, and gentle detoxification through Ayurvedic Pancha-Karma therapy. This course is recommended prior to taking other Ayurvedic electives. Prerequisite: Admission to Bastyr University

Basic Sciences

Lynelle Golden, PhD, Department Chair

BC1105 College Algebra/Pre-Calculus

4 credits

This course covers basic equations, inequalities and modeling, and functions and graphs. Specific emphasis is placed upon quadratic, exponential and logarithmic functions. Prerequisite: Precollege algebra (taught in a high school or community college)

BC2107 Introduction to Physics I

2 credits

This is the first of a two-course sequence that offers an introduction to the general principles of physics. Topics include Newton's laws of motion, momentum and energy and linear and rotational acceleration. This is the first of two courses that can be used to satisfy the physics prerequisite for the ND program. Offered only summer quarter. Prerequisite: College algebra or trigonometry

BC2108 Introduction to Physics II

2 credits

This is the second of a two-course sequence that offers an introduction to the general principles of physics. Topics include electricity, magnetism and optics. This is the second of two courses that can be used to satisfy the physics prerequisite for the ND program. Offered only summer quarter. Prerequisite: BC2107 or an equivalent physics course that included Newton's laws of motion, momentum and energy and linear and rotational acceleration

BC2115 General Chemistry Intensive 1 Lecture

5 credits

This four-week summer quarter course is the first part of an eight-week intensive series held in two parts. The fundamental laws and basic concepts of modern chemistry as applied to the structure and behavior of matter/energy are presented. Topics include measurements and dimensional analysis; atoms, molecules and ions; mixtures; quantitative relationships; thermochemistry; the periodic table; chemical bonding; gases, liquids and solids; rates of reactions; equilibrium; acids and bases; solubility; and oxidation/reduction. Prerequisites: Passing grade in college level introduction to chemistry course

BC2116 General Chemistry 1 Intensive Lab

1 credit

Corequisite: BC2115

BC2117 General Chemistry 2 Intensive Lecture

5 credits

This four-week summer quarter course is the second part of an eight-week intensive series held in two parts. The fundamental laws and basic concepts of modern chemistry as applied to the structure and behavior of matter/energy are presented. Topics include measurements and dimensional analysis; atoms, molecules and ions; mixtures; quantitative relationships; thermochemistry; the periodic table; chemical bonding; gases, liquids and solids; rates of reactions; equilibrium; acids and bases; solubility; and oxidation/reduction. Prerequisites: BC2115

BC2118 General Chemistry 2 Intensive Lab

1 credit

Prerequisite: BC2116 or equivalent. Corequisite: BC2117

BC3100 Survey of Organic Chemistry

4 credits

This survey course examines the types of bonding, functional groups, and physical properties of saturated and unsaturated hydrocarbons, alcohols, phenols, thiols, ethers, aldehydes, ketones, carboxylic acids, amines, and amides. Prerequisite: general chemistry (BC2115 or equivalent)

BC3104 Biochemistry

4 credits

This course provides an overview of basic human metabolism. Topics include carbohydrate, protein and fat metabolic pathways, with integration into overall anabolic and catabolic metabolic processes. Prerequisite: BC3100

BC3113 Living Anatomy

3 credits

Required for exercise science students. This course emphasizes musculoskeletal anatomy through lecture and palpation. The focus is to lay a strong foundation of the muscles, bones and joints necessary for understanding biomechanics. Weekly lecture and palpation are reinforced by a required rotation in the cadaver anatomy laboratory. This course is a prerequisite for the massage intensive course and is offered winter quarter only. Prerequisite: None

BC3115 Organic Chemistry Intensive 1 Lecture	4 credits
This is a four-week intensive summer course. This course along with Organic Chemistry 2 is intended to satisfy the organic chemistry prerequisites for BC5104. This course offers a systematic study of the physical properties, electronic structures, modes of bonding, and patterns of reactivity seen in alkanes, alkenes, alcohols, thiols, ketones, aldehydes, esters, ethers, phosphoesters, thioesters, amines, amides, carboxylic acids and aromatic compounds. Prerequisite: At least a C in BC2115 and BC2117 or equivalent college-level courses elsewhere	
BC3116 Organic Chemistry Intensive 1 Lab	1 credit
Prerequisite: At least a C in BC2117 and BC2118 or equivalent college-level courses elsewhere. Corequisite: BC3115	
BC3124 Organic Chemistry for Life Sciences Lecture/Lab	5 credits
Offered in the fall, this course is intended to satisfy the organic chemistry prerequisite for BC4109. This course offers a survey of the chemistry and reactivity of organic compounds with an emphasis on those molecules of biological importance. Prerequisite: At least a C in either BC2117 and BC2118 or an equivalent college-level chemistry course with lab	
BC3125 Organic Chemistry Intensive 2 Lecture	4 credits
This is a four-week intensive summer course. This course along with Organic Chemistry 1 is intended to satisfy the organic chemistry prerequisites for BC5104. Structure and function of proteins, lipids, carbohydrates and nucleic acids are also included. Prerequisite: A grade of C or better in BC3115	
BC3126 Organic Chemistry Intensive 2 Lab	1 credit
Prerequisite: A grade of C or better in BC3116. Corequisite: BC3125	
Anatomy and Physiology Sequence for AOM	
This three (3) course sequence for AOM students presents an integrated approach to the study of the normal human body. The anatomy, physiology of each major organ system and their interrelationships are approached in a lecture/laboratory format. Prosected cadavers are used for lab demonstrations.	
BC3134 Living Anatomy for AOM	4 credits
Western anatomy and acupuncture energetic anatomy are bridged in this course that emphasizes musculoskeletal anatomy through lecture, palpation and the study of cadavers. Anatomical connections to acupuncture point location are reinforced in both surface anatomy and in the required weekly cadaver laboratory. Offered fall quarter. Prerequisites: Admission into AOM program	
BC3135 Anatomy and Physiology 1 Lecture/Lab (AOM)	5 credits
See general description of Anatomy and Physiology sequence preceding BC3134 above. Topics covered in this course include cellular anatomy and physiology, and the integumentary, nervous, muscular, and endocrine systems. Prerequisite: BC3134 or permission of basic sciences department	
BC3136 Anatomy and Physiology 2 Lecture/Lab (AOM)	4 credits
See general description of Anatomy and Physiology sequence above. Topics covered in this course include blood, lymphatic, immune, cardiovascular, respiratory, digestive, urinary and reproductive systems. Prerequisite: BC3135 or permission of basic sciences department	
BC3139 Human Biology Seminar	2 credits
This course assesses the baseline learning skills of students and then addresses areas of concern in problem solving, writing, study strategies, and prerequisite knowledge. Students are introduced to the goals of the human biology program and to resources available to achieve these goals. Prerequisite: Admission to the human biology program	
Anatomy and Physiology 1-3 for Undergraduate Science Majors	
This three (3) course sequence presents an integrated approach to the study of the normal human body. The anatomy, histology and physiology of each major organ system and their interrelationships are approached in a lecture/laboratory format. This sequence is designed for students enrolled in the nutrition, herbal sciences, exercise science, and psychology and human biology programs. Prosected cadavers are used for lab demonstrations. See BC3162 and BC3163 for Anatomy and Physiology 2 and 3.	
BC3141 Anatomy and Physiology 1 Lecture/Lab	3 credits
See the sequence description above. This course covers basic cell structure and function, histology and the anatomy and physiology of the integumentary, skeletal and nervous systems. Prerequisites: General chemistry and general biology with labs	
BC3144 Integrated Biochemistry & Cell Biology Lecture/Lab	6 credits
This course is an introduction to the basic principles of biochemistry, cellular and molecular biology and genetics relevant to human cells. Topics include cell chemistry, molecular genetics, energy metabolism and cell homeostasis. General themes or models are introduced as a foundation for integration of concepts. Foundational concepts continue to be integrated throughout Human Biology 1-3. The lab component introduces students to relevant techniques in biochemistry and molecular biology and emphasizes scientific inquiry. Prerequisite: Admission to the human biology program	
BC3145 Physics 1 Lecture/Lab	4 credits
The first in a sequence of courses designed as a survey of physics. The course focuses on classical mechanics. Specific applications to human biology are emphasized. The lab component emphasizes scientific inquiry and applications to human biology. Prerequisite: Admission to the human biology program or permission of instructor	

BC3146 Physics 2 Lecture/Lab	4 credits
The second in a sequence of courses designed as a survey of physics. The course focuses on thermal physics and electromagnetism. Specific applications to human biology are emphasized. The lab component emphasizes scientific inquiry and applications to human biology. Prerequisite: BC3145	
BC3147 Physics 3 Lecture	3 credits
The third in a sequence of courses designed as a survey of physics. This course focuses on waves and modern physics. Specific applications to human biology are emphasized. Prerequisite: BC3146	
BC3148 Research Methods in Human Biology 1	3 credits
This course provides an overview of the fundamentals of the scientific method and research design. Students develop the skills needed to locate, evaluate, and utilize published scientific research. Students become familiar with qualitative and quantitative research methods and the principles of effective experimental design. Prerequisite: Admission to the human biology program or permission of instructor	
BC3149 Research Methods in Human Biology 2	3 credits
This course builds upon Research Methods 1. Students learn when to use basic quantitative biostatistical methods. The importance of statistical methods in effective experimental design is emphasized. Prerequisite: BC3148	
BC3151 Integrated Human Biology 1 Lecture/Lab	6 credits
This course includes an introduction to basic concepts necessary to understand structure and function at the higher organizational levels. Basic principles of anatomy, physiology, biochemistry, cell and developmental biology are integrated to provide an understanding of tissues, the integumentary system and the basic functions of endocrine and neural control systems. General themes or models are used to facilitate integration of concepts. The lab component emphasizes scientific inquiry and examines histology, anatomy, biochemistry and physiology of the systems examined. Prerequisite: BC3144	
BC3152 Integrated Human Biology 2 Lecture/Lab	6 credits
This course is a continuation of Human Biology I. Basic principles of anatomy, physiology, biochemistry and cell and developmental biology are integrated to provide an understanding of the skeletal and muscular systems, blood and the immune and cardiovascular systems. General themes or models are used to facilitate integration of concepts. The lab component emphasizes scientific inquiry and examines histology, anatomy, physiology and biochemistry of the systems. Prosected cadavers are used for anatomical study. Prerequisite: BC3151	
BC3162 Anatomy and Physiology 2 Lecture/Lab	3 credits
See the description of the A and P sequence preceding BC3141. Topics covered in this course include the anatomy and physiology of the muscular, endocrine, cardiovascular, and immune systems and blood. Prerequisite: Passing grade in BC3141	
BC3163 Anatomy and Physiology 3 Lecture/Lab	4 credits
See the description of the A and P sequence preceding BC3141. Topics covered in this course include the anatomy and physiology of the digestive, respiratory, urinary and reproductive systems. Prerequisite: Passing grade in BC3162	
BC3901, BC3902, BC3903 Independent Study	variable credit
These courses provide an opportunity for undergraduate students to study areas of interest that are not included in the regular curriculum. With the aid of a selected resource person, the student may explore a field of study that is of personal interest and value. Prerequisite: Permission of department chair	
BC4100 Microbiology Lecture/Lab	4 credits
This course introduces the diversity of microorganisms including bacteria, fungi, algae, protozoans and infectious particles. The beneficial and detrimental effects of these microorganisms are explored, including human pathogens, biotechnology, food production and bioterrorism. The lab provides exposure to the standard microbiological tools used in clinical laboratories: sterile technique, pure culture, staining, selection of selective and differential media, biochemical tests, isolation of organisms from samples, antibiotic susceptibility, and identification of unknowns. Prerequisite: BC3152	
BC4105 Introduction to Western Pathology (AOM)	3 credits
This course explores the inflammatory process, cell injury and repair, basic immunopathology, cancer, and blood, hemodynamic and cardiovascular disorders. Prerequisites: BC3100 and BC3135 or BC3162	
BC4114 Disease Processes	4 credits
This course is designed for nutrition and herbal science students and is an introduction to pathology. The inflammatory process, basic immunopathology, diabetes, cancer, anemias and the most common and clinically relevant disease processes of the cardiovascular and gastrointestinal systems are covered. Prerequisites: BC3163 and BC4118	
BC4115 Pharmacology Overview for Herbal Sciences	3 credits
This course is designed to teach the basics of how the commonly used pharmaceutical drugs work. It emphasizes the mechanisms of actions, the adverse effects and the common therapeutic guidelines for drug treatment. Where appropriate, botanical mechanisms of action are discussed and possible areas of drug-herb interactions are noted. Prerequisites: BC3163, BC4118	

BC4116 Bioethics	3 credits
This course provides an opportunity for students to think critically about difficult ethical problems that emerge from scientific research and the application of medical technology to human biology. Discussions and assignments focus on personal decision making and public policy relevant to biomedical issues. Prerequisite: Admission to the human biology program	
BC4117 Biochemistry for Life Sciences 1 Lecture/Lab	5 credits
Biochemistry of fuel metabolism, carbohydrates and lipids. This course is taught for undergraduates in herbal science, nutrition and health psychology (human biology track). This course is offered in both winter and summer. Prerequisite: A grade of at least a C in either BC3124 or one quarter of college-level organic chemistry with laboratory. A grade of at least a C in one quarter of college-level biology with laboratory is also required.	
BC4118 Biochemistry for Life Sciences 2 Lecture/Lab	5 credits
Topics include eicosanoids, cholesterol metabolism, amino acid metabolism and nucleotide metabolism. This course is taught for undergraduates in herbal science, nutrition and health psychology (human biology track). Prerequisite: A passing grade in BC4117	
BC4119 Intro to Research Proposals	2 credits
Students work with a mentor to write a research proposal. Students who are working with human subjects also submit the proposal to the IRB for approval. This course is a prerequisite for research or internship credits. Prerequisite: All year-one courses	
BC4120 Microbiology Lecture (AOM and HS)	2 credits
This course explores the world of microorganisms and human health. Pathogens associated with human illness are emphasized, including bacteria, fungi, viruses, parasites and prions. Prerequisites: BC3136 or BC3162	
BC4120L Microbiology Laboratory (AOM) Lab	1 credit
In this intensive, hands-on laboratory component of Microbiology lecture, students further explore the nature of micro-organisms, including their culture and identification using various staining and biochemical testing. Prerequisite: Co-enrollment in BC4120	
BC4125 Pharmacology Overview for AOM	4 credits
Awareness of pharmaceuticals common to Western therapeutics is essential for proper patient assessment and care. In this course, students explore naming, dosing and general mechanisms for the activity and clearance of prescription and over-the-counter medications. Issues pertaining to prescribed medications and interactions with non-prescribed and/or substances of abuse are also explored. The actions, therapeutic rationale, benefits, risks and potential interactions of pharmaceuticals are emphasized. Prerequisites: BC3104 or BC4118, BC3136 or BC3163	
BC4153 Integrated Human Biology 3 Lecture/Lab	6 credits
This course is a continuation of Human Biology 2. Basic principles of anatomy, physiology, biochemistry and cell and developmental biology are integrated to provide an understanding of the renal, respiratory, digestive and reproductive systems. General themes or models are used to facilitate integration of concepts. The lab component emphasizes scientific inquiry and examines histology, anatomy, physiology and biochemistry of the systems. Prosected cadavers are used for anatomical study. Prerequisite: BC3152	
BC4161 Advanced Cell & Molecular Biology	4 credits
This course evaluates cellular function and genetic concepts from an experimental perspective. Emphasis is placed on the functional relationships between cellular structures, molecular genetics and biosynthetic functions with application to experimental data from human cells. Prerequisite: BC4153 or permission of instructor	
BC4901, BC4902, BC4903 Independent Study	variable credit
These courses provide an opportunity for undergraduate students to study areas of interest that are not included in the regular curriculum. With the aid of a selected resource person, the student may explore a field of study that is of personal interest and value. Prerequisite: Permission of department chair	
Solving Physiological Problems in Human Physiology 1-3	
This integrated sequence is presented as two educational units, intended to help students develop an in-depth understanding of mechanisms involved in the normal functioning of human organ systems. Course activities include workshops, problem-solving sessions and laboratory exercises.	
BC5101 Solving Physiological Problems in Human Physiology 1 Lecture/Lab	5.5 credits
See description above. This course is the first part of one educational unit (BC5101-BC5102) in the yearlong study of normal functioning of human organ systems. The primary focus of the quarter includes general models (common concepts) in physiology, excitable cells, muscle physiology, cardiovascular physiology and temperature regulation. Prerequisite: Admission to naturopathic medicine program	
BC5102 Solving Physiological Problems in Human Physiology 2 Lecture/Lab	5.5 credits
See description preceding BC5101. This course is the second part of one educational unit (BC5101-BC5102) in the yearlong study of normal functioning of human organ systems. The primary focus of the quarter includes respiratory, renal and gastrointestinal physiology, as well as acid-base balance. Prerequisite: BC5101 or permission of instructor	

BC5103 Solving Physiological Problems in Human Physiology 3 Lecture	3 credits
See description preceding BC5101. This course is the third educational unit in the yearlong study of normal functioning of human organ systems. The primary focus of the quarter is endocrine physiology. Prerequisite: BC5102 or permission of instructor	
Biochemistry 1-3	
This three (3) course sequence is for naturopathic medicine students and provides an in-depth study of biochemistry. Descriptions for each course in the sequence are below.	
BC5104 Biochemistry 1	4 credits
Topics include fed and fasting states, fuel oxidation, carbohydrate metabolism and lipid metabolism. Prerequisite: Admission to naturopathic medicine program or permission of instructor	
BC5105 Biochemistry 2	4 credits
Topics include eicosanoids, cholesterol metabolism, amino acid metabolism, and nucleotide metabolism. Prerequisite: grade of AC in BC5104 or grade of B or higher in BC4117	
BC5106 Biochemistry 3	4 credits
Topics include nucleic acids, gene expression, protein structures, fructose and galactose metabolism, pentose phosphate pathway, antioxidant systems, ethanol metabolism, and clinical case studies. Prerequisite: Grade of AC in BC5105 or grade of B or higher in BC4118	
BC5110 Histology	5 credits
This lecture and lab course examines the microscopic anatomy of human tissues and organs. The course is especially designed to prepare naturopathic students for Pathology in the following year. Emphasis is placed on topics that will also be studied in Biochemistry, Human Physiology and Anatomy. Prerequisite: Admission to naturopathic medicine program	
BC5112 Embryology	3 credits
This course covers human development from conception to birth including the formation of tissues, organs and systems of the body, integrating histology and anatomy. Prerequisite: Admission to naturopathic medicine program	
BC5118 Disease Processes 1	3 credits
This course is designed for nutrition master's students and is an introduction to pathology. Included are the inflammatory process, cell repair and basic immunology. (For Disease Processes 2, see BC5132.) Prerequisite: Admission to MS nutrition program	
Gross Human Anatomy Lecture 1-3	
This three (3) course sequence for naturopathic medical students provides an in-depth study of macroscopic human anatomy. Each of these courses has three components: lecture (theory), dissection (practicum) and living anatomy. The dissection and living anatomy components provide the "hands-on" experience absolutely necessary for a physician. In living anatomy, students learn to identify and palpate superficial and deep structures. Principles of motion, palpation and neurological testing are also introduced in living anatomy, which forms the foundation of the physical examination.	
BC5122 Gross Human Anatomy 1 Lecture	4.5 credits
See description above. This course emphasizes the theory and living anatomy of the upper and lower extremities and of the thorax. Prerequisite: Admission to naturopathic medicine program	
BC5123 Gross Human Anatomy 2 Lecture	4.5 credits
See description preceding BC5122. This course includes the theory and living anatomy of the thorax, abdomen, pelvis, perineum and back. Prerequisite: Grade of AC in BC5122	
BC5124 Gross Human Anatomy 3 Lecture	4.5 credits
See description preceding BC5122. This course examines in detail the theory and living anatomy of the head and neck regions. Prerequisite: Grade of AC in BC5123	
Gross Human Anatomy Lab 1-3	
Students have the opportunity to locate anatomical structures with hands-on dissection. This allows students to visualize anatomy three-dimensionally and is invaluable when performing examinations in a clinical setting. Note: Students must take the Gross Human Anatomy Lecture and Dissection Lab simultaneously.	
BC5122L Gross Human Anatomy 1 Lab	1 credit
Fall quarter involves students dissecting the lower and upper extremities with faculty supervision. Prerequisite: Admission to naturopathic medicine program	
BC5123L Gross Human Anatomy 2 Lab	1 credit
See description preceding BC5122L. In the winter quarter students dissect the thorax, abdomen, perineum and back with faculty supervision. Prerequisite: Grade of AC in BC5122	

BC5124L Gross Human Anatomy 3 Lab**1 credit**

See description preceding BC5122L. The spring quarter involves supervised dissection and study of the back, head and neck. Prerequisites: Grade of AC in BC5123

BC5129 Neuroscience**5.5 credits**

The central nervous system is studied in class discussion and laboratory with emphasis on physiologically and clinically relevant regions and pathways. Regions include cerebrum, thalamus, brainstem, spinal cord and cerebellum. Cranial nerve nuclei are studied in conjunction with motor and sensory pathways, including peripheral receptors and effectors. Clinical case studies are used in the laboratory to practice diagnostic skills and to emphasize special topics. Prerequisites: BC5102, BC5110, BC5124 (or concurrent registration in BC5124)

BC5132 Disease Processes 2**2 credits**

This course is designed for nutrition master's students. It is a continuation of BC5118. This course is a systematic approach to pathology in which selected organ systems are explored with an emphasis on the most common and clinically relevant disease processes. (For Disease Processes 1, see BC5118.) Prerequisite: BC5118

BC5140 Research Methods in AOM**3 credits**

This course provides an introduction to basic concepts of scientific methods, statistics, epidemiology and research methodology. Also explored are the state of AOM research and its interface with the research world. Emphasis is placed on gaining an understanding of how to read and evaluate AOM/medical published research articles. Students also practice applied research skills and use of the library and Internet. Prerequisite: Admission to MSA or MSAOM program

BC5142 Fundamentals of Research Design**2 credits**

This course is designed to provide the student with the basic knowledge needed to evaluate the quality, internal validity, and external validity of published research literature. This includes the basic types of clinical epidemiological studies, the basic principles of biostatistics, and an introduction to searching medical literature databases, retrieving and interpreting relevant research information. The course is the foundation for Critical Evaluation of the Medical Literature (NM7142) in which students learn how to evaluate medical literature to achieve an evidence-based medical practice. Prerequisite: Admission to naturopathic medicine program or permission of instructor

BC5901, BC5902, BC5903 Independent Study**variable credit**

These courses provide an opportunity for graduate students to study areas of interest that are not included in the regular curriculum. With the aid of a selected resource person, the student may explore a field of study that is of personal interest and value. Prerequisite: Permission of department chair

BC6100 Pharmacology of CHM and Drug Interactions**2 credits**

This course provides an overview of the active constituents found in commonly used Chinese herbs and their potential interactions with pharmaceuticals. It also details the *in vitro*, *in vivo* and clinical trial evidence for efficacy. Prerequisites: BC3104, BC4125

BC6134 Advanced Living Anatomy**1 credit**

This course combines Western anatomy with advanced acupuncture point locations to enhance clinical skills and outcomes. The course uses musculoskeletal anatomy through lecture, palpation and the study of cadavers. Anatomical connections to advanced acupuncture point location are reinforced in both surface anatomy and in the required weekly cadaver laboratory. Prerequisite: BC3134, admission to DAOM program or permission of AOM Dean

Human Pathology 1-3

The three (3) course series of Human Pathology is integrated with Physical/Clinical Diagnosis and Clinical Laboratory Diagnosis to provide for the development of diagnostic and assessment skills. During this sequence in Human Pathology, students study the normal and abnormal changes that occur in the human body when confronted with internal and external stresses that create an imbalance in homeostasis and the development of disease.

BC6200 Human Pathology 1**4 credits**

This course covers the basic mechanisms underlying the development of human disease, emphasizing medical terminology, etiologies, pathogenesis, morphological changes and clinical consequences. Specific topics include cell injury, inflammation, healing, immunity, neoplasia and principles of genetic disease. Prerequisites: BC5103, BC5106, BC5110, BC5124. Prerequisites or Corequisites: BC6204 and BC5112

BC6201 Human Pathology 2**4 credits**

See description preceding BC6200. This course covers the pathology of the respiratory, hepatobiliary and cardiovascular systems, as well as the blood, spleen and pancreas. Prerequisite: BC6200

BC6202 Human Pathology 3**4 credits**

See description preceding BC6200. The final course in this sequence covers the pathology of the genitourinary, gastrointestinal, endocrine and nervous systems. Prerequisite: BC5129 (or concurrent if on five-year track option A), BC6201

BC6204 Immunology	4 credits
This course explores the basic principles of human immunity, including nonspecific host defenses, humoral and cell-mediated immunity, complement, cytokines, and the major histocompatibility complex. The course defines a normal immune response and explores what occurs when the immune system is not functioning normally as in autoimmunity, hypersensitivity, and immune deficiencies. Also examined are transplantation and cancer surveillance. (Immunology is a prerequisite for Infectious Diseases.) Prerequisite: Completion of all first year BC courses for the four or five-year track and BC5142. Prerequisite or Corequisite: BC5112	
BC6209 Infectious Diseases	5 credits
This course explores a systems-wide approach to infection. The focus is on infectious agents (identification, virulence, transmission), pathology of infection, signs and symptoms, laboratory diagnosis, prognosis, and therapeutic strategies to infection. Prerequisite: BC6204	
BC6305 Pharmacology	5 credits
This course covers the basics of drug interactions including pharmacokinetics, pharmacodynamics, drug and toxin metabolism, and the molecular basis for drug and botanical effects. Particular attention is given to the commonly used therapeutic agents for cardiac, central nervous system, infectious, and endocrine diseases. Toxicities, drug interactions and clinical effectiveness are also emphasized. Most legend drugs within the naturopathic scope of practice are included and the mechanisms of herbal action and drug/herb interactions are discussed. Prerequisites: BC5103, BC5106, BC6200	
BC7101 Pathology of Cancer	3 credits
This course provides a biomedical overview of cancer in terms of biology, etiology, staging and progression. The coursework provides the allopathic framework from which clinical care is derived. The course also provides students with a more sophisticated understanding of the paradigm of Western oncology care, which, in turn, ultimately enhances patient care and treatment strategies. Prerequisites: Admission to DAOM program, or one of BC5132 or BC6202, or permission of AOM dean or instructor	
BC7105 Pharmacology of Cancer Therapeutics	3 credits
This course provides a foundation for understanding the pharmacological agents used in cancer treatment. Topics include primary medications used in oncology as well as secondary medication to address side effects of treatment. Pharmacological management of medicating for depression/anxiety are also covered. Prerequisites: Admission to DAOM program, or one of BC5132 or BC6305, or permission of AOM dean or instructor	
BC9104 Immunology	4 credits
This course explores the normal mechanisms by which the immune system protects against disease causing agents. The focus is on the basic concepts of human immunity including nonspecific and specific host defenses. Prerequisite: BC3152 or permission of instructor	
BC9105 Laboratory Research	2 credits
This laboratory course is designed to enable students to learn basic experimental techniques used in preclinical biomedical research studies. Prerequisites: One year of biology or equivalent (to be assessed and approved by instructor) and one year of chemistry or equivalent. Students must take the bloodborne pathogen safety training prior to start of class. Contact the safety coordinator for upcoming dates.	
BC9106 Human Biology & Toxicology	3 credits
This course introduces the biochemical, cellular and physiologic responses of human tissues to toxic doses of chemicals and radiation. Prerequisite: BC3152, BC3147, or permission of instructor	
BC9107 Virology	3 credits
This course introduces the molecular biology of animal viruses and examines virus-host relationships including viral pathogenesis. Unusual infectious agents including viroids and prions are also studied. Prerequisite: BC4100 or permission of instructor	
BC9108 Pathophysiology	3 credits
This course assesses the biological basis for disease. The course focuses on the mechanisms by which disruption of normal homeostatic mechanisms results in the development of many common disease states. Prerequisite: BC4153 or permission of instructor	
BC9112 Advanced Topics in Human Biology	1 credit
This is a seminar course with a focus on current topics related to human biology. Students read and discuss current research papers. Prerequisite: BC4153	
BC9114 Natural Products	2 credits
This course covers the mechanism of action, constituent compositions, classification and the biosynthetic pathways of relevant constituents in natural products (secondary metabolites of plants, fungi or marine organism). Methods of standardization and quantification as well as the chemical ecology of natural products are discussed. Prerequisite: BC3124 or equivalent	
BC9115 Drug/Herb Interactions	2 credits
This course examines herb/ supplements and drug interactions. The course examines herbs that can be used for specific pathological conditions (ulcers, depression, anxiety, etc.) and then looks at the possible drug interactions that may occur. Specific emphasis is placed on mechanisms and the <i>in vitro</i> and clinical trial data on botanicals. Prerequisites: BC6305 for NM students; BC4125 for AOM students. Open to students who have completed a pharmacology course and to practicing pharmacists.	

BC9117 Advanced Lab Research Methods**2 credits**

This two-credit laboratory course is for individuals who have completed the basic Laboratory Research course. In this course, with appropriate guidance from the instructor, the goal is for the student to design and carry a small research project to completion. Prerequisite: BC9105 or permission of instructor. Students must take the bloodborne pathogen safety training prior to start of class. Contact the safety coordinator for upcoming dates.

BC9119 Directed Study Research**0-5 credits**

Students complete an original research project under the supervision of a previously approved faculty mentor or external advisor. The research proposal for the project is completed in the Introduction to Research Proposals course. Students are required to present the results of the study to the Bastyr community. May be repeated with permission of departmental committee. Prerequisite: Approval of a departmental committee

BC9801 Internship**0-5 credits**

Students complete a supervised work experience with a previously approved business firm, clinic or governmental agency. Students are required to present a summary of the internship experience to the Bastyr community. May be repeated with permission of departmental committee. Prerequisite: Approval of a departmental committee

Botanical Medicine

Sheila Kingsbury, ND, RH (AHG), Department Chair

BO2101 Introduction to Botany Lecture/Lab**3 credits**

In introducing students to plant science, this course encompasses the study of plants from the molecular to the ecosystem level. Topics include cellular biology, morphology, physiology, classification and evolutionary relationships, life cycles, and introductory ecology. The course emphasizes the importance of plants and their products in the life of the planet and the interdependence of all living things. Prerequisite: College-level biology

BO3103 Botany 1 Lecture/Lab**3 Credits**

This course expands upon basic concepts of botany as they relate to the herbal sciences. It explores plants as a kingdom with unparalleled importance for the rest of planetary life and presents important concepts from botanical disciplines, including plant identification, plant physiology, economic botany, ethnobotany, ecology, and plant genetics. Prerequisite: BO2101

BO3105 Plant Identification Lecture/Lab**3 credits**

This course develops plant taxonomy and morphology skills. Students learn distinguishing plant family characteristics and the use of a dichotomous key for identification. Basic life cycles of major plant groups are studied in relation to habitat, seasonal changes and climate impact. Outdoor field work, live plant laboratory study and herbarium samples are utilized to aid in developing identification skills. Prerequisites: BO3103, BO3108, BO3114

BO3108 Introduction to Herbal Sciences Lecture/Lab**3 credits**

As the beginning of the Herbal Sciences foundational coursework, Introduction to Herbal Sciences introduces students to diverse aspects of herbalism including current sociopolitical and legal trends, ethics, sustainable plant conservation, herbal terminology and preparations, manufacturing and retail site visits, and forest, field and garden herb walks. Prerequisite: Admission to herbal sciences program

BO3114 Herbal Preparations**3 credits**

This course presents the pharmacy of herbal medicine where the focus is on preparations from plants to products. This is a medicine-making lab. Students participate hands-on in the making of preparations for internal and topical use, including infusions and decoctions, tinctures, and other extracts, creams and ointments, compresses, poultices, suppositories and more. Local plant identification and harvesting techniques and practices are incorporated. Prerequisite: BO3108

BO3115 Herbal Medicine History and Traditions**2 credits**

World herbalism is the focus of this course, introducing students to diverse cultures of herbal practices. Systems to be studied include Native American, Shamanic, Ayurvedic, TCM, Physiomedical and Eclectic, Unani and Tibetan. The energetic aspects of herbs including quantum physics, doctrine of signature and plant spirit medicine are explored. Prerequisite: BO3114 or permission from the department

BO4100 Herbs and Food**3 credits**

This course surveys diverse topics regarding herbs and food, with attention to the cultural and dietary evolution of herbal usage, herbal sources of primary nutrients, and the role of digestion, emphasizing herbal influences. Students gain an understanding of how to grow, harvest and utilize herbs to best obtain and maintain the highest nutrient availability. Prerequisites: BC3124, BC3163, BC4118, BO3114 or BO6303 or BO9514

BO4102 Research Methods for Herbal Sciences**2 credits**

This course is an introduction to research methods. Included are the basic concepts of scientific methods, epidemiology and research methodology. Students practice applied research skills such as use of the library and Internet and evaluation of research literature. Prerequisite: BC3124, BC3141, BO3103, BO3108

BO4103 Botany 2 Lecture/Lab	3 credits
This course deepens the botanical knowledge of students by presenting selected topics in advanced Botany. It presents plant development, and classic and modern methods of plant propagation. Students explore plant constituents in depth, including the classes of plant hormones and plant toxins, their roles in plants and humans, as well as the various groups of secondary plant substances that generate unique plant colors, spices, fragrances and medicine. Prerequisites: BO3103, BO3105, BO3114	
BO4107 Materia Medica 1 for Herbal Sciences Lecture/Lab	5 credits
This course is the introduction to the materia medica series, taught with a foundation in plant taxonomy and pharmacognosy. The plant family structure acts as a mapping for learning nomenclature, energetics, folklore, chemical constituents, medicinal applications, pharmacy, toxicology and safety factors of chosen botanicals. Key actions of the herbs are explored based on several world herbal models, and the science and art of formulating are developed. Prerequisites: BC3163, BC4118, BO3105, BO3114	
BO4108 Materia Medica 2 for Herbal Sciences Lecture/Lab	5 credits
Materia Medica 2 is a continuation of the study of materia medica with an emphasis on a different set of botanical families through lecture, lab and experimentation. See description of BO4107. Prerequisite: BO4107	
BO4109 Materia Medica 3 for Herbal Sciences Lecture/Lab	5 credits
Materia Medica 3 is a continuation of the study of materia medica with an emphasis on a different set of botanical families through lecture, lab and experimentation. See description of BO4107. Prerequisite: BO4108	
BO4111 First Aid for Herbalists	2 credits
This class covers a wide range of first aid situations including safety protocols, acute-care scenarios, pain remedies, materia medica, infections, allergies, preparing a first aid kit, commonly found first aid plants, injuries and wounds, burns, food and water sickness, animal bites and stings, and other first aid circumstances. Prerequisite: BO3114 or permission from department	
BO4112 Northwest Herbs	1 credit
This is a field and lab course focusing on the plants of the Pacific Northwest. This class focuses on plant recognition and identification, botany, ethnobotany and medicinal application of the plants found in the outdoor classroom of the Bastyr University campus. The class is primarily an outdoor field class, exploring all the new growth of the spring season, with some lab sessions to work with preparations of the plants being studied. It is a good companion class to Plant Identification as it reinforces the skills being learned in the laboratory. Prerequisites: BO3114 or permission from instructor	
BO4119 Pharmacognosy for Herbal Sciences	2 credits
This course looks at the chemistry of secondary metabolites in medicinal plants, algae and fungi. This chemical knowledge is then used to construct an understanding of real-world applicability in areas such as extraction techniques, medicinal activities and nutritional aspects in an active-learning environment. Prerequisites: BC4118, BO3108	
BO4122 Test Methods for Botanical Authentication Lecture/Lab	2 credits
This course develops the ability of the student to identify and evaluate the authenticity and quality of raw herbal material. Organoleptic skills, involving the senses of sight, touch, smell and taste, are explored along with microscopic identification and interpretation of assay and spec sheets. Chromatographic analysis is introduced. Prerequisites: BC4118, BO3105, BO3114	
BO4123 Soil Ecology	1 credit
This course focuses on the interaction of the soil-food-web, the diversity of soil organisms (bacteria protozoa, fungi, animals, plants) in natural and managed ecosystems; roles in primary metabolism; nutrient cycling; decomposition and reclamation; responses to environmental change. Explore soil testing methods, and soil building techniques including cover crops, mulching, composting, vermiculture and use of compost teas. Prerequisite: None	
BO4125 Introduction to Herb/Drug Interaction	2 credits
This course takes the pharmacokinetics and pharmacology of the herbs and drugs and reviews potential interactions and the postulated mechanisms. Students review the literature of documented herb/drug interactions and critically analyze these reports. Prerequisites: BC3163, BC4115, BC4118, BO4102, BO4108, BO4119	
BO4126 Seed Saving	1 credit
Collecting seed from superior parent stock has been practiced for thousand of years, resulting in higher yields and bio-regionally adapted plants. This course provides an overview of seed physiology and explores the importance of seed banks. Learn the processes of preserving valuable genetic material – seed harvesting, seed cleaning/extraction, storage, viability and record keeping; discuss seed types and breeding techniques. Prerequisite: None	
BO4127 Mycology	1 credit
This course focuses on the ecological role of mushrooms in building and maintaining an edible landscape. An overview of mushroom cultivation techniques is provided. Learn about mycoremediation and mycofiltration and how mushrooms can be used to transform toxic wastes into less harmful substances, augmenting environmental degradation. Prerequisite: None	

BO4128 QAQC - Quality Assurance/Quality Control Lecture/Lab**2 credits**

This course combines analytical rigor of quality control with the whole-system aspects of quality assurance in an industry context. Students experience quality assurance practice in a problem-based format relating to the herbal industry. They explore QA as an attitude, a way of working, which not only improves businesses but the way people work and live. The lab emphasizes the practice of QC procedures and protocols through a comparison of herbal products using analytical equipment and methodology including GC , HPLC and spectrophotometry. Prerequisites: BC4120, BO4107, BO4122

BO4129 Ethnobotany**2 credits**

This course is designed to introduce the basis of ethnographic methodology. It explores the world and different cultures, people's past and present use of plants, food, medicine, shelter, clothing, etc. Various regions are discussed and contrasted from anthropological and historic perspectives. Indigenous guests are invited to represent their ways of life. Prerequisite: None

BO4131 Permaculture 1 Lecture/Lab**3 credits**

This course covers the Principles and Ethics of Permaculture and the interconnectedness of Ecology and Agroecology. Understand the patterns in nature in relation to natural systems design strategies and methodologies. A lab component includes seed saving techniques for improving viability and adaptability of local strains, soil building techniques and extending the season. Prerequisite: Admission to the Holistic Landscape Design certificate program or permission of the program chair

BO4132 Permaculture 2 Lecture/Lab**3 credits**

This course focuses on natural energy systems; energy flow through ecosystems; global weather patterns and biogeography; thermal zones and frost pockets; climate-specific design strategies and energy conservation through appropriate technology. A lab component explores heat sinks, sun traps, and other ways to capture and utilize radiant energy. Winter tree pruning and grafting techniques are also introduced. Prerequisite: BO4131

BO4133 Permaculture 3 Lecture/Lab**3 credits**

This course focuses on the importance of water in natural systems; water in urban and rural systems; water retention and purification; waste water management strategies; aquaculture and aquatic plants. A lab component includes elements of keyline/contour mapping, water movement (swales), storage (ponds, cisterns) and greywater systems. Prerequisite: BO4132

BO4134 Permaculture 4 Lecture/Lab**3 credits**

This course discusses ways of achieving self-reliance through permaculture design. Topics include elements of cultivated ecosystems; establishing and maintaining medicinal and edible food forests, succession design of annual and perennial vegetables, medicinal plants and orchards; agroforestry practices including windbreaks, alley cropping, silvopasture, riparian buffers and forest farming; integrating animals into backyards and farms; wildlife management. The lab component includes assembling plant guilds, orchard and forest management; animals and insects as elements of human nourishment and land fertility. Prerequisite: BO4133

BO4135 Greenhouse & Nursery Management**1 credit**

This course provides an overview of important techniques to insure plant health from seed to market. Topics include plant propagation techniques, plant selection, potting media for various plant types and ways to balance the elements of soil, air, light, moisture and heat in the greenhouse. Ideas for establishing and maintaining a small scale landscape or market nursery are discussed. Prerequisite: Admission to the Holistic Landscape Design certificate program or permission of the program chair

BO4136 Intro to Biodynamic Agriculture**1 credit**

This course explores the astronomical influences in horticulture throughout history with an emphasis on the principles and practices of Biodynamic Agriculture. Learn about the uses of biodynamic compost preparations and foliar sprays and how they benefit the landscape. An overview of requirements for biodynamic certification and ongoing research demonstrating the ecological benefits of biodynamic agriculture are provided. Prerequisite: None

BO4137 Horticultural Research and Grant Writing**1 credit**

This course reviews how to pursue and participate in horticultural research and how techniques learned throughout this program can be applied in research studies. Grant writing basics are also taught with a focus on how to apply for grant funding for horticultural research or permaculture projects. Prerequisite: Admission to the Holistic Landscape Design certificate program or permission of the program chair

BO4138 Biointensive IPM & Plant Health**2 credits**

Explore the principles and applications of Biointensive Integrated Pest Management (IPM), which integrates ecological and economical factors into agricultural system design and management. The primary goal of biointensive IPM is to provide guidelines and options for effectively managing pests and beneficial organisms in an ecological context and addresses public concerns about environmental quality and food safety. Signs and symptoms of plant deficiencies and diseases are examined and treated with appropriate organic inputs in order to restore balance to the soil, shifting the disease state. Prerequisite: None

BO4139 Advanced Landscape Design**1 credit**

This course explores patterns of human settlement. Topics include design models for broad-scale design for urban and village systems, community wellness and food security, land access strategies and cooperative legal systems for businesses and communities, land restoration and earthworks, and design models for circumventing natural disasters. Prerequisites: Successful completion of BO4133 and concurrent enrollment with BO4131.

BO4141 Medicinal & Edible Plants in the Landscape 1	1 credit
This course explores the many attributes of a wide variety of medicinal and edible plants that add beauty and utility in cultivated landscapes. Propagation, cultivation, environmental tolerances and harvesting methods are discussed with an additional emphasis on the therapeutic properties of the plants. Emphasis is on deciduous and evergreen trees. Prerequisite: Admission to the Holistic Landscape Design certificate program or permission of the program chair.	
BO4142 Medicinal & Edible Plants in the Landscape 2	1 credit
This course explores the many attributes of a wide variety of medicinal and edible plants that add beauty and utility in cultivated landscapes. Propagation, cultivation, environmental tolerances and harvesting methods are discussed with an additional emphasis on the therapeutic properties of the plants. Emphasis is on shrubs and woody perennials. Prerequisite: BO4141	
BO4143 Medicinal & Edible Plants in the Landscape 3	1 credit
This course explores the many attributes of a wide variety of medicinal and edible plants that add beauty and utility in cultivated landscapes. Propagation, cultivation, environmental tolerances and harvesting methods are discussed with an additional emphasis on the therapeutic properties of the plants. Emphasis is on herbaceous annuals and perennials. Prerequisite: BO4142	
BO4144 Horticultural Business Practices	1 credit
This course discusses the niches available for Permaculture Landscape Designers that have a medicinal and edible plant focus. An introduction to business practices essential for operating and managing a successful horticultural business is covered including basic record keeping, cost estimation (labor, equipment and materials, bidding on contracts), project organization (phase planning, budget development), resource allocation, marketing, legal forms, construction law and safety. Prerequisites: BO4132 and BO4135	
BO4810 Permaculture Design Project	1 credit
This course provides the opportunity to implement and demonstrate the principles and practices of permaculture design through a hands-on design project. Students work in teams to design and develop a practical, sustainable, and bountiful permaculture landscape design that reflects an understanding of the site and the needs of the client. Teams are expected to analyze and assess the site, establish goals and timelines for the project, create base maps and overlays and establish resource lists. Team design concepts and proposal drawings are presented for instructor feedback. Prerequisites: Successful completion of BO4133 and concurrent enrollment with BO4134	
BO4801 Herbal Sciences Practicum	1 credit
This course introduces students to the practical application of herbal knowledge. Possible practicum sites include herbal product manufacturers, growers and wildcrafters, herbal researchers, practitioners, and educators. Evaluation based on successful completion of hours, self evaluation, site evaluation of student and brief presentation to cohort. Prerequisite: Completion of the first and second quarter of the herbal sciences curriculum	
Botanical Medicine 1-5	
The botanical medicine curriculum provides an in-depth study of the botanical materia medica. Terminology, nomenclature, plant identification, pharmacology, pharmacognosy, toxicity, herb-drug interactions, formula preparation and clinical application are among topics covered in these courses. Students gain skills in herbal management of acute and chronic disease conditions.	
BO5301 Botanical Medicine 1 Lecture/Lab	2 credits
This course introduces students to the history, philosophy and science of botanical medicine. Terminology of botanical medicine, and the medicinal, botanical and pharmacological categorizations are studied. Overviews of botany, pharmacognosy and formulation principles are covered with introductions to plant identification. Materia medica of the gastrointestinal system is introduced. Students are introduced to the importance and principles of sustainable agriculture and ecological harvesting. Labs reinforce didactic learning and bring the plant medicine alive through hands-on experience. Prerequisite: Admission to naturopathic medicine program	
BO5901, BO5902, B05903 Independent Study	variable credit
A student may contract with a botanical medicine faculty member or approved faculty or professional to do an in-depth study in an area not covered in the botanical medicine curriculum. Prerequisites: BO5301 and permission of department chair	
Botanical Medicine 2-5	
These courses, four quarters total, sequentially offered over two years, are designed to teach the information and skills required to assess, evaluate and apply botanical knowledge in naturopathic treatment protocols. Students evaluate botanicals from an organ-system perspective. Material presented about each botanical includes taxonomic family, description, habitat, part(s) used, energetics, pharmacognosy, herb-drug interaction, pharmacology, historical and current medicinal actions and uses, pharmacy and toxicology. The students integrate pathophysiology, biochemistry and vitalistic understanding in the presentation of material. Plant specimens and slides aid the understanding of the presented botanicals. In BM 4 and 5, the labs enhance didactic learning and clinical application through hands-on experience and case studies.	
BO6301 Botanical Medicine 2	2 credits
See description above. Prerequisites: BC5103, BC5106, BO5301	

BO6302 Botanical Medicine 3	2 credits
See description preceding BO6301. Prerequisite: BO6301	
BO6303 Botanical Medicine Dispensary Lab	1 credit
This course focuses on clinically useful herbal preparations. Students make herbal tinctures, glycerites, infusions, decoctions, poultices, compresses, syrups, creams, ointments, emulsions, liniments, suppositories and capsules. They examine the comparable advantages and disadvantages of each type of preparation, incorporating pharmacognosy into their understanding of each preparation. Prescription writing is reviewed. Organoleptic testing to assess medicinal preparation identity and quality is taught. Field identification is reinforced through herb walks in the woods and in the Bastyr herb garden. Prerequisite: BO6302 or permission of department chair	
BO6901, BO6902, BO6903 Independent Study	variable credit
A student may contract with a botanical medicine faculty member or approved faculty or professional to do an in-depth study in an area not covered in the botanical medicine curriculum. The independent study may include pre-approved botanical medicine research projects or studies in traditional herbal medicine. Prerequisites: BO6301 and permission of department chair	
BO7300 Botanical Medicine 4 Lecture/Lab	2 credits
See description preceding BO6301. Lab is included. Prerequisites: BO6302, BO6303	
BO7301 Botanical Medicine 5 Lecture/Lab	2 credits
See description preceding BO6301. Lab is included. Prerequisites: BO6303, BO7300	
BO7901, BO7902, BO7903 Independent Study	variable credit
A student may contract with a botanical medicine faculty member or approved faculty or professional to do an in-depth study in an area not covered in the Bastyr curriculum. The independent study may include pre-approved botanical medicine research projects or studies in traditional herbal medicine. Prerequisites: BO7300 and permission of department chair	
BO8901, BO8902, BO8903 Independent Study	variable credit
A student may contract with a botanical medicine faculty member or approved faculty or professional to do an in-depth study in an area not covered in the Bastyr curriculum, or to participate in a botanical medicine research project. The independent study may include pre-approved botanical medicine research projects or studies in traditional herbal medicine. Prerequisites: BO6303 and permission of department chair	
BO9100 Herbal Medicine Making for All (lab)	1 credit
This course is an introduction to herbal medicine making and applications. The class is designed for interested students and staff, especially for those students whose programs do not offer classes in herbal medicine and for those who want to have hands-on experience in the lab learning about herbs and herbal preparation. The class introduces home remedies in the form of tinctures, teas, infused oils, salves, creams, poultices, hydrosols, steams and bath salts. Prerequisite: None	
BO9104 Organic Gardening	2 credits
The goal of this class is to give students the knowledge and skills necessary to design and implement a perennial or annual organic garden. Topics explored include soil fertility, garden cultivation, transplanting and direct seeding, irrigation principles, composting, pest and weed management, soil testing, and social and environmental issues in agriculture. Prerequisite: None	
BO9107 Food and Medicinal Mushrooms	2 credits
This class is a combination of lecture, field hours and lab work. The class covers edibility, toxicity and medicinal uses of fungi. In this class you learn where, when and how to find mushrooms in the field as well as what to do with them once you find them. The role of fungi in their ecosystems is also studied. In addition to the course hours required, there are optional field trips arranged. Prerequisite: None	
BO9112 Plants in Ceremony: An Exploration of Yourself	2 credits
This course is a three-day exploration of the state of spirit and soul through the use of plants in ceremony. It includes both individual and group evaluation of who you are, where you come from, what you have and want to experience. The class takes each individual and the group into sacred space to access and facilitate an experience of deep healing. Plant spirits, masks, drumming, toning, chanting and the use of herbs both internally and externally are the tools for growth and change. Prerequisite: None	
BO9115 Herbs and Ayurvedic Medicine	2 credits
This course engages the student in a "process-centered" approach to Ayurvedic botanical medicine, focusing on therapeutic objectives and herbal actions. The class discusses case strategy and the role of individual Ayurvedic herbs, Ayurvedic polyherb formulas and herb actions from the Ayurvedic perspective. Each section of materia medica includes an Ayurvedic overview of the system/function, Ayurvedic energetics, A and P review, Ayurvedic pathology and herbal properties used in treatment of that system. Prerequisite: None	

BO9116 Cascade Herb Experience**2 credits**

This three-day herbal medicine field course is designed to introduce students to recognizing and wildcrafting native plant species in the North Cascades. The weekend includes ethical wildcrafting as well as identifying plants, medicine making and harvesting from cultivated gardens. This camping experience includes a medicine-making workshop, group meals and several field sojourns to explore various habitats and ecosystems. The activity fee covers tent camping fees and food. Prerequisite: BO3114 or BO5301

BO9118 Herbal Medicine in Italy**3 credits**

This course combines herbal medicine and Italian culture. Throughout two weeks in Italy, students learn the history and medical applications of plants, explore cultivated and wild fields, and visit herbal manufacturers. The course utilizes the facilities and museum of the Italian herb company Aboca and the University of Salerno. Students are responsible for their airfare to Italy and personal expenses. The student fee covers group accommodations, transportation, one meal a day and any group events. A nonrefundable deposit is required upon registration. Prerequisite: None

BO9119 Clinical Pharmacognosy**2 credits**

This course reviews the secondary metabolites in plants, algae and fungi that are fundamental to their medicinal activities. This information is presented in a clinically relevant manner, as opposed to focusing solely on the chemistry of the compounds. Major classes of constituents including terpenoids, phenylpropanoids, resins, glycosides, alkaloids and saponins are discussed. Prerequisite: BC4118 or BC5106 and BC3163 or BC5103 and BO4107 or BO5301

BO9127 Herbal Medicine Throughout Oregon**3 credits**

This is an eight-day field course, touring the variety of herbal growing and manufacturing facilities throughout western Oregon. Students explore the production of herbal medicines from seed to final products including plant identification, cultivation, manufacturing processes and clinical applications of medicinal plants. A nonrefundable deposit is required upon registration. Prerequisite: None

BO9128 Plant Identification and Medicinal Field Botany**3 credits**

This elective class combines morning classroom study and afternoon field trips to introduce plant taxonomy and morphology. Key characteristics distinguishing native plant families, the use of a dichotomous key to identify NW plants, and life cycles of each major plant group are taught. Afternoon field trips to mountains, forests and parks emphasize plant identification topics as well as medicinal aspects of plants. Field trips include four hours on site plus one-two hours travel time before and after class. Prerequisite: College Biology

BO9129 Island Herb Experience**2 credits**

This three-day course focuses on medicinal plants and sea plants in their natural habitat, studying plant identification, botany, properties, ecology, harvesting and lore. Students have the opportunity to gather wild herbs and sea plants and prepare tinctures and other medicines. Prerequisite: None

BO9302 Flower Essences**2 credits**

“Disease will never be cured or eradicated by present materialist methods, for the simple reason that disease in its origin is not material.” (Dr. Edward Bach, 1931) Flower essences — subtle extracts still made from many of the original plants found in the region of Dr. Bach’s home in England — are used to address issues of emotional well-being, soul development and mind/body health. This elective is an introductory course in the origins, nature and therapeutic use of the Bach Flower Remedies. Prerequisite: None

BO9306 Clinical Formulations and Applications of Botanical Medicine**1 credit**

In this course students learn how to use botanical formulations for specific common clinical conditions. Botanicals are grouped by condition and offer specific formulas and applications that are most effective for specific ailments. Students learn how to mix essential oils and other liquid extracts, which liquid extracts are incompatible, how to use toxic herbs as low-dose formula activators, and how to make formulas taste good! Prerequisite: Concurrently enrolled in BO4107 or completion of BO6301

BO9401 Foundations of Aromatic Medicine**1 credit**

This class creates a dynamic that clearly integrates the uses of essential oils within traditional herbal medicine. In this two-day intensive, the student is guided to understand and utilize the world of aromatic medicine. An understanding of major functional chemistry groups, aldehydes, esters, ketones, monoterpenes alcohols, phenols, etc., and clinical application is included. Materia medica of 11 primary essential oils is studied. Prerequisite: None

BO9405 Introduction to Gemmotherapy**2 credits**

This course unfolds the principles of gemmotherapy as a phytotherapeutic method of drainage. Included are the preparation, posology and safety issues when using these plant stem cell therapies, as well as the phytochemical analysis of the gemmos. An overview of the 50 primary remedies gives details about each remedy through organ system affinity. Clinical applications are included each week through case study analysis. Prerequisite: None. Open to all students interested in the study of gemmotherapy, but class is taught at a clinical level.

Chinese Herbal Medicine Certificate

Terry Courtney, MPH, LAc, Dean

For acupuncture and Oriental medicine courses, see alphabetical listings beginning with OM. A grade of C or higher is required to pass all AOM/CCHM courses.

CH5901, CH5902, CH5903 Independent Study	variable credit
These courses provide an opportunity for students to study areas of interest that are not included in the regular curriculum. With the aid of a selected resource person/sponsor, the student may explore a field of study in Chinese herbal medicine of personal interest and value. Prerequisite: Permission of dean	
CH6105 Chinese Herb Preparations	1 credit
This course provides students with hands-on experience in cooking and preparing Chinese herbal preparations. The course covers various ways to prepare decoctions; preparation of pills, powders and granules; topical applications and further refinement of moxa based products. Prerequisite: CH6423	
CH6408 Chinese Herbal Therapeutics 1	4 credits
This course is part of a four-quarter series covering the therapeutic clinical applications of Chinese herbal medicine. This first course covers a variety of common internal medicine conditions including respiratory, cardiovascular, gastrointestinal, genitourinary and endocrine conditions. Prerequisites: CH6431, CH6432	
CH6409 Chinese Herbal Therapeutics 2	4 credits
This course is part of a four-quarter series covering the therapeutic clinical application of Chinese herbal medicine. This second course focuses on gynecology, obstetrics and pediatric diseases. Prerequisites: CH6431, CH6432	
CH6410 Chinese Herbal Therapeutics 3	4 credits
This course is part of a four-quarter series covering the therapeutic clinical applications of Chinese herbal medicine. This third course focuses on eye/ear, nose, throat, and dermatology, as well as an overview of sexually transmissible diseases. Prerequisites: CH6431, CH6432	
CH6411 Chinese Herbal Therapeutics 4	4 credits
This course is part of a four-quarter series covering the therapeutic clinical applications of Chinese herbal medicine. This fourth and final course covers musculoskeletal and connective tissue conditions, including acute sports injury, with focus on internal and external applications for pain, burns and trauma. Prerequisites: CH6431, CH6432	
CH6421 Chinese Materia Medica 1	4 credits
This course is part of a three-quarter series covering the Chinese materia medica. This first quarter focuses on herbs that release the exterior, quell fire, cool blood, drain dampness, drain downwards, dispel wind dampness and release food stagnation. Prerequisite: Admission to MSAOM or CCHM	
CH6422 Chinese Materia Medica 2	4 credits
This course is part of a three-quarter series covering the Chinese materia medica. This second quarter focuses on herbs that clear heat and relieve toxicity, clear deficient heat, clear summer heat, transform phlegm, relieve coughing and wheezing, regulate qi, promote the movement of qi, invigorate blood, transform congealed blood, stop bleeding and warm the interior/expel cold. Prerequisites: Admission to MSAOM or CCHM, CH6421 or permission of instructor	
CH6423 Chinese Materia Medica 3	4 credits
This course is part of a three-quarter series covering the Chinese materia medica. This third quarter focuses on herbs that tonify qi, tonify the blood, nourish the yin, tonify the yang, calm the spirit, expel wind, stabilize and bind, open the orifices, and expel parasites and substances for external application. Prerequisites: Admission to MSAOM or CCHM, CH6422 or permission of instructor	
CH6431 Chinese Herbal Medicine Formulations 1	4 credits
This course is part of a two-quarter series covering the foundation formulas in Chinese herbal medicine. This first class focuses on formulas that release the exterior, quell fire, cool blood, drain downwards, drain dampness, dispel wind damp, release food stagnation, clear heat and relieve toxicity, clear summer heat, transform phlegm, relieve cough/wheeze and regulate qi. Prerequisites: CH6421, CH6422, and CH6423	
CH6432 Chinese Herbal Medicine Formulations 2	4 credits
This course is part of a two-quarter series covering the foundation formulas in Chinese herbal medicine. This second class focuses on formulas that promote the movement of qi, invigorate the blood, congeal blood and stop bleeding, warm the interior/expel cold, tonify the qi, tonify the blood, nourish yin, tonify yang, calm the spirit, expel wind, stabilize and bind, open orifices, expel parasites and external applications. Prerequisite: CH6431	
Chinese Herbal Medicine Clinic 1-8	
Students enrolled in the MSAOM or CCHM programs are eligible to take clinic shifts in Chinese herbal medicine, under the supervision of licensed acupuncturists. Students may take the CH6831 and CH6832 CHM Dispensary shifts at any time in the MSAOM or CCHM program. At a minimum, students must be enrolled in the Chinese Herbal Therapeutics course series in order to be eligible for CHM clinic intern status.	
CH6803 CHM Clinic 1	2 credits
See description above. Prerequisites: CH6408 (may be concurrent) and admission to MSAOM or CCHM program	
CH6804 CHM Clinic 2	2 credits
See description preceding CH6803. Prerequisite: CH6803	

CH6805 CHM Clinic 3	2 credits
See description preceding CH6803. Prerequisite: CH6804	
CH6806 CHM Clinic 4	2 credits
See description preceding CH6803. Prerequisite: CH6805	
CH6807 CHM Clinic 5	2 credits
See description preceding CH6803. Prerequisite: CH6806	
CH6808 CHM Clinic 6	2 credits
See description preceding CH6803. Prerequisite: CH6807	
CH6809 CHM Clinic 7	2 credits
See description preceding CH6803. Prerequisite: CH6808	
CH6810 CHM Clinic 8	2 credits
See description preceding CH6803. Prerequisite: CH6809	
Herbal Medicine Clinic in China 1-4	
Students in good academic standing are encouraged to apply for advanced studies in China. Currently, Shanghai and Chengdu Universities of TCM are the main sites for Bastyr herbal internships. For more information and an application, see the AOM China Studies link, on the Clinical Education page, at MyBU.bastyr.edu. The clinic in China is an eight (8) credit experience to be applied toward MSAOM or CCHM internship and/or elective credit. These credits may not be audited.	
CH6821 Clinic in China 1	2 credits
See description above. Prerequisite: Permission of dean	
CH6822 Clinic in China 2	2 credits
See description preceding OM6821. Prerequisite: Permission of dean	
CH6823 Clinic in China 3	2 credits
See description preceding OM6821. Prerequisite: Permission of dean	
CH6824 Clinic in China 4	2 credits
See description preceding OM6821. Prerequisite: Permission of dean	
CHM Dispensary	
Students are required to do two (2) CHM dispensary shifts in the clinic. The shifts can be taken at any time once a student has begun the herbal curriculum. It is recommended that students complete at least one dispensary shift prior to starting as an herbal intern.	
CH6831 CHM Dispensary 1	2 credits
See description above. Prerequisite: Admission to MSAOM or CCHM program	
CH6832 CHM Dispensary 2	2 credits
See description preceding CH6831. Prerequisite: Admission to MSAOM or CCHM program	
CH6901, CH6902, CH6903 Independent Study	variable credit
These courses provide an opportunity for students to study areas of interest that are not included in the regular curriculum. With the aid of a selected resource person/sponsor, the student may explore a field of study in Chinese herbal medicine of personal interest and value. Prerequisite: Permission of dean	
CH9520 Introduction to AOM Oncology	2 credits
This class presents an overview of oncology with discussion of diagnosis and treatment for many of the common cancers. Patient support networks are also presented. This course provides an introduction to integrated CAM/allopathic co-management. Prerequisite: OM5805	
Chinese Herbal Medicine Clinic 1-4 Elective	
Students have the opportunity to take elective shifts in Chinese herbal medicine with approval of the dean.	
CH9801 CHM Dispensary Elective	2 credits
See description above. Prerequisite: Permission of dean	
CH9802 CHM Elective Shift	2 credits
See description preceding CH9801. Prerequisite: Permission of dean	

Dietetic Internship

Debra Boutin, MS, RD, Internship Director

DI5100 Introduction to the Practice of Dietetics

1 credit

This course includes a discussion of professional ethics and standards of practice. Prerequisite: Admission to the internship program

DI5101 Community Nutrition

1 credit

This course includes a review of services provided by community and public health nutritionists. Lectures and discussions focus on the unique concerns of community and public health nutrition. Evaluation is based on written assignments, participation in seminar discussion, final exam and activities. Prerequisite: Admission to the internship program

DI5103 Food Service Administration

1 credit

This course is a review of food service management through lectures and discussions of administrative problem-solving techniques and methods of management, cost control and quality assurance. Evaluation is based on participation in seminar discussion, activities and final exam. Prerequisite: Admission to the internship program

DI5104 Medical Nutrition Therapy

1 credit

This course prepares interns for their clinical/hospital-based rotation, emphasizing medical nutrition therapy including enteral and parenteral therapy. Information is presented through lectures, demonstrations, discussion and case studies. Evaluation is based on written assignments, clinical cases and final exam. Prerequisite: Admission to the internship program

DI5801 Community Practicum

2 credits

This course is the application of DI5101 through the execution of selected community nutrition planned experiences. Evaluation is based on successful completion of all learning activities. Prerequisite: Admission to the internship program

DI5814 Food Service Practicum

4 credits

This course is the application of DI5103 through food service planned experiences. Evaluation is based on successful completion of all learning activities. Prerequisite: Admission to the internship program

DI5820 Medical Nutrition Therapy Practicum

5 credits

This course is the application of DI5104 through clinical planned experiences. Evaluation is based on successful completion of all learning activities. Prerequisite: Admission to the internship program

Exercise Science and Wellness

Tiffany Reiss, PhD, Program Director

EX3101 Biomechanics 1

2 credits

This course is an introduction to the fundamental principles of human movement, focusing on the study and elementary analysis of human motion based on anatomical and mechanical principles. Prerequisites: BC3141, BC3162 and BC3163 (concurrent)

EX3105 Physical Activity and Wellness

2 credits

This course covers the general principles behind physical activity and how it relates to overall health and wellness. The course provides students with an introduction to the basic fundamentals of exercise and their application in leading a healthier and more physically active lifestyle through the entire lifespan. Prerequisite: None

EX4100 Physiology of Exercise

5 credits

This course explores concepts in the physiology of exercise, including fuel substrate utilization, metabolism, adaptations and responses to different exercise modalities. The class examines the (1) physiology of exercise, (2) physiology of health and fitness, and (3) physiology of performance. This course is designed to complement the Exercise Physiology Lab, which emphasizes (1) the factors that limit health and fitness, (2) work tests used to evaluate cardiorespiratory fitness, (3) training methods for fitness, (4) body composition measures, and (5) field and laboratory aerobic and anaerobic fitness tests. Prerequisites: BC4118 and BC3163 (or equivalent), CPR and first aid certification

EX4102 Biomechanics 2

3 credits

This course examines the anatomical and mechanical concepts required for critical assessment, description and qualitative analysis of human movement in a clinical context. Prerequisites: BC3113 and EX3101

EX4105 Business Principles in Health Promotion

2 credits

This course is designed to introduce nutrition and exercise science students to business principles within the health professions. The course facilitates a better understanding of the necessary market research involved in the process of developing health related strategic and business plans. Prerequisite: Admission into BSN or BSX program

EX4107 Sports Nutrition**5 credits**

This course examines the interaction between nutrition, physical activity and athletic performance. Topics focus on the efficacy of ingesting various macronutrients and bioactive compounds found in foods for enhancing certain types of athletic performance. Nutritional biochemistry of macronutrients and micronutrients including digestion, biological requirements, absorption and metabolism are emphasized. Prerequisites: BC4118 or permission of instructor

EX4112 Seminar in Ergogenic Aids**1 credit**

This course is designed to allow students exposure to the various ergogenic aids currently on the market. This course requires students to research and present material on the advertised benefits of specific ergogenic aids, literature on the product, and critical thinking around metabolic pathways of ingredients found within the products. Prerequisites: EX4107

EX4115 Motor Learning and Development**3 credits**

This course investigates principles of human movement and the acquisition of motor skills, as well as motor and perceptual development throughout the lifespan. Upon successful completion of the course, students are able to trace the path of human perceptual-motor development and to discuss the implications of general principles of motor development for the movement and sport specialist. Attention is given to learning theories, reinforcement, transfer, massed and distributed practice schedules, closed and open skills, motivation, feedback, arousal, motor control systems, and retention of motor skills. Prerequisite: None

EX4119 Principles of Resistance Training**3 credits**

This course includes an introduction to principles and fundamentals of resistance training including both a theoretical and practical, hands-on component. Students are expected to participate in the resistance training core activity while also covering the basics of muscle physiology, bioenergetics, biomechanics, training principles (modes and methods), training theory and practical considerations as they pertain to resistance training. Prerequisites: BC3113, BC3163, EX4115

EX4123 Exercise Prescription and Testing**5 credits**

This course explores the role of exercise in the assessment of functional capacity and in the diagnosis of coronary heart disease. Techniques of exercise stress testing are studied and practiced along with basic electrocardiography. Methods of quantifying energy cost of exercise and the development of exercise prescriptions are emphasized. This course contains a lab component for practical application of these concepts and development of these skills. Prerequisite: EX4100

EX4124 Exercise Science Laboratory Techniques**2 credits**

This course offers students exposure and practical hands-on experience to laboratory techniques commonly used in exercise physiology labs and health and fitness settings. Prerequisite: EX4100

EX4133 Exercise Prescription for Special Populations**2 credits**

This course is designed to provide students exposure to various special populations, pathophysiology and the American College of Sports Medicine exercise recommendations for varying diseases states. Corequisite: EX4123

EX4140 Community Health Promotion**2 credits**

This course is designed to allow students to explore the theories and concepts of health behavior change and the principles of public health and to provide students with a platform to create programs and practice disseminating health and wellness information to adults in community settings. Prerequisite: none

EX4800 Exercise and Nutrition Practicum**2 credits**

This course provides the opportunity for students to develop practical experience in nutrition and exercise education through presentations and preceptorships. This course may be taken in any quarter, except summer, during year two if student is in good academic standing. Prerequisite: none

EX4810 Internship for Exercise Science and Wellness**12 credits**

This course provides students with practical knowledge in different areas of exercise science and wellness. Students apply the information obtained through past didactic experiences by working in areas such as (1) physical therapy/sports medicine clinics, (2) hospital cardiac/pulmonary rehabilitation, (3) health and fitness facilities, (4) spa/retreat/wellness centers, or (5) athletic training facilities. Students assume a leadership role in various related activities and perform administrative tasks in support of such activities under an experienced agency supervisor and faculty sponsor. Internship hours can begin in any quarter following junior year with approval of instructor, but may only be registered for during spring quarter of the senior year. See instructor for official policy guidelines. Prerequisites: A 2.0 or better in all designated courses or approval of exercise science program director. Student must be in good academic standing to pursue internship.

Homeopathic Medicine

Richard Mann, ND, Department Chair

Homeopathy 1-3

This course sequence is required for all students in the naturopathic medicine program. Homeopathy 4-6 are elective courses. Student clinicians are allowed to register for the Homeopathy Specialty Clinic after successfully completing HO6302 or with permission of the department chair. However, HO9301 is recommended as a requisite or corequisite to the Homeopathy Specialty Clinic.

HO6300 Homeopathy 1**2 credits**

This course is an introduction to homeopathy — its theory and practice. Using Hahnemann's Organon of Medicine, the principles of homeopathic medicine and the development of its method of practice are explored. This includes the use of the repertory, study of homeopathic philosophy, and an introduction to homeopathic materia medica. When possible, cases are used to elucidate concepts. Emphasis is placed on the integral relationship of homeopathy to naturopathic practice. Prerequisites: BC5103, BC5106, BC5124 and NM5115 or NM5136 or permission of department chair

HO6301 Homeopathy 2**3 credits**

This course emphasizes homeopathic case taking and analysis. Students learn how to take and analyze a homeopathic case, how to prioritize symptoms and how to use the homeopathic repertory as a guide to prescribing the proper medicine. Different methods of case analysis are discussed. Students actively take and analyze a homeopathic case. Basic homeopathic materia medica continues to be elucidated. Prerequisite: HO6300

HO6302 Homeopathy 3**3 credits**

This course emphasizes homeopathic materia medica. Repertory skills are further developed. When possible, homeopathic case studies are used to illustrate basic concepts. Prerequisite: HO6301

HO6901, HO6902, HO6903 Independent Study**variable credit**

These courses provide an opportunity for students to study areas of interest that are not included in the regular curriculum. With the aid of a selected resource person, the student may explore a field of study that is of personal interest and value. Prerequisites: HO6300 and permission of department chair

Homeopathy 4-6

These three (3) elective courses are offered to naturopathic medicine students interested in the further study of homeopathy, after successfully completing Homeopathy 3 (HO6302).

HO9301 Homeopathy 4**3 credits**

This course continues the study of homeopathic materia medica. Cured cases are studied to illustrate points of case analysis; materia medica and the homeopathic theory of miasms are explored more deeply. Prerequisite: HO6302 or permission of department chair

HO9302 Homeopathy 5**3 credits**

This course is a continuation in the advanced study of materia medica, case analysis and case management. Prerequisite: HO6302 or permission of department chair

HO9303 Homeopathy 6**3 credits**

This course is a continuation of the advanced study of homeopathy. Homeopathic medicines are reviewed and analyzed via case study. Cases are presented by practicing homeopaths. Prerequisite: HO6302 or permission of department chair

Homeopathy Grand Rounds

Each student registered in the Homeopathy Specialty Clinic must also enroll in Homeopathy Grand Rounds. Cases seen in the Homeopathy Specialty Clinic are discussed in-depth with respect to case analysis, comparative materia medica and case management. Students who have completed HO6302 and want further knowledge of homeopathy but are not enrolled in the Homeopathy Specialty Clinic may enroll in Homeopathy Grand Rounds with permission from the department chair.

HO9800 Homeopathy Grand Rounds 1**1 credit**

See description above. Prerequisite: HO6302

HO9801 Homeopathy Grand Rounds 2**1 credit**

See description preceding HO9800. Prerequisite: HO6302

HO9802 Homeopathy Grand Rounds 3**1 credit**

See description preceding HO9800. Prerequisite: HO6302

HO9803 Homeopathy Grand Rounds 4**1 credit**

See description preceding HO9800. Prerequisite: HO6302

HO9804 Homeopathy Grand Rounds 5**1 credit**

See description preceding HO9800. Prerequisite: HO6302

Homeopathy Specialty Clinic

The Homeopathic Specialty shift allows students to apply classical homeopathic principles to patient care in a supervised clinical setting, including case taking, case analysis and prescribing and case management. Students may take up to four homeopathy clinical shifts if space is available. Prerequisite: HO6302

Homeopathy Specialty Clinic 1-4 Elective

Students particularly interested in homeopathy may take additional elective clinic shifts in the Homeopathy Specialty Clinic, with permission of the department chair, on a space available basis.

HO9821 Patient Care 1 - Elective (fall) **2 credits**

See description above. Prerequisites: HO6302 and permission of department chair

HO9822 Patient Care 2 - Elective (winter) **2 credits**

See description preceding HO9821. Prerequisites: HO6302 and permission of department chair

HO9823 Patient Care 3 - Elective (spring) **2 credits**

See description preceding HO9821. Prerequisites: HO6302 and permission of department chair

HO9824 Patient Care 4 - Elective (summer) **2 credits**

See description preceding HO9821. Prerequisites: HO6302 and permission of department chair

Interdisciplinary Studies

Timothy C. Callahan, PhD, Senior Vice President and Provost

IS3111 Interdisciplinary Experiences in Natural Health Arts and Sciences 1 **1 credit**

This is the first of two courses that provide undergraduates with an opportunity to participate in workshops, seminars and other activities related to health. Students work collaboratively across disciplines to build an integrated model of health. Communication and critical thinking skills are emphasized. Offered Fall quarter. Prerequisite: Admission into an undergraduate program at Bastyr University

IS3112 Interdisciplinary Experiences in Natural Health Arts and Sciences 2 **1 credit**

This course is a continuation of Interdisciplinary Experiences in Natural Health Arts and Sciences 1. Offered winter quarter. Prerequisite: IS3111

IS9510 Introduction to Backpacking and Plant Identification **2 credits**

This class meets over two weekends. The first weekend meets in class. The second weekend is an overnight backpacking trip. Basic backpacking skills including trip planning, gear selection, route finding/navigation, and back-country rules and regulations are introduced. Basic plant identification skills and how to safely collect and use a limited number of medicinal plants in the back-country are also covered. Prerequisites: None. This class is best suited to those with little or no backpacking experience/plant identification training. If you have physical limitations that would prevent completion of an 8-12 mile backpacking trip, please contact the instructor directly.

MIDWIFERY

Suzy Myers, LM, CPM, MPH, Department Chair

MW3101 Midwifery Care 1: Introduction to the Midwives Model of Care **3 credits**

This course includes an introduction to the guiding principles, philosophy and values of the Midwives Model of Care, an introduction to cultural competency, and an overview of the midwife's role throughout the childbearing year. Basic principles of client education and health literacy are covered. The course also includes an introduction to the professional roles, responsibilities, and legal issues of midwifery, as well as national and local midwifery organizations. Prerequisite: None

MW3105 Introduction to Epidemiology for Midwives **3.5 credits**

This course focuses on developing the skills needed to critically evaluate research relevant to midwifery care. Epidemiology for Midwives also introduces research methodologies and biostatistics and enables students to apply these concepts to evaluation of the efficacy and safety of midwifery and homebirth, the cost effectiveness of midwifery care, and the value of midwifery research. Additionally students begin the process of identifying their master's project. Prerequisite: None

MW3301 Well Woman Health and Assessment **4 credits**

This course includes onsite presentations, discussions and skills practice, with the objective of developing the skills for taking a thorough client medical and social history and performing and charting a complete physical exam, including breast and pelvic exams. Prerequisite: Enrollment in Midwifery Program.

MW3311 Perinatal Nutrition 1: Pre-conception and Prenatal	2 credits
This course addresses nutritional needs during pregnancy, emphasizing how nutrition can assist in the management of common pregnancy-related issues, as well as building maternal and fetal nutrient stores. Students learn assessment, counseling, and nutrition-related problem solving for the pregnant woman and her family. Prerequisite: None	
MW4100 Genetics and Embryology	2 credits
This course provides an introduction to human genetics, genetic disorders, and embryological and fetal development, both normal and abnormal, with an emphasis on teaching and supporting clients. Prerequisite: None	
MW4101 Professional Issues Seminar: Cultural Competency for Midwives	2 credits
Students learn about the relevance of culture to perinatal health care and investigate the impact and extent of health disparities as they affect maternal and infant outcomes in their own communities. Through the use of books, research articles, videos, interviews and guest speakers, students raise their level of cultural competence and develop client education materials for a specific cultural group in their community. Prerequisite: None	
MW4102 Professional Issues Seminar: Modern Midwifery, History, Politics and Activism	2 credits
A review of the history of medicine and midwifery through the 19th and 20th centuries, focusing on the social movements of the 1960s and 70s that re-awakened the midwifery profession in North America. The course also provides an interactive exploration of the current political climate in which direct-entry midwifery is practiced in the U.S. and Canada, inter-professional relationships and challenges faced. Prerequisite: None	
MW4103 Professional Issues Seminar: Midwifery Legal, Ethical and Professional Frameworks	2.5 credits
This course covers state and provincial midwifery laws, processes for legislative change, quality assurance, professional liability, and ethics. The midwife's role and responsibilities regarding current state, provincial, national and international midwifery are also addressed. Particular emphasis is placed on developing the knowledge and skills necessary to make difficult decisions in today's complex professional and legal environment. Prerequisite: None	
MW4300 Pharmacology and Treatments 1	1 credit
This course includes foundational information about allopathic medications and immunizations relevant to midwifery practice and the midwife's professional and legal responsibilities around using medications. Prerequisite: None	
MW4301 Pharmacology and Treatments 2	1 credit
This course continues with an overview of certain complementary medicines such as homeopathy, Western herbs and Traditional Chinese Medicine, and their use and application in midwifery practice. Prerequisite: MW4300	
MW4302 Midwifery Care 2: Pregnancy and Prenatal Care	4 credits
Midwifery Care 2 includes the anatomy and physiology of normal pregnancy and an in-depth study of routine prenatal care procedures. It also includes assessment of each woman's individual needs and treatments for common discomforts and problems in pregnancy. Throughout Midwifery Care courses 2-7, students use case management exercises to practice critical thinking and risk assessment skills, apply precepts of evidence-based practice, and work toward acquiring skills as culturally competent providers and understanding of the midwife as a community health worker. Prerequisite: MW3101	
MW 4303 Midwifery Care 3: Advanced Pregnancy and Prenatal Care	4 credits
This course includes information relevant to more complicated aspects of prenatal care: early pregnancy bleeding, management of the Rh-negative mother, anemia, infections, trauma, miscarriage, post-dates pregnancy, gestational diabetes, and hypertensive disorders. Prerequisite: MW4302	
MW4305 Gynecology	3.5 credits
This course covers female reproductive anatomy and physiology from menarche through menopause and provides an introduction to women's health concerns including sexuality, fertility, infertility, contraception, unwanted pregnancy, and the diagnosis and treatment of common gynecologic problems and reproductive tract infections. Prerequisite: None	
MW4307 Breastfeeding and Lactation Education	2 credits
This course is designed to give student midwives the ability to educate women about the benefits of breastfeeding, to prepare clients to breastfeed, to understand the anatomy and physiology involved in breastfeeding, to assist clients with early breastfeeding, to help with common problems and to make appropriate referrals to other care providers for breastfeeding concerns beyond their expertise or scope of practice. Prerequisite: None	
MW4312 Perinatal Nutrition 2: Nutrition for Postpartum & Breastfeeding	1 credit
Part 2 of the Perinatal Nutrition course explores nutrition for the new mother and her infant, from a basic understanding of how nutrition can help the mother heal and recover physically from childbirth to helpful applications to encourage her to nourish herself. Infant nutrition (breastfeeding through introduction of solids) is also explored with the emphasis on making healthy food choices that best fit the mother's and her family's needs. Prerequisite: MW3311	
MW4313 Counseling for the Childbearing Year 1	1 credit
This introductory course consists of information, role-plays and student presentations designed to develop basic skills needed for client counseling. Prerequisite: MW3301	

MW4314 Counseling for the Childbearing Year 2	1 credit
This course is a continuation of Counseling for the Childbearing Year 1, with discussion and skill building related to domestic violence, as well as resources and skills for counseling pregnant women dealing with substance abuse issues. Prerequisite: MW4313	
MW4321 Clinical Skills 1	1 credit
The Clinical Skills course is presented as a series of on-site skills labs and workshops, coordinated with Midwifery Care and Clinical Seminar course content. The objective of this course is to develop many of the skills, both hands-on and teaching, necessary to practice midwifery. Clinical Skills 1 builds on and amplifies some of the key skills first introduced in Well Woman Health and Assessment and covers aseptic technique, medication administration, venipuncture, and further study and practice in charting and vital signs. Prerequisite: MW3301	
MW4322 Clinical Skills 2	1 credit
Continuation of the clinical skills series. Students complete full-day neonatal resuscitation program (NRP) certification, practice client informed choice skills related to perinatal care, as well as learn principles and skills related to intravenous therapy during intrapartum care, and review and practice injections and venipuncture. Prerequisite: MW4321	
MW4323 Clinical Skills 3	0.5 credit
Continuation of the clinical skills series. Students learn skills need for intrapartum care: perineal suturing, simulation of cervical exam, rupture of membranes, hand maneuvers for receiving the baby, estimating blood loss and treating postpartum hemorrhage. Prerequisite: MW4322	
MW4331 Clinical Seminar 1	1 credit
Clinical Seminar is a 7-quarter series concurrent with practicum, focusing on the integration of theory and practice. As the course progresses quarter by quarter, both student expectations and complexity of case management skills increase. Clinical Seminar 1 learning activities focus on building basic skills in charting, phone triage, data collection, continuing education, basic management decisions, risk assessment and physician consultation and referral. Prerequisites: MW4302, MW4800	
MW4332 Clinical Seminar 2	1 credit
Continuation of Clinical Seminar series. This quarter further refines students' skills in charting, phone triage and risk assessment with emphasis on appropriate guidelines. Case questions and management problems increase in complexity to mirror student's clinical experience in practicum, continuation of case presentations, and use of "virtual client" with random phone triage exercises. Prerequisite: MW4331	
MW4333 Clinical Seminar 3	1 credit
Continuation of Clinical Seminar series. In this course students are expected to have refined skills in charting, phone triage and communication with other medical professionals, developing understanding of and skill with more complex management decisions. Case questions and "virtual client" exercises require the student to demonstrate higher level problem-solving and critical thinking skills. Prerequisite: MW4332	
MW4800 Introduction to Practicum	0.5 credit
This course includes an introduction to the documentation and requirements necessary for the midwifery program's clinical placements and an orientation designed to prepare students to work effectively in a midwifery clinical preceptorship. Prerequisite: MW3301	
MW4801 Practicum 1	2.5 credits
Theoretical coursework is complemented by clinical rotations with practitioners providing midwifery and related women's health care. Prerequisite: MW4800	
MW4802 Practicum 2	6.0 credits
Theoretical coursework is complemented by clinical rotations with practitioners providing midwifery and related women's health care. Prerequisite: MW4801	
MW5100 Research Methods for Midwifery	3.0 credits
This course builds on the foundation and skills of Introduction to Epidemiology for Midwives and facilitates skills needed for the master's project series. Students gain understanding in and apply appropriate research methods to their question of interest, including skills in grant writing, IRB application and presentation of work. Prerequisite: MW3105	
MW5101 Master's Project 1	0.5 credit
This course is part of a series designed to build on the foundations of Introduction to Epidemiology for Midwives and to further develop the student's master's project. Topics may include refining the research hypothesis, data collection plan and application for human subjects review. Prerequisite: MW3105	
MW5102 Master's Project 2	0.5 credit
This course is part of a series designed to build on the foundations of Introduction to Epidemiology for Midwives and to further develop the student's master's project. Topics may include refining the research hypothesis, data collection plan and application for human subjects review. Prerequisite: MW5101	

MW5103 Master's Project 3	0.5 credit
This course is part of a series designed to build on the foundations of Introduction to Epidemiology for Midwives and to further develop the student's master's project. Topics may include refining the research hypothesis, data collection plan and application for human subjects review. Prerequisite: MW5102	
MW5104 Master's Project 4	0.5 credit
This course is part of a series designed to build on the foundations of Introduction to Epidemiology for Midwives and to further develop the student's master's project. Topics may include refining the research hypothesis, data collection plan and application for human subjects review. Prerequisite: MW5103	
MW5114 Professional Issues Seminar: Health Care Systems and Health Policy	2 credits
This course addresses issues in health care organization and financing. Students learn about formal health care systems in the U.S. and Canada as they relate to midwifery practice. In addition, health care policy and health care reforms are explored with an emphasis on how midwives can function as effective advocates for improved maternity care policy. Prerequisite: None	
MW5304 Midwifery Care 4: Labor and Birth	6 credits
A continuation of the midwifery care courses, this course includes an in-depth study of midwifery management of the normal processes of all stages of labor, birth, and care of the mother and neonate in the immediate postpartum period, with an emphasis on preparing students for out-of hospital birth practice. Prerequisite: MW4303	
MW5305 Midwifery Care 5: Postpartum and Newborn Care	4 credits
This course addresses the roles and responsibilities of the midwife during the postpartum period. It includes a review of breastfeeding, maternal physiological changes and psycho-social adjustments, common newborn procedures, and select newborn problems. Prerequisite: MW5304	
MW5306 Midwifery Care 6: Challenges in Practice	4.5 credits
This course covers a variety of complications the midwife may encounter in clinical practice. Emphasis is on recognition, current thinking about prevention/treatment modalities, including medical as well as complementary and nutritional therapies. In addition to the role of physician consultation and referral, this course also addresses controversies within the midwifery community regarding where and how these clinical challenges should be handled. Prerequisite: MW5305	
MW5315 Counseling for the Childbearing Year 3	1.5 credits
A continuation of the counseling courses, this course complements Midwifery Care 4 and includes information and skills for counseling, supporting, and effectively empowering woman through labor who have a history of reproductive loss, or who experienced reproductive loss and/or disappointment during pregnancy or birth. Prerequisite: MW4314	
MW5316 Counseling for the Childbearing Year 4: Postpartum	1.5 credits
This section of the Counseling curriculum complements Midwifery Care 5 and includes information and skills needed to assess postpartum emotional adjustments and attachment difficulties and to provide early parenting support and intervention. Prerequisite: MW5315	
MW5324 Clinical Skills 4:	0.5 credit
Continuation of the clinical skills series. Students learn newborn exam techniques, newborn screening techniques, assessing and aiding with breastfeeding challenges, and informed choice and teaching appropriate to postpartum care. Prerequisite: MW4323	
MW5325 Clinical Skills 5	0.5 credits
Continuation of the clinical skills series. Using simulation models, students learn and practice emergency delivery skills including breech delivery, shoulder dystocia, cord prolapse and unexpected twin delivery. Prerequisite: MW5324	
MW5803 Practicum 3	4.5 credits
Theoretical coursework is complemented by clinical rotations with practitioners providing midwifery and related women's health care. Prerequisite: MW4802	
MW5804 Practicum 4	3 credits
Theoretical coursework is complemented by clinical rotations with practitioners providing midwifery and related women's health care. Prerequisite: MW5803	
MW5334 Clinical Seminar 4	1 credit
Continuation of Clinical Seminar series. Students participate in a variety of clinical practice skills including a data collection project, "virtual client" exercises that continue to challenge students in making complex clinical management decisions, on-going practice in charting and phone triage with emphasis on valid management decisions consistent with safe practice and midwifery standard of care, case presentations and complex case questions. Prerequisite: MW4333	

MW6105 Master's Project 5	3 credits
This course is the first in a series of three designed to provide structure for the completion of the actual thesis project. Students meet with their project review committee, refine the topic of their master's project and submit to their committee for approval a final version of their thesis proposal that includes feasibility, applicability and scope. (See note below.) Students complete a project design, literature review and a timeline for their project's completion. Prerequisite: MW5104	
MW6106 Master's Project 6	3 credits
In this course students continue the implementation of their master's project including submission of the first full draft of their final project paper to the review committee, meeting with the committee for a formal review of the project and completion of revisions. Prerequisite: MW6105	
MW6107 Master's Project 7	3 credits
Students meet with their review committee to integrate final revisions, complete their master's project and submit it for approval and grading. Additionally, students prepare for and make an oral presentation to the midwifery community of the findings of their research. Prerequisite: MW6106	
MW6115 Professional Issues Seminar: The Business of Midwifery	2.5 credits
This course includes topics related to establishing a private midwifery practice, including a business plan and budget, and seeking employment opportunities in midwifery or a related field. The course also includes an update on current issues facing the profession of midwifery to prepare students for post-graduation activities. Prerequisite: None	
MW6307 Midwifery Care 7: Synthesis and Application	2 credits
This course includes discussions and assignments designed to integrate and apply to clinical care the concepts of informed choice, evidence-based practice, and ethical, professional and legal issues, including consultation and referral systems. Students hone critical thinking and risk assessment skills, cultural sensitivity and an understanding of the midwife as a community health worker through case management exercises and panel discussions. Prerequisite: MW5306	
MW6335 Clinical Seminar 5	1 credit
Continuation of Clinical Seminar series. In this course students continue with "virtual client" exercise and more complex case questions and presentations, fine tuning management decisions and skills acquired in practicum focusing on the integration of theory and clinical practice. Prerequisite: MW5334	
MW6336 Clinical Seminar 6	1 credit
Continuation of Clinical Seminar series. In this course students continue with "virtual client" exercises reflecting the level of primary midwife under supervision. Students make presentations of their data collection project and continuing education topics. Prerequisite: MW6335	
MW6337 Clinical Seminar 7	1 credit
Continuation of Clinical Seminar series. In this quarter students are assessed for their readiness for entry-level practice, which will take into consideration the progression of their clinical problem-solving skills while caring for the fictional "virtual clients." Continuation of student presentations of data collection projects and continuing education topics. Prerequisite: MW6336	
MW6805 Practicum 5	4 credits
Theoretical coursework is complemented by clinical rotations with practitioners providing midwifery and related women's health care. Prerequisite: MW5804	
MW6806 Practicum 6	4.5 credits
Theoretical coursework is complemented by clinical rotations with practitioners providing midwifery and related women's health care. Prerequisite: MW6805	
MW6807 Practicum 7	8 credits
Theoretical coursework is complemented by clinical rotations with practitioners providing midwifery and related women's health care. Prerequisite: MW6806	
MW6808 Practicum 8	8 credits
Theoretical coursework is complemented by clinical rotations with practitioners providing midwifery and related women's health care. Prerequisite: MW6807	
MW6809 Practicum 9	9 credits
Theoretical coursework is complemented by clinical rotations with practitioners providing midwifery and related women's health care. Prerequisite: MW6808	

MW7302 Prenatal Complications**3 credits**

In this course students focus on the recognition and care of common physical and emotional complications of pregnancy. Students develop in-depth practice guidelines for common complications that include definitions, etiologies, incidences, signs and symptoms, risks, differential diagnoses, management, consultation, and referral practices. Students also become familiar with expected allopathic management of common complications and the associated risks and benefits. The distinction between the scope of practice of the general naturopathic physician and that of the naturopathic midwife is emphasized. Prerequisite: NM7313

MW7303 Labor Complications**3 credits**

In this course students focus on the role of the naturopathic midwife in the care of the laboring woman, with special emphasis on the diagnosis and management of complications of the intrapartum period. Students develop practice guidelines for intrapartum complications. The practical portion of the course covers basic nursing skills such as the administration of IV fluids, episiotomy, perineal repair, urinary catheterization and the administration of medications. Consultation/referral practices are integral to this course. (Students must have completed this course before performing any skills independently at births.) Prerequisites: NM7313, MW7320. Corequisite: MW7321

MW7304 Maternal Postpartum Care**2 credits**

While this course begins with the management of the normal and complicated third stage of labor, it focuses on the role of the naturopathic midwife in the care of the new mother. The practical portion of the course covers blood loss assessment and management, and placental inspection. The normal puerperium is addressed, as are the development and naturopathic management of physical and emotional postpartum complications. Students develop clinical practice guidelines for common complications. Client education in the areas of infant care, self care, breast feeding and parenting skills is also covered. Prerequisite: MW7320

MW7310 Neonatology**3 credits**

In this course students study the normal development and management of the newborn. The innate intelligence and sensitivity of the developing child are emphasized. Etiologies, risks, signs, symptoms and management of pathologies of the newborn are presented. Students develop practice guidelines for common neonatal complications. The practical portions of the course include infant physical exam, gestational age assessment, and neonatal resuscitation skills and knowledge. Previous participation in at least 20 births is strongly recommended. Prerequisites: MW7320, NM7314. Note: This course is for students in their final year of the naturopathic midwifery program.

MW7315 The Practitioner's Guide to Lactation Management**2 credits**

This course is required for midwifery students and is designed for the midwife, doula, lactation consultant, nurse, physician, nutritionist or other member of the mother's and infant's health care team. The course provides the core knowledge and skills necessary to help mothers breast-feed, as well as some advanced skills needed for problem solving. Students learn basic lactation management skills through practical application of scientific principles. Naturopathic modalities of treatment and contraindicated herbs are discussed. Students practice skills such as assessment, planning, alternative feeding methods, milk expression techniques and documentation. Prerequisite: None. This course is offered only in the summer and is open to students entering their final year in a degree program.

MW7320 Normal Maternity**3 credits**

This course is designed to meet the needs of the naturopathic doctor-in-training for general family practice and is the first in the naturopathic midwifery program series. It is an introduction to normal maternity and to the midwives' model of care, with a focus on the role of the naturopathic doctor in the support of healthy women who are or who want to become pregnant. The emphasis is on normal, healthy pregnancy and birth. A brief overview of the maternal postpartum period and newborn adaptation is included. The intent is to prepare ND students to discuss normal preconception, pregnancy and postpartum-related concerns with their clientele and to competently attend unplanned (emergent, normal) deliveries. Scope of practice boundaries and consultation/referral practices are integral to this course. Prerequisite: BC6202

MW7321 Advanced Normal Maternity**2 credits**

This course facilitates competency in the advanced management of normal pregnancy and birth and is intended for enrollees in the naturopathic midwifery program. Topics covered include prenatal assessment skills, maternal physiological changes in pregnancy, pelvimetry, charting and prenatal testing. Also covered are advanced normal labor and delivery management, including cardinal movements, monitoring protocols, common complications, hand maneuvers, birth positions, waterbirth, and introductory neonatal assessment and management. Students practice conducting prenatal consults, cervical dilation assessment, initial and routine visits, client education, and telephone assessment and consultation. Prerequisite: MW7320

MW7901, MW7902, MW7903 Independent Study**variable to maximum of 2 credits**

This course provides an opportunity for students to study areas of interest in greater detail than is covered in the regular curriculum. With the aid of a selected resource person, the student may explore any topic within the area of childbirth. The student is responsible for submitting an independent study form to the program chair which includes learning objectives, evaluation method and timeline. Students may study more than one topic, using a separate course number for each topic. Two credits are required in the naturopathic midwifery program. Prerequisites: MW7321 and permission of department chair

MW8102 Childbirth Education**1 credit**

This course offers an overview of the current trends in and methods of teaching childbirth education classes and prepares students to teach childbirth education classes. Concepts of instruction, learning and effective means of conveying both factual information and practical skills to expectant parents are presented. Students are required to attend and critique at least one community childbirth education class session and to teach one topic in class. Prerequisite: MW7320

MW8103 Legal and Professional Issues in Midwifery**2 credits**

This course outlines the legal responsibilities and restrictions of practice for naturopathic physicians specializing in natural childbirth. Upon completion of this course students demonstrate knowledge of the following: professional ethics specific to midwifery; local and national politics; midwifery regulation in various jurisdictions; peer review procedures, quality assurance and quality improvement mechanisms; malpractice insurance; billing practices; informed consent/choice; scope and standards of practice; cultural diversity in client populations; consultation/referral relationships; dual licensure; unlicensed/unregulated practice; regulatory systems, sanctions and disciplinary processes. Prerequisite: NM7109. Note: This course is for students in their final year of the naturopathic midwifery program.

MW8105 Grief and Loss in Midwifery**2 credits**

Upon completion of this course, students are competent to do the following: provide emotional support to families grieving the loss of a pregnancy or newborn, teach self-nurturing methods that facilitate healing in the grief process, model how to heal through and be strengthened by loss, and draw on personal spiritual resources for the benefit of self and client. Students develop skills in helping couples talk through the impact of grief and loss on their relationship and the grief of infertility. Students also learn to help parents deal with bereavement pressures, grief reactions of the extended family, and societal expectations around the death of a child, a spontaneous abortion or planned termination of pregnancy. Prerequisite: PS6306

MW8410 Clinical Pharmacology in Midwifery**1 credit**

This course covers medication use during pregnancy and intrapartum, along with substances commonly used in healthy neonates. The course emphasizes the medications that midwives may legally administer in Washington state, including indications, contraindications, and associated risks for interaction and/or adverse effects for these agents. Additionally, the course includes dosing and routes of administration along with the underlying pharmacodynamics and pharmacokinetics. Throughout, scope of practice and consultation/referral indications are incorporated into the information discussed. Prerequisites: BC6305, MW7321, admission to naturopathic midwifery program

Childbirth Practicum

Students intern with approved licensed or legal practitioners providing maternity care services. Students are required to actively participate in 25 births (12.5 credits of MW8800 or 1 credit/2 participations) and to manage 50 births (25 credits of MW8802 or 1 credit/2 managements).

MW8800 Birth Participations**variable to maximum of 12.5 credits**

See description above. Prerequisite: MW7320

MW8802 Birth Managements**variable to maximum of 25 credits**

See description preceding MW8800. Prerequisites: MW7320, MW7321

Birth Rounds

This three (3) course sequence consists of maternity skills labs and case reviews facilitated by the naturopathic midwifery clinical faculty. Specific midwifery topics are addressed in a small group discussion, skill labs and role play format. Prerequisite: Current enrollment in naturopathic midwifery program and concurrent enrollment in MW8800 or MW8802

MW8811 Birth Rounds 1**1 credit**

See description above. Corequisite: MW8800

MW8812 Birth Rounds 2**1 credit**

See description preceding MW8811. Corequisite: MW8800 or MW8802. Prerequisite: MW8811

MW8813 Birth Rounds 3**1 credit**

See description preceding MW8811. Corequisite: MW8800 or MW8802. Prerequisite: MW8812

MW8901, MW8902, MW8903 Independent Study**variable to maximum of 2 credits**

See description for MW7901, MW7902, MW7903. Prerequisites: MW7321 and permission of program chair

MW9100 Midwifery Wisdom: An Introduction**3 credits**

This course is designed to be the first in the naturopathic midwifery curriculum. It is an introduction to the art and practice of midwifery. It includes a brief history of midwifery and medicine in the U.S., as well as trends in and perspectives on birth in American culture. Students are introduced to counseling skills in maternity care, lactation issues, the fourth trimester, various definitions of "midwife," and some realities of midwifery practice. In addition, students view a variety of midwifery-related videos and develop a group and an individual project. Prerequisite: Admission to Bastyr University. Note: This class is a prerequisite for application to the naturopathic midwifery program. This course is offered only in the summer.

MW9115 Doula Training**3 credits**

This course prepares the student for the unique role of a doula — a professional who provides physical, emotional and informational support for women in labor. Topics covered include female reproductive anatomy, fetal development, components of perinatal care, clinical terminology, communication skills, pain management techniques, the emotional and psychological aspects of giving birth and its significance in women's lives. Scope of practice, providing culturally sensitive support, clarifying values and beliefs about birth, coping with complications in pregnancy and labor, newborn care, and breast feeding are also included. Upon completion of this course students interested in doula certification may apply to the Pacific Association for Labor Support (PALS) or DONA International. PALS offers an apprenticeship program, which supports placement with certified doulas in the Seattle area who mentor newly trained doulas seeking certification. Prerequisite: MW9100. This course is offered only in the summer.

MW9500 Introduction to Childbirth**1 credit**

This course allows students to experience childbirth and some of the associated activities. Participants attend an orientation at BU, participate in pre- and post-natal visits with a local practitioner, observe a birth, attend a birth rounds class and write a summary of the experience. Notes: Additional hours may be required if the birth a student observes is exceptionally brief. If this elective credit is needed for graduation, the entire process must be completed by the final week of classes. This course cannot be audited. Prerequisite: MW7320

Naturopathic Medicine

Jane Gultinan, ND, Dean

NM5113 Naturopathic Medicine in Historical Context**2 credits**

This course traces the roots of naturopathic medicine and the development of its modalities and philosophy from 4,000 BC to the present day. Lab cohorts are introduced to the principles and practices of naturopathic medicine and discuss them in a historical context to gain an understanding of the philosophical, political and therapeutic constructs that shaped our current profession. Prerequisite: Admission to ND program

NM5114 Fundamentals of Naturopathic Clinical Theory**2 credits**

Naturopathic principles of practice, concepts of health and disease, environment, hygiene, nature cure, natural therapeutics, prevention and wellness are discussed with an emphasis on the vitalistic context of science-based naturopathic medicine. Lab cohorts explore the naturopathic principles, therapeutic order and determinants of health more deeply and begin to apply them to cases. Prerequisite: Admission to ND program

NM5115 Naturopathic Medicine in Global Context**2 credits**

This course explores the current practice of natural medicine across the globe. Students survey traditional healing methods as well as institutional practices of natural therapeutics. Drawing on the historical and philosophical information given the previous two quarters, students gain an understanding of the current political, social and cultural context of natural medicine in each region. The lab cohorts explore the different philosophical and clinical practices of each region and discuss/experience how these complement current naturopathic philosophy and practice. Prerequisite: Admission to ND program

NM5500 Intensive: Advanced Standing Status**variable credit**

This intensive is designed to satisfy a selection of lower-level naturopathic medicine courses, enabling advanced standing students to better integrate the first and second-year curriculum. Topics may include naturopathic philosophy, botanical medicine courses, physician heal thyself or clinic entry. Prerequisite: Admission to naturopathic medicine program with advanced standing status

NM5804 Clinic Entry 1**1 credit**

This experiential course provides naturopathic medical students with the opportunity to become familiar with, and to personally experience, Bastyr Center for Natural Health, the University's teaching clinic. Students experience a first office call and return office call, as well as experience naturopathic and other modalities at the center. Students also attend case preview and review. This class offers students clinical experience with the medicine they are studying. Prerequisite: Admission to naturopathic medicine program

NM5901, NM5902, NM5903 Independent Study**variable credit**

These courses provide an opportunity for students to study areas of interest that are not included in the regular curriculum. With the aid of a selected resource person/sponsor, the student may explore a field of study in naturopathic medicine of personal interest and value. Prerequisites: NM5113 and permission of dean

NM6100 Successful Charting and Coding**1 credit**

This course provides an opportunity to learn skills of efficient charting and coding, and how to use ICD9 and CPT nomenclature necessary when insurance billing or when seeing patients who self-bill insurers. Insurance contract evaluation is also reviewed. Prerequisites: Admission to the naturopathic program or permission of dean

NM6105 Fundamentals of Business Operations	2 credits
This course provides an opportunity to learn business fundamentals such as creating a mission, selecting a clinic name, planning layout for a clinic and dispensary, registering a business, hiring and managing employees. Financial planning, keeping statistics, and creating a business plan are also reviewed along with the opportunity to learn how to identify ideal candidates for care, learn interpersonal techniques that promote clinical and economic success. Patient retention and management systems are also reviewed. Prerequisites: Admission to the naturopathic program or permission of dean	
NM6115 Goal Setting and Self Motivation	1 credit
This course shares methods in goal setting and personal development used by leaders in our field, helpful to the new graduate starting his/her career. Prerequisites: Admission to the naturopathic program or permission of dean	
NM6120 Professional Speaking and Writing	1 credit
This course provides students guidance and practice on professional speaking and writing and suggestions to identify and secure opportunities. Prerequisites: Admission to the naturopathic program or permission of dean	
Clinical Laboratory Diagnosis 1-3	
This sequence of three (3) courses introduces the student to laboratory diagnoses of clinical disorders and disease states. Emphasis is on methods of analysis, appropriateness of tests, interpretation of laboratory results and clinical application of laboratory data for the primary care provider. NM6210 focuses primarily on definitions of "normals," hematology and coagulation. NM6211 explores clinical chemistries and their interpretation. NM6212 focuses on the laboratory diagnosis of urogenital and endocrine disorders.	
NM6210 Clinical Laboratory Diagnosis 1	3.5 credits
See description above. Prerequisite: BC5106	
NM6211 Clinical Laboratory Diagnosis 2	3.5 credits
See description preceding NM6210. Prerequisite: NM6210	
NM6212 Clinical Laboratory Diagnosis 3	3.5 credits
See description preceding NM6210. Prerequisite: NM6211	
Physical/Clinical Diagnosis 1-3	
The Physical/Clinical Diagnosis series of six (6) courses uses a lecture and laboratory format to teach practical clinical skills. Emphasis is on early detection of abnormalities and diagnosis of common health problems. Differential diagnosis and assessment, patient interview techniques, history taking and physical examination are covered. Also included are indications for diagnostic procedures and an introduction to clinic protocols.	
NM6221 Physical/Clinical Diagnosis 1 Lecture	2 credits
See description above. Prerequisites: BC5124, BC5129	
NM6221L Physical/Clinical Diagnosis 1 Lab	2 credits
See description preceding NM6221. Corequisite: NM6221	
NM6222 Physical/Clinical Diagnosis 2 Lecture	2 credits
See description preceding NM6221. Prerequisite: NM6221	
NM6222L Physical/Clinical Diagnosis 2 Lab	2 credits
See description preceding NM6221. Corequisite: NM6222	
NM6224 Physical/Clinical Diagnosis 3 Lecture	2.5 credits
See description preceding NM6221. Prerequisite: NM6222	
NM6224L Physical/Clinical Diagnosis 3 Lab	2 credits
See description preceding NM6221. Corequisite: NM6224	
NM6901, NM6902, NM6903 Independent Study	variable credit
These courses provide an opportunity for students to study areas of interest that are not included in the regular curriculum. With the aid of a selected resource person/sponsor, the student may explore a field of study in naturopathic medicine of personal interest and value. Prerequisites: BC6200, NM6210, NM6221 and permission of dean	
Public Health and Environmental Medicine	
In these two (2) courses, the toxic effects of the pollution of our air, water, food, and electromagnetic environment are provided. Types, sources, and health effects of common pollutants, prevention and treatment of occupational diseases, public health and the public health system are discussed. The clinician's interaction with public health resources and responsibilities is emphasized.	
NM7101 Environmental Medicine	1.5 credits
See description above. Prerequisite: NM6221	

NM7102 Public Health	1.5 credits
See description preceding NM7101. Prerequisite: NM6221	
NM7116 Naturopathic Clinical Theory	1 credit
This course emphasizes the clinical application of the principles of naturopathic medicine, using the therapeutic order as an integrative framework and providing students with a foundation for naturopathic case analysis and management. Prerequisite: Concurrent with clinic shifts	
NM7142 Critical Evaluation of the Medical Literature	2 credits
In this course students further develop skills needed to locate, critically evaluate, and translate biomedical evidence-based literature into clinical practice using core competencies learned in the Fundamentals of Research Design. The course allows students to better understand the treatments their patients receive and the new biomedical research relevant to their profession. Practical application of biomedical decision-making is emphasized, with students using their patient experiences to guide their clinically answerable questions on diagnosis and therapeutics. Prerequisite: BC5142	
NM7302 Gastroenterology	2 credits
Disorders of the gastrointestinal system, the digestive tract and related organs are presented with discussion of prevalence, pathophysiology, diagnosis, naturopathic analysis, and conventional and naturopathic therapeutics for these conditions. Prerequisite: Concurrent with clinic shifts	
NM7304 Dermatology	2 credits
Differential diagnosis and assessment of common skin disorders are covered in this course. Emphasis is placed on treatment from a conventional and naturopathic perspective. Prerequisite: Concurrent with clinic shifts	
NM7305 Clinical Ecology	2 credits
This course covers the diagnosis, prevention and treatment of allergy in its many forms. Food, plant, environment, hydrocarbon and other types are presented. Considered are such topics as masked allergies, allergic adaptation, challenge testing, rotation diets, environmental medicine clinics, fasting and various laboratory tests for allergies (i.e., skin, sublingual, intradermal and blood). Prerequisite: Concurrent with clinic shifts	
NM7306 Oncology	2 credits
Students explore the problems involved in the diagnosis and assessment of cancer. Current knowledge of the causes and mechanisms of cancer are presented. Included is an overview of the current conventional therapies for cancer, their efficacy and side effects. Students learn how to become an effective part of the health care team in providing care to patients. Complementary naturopathic care for patients with cancer is presented to provide a comprehensive approach to patient management. Prerequisite: Concurrent with clinic shifts	
NM7307 Eye, Ear, Nose and Throat (EENT)	2 credits
Conventional and naturopathic therapeutics for EENT conditions are presented. Prerequisite: Concurrent with clinic shifts	
NM7311 Neurology	2 credits
Students refine their skills in diagnosis and treatment from both a conventional and naturopathic perspective of neurological diseases in this course. Recognition of conditions requiring referral for specialized diagnostic procedures and care are addressed. Prerequisite: Concurrent with clinic shifts	
NM7313 Gynecology	3 credits
In this course students study the interrelationship of patient history, symptoms, physical signs and laboratory tests in making early and accurate diagnoses. Naturopathic therapeutics for gynecological conditions are covered. Students participate in a practicum experience as well. Prerequisite: Concurrent with clinic shifts	
Pediatrics 1-2	
This two (2) course sequence presents the differential diagnosis and assessment of the common problems of infancy, childhood, and adolescence. Emphasis is on early recognition of signs and symptoms, disease prevention, and the development of a healthy lifestyle at an early age. Treatment of common childhood conditions and diseases is presented.	
NM7314 Pediatrics 1	2 credits
See description above. Prerequisite: Concurrent with clinic shifts	
NM7315 Pediatrics 2	2 credits
See description preceding NM7314. Prerequisite: Concurrent with clinic shifts	
NM7320 Family Medicine	2 credits
This course explores family health and wellness and the role of the physician's influence on the perpetuation of health. Prerequisite: PS6306, concurrent with clinic shifts	
NM7325 Naturopathic Case Analysis and Management 1	1.5 credits
This course is designed to provide a format for the development of skills and rationale in naturopathic case analysis, treatment integration and case management. Naturopathic principles of practice are applied, in concert with conventional case analysis Prerequisite: NM6224, concurrent with first clinic shifts	

NM7330 The Healing Systems	1 credit
This course examines seven core systems, which maintain the body's strength and vitality, and how illnesses can be traced to weaknesses in one or more of these systems. Diagnosis and treatment of underlying systemic weaknesses and optimizing function in these systems to focus effectively on the healing effort are emphasized. In the therapeutic order, the course reflects the therapeutic intent of tonifying systems and supporting the body/spirit in healing itself. Prerequisite: Concurrent with clinic shifts	
NM7341 Cardiology	3 credits
This course covers the pathophysiology, advanced diagnosis and treatment of diseases of the cardiovascular system. Both naturopathic and conventional therapies are discussed based on the nature and severity of the diseases included. Prerequisite: Concurrent with clinic shifts or NM6224	
NM7416 Minor Office Procedures	3 credits
Minor surgical procedures as defined by scope of practice for naturopathic physicians and licensing laws are taught. This lecture/laboratory course covers common minor surgery office procedures. Topics include suturing techniques; wound, infection and burn management; local anesthetics; bandaging techniques; and the recognition of conditions requiring medical referral for surgical intervention. Prerequisite: NM6224	
NM7417 Medical Procedures	3 credits
This course provides students with training in a variety of medical procedures including immunization, prescription writing, intravenous and intramuscular injections. The pre-clinical CPR training requirement is also met through this course. Prerequisite: NM6224	
Bastyr Center for Natural Health: Patient Care Shifts	
Naturopathic medicine students are required to take 18 general patient care shifts or rotations. Each patient care shift/rotation involves provision of care under the supervision of licensed faculty. The medical skills mastered in this setting include all skills and therapeutics utilized in the provision of primary naturopathic medicine and are performed in the context of naturopathic principles. Each student is evaluated for increasing competence and specific skills as s/he progresses through the clinical education. See also listings for physical medicine Patient Care Shifts (PM7801, PM7802, PM8801 and PM8802). Prerequisites: successful completion of all required first and second year ND courses for the four-year track or all required first, second, and third year ND courses for the five-year track, Option A, NM6224, a TB test, background check and 20 hours of preceptorship	
NM7820 Patient Care 1	2 credits
See description above. Prerequisites: See above	
NM7821 Patient Care 2	2 credits
See description preceding NM7820. Prerequisite: NM7820	
NM7822 Patient Care 3	2 credits
See description preceding NM7820. Prerequisite: NM7821	
NM7823 Patient Care 4	2 credits
See description preceding NM7820. Prerequisite: NM7822	
NM7824 Patient Care 5	2 credits
See description preceding NM7820. Prerequisite: NM7823	
NM7825 Patient Care 6	2 credits
See description preceding NM7820. Prerequisite: NM7824	
NM7826 Patient Care 7	2 credits
See description preceding NM7820. Prerequisite: NM7825	
NM7827 Patient Care 8	2 credits
See description preceding NM7820. Prerequisite: NM7826	
NM7828 Patient Care 9	2 credits
See description preceding NM7820. Prerequisite: NM7827	
NM7829 Patient Care 10	2 credits
See description preceding NM7820. See NM8830-NM8836 for Patient Care 11-17 descriptions. Prerequisite: NM7828	
NM7835 Building Clinical Skills	2 credits
Cross listed as NM9835. This course is part of an ongoing series that is formulated to build and enhance clinical skills. The course covers all aspects of the clinical encounter including the interview, physical exam, case analysis, and differential diagnosis, laboratory and imaging as diagnostic tools, and naturopathic case analysis. The course is a directed study with lecture and group discussion and sessions. The student completes case-based assignments and brings the results to the group for analysis and discussion. Practice of personal skills outside of class is expected and is necessary for improvement to occur. This course may be offered as an independent study course with permission of the dean. Prerequisite: Clinic eligibility	

NM7901, NM7902, NM7903 Independent Study	variable credit
These courses provide an opportunity for students to study areas of interest that are not included in the regular curriculum. With the aid of a selected resource person/sponsor, the student may explore a field of study in naturopathic medicine of personal interest and value. Prerequisite: Permission of the dean or associate dean	
NM8101 Ethics	1 credit
Ethics of the physician-patient relationship are explored in case studies. Prerequisite: NM6105	
NM8102 Jurisprudence	1 credit
This course is an overview of the state laws and the regulations as they relate to the practice of naturopathic medicine in the state of Washington. This includes licensing, malpractice, patient and physician rights, and the mechanisms by which laws are applied and enforced. Prerequisite: NM8101	
Radiographic Interpretation 1-2	
In this two (2) course sequence, students learn the fundamentals of radiographic interpretation. This course includes x-ray physics, the production and effects of ionizing radiation and radiological safety. Radiographic findings of common disorders are discussed with emphasis on differential diagnosis and correlation with clinical findings. Included is the study of pathologies of the skeleton, the thoracic region, and the gastrointestinal and genitourinary systems. Since many images are presented in class and considered extremely important to the learning process, in-person classroom attendance is required.	
NM8201 Radiographic Interpretation 1	2 credits
Since many images are presented in class and considered extremely important to the learning process, in-person classroom attendance is required. See description above. Prerequisite: NM7823	
NM8212 Radiographic Interpretation 2	3 credits
In this lecture course, students learn the diagnostic imaging appearance of common disorders of the skeleton, chest, and abdomen, with an emphasis on x-ray presentation. Further diagnostic imaging terminology is introduced. Since many images are presented, classroom attendance is considered extremely important to the learning process. In-person classroom attendance is required. Prerequisite: NM8201	
NM8214 Diagnostic Imaging	3 credits
Students are introduced to special imaging procedures commonly used as ancillary and sometimes the primary imaging method in the evaluation of osseous and soft-tissue lesions of the body. Also included is the study of diagnostic ultrasound, computerized tomography, magnetic resonance imaging, nuclear medicine and fluoroscopy. Since many images are presented in class and considered extremely important to the learning process, in-person classroom attendance is required. Prerequisite: NM8201	
NM8303 Geriatrics	2 credits
The recognition of the physical, psychological and social differences between the elderly and the younger population is explored. The ability to differentially diagnose common disease entities of the elderly also is covered, as well as specific chronic conditions like diabetes, degenerative joint disease, coronary artery disease and problems of disabled individuals. Prerequisite: Concurrent with clinic shifts	
NM8308 Endocrinology	3 credits
The complex interactions of the hormone systems of the body including the causes and effects of hormonal imbalance are covered. Conventional and naturopathic therapeutics for these conditions are presented. Prerequisite: Concurrent with clinic shifts	
NM8309 Rheumatology	1.5 credits
This course focuses on the inflammatory conditions involving the connective tissue structures of the body, including muscles and joints. Emphasis is placed on autoimmune disorders and their treatment, with both conventional and naturopathic therapeutics. Prerequisite: Concurrent with clinic shifts	
NM8312 Urology	1.5 credits
Diseases of the kidney, urinary tract and male reproductive system are covered in this course, with emphasis on differential diagnosis and assessment. Case management from both a conventional and naturopathic perspective is presented. Prerequisite: Concurrent with clinic shifts	
NM8314 Pulmonary Medicine	1.5 credits
The diagnosis and treatment of respiratory diseases, including their relationship to cardiovascular disease, are covered. Conventional and naturopathic therapeutics for respiratory problems are presented. Prerequisite: NM7341	
NM8325 Naturopathic Case Analysis and Management 2: Grand Rounds	1 credit
Students in this clinic-based course participate in case presentations. Prerequisite: NM7325	
Advanced Naturopathic Therapeutics 1-2	
This two (2) course sequence covers health problems in a case-oriented approach. The most appropriate nutritional, botanical and environmental considerations are presented together with other appropriate naturopathic therapeutics. Emphasis is given to balance among the physical, mental and emotional aspects of treatment.	

NM8413 Advanced Naturopathic Therapeutics 1 See description above. Prerequisite: NM7330	2 credits
NM8414 Advanced Naturopathic Therapeutics 2 See description preceding NM8413. Prerequisite: NM8413	2 credits
Preceptorship 1-3 and Advanced Preceptorship Students have the opportunity to preceptor with physicians (ND, MD, DO) in practice. A preceptor/outreach coordinator assists students in locating appropriate preceptorship sites.	
NM8801 Preceptorship 1 See description above. Prerequisite: Admission to naturopathic medicine program	1 credit
NM8802 Preceptorship 2 See description preceding NM8801. Prerequisite: NM8801	1 credit
NM8803 Preceptorship 3 See description preceding NM8801. Prerequisite: NM8802	1 credit
NM8830 Patient Care 11 See description preceding NM7820. Prerequisite: NM7829	2 credits
NM8831 Patient Care 12 See description preceding NM7820. Prerequisite: NM8830	2 credits
NM8832 Patient Care 13 See description preceding NM7820. Prerequisite: NM8831	2 credits
NM8833 Patient Care 14 See description preceding NM7820. Prerequisite: NM8832	2 credits
NM8834 Patient Care 15 See description preceding NM7820. Prerequisite: NM8833	2 credits
NM8835 Patient Care 16 See description preceding NM7820. Prerequisite: NM8834	2 credits
NM8836 Patient Care 17 See description preceding NM7820. Prerequisite: NM8835	2 credits
NM8844 Interim Patient Care See description preceding NM7820. Prerequisite: NM7820	2 credits
NM8901, NM8902, NM8903 Independent Study These courses provide an opportunity for students to study areas of interest that are not included in the regular curriculum. With the aid of a selected resource person/sponsor, the student may explore a field of study in naturopathic medicine of personal interest and value. Students may devote one (1) to five (5) of their elective credits to independent study. Prerequisite: Permission of dean	variable credit
NM9111 Fasting and Natural Medicine Prerequisite: Admission to naturopathic medicine program or permission of dean	1 credit
NM9112 Traditional Naturopathic Medicine Series: Special Topics This course presents special topics in traditional medicine. Examples of topics include the healing reaction, natural hygiene and fasting, nature cure, the spiritual aspects of health and illness, and methods and techniques taught by traditionally-trained naturopathic physicians. Cases are considered in lecture and discussion using this approach. Prerequisite: NM5113	2 credits
NM9115 Traditional Naturopathic Medicine Series: Natural Hygiene, Principles, Research and Practice This course is designed to teach and explore principles, research and practice of natural hygiene. The variable factors that determine health, health recovery and disease are integrated with current scientific research and today's practice of natural hygiene. Prerequisite: Admission to the naturopathic medicine program or MS in nutrition program	2 credits
NM9118 Energetics of Natural Medicine This course presents an analysis of the vital force, the emergence of shape, a redefinition of disease and a discussion of specific disorders. The class is participatory, involving lecture, discussion and movement. Prerequisite: NM6224 or NM7116	0.5 credits

NM9314 Advanced Gynecology and Practicum	2 credits
This class includes advanced discussion in topics such as dysfunctional uterine bleeding, cervical cytology, chronic pelvic pain, recurrent vaginitis, breast disease, contraception management, osteoporosis and menopause. This class includes several case discussions. Included is a 2-hour practicum each week to review and practice the gynecologic exam, breast exam and office procedures. The practicum also includes discussion, demonstration and practice of IUD insertions plus endometrial and vulvar biopsies. Students enrolled in this class are encouraged but not mandated to practice gynecological and breast exams on each other. However, the practice of minor office procedures is done on Papayas. Prerequisites: NM7313	
NM9316 Advanced Pediatrics	2 credits
This elective course focuses on clinical pearls and necessary knowledge for the naturopathic physician who will be working with children of all ages. Practical skills, such as vaccine administration, blood collection and exam skills are taught, as well as more advanced pediatric assessment techniques and treatment options. Prerequisites: NM7314, NM7315	
NM9401 Diabetes, Insulin Resistance Syndrome	2 credits
Naturopathic medicine has powerful tools to meet this challenge, and we will be asked to care for an increasing number of diabetic patients. Diabetic care often presents complex management problems. The goal of this course is to develop a deeper understanding of the principles of natural diabetic care and an ability to make a sound response to the diabetic challenge. Prerequisite: Admission to Bastyr University	
NM9402 AIDS and Alternative Medicine	1.5 credits
This course provides students with a foundation of information on HIV and AIDS necessary to meet the responsibilities of a naturopathic physician working with HIV/AIDS. Prerequisite: BC6209	
NM9405 Traditional Naturopathic Medicine Series: Principles of Clinical Fasting	1 credit
The purpose of this course is to familiarize students with the clinical application of fasting and management of fasting patients. Principles of natural hygiene, naturopathic philosophy and the therapeutic order are applied. Prerequisite: Admission to the naturopathic medicine program or permission of instructor	
Patient Care Elective Shifts 1-4	
Students may take Patient Care Shifts as elective credit by permission of clinic medical director	
NM9801 Patient Care Elective (fall)	2 credits
See description above. Prerequisite: Permission of clinic medical director	
NM9802 Patient Care Elective (winter)	2 credits
See description preceding NM9801. Prerequisite: Permission of clinic medical director	
NM9803 Patient Care Elective (spring)	2 credits
See description preceding NM9801. Prerequisite: Permission of clinic medical director	
NM9835 Building Clinical Skills	2 credits
Cross listed as NM7835. This course is part of an ongoing series that is formulated to build and enhance clinical skills. The course covers all aspects of the clinical encounter including the interview, physical exam, case analysis, and differential diagnosis, laboratory and imaging as diagnostic tools, and naturopathic case analysis. The course is a directed study with lecture and group discussion and sessions. The student completes case based assignments and brings the results to the group for analysis and discussion. Practice of personal skills outside of class is expected and is necessary for improvement to occur. Prerequisite: Clinic eligibility	
NM9804 Patient Care Elective (summer)	2 credits
See description preceding NM9801. Prerequisite: Permission of clinic medical director	
NM9811 Advanced Preceptorship	2 credits
Students have the opportunity to preceptor with physicians (ND, MD, DO) in practice, in lieu of a regular clinic shift. Advanced Preceptorships may also be taken for elective credit. Approval must be granted by the associate clinical dean for naturopathic medicine. Prerequisite: Mid-level primary clinician status and completion of all preceptor rotations	

Acupuncture and Oriental Medicine

Terry Courtney, MPH, LAc, Dean

For a listing of the Chinese herbal medicine courses that are part of the MSAOM or CCHM programs, please see alphabetical listings beginning with CH. A grade of C or higher is required to pass all AOM/CCHM courses. Please review grade point requirements for the MSA/MSAOM programs.

CPR for Health Care Providers

Prior to entrance into the clinic, all students in the MSA and MSAOM programs must complete a CPR course for health care professionals. This is a Bastyr Center for Natural Health requirement and is offered by the health and safety officer, health and safety department. Prerequisite: None

OM4101 History of Medicine	2 credits
This course is a survey of the history of medicine, including cross-cultural perspectives in healing. The course traces the history of medical practice from Ayurveda, Hippocrates and Taoism to the development of drug therapy and allopathic medicine. Special attention is placed on issues of cultural diversity in medicine. Prerequisite: Admission to the AOM program	
Meridians and Points 1-3	
This series includes a comprehensive study of acupuncture meridians and points of the human body with reference to traditional Chinese locations. The traditional indications, precautions and physiological responses according to modern research are emphasized. The 12 regular meridian channels and eight extra meridian channels, 15 collaterals, 365 regular acupoints and extra points are discussed. Labs, lectures and illustrations are coordinated to provide students with hands-on skills and a thorough understanding of points and meridians.	
OM4106 Meridians and Points 1	4 credits
See description above. Prerequisite: Admission to the AOM program	
OM4107 Meridians and Points 2	4 credits
See description preceding OM4106. Prerequisite: OM4106	
OM4108 Meridians and Points 3	4 credits
See description preceding OM4106. Prerequisite: OM4107	
OM4118 TCM Fundamentals	4 credits
This course covers the traditional theories fundamental to the practice of acupuncture and Oriental medicine. Students are introduced to the philosophy, theories of diagnosis and therapeutic concepts underlying traditional Chinese medicine. Prerequisite: Admission to the AOM program	
TCM Diagnosis 1-2	
In TCM Diagnosis 1 and 2 students begin the study, analysis, and understanding of the tongue and pulse. These courses focus on the understanding and practical skills of TCM diagnosis, applicable to both traditional Chinese herbology and acupuncture. Topics include differentiation of syndromes according to etiology, disease classification by symptom analysis, an in-depth study of the four diagnostic methods, and the principles of treatment. Teaching aids, illustrations and case studies are utilized to facilitate learning.	
OM4211 TCM Diagnosis 1	3 credits
See description above. Prerequisites: OM4118/OM5120, admission to the AOM program	
OM4212 TCM Diagnosis 2	3 credits
See description preceding OM4211. Prerequisite: OM4211	
TCM Pathology 1-2	
TCM Pathology 1 and 2 focus on understanding of the TCM empirical model of pathophysiology of health disharmonies according to Zang Fu and channel theories. Through case presentations students learn to analyze the etiology, signs and symptoms, patterns that create disease, and treatment plans that facilitate homeostasis.	
OM4221 TCM Pathology 1	3 credits
See description above. Prerequisites: OM4118/OM5120, admission to the AOM program	
OM4222 TCM Pathology 2	3 credits
See description preceding OM4221. Prerequisite: OM4221	
OM4315 TCM Bodywork: Tui Na	1 credit
Tui Na, a form of bodywork, is a therapeutic massage modality that originated in China. The application of the various Tui Na techniques is based on the theories of TCM, and Tui Na's effects can be utilized for acute conditions, as well as for constitutional disharmonies. In this course, students are introduced to various techniques, as well as fundamental principles for common therapeutic applications. Both practical and theoretical aspects are emphasized. Prerequisites: OM4118/OM5120, admission to the AOM program	
OM4406 Qi Gong	1 credit
Qi gong refers to the building, harnessing and proper directing of qi (energy.) Through proper exercise and instruction, students experience qi gong as a valuable resource for self healing and building energy. Prerequisite: OM4118 or OM5120 (can be concurrent) or permission of dean	

TCM Techniques 1-3

This sequence of courses offers instruction in both the principles and hands-on skills of acupuncture techniques. Considerable emphasis is put on patient safety, competence in clean needle technique, material preparations and precautions. Technical training includes needling, moxibustion, cupping, electroacupuncture, Gwa Sha, plum blossom needle, and physical stimulation of acupoints. A student must be enrolled in the MSA or MSAOM program in order to take these courses.

OM4411 TCM Techniques 1	2 credits
See description above. (For TCM Techniques 2-3, see OM5430 and OM5436.) Prerequisites: BC3134 (or BC5122 - ND Students), OM4106, OM4118; concurrent with BC3135 and OM4107	
OM4800 AOM Clinic Entry	2 credits
This course covers clinic requirements, procedures and protocols, as well as clinic philosophy and standards of practice. Case management skills and charting skills prepare students for their clinic experience. Students attend case preview/review sessions where clinic cases are discussed. Special topics include confidentiality, special needs of different patient groups, dispensary, ethics and library support. Familiarity with Bastyr Center for Natural Health from the perspective of the patient and preparation for becoming a clinician are the key aspects of this course. Prerequisite: Admission to the AOM program	
Clinical Observation 1-3	
In preparation for becoming an intern, students train under the supervision of faculty who are licensed acupuncturists. Training occurs at Bastyr Center for Natural Health as well as other community sites. Observation is designed to introduce and train the student in clinical protocol, patient care etiquette and appropriate interactive skills with supervisors and student interns. Completion of the observation experience prepares students to further advance in the clinical training program.	
OM4803 Clinical Observation 1	2 credits
See description above. Prerequisite: OM4800	
OM4804 Clinical Observation 2	2 credits
See description preceding OM4803. See OM5803 for Clinical Observation 3 description. Prerequisite: OM4803	
OM4806 AOM Preceptor Observation	2 credits
The required preceptorship experience can be done while in observation status or completed during the internship phase. Students who choose to complete the preceptorship during their internship phase are still eligible to start clinic in spring quarter of their second year, which is the traditional entry point into internship training. This observation experience is to be completed with a practicing professional either in or outside of Washington State. Prerequisite: OM4804 or permission of dean	
OM4901, OM4902, OM4903 Independent Study	variable credit
These courses provide an opportunity for students to study areas of interest that are not included in the regular curriculum. With the aid of a selected resource person/sponsor, the student may explore a field of study in acupuncture and Oriental medicine of personal interest and value. Prerequisite: Permission of dean	
OM5120 Fundamental Principles of Traditional Chinese Medicine	3 credits
This introductory course provides an overview to the theories and practice of acupuncture and Oriental medicine. Students are introduced to this ancient medicine in order to both better understand it and to recognize clinical situations that would benefit from referral to an acupuncturist. While this course is designed for students in the naturopathic medicine program, students enrolled in other degree programs are also eligible to take this course. Prerequisite: Admission to naturopathic medicine program or any other non-AOM degree program	
OM5121 Medical Chinese 1	1 credit
Medical Chinese 1 provides basic training in the Chinese Romanization system (pin yin), which assists students in recognizing Chinese medical concepts in both written and oral form. This is the first course in a four-course series and is the only medical Chinese course required for MSA students. Prerequisite: Admission to the AOM program	
OM5122 Medical Chinese 2	1 credit
Medical Chinese 2 introduces basic Chinese characters including the use of radicals. Simple greetings are also covered. This is the second course in a four-course series. Prerequisite: OM5121 or permission of the dean	
OM5123 Medical Chinese 3	2 credits
Medical Chinese 3 focuses on introducing herbs with correct pronunciation and visual recognition of characters, introducing TCM clinical terminology, and developing verbal skills to include simple conversational Chinese. This is the third course in a four-course series. Prerequisite: OM5122 or permission of the dean	
OM5124 Medical Chinese 4	2 credits
Medical Chinese 4 continues with the study of herbal pronunciation and visual recognition of characters, introducing additional TCM clinical terminology. The course also covers simple grammar and sentence structure and builds verbal skills with simple medical conversation. This is the final course in a four-course series. Prerequisite: OM5123 or permission of the dean	
OM5300 Auricular Therapy	2 credits
This course introduces the basics of auricular therapy (ear acupuncture) and its use in diagnosis and treatment. Labs and lectures are included. Prerequisite: OM5436	

OM5302 Public Health Issues in AOM	2 credits
HIV/AIDS and chemical dependency are two major public health challenges for which the AOM profession has been instrumental in providing important ancillary care. This course provides an overview of differential diagnosis, treatment approaches and collaboration with other health care professionals in the treatment setting. The course blends Western medical theories with Oriental medicine in order to provide the student with a solid beginning foundation of clinical knowledge. Prerequisite: Intern status in AOM	
Survey of Western Clinical Sciences 1-3	
This three-course sequence emphasizes the systemic approach to Western pathology and the signs and symptoms that are clinically associated with disease in the various organ systems. Students learn basic physical exam skills from a Western clinical sciences perspective, including an overview to the fundamentals of laboratory test interpretation. Recognition of signs and symptoms as well as objective findings that would indicate the necessity for a referral are extremely important to contemporary acupuncture practice.	
OM5321 Survey of Western Clinical Sciences 1	3 credits
See description above. Prerequisites: BC3136, BC4105 and admission to the AOM program	
OM5322 Survey of Western Clinical Sciences 2	3 credits
See description preceding OM5321. Prerequisite: OM5321	
OM5323 Survey of Western Clinical Science 3	2 credits
See description preceding OM5321. Prerequisite: OM5322	
OM5405 TCM Whole Foods Nutrition	2 credits
Students learn through lecture, demonstration, and practical lab how to recognize and apply a wide variety of foods for use in common patterns of pathology in TCM. Prerequisites: OM5418, OM5419	
Acupuncture Therapeutics 1-7	
This sequence of seven (7) courses covers the systems of the body and the conditions and disorders that afflict the body's systems from a TCM perspective. Each course begins with a brief survey of Western biomedical information. Traditional approaches in acupuncture are covered to familiarize students with TCM therapeutics. There is an overall emphasis on classical applications as they relate to therapeutics.	
OM5414 Acupuncture Therapeutics 1	2 credits
See description above. This course provides an introduction to the seven (7) part sequence of Acupuncture Therapeutics. Also covered are the most common disorders seen in the clinical setting. Prerequisites: OM4212, OM4222	
OM5415 Acupuncture Therapeutics 2	2 credits
See description preceding OM5414. This course provides foundational training in musculo-skeletal and dermatology conditions. Also covered are respiratory disorders. Prerequisite: OM5414	
OM5416 Acupuncture Therapeutics 3	2 credits
See description preceding OM5414. Acupuncture therapeutics for disorders of the gastrointestinal and hepatobiliary systems are covered in this course. Prerequisite: OM5414	
OM5417 Acupuncture Therapeutics 4	2 credits
See description preceding OM5414. Acupuncture therapeutics for the treatment of pediatric and gynecological disorders are covered in this course. Prerequisite: OM5414	
OM5418 Acupuncture Therapeutics 5	2 credits
See description preceding OM5414. Students learn to treat disorders of the cardiovascular system and common psychiatric disorders. Prerequisite: OM5414	
OM5419 Acupuncture Therapeutics 6	2 credits
See description preceding OM5414. This course covers the approach to and treatment of eye, ear, nose and throat conditions. Prerequisite: OM5414	
OM5430 TCM Techniques 2	2 credits
See description preceding OM4411. This course continues with building basic needling skills and introducing moxibustion, Gwa Sha, and other non-needle modalities. Prerequisite: OM4411	
OM5436 TCM Techniques 3	2 credits
See description preceding OM4411. This course provides students with advanced acupuncture skills, supervised practice on difficult acupuncture points and the techniques of acupuncture microsystems. Prerequisite: OM5430	
OM5438 TCM Techniques Lab	1 credit
This course provides additional instruction, review and practice opportunity for all material taught in the TCM Techniques 1-3 series. Prerequisite: OM5436	

OM5442 Tai Chi	1 credit
Tai chi is an important energetic system that utilizes specific movements and exercises designed to harmonize and build one's spirit and body. Prerequisite: OM4118 (may be concurrent) or 5120 (may be concurrent) or permission of dean	
OM5803 Clinical Observation 3	2 credits
See description preceding OM4803. Prerequisite: OM4804	
Clinical Internship and Internship Interim Clinic	
Students progress through 14 internship shifts (MSA) or 16 internship shifts (MSAOM), which start in the spring of their second year and continue through the remainder of the program. An increasing level of independence is expected of student clinicians as they approach graduation. This is assessed through supervisor evaluations and clinical competencies performed by the student clinician throughout their clinical experience. Prerequisite: completion of clinic entry exam	
Note: To graduate, AOM students must complete 400 separate patient treatments on a minimum of 100 different patients completed over a minimum of one academic year. In order to satisfy the patient contact requirements, students may need additional clinic internship hours beyond those required for graduation from the University.	
OM5805 Clinical Internship 1	2 credits
See description above. Prerequisite: Admission to MSA or MSAOM, OM5803, successful completion of Clinic Intern Entry exam	
OM5806 Clinical Internship 2	2 credits
See description preceding OM5805. Prerequisite: OM5805	
OM5807 Clinical Internship 3	2 credits
See description preceding OM5805. Prerequisite: OM5806	
OM5808 Clinical Internship 4	2 credits
See description preceding OM5805. Prerequisite: OM5807	
OM5809 Clinical Internship 5	2 credits
See description preceding OM5805. Prerequisite: OM5808	
OM5810 Clinical Internship 6	2 credits
See description preceding OM5805. See OM6801-OM6810 for Clinic Internship 7-16 Prerequisite: OM5809	
OM5836 Internship Interim Clinic	1.5 credits
See description preceding OM5805. Prerequisite: OM4800	
OM5901, OM5902, OM5903 Independent study	variable credit
These courses provide an opportunity for students to study areas of interest that are not included in the regular curriculum. With the aid of a selected resource person/sponsor, the student may explore a field of study in acupuncture and Oriental medicine of personal interest and value. Prerequisite: Permission of dean	
OM6105 Jurisprudence/Ethics	1 credit
Medical ethics and legal considerations are discussed in relationship to patient care and privacy issues. Prerequisite: Third-year status in AOM program	
OM6110 TCM Medical Classics	2 credits
This course offers a survey of the historical evolution of TCM from its empirical beginnings within different schools to the most current practices. Prerequisite: Admission to the MSA or MSAOM program	
OM6111 Practice Management 1	2 credits
This is the first class of a two-class series. The primary focus is assisting with the foundations of building a practice, including formulating and completing a business plan. Additional topics include office planning, bookkeeping, fee structures, taxes, accounting, marketing and communication skills. Prerequisite: OM5807	
OM6112 Practice Management 2	1 credit
This is the second class of a two-class series. This course focuses on additional practice building skills and requirements, including city and state licensing, marketing strategies, legal consent and privacy disclosures, practice options and referrals. Prerequisite: OM6111	
OM6305 Survey of Biophysics and Electroacupuncture	2 credits
This course presents an overview of the theories and research in the field of biophysics that impact the practice of electroacupuncture. Principles and various applications of electroacupuncture are presented, a variety of devices demonstrated, and hands-on experience encouraged. Prerequisite: OM5436	
OM6310 Case Review	2 credits
This course runs concurrently with Clinic Internship and provides a forum for the discussion of cases seen in the teaching clinic. Prerequisite: OM5805	

OM6315 Clinical Theatre	2 credits
This course provides an opportunity to observe experienced practitioners conducting patient interviews, constructing treatment plans, and applying treatments. The course is designed to assist students with understanding various approaches to medical interviewing, patient care and management. Prerequisite: OM5805	
OM6417 Acupuncture Therapeutics 7	2 credits
See description preceding OM5414. Acupuncture therapeutics of renal and genitourinary systems, plus immune disorders including MS, CFIDS, and fibromyalgia. Prerequisite: OM5414	
OM6801 Clinical Internship 7	2 credits
See description preceding OM5805. Prerequisite: OM5810	
OM6802 Clinical Internship 8	2 credits
See description preceding OM5805. Prerequisite: OM6801	
OM6803 Clinical Internship 9	2 credits
See description preceding OM5805. Prerequisite: OM6802	
OM6804 Clinical Internship 10	2 credits
See description preceding OM5805. Prerequisite: OM6803	
OM6805 Clinical Internship 11	2 credits
See description preceding OM5805. Prerequisite: OM6804	
OM6806 Clinical Internship 12	2 credits
See description preceding OM5805. Prerequisite: OM6805	
OM6807 Clinical Internship 13	2 credits
See description preceding OM5805. Prerequisite: OM6806	
OM6808 Clinical Internship 14	2 credits
See description preceding OM5805. Prerequisite: OM6807	
OM6809 Clinical Internship 15	2 credits
See description preceding OM5805. Prerequisite: OM6808	
OM6810 Clinical Internship 16	2 credits
See description preceding OM5805. Prerequisite: OM6809	
OM6820 Clinic Entry for China	1 credit
Required for all students (master's and doctoral) who plan to study in China. This class is designed to prepare AOM students for their internships in Chengdu or Shanghai. Major topics include: professional hospital conduct in the Chinese hospital, Chinese cultural topics (dining, etiquette, studying tai chi, Chinese), safety, practical travel tips (money, packing, purchases in China, etc.). The course is taught with lecture, role play, video and guest speakers. Prerequisite: Prior approval for China internship or permission of the dean	
Acupuncture Clinic in China 1-4	
Students in good academic standing are encouraged to apply for advanced studies in China. Currently, Chengdu and Shanghai Universities of TCM are the main sites for Bastyr acupuncture internships. For more information and an application, see the <i>Student Clinician Handbook</i> . The clinic in China is an eight (8) credit experience to be applied toward MSA or MSAOM internship and/or elective credit. These credits may not be audited.	
OM6821 Clinic in China 1	2 credits
See description above. Prerequisite: Permission of dean	
OM6822 Clinic in China 2	2 credits
See description preceding OM6821. Prerequisite: Permission of dean	
OM6823 Clinic in China 3	2 credits
See description preceding OM6821. Prerequisite: Permission of dean	
OM6824 Clinic in China 4	2 credits
See description preceding OM6821. Prerequisite: Permission of dean	
OM6901, OM6902, OM6903 Independent Study	variable credit
These courses provide an opportunity for students to study areas of interest that are not included in the regular curriculum. With the aid of a selected resource person/sponsor, the student may explore a field of study in acupuncture and Oriental medicine of personal interest and value. Prerequisite: Permission of dean	

OM7110 Mechanisms and Pathology of Pain	2 credits
Understanding the mechanisms and pathology of pain is key to clinical management and resolution. This course covers the anatomical, neurological and biochemical components and biomedical aspects of pain. Prerequisites: Admission to DAOM program, or BC6200 for ND students, or permission of dean	
OM7200 Huang Di Nei Jing	2 credits
The Neijing is the earliest known book on Chinese medical theory and is also included as one of the four major classical texts of Chinese medicine. This course provides highly developed studies in theories pertaining to yin/yang, five element, zang/fu and meridians. Building on these theories, the course provides a deeper understanding of disease etiology, which is critical to development of sophisticated clinical treatment plans. Prerequisite: Admission to DAOM program or permission of dean	
OM7205 Shang Han Lun	2 credits
The Shang Han Lun is one of the four most important classics of traditional Chinese Medicine. The course provides an advanced analysis and ensuing clinical application of diseases caused by the external pathogen of Cold. This course prepares students to apply its diagnostic and treatment protocols to complex clinical care and treatment strategies. Prerequisite: Admission to DAOM program or permission of dean	
OM7210 Jing Gui Yao Lue	2 credits
The Jin Gui Yao Lue is included as one of the four most important classics of traditional Chinese medicine. This course provides students with advanced clinical concepts in diagnostic and therapeutic systems in the areas of differential diagnosis, treatment principles and Chinese herbal formula selection, utilizing the six classic stages of disease as the structure for the course. The lectures are followed by case studies, some of which are from the Bastyr Center for Natural Health patient population. Prerequisite: Admission to DAOM program or permission of dean	
OM7215 Wen Bing Xue	2 credits
The Wen Bing Xue medical classic is the one of the four major traditional Chinese medical classic texts. This text pertains to “seasonal febrile diseases.” The course analyzes the four classic stages of disease as they pertain to the external pathogen of Heat. The analysis and clinical application of this course material are applied to the diagnostic and treatment protocols of complex patient care protocols. Prerequisite: Admission to DAOM program or permission of dean	
OM7311 OM Pain Management 1	2 credits
This is the first of three courses covering the diagnosis and treatment of neuromusculoskeletal conditions. The class discusses the TCM differential diagnosis of pain, treatment for the various types of pain with various types of tissue involvement, acupuncture systems of point selection, and the broad topics of TCM bi syndrome, wei syndrome and zhong-feng or windstroke. Prerequisite: Admission to DAOM or approval of the dean	
OM7312 OM Pain Management 2	2 credits
This is the second of three courses covering the diagnosis and treatment of neuromusculoskeletal conditions, many of which involve pain. This course discusses site-specific neuromuscular problems including tendonitis, bursitis, neuralgia, sports injuries, and trigger point pain patterns of the lower extremities. Prerequisite: OM7311 or approval of the dean	
OM7313 OM Pain Management 3	2 credits
This is the third of three courses covering the diagnosis and treatment of neuromusculoskeletal conditions, many of which involve pain. This course explores painful conditions of the spine, neck, head, shoulder and upper limbs, including the hand. Prerequisite: OM7311, OM7312, or approval of the dean	
OM7400 Acupuncture in Oncology	2 credits
This course provides advanced acupuncture techniques that are vital to the clinical care and management of oncology patients. Advanced clinical theories and techniques, as they pertain to acupuncture, are given for the management of pain, immune support, treatment of anxiety/depression and modifying the side effects of medication. This course provides a sophisticated understanding and application of acupuncture in the oncology clinical setting. Prerequisite: Admission to DAOM program	
OM7401 AOM Orthopedics	2 credits
This course provides an introduction to orthopedic assessment as it applies to the acupuncture clinical setting. Students gain skills in orthopedic assessment, which will enhance their clinical work and ability to provide advanced clinical care. Prerequisite: Admission to DAOM program or OM5323	
OM7402 Clinical Orthopedics	2 credits
This course addresses the clinical issues of orthopedic management, including imaging, pharmaceuticals, labs and specific physical modalities. Patient co-management issues are also addressed, including recognition of advanced conditions requiring referral. Prerequisites: Admission to DAOM program, or BC6200 for ND students, or permission of dean	
OM7403 Advanced Tui Na	1 credit
There are many advanced Tui Na techniques that can enhance resolution of pain. This course covers a variety of common clinical conditions including headache, TMJ, upper extremities, carpal tunnel syndrome, wrist pain, injury of lower extremities including the gastrocnemius muscle, ankle sprains and traumatic synovitis. Prerequisite: Admission to DAOM or approval of the dean	

OM7405 Chinese Herbs in Oncology	3 credits
This course provides an analysis of the herbs and formulas that are commonly used in cancer treatment to treat both the acute phase of illness as well as to support health maintenance. Utilizing the standard Chinese herbal categories of clearing, releasing, invigorating, softening, reducing, draining and tonification, the course leads to a sophisticated understanding and application of Chinese herbal medicine in the oncology clinical setting. Prerequisite: Admission to DAOM program	
OM7406 Qi Gong for Immunity and Pain Management	1 credit
This course focuses on both static and dynamic Qi Gong. Training is focused on strengthening the five Zang organs, calming Shen and managing pain. Case studies are presented for discussion. Prerequisite: OM4406 or admission to DAOM program	
OM7411 TCM Cancer Therapeutics 1	2 credits
This course is the first in a two-part series. The focus of the course is to provide an advanced analysis of traditional Chinese medicine etiology, pathology, treatment principles and clinical application including nutrition and rehabilitation. This course develops skills in building sophisticated treatment plans for oncology care. Prerequisites: BC7101 and admission to DAOM program	
OM7412 TCM Cancer Therapeutics 2	2 credits
This course is the second in a two-part series and covers the most common types of cancer found in the U.S. The course focuses on the clinical treatment of cancer utilizing both Chinese medicine and Western clinical intervention. The course provides an analysis of the strengths and limitations of Western and Chinese medicine in the oncology setting which leads to greater skills in understanding their integration in the clinical arena. Prerequisite: OM7411	
OM7415 Advanced Acupuncture Techniques for Pain	2 credits
There are many advanced acupuncture techniques that can enhance needle manipulation skills, leading to stronger clinical outcomes. In addition to covering commonly used acupuncture techniques for pain, the course also covers techniques from the Huang Di Nei Jing, penetrated needling and traditional therapeutic artistic needling. Prerequisite: Admission to DAOM	
DAOM Internships	
Doctoral students rotate through six different clinical sites. The first rotation is done at Bastyr Center for Natural Health and trains students in the basics of clinical supervision. Students then complete internships at the Seattle Cancer Treatment and Wellness Center and Skagit Valley Hospital Regional Cancer Care Center. Internships in advanced pain management are done in integrated shifts at Bastyr Center for Natural Health. In the final quarter, students have an opportunity to do advanced clinical work through sister school affiliations with Chengdu and Shanghai Universities of Traditional Chinese Medicine. Students spend a total of six weeks in clinical rotations in China.	
The purpose of the clinical training is to give students a strong foundation in traditional Chinese medicine care within integrated Western clinical settings that provide oncology and pain care. The student training experience provides clinical experience with developing and applying advanced acupuncture and Oriental medicine treatment plans as well as opportunities to observe oncologists and other health providers.	
OM7800 Clinic Entry for Supervisors	1 credit
This course provides the skills and information needed to provide clinical supervision at Bastyr Center for Natural Health. The course covers key concepts that are important to working with adult learners including conducting mini-assessments, constructive feedback techniques and evaluation/grading. The course also assists students in conducting interdepartmental referrals and in skill building in co-management of patients. Prerequisite: Admission to DAOM program	
OM7801 Clinic Supervision Internship 1	2 credits
See description preceding OM7800. Prerequisite: Concurrent with OM7800, Admission to DAOM program	
OM7802 Clinic Supervision Internship 2	2 credits
See description preceding OM7800. Prerequisite: OM7801	
OM7811 Oncology Clinic 1	2 credits
See description preceding OM7800. Prerequisite: completion of or concurrent with OM7412	
OM7812 Oncology Clinic 2	2 credits
See description preceding OM7800. Prerequisite: OM7811	
OM7813 Oncology Clinic 3	2 credits
See description preceding OM7800. Prerequisite: OM7812	
OM7821 Pain Clinic 1	2 credits
See description preceding OM7800. Prerequisite: OM7110, OM7401	
OM7822 Pain Clinic 2	2 credits
See description preceding OM7800. Prerequisite: OM7821	
OM7823 Pain Clinic 3	2 credits
See description preceding OM7800. Prerequisite: OM7822	

OM7901, OM7902, OM7903 Independent Study **variable credit**
These courses provide an opportunity for students to study areas of interest that are not included in the regular curriculum. With the aid of a selected resource person/sponsor, the student may explore a field of study in acupuncture and Oriental medicine of personal interest and value. Prerequisite: Permission of dean

Research Practicum 1-3

This course provides students with a forum to discuss contemporary research topics as well as a place to discuss challenges or breakthroughs with their own doctoral research. Research Practicum 3 is the forum for final project presentations. The group discussions are particularly focused on complementary and alternative medicine issues, including analyzing the work going on nationally through NIH funding. An introduction to the research application process itself is also covered.

OM8101 Research Practicum 1 **2 credits**

See description above. Prerequisites: TR5128, Admission to DAOM program

OM8102 Research Practicum 2 **2 credits**

See description preceding OM8101. Prerequisite: OM8101

OM8103 Research Practicum 3 **2 credits**

See description preceding OM8101. Prerequisite: OM8102

OM8199 Capstone Continuation **0 credits**

Enrollment in this course is required when a student has not yet completed the DAOM capstone project but has completed all other requirements of the doctoral program. One credit of tuition is charged. Prerequisite: OM8103

OM8800 Cancer Care Internship (Observation) **2 credits**

See description preceding OM7800. Prerequisite: Completion of or concurrent with OM7412

OM8805 Hospital Internship **12 credits**

See description preceding OM7800. The six-week clinical rotation in China provides doctoral students with exposure to advanced Western and TCM treatment planning and case management as it pertains to oncology care. Students are directly involved in treatment of oncology patients under supervision of the hospital teaching staff. The six-week rotation includes three weeks at Chengdu University of Traditional Chinese Medicine and three weeks at Shanghai University of Traditional Chinese Medicine. Prerequisite: OM7813

OM8901, OM8902, OM8903 Independent Study **variable credit**

These courses provide an opportunity for students to study areas of interest that are not included in the regular curriculum. With the aid of a selected resource person/sponsor, the student may explore a field of study in acupuncture and Oriental medicine of personal interest and value. Prerequisite: Permission of dean

AOM Department Electives: The following courses (course numbers starting with OM9—) represent a variety of electives and special topics courses offered on a rotating basis.

OM9101 Overview of TCM and Physics **3 credits**

This course provides an overview of Western physics and the physiological mechanisms behind concepts of traditional Chinese medicine. The course covers the framework behind the current Western scientific understanding of traditional Chinese medicine. Prerequisites: OM4108, OM4222

Qi Gong Elective Series

Courses are grouped into three units of three classes each. The first unit of classes must be completed before either units 2 or 3 can be taken.

Unit 1: Learning the Basics of Qi Gong

OM9111 Qi Gong: Internal Activation **1 credit**

This is the first class in a three-course series, introducing methods and techniques for direct, experiential understanding of the internal qi pathways of the Du and Ren meridians. The focus is on activating and cultivating one's own qi in accordance with corresponding yin/yang theory and TCM principles. Prerequisite: OM4406

OM9112 Qi Gong: Energizing the Zang Fu **1 credit**

This is the second in a three-course series, introducing methods for developing the Zang Fu related meridians. Students learn meridian cultivation exercises and gain an experiential understanding of the internal organs at the energetic level. Prerequisite: OM9111

OM9113 Qi Gong: Energizing the Extraordinary Meridians **1 credit**

This is the third in a three-course series, introducing methods for developing the extraordinary pathways. Students gain an experiential understanding of the functions of the extraordinary energy pathways at the subtle energy level. Prerequisite: OM9112

Unit 2: Training for Teaching Qi Gong to Others**OM9121 Qi Gong: Development of Emotional****Well-Being****1 credit**

Students learn internal organ energy activation and cultivation leading to an experiential understanding of the emotional functions of the organs and the development of emotional management. Prerequisite: OM9113

OM9122 Qi Gong: Internal Balance and Qi Cultivation**1 credit**

Students learn advanced qi cultivation exercises including those affecting the central and autonomic nervous systems, including the Marrow Gate and the Brain Gate. Prerequisite: OM9121

OM9123 Qi Gong: Teaching Methods and Philosophy**1 credit**

Students learn methods and tools for conducting presentations and classes, including self-care practice and understanding of the trinity of students-teacher-universal energy. Prerequisite: OM9122

Unit 3: Therapeutic Application: Basics of Diagnostic Methods and Techniques**OM9131 Qi Gong: Diagnostics****1 credit**

The first of a three-course series. Methods covered include qi resonance, qi image perception and qi energy body communication. Prerequisite: OM9113

OM9132 Qi Gong: Therapeutic Approaches**1 credit**

This is the second of a three-course series. This course introduces the relationship between qi Gong and five-element theory and the application of this knowledge in addressing health conditions. Students learn how natural changes within the body and the external environment affect health and quality of life. Prerequisite: OM9131

OM9133 Qi Gong: Philosophy and Ethics**1 credit**

This is the third of a three-course series. This course introduces the Qi Gong healing philosophy and the ethical code for providing Qi Gong treatments. Students learn appropriate self care before and after providing Qi Gong sessions. Prerequisite: OM9132

OM9201 TCM Diagnostics for NDs**3 credits**

This course is designed to provide naturopathic students an opportunity to apply basic diagnostic principles of traditional Chinese medicine. Topics include TCM interviewing skills, pulse, tongue, meridian, palpation and case analysis. Beginning patient assessment skills are introduced. Prerequisite: OM4118 or OM5120

OM9205 Advanced Tongue and Pulse Diagnosis**2 credits**

This class deepens the student's ability to use tongue and pulse diagnosis in a clinical setting. In addition to an in-depth review of TCM pulse diagnostics, the class explores the yin and yang pulses, the eight extra vessel pulses, and the wave from within each organ pulse, as well as an in-depth review of tongue diagnostics. Prerequisite: OM5805 (may be concurrent)

OM9303 TCM Sports Medicine 1**1 credit**

This course covers the theories, techniques and treatments of TCM sports medicine. The class focuses on introducing the treatments of six common joint injuries: mandible dislocation, luxation of biceps, long head tendon, acromioclavicular joint, sternoclavicular joint and radial capitulum. Prerequisite: BC3134

OM9306 Five Element**2 credits**

This course provides an integrated approach to five element diagnostic laws and theory. The course provides a bridge between TCM and five element theory. Emphasis is given to developing diagnostic skills, interviewing and examining techniques. The student is guided to a new experience of seeing, hearing, feeling and smelling. Understanding all correspondences of lifestyle preference, personality, compensation for early traumas and emotional patterns, with a consciousness from within each element, is the goal of a series of experiential exercises. Prerequisite: OM4118 or OM5120

OM9309 Introduction to Foot Reflexology Massage**1 credit**

This course introduces the theory and techniques of foot reflexology massage. Foot reflexology uses acupressure reflex points on the soles of the foot and lower leg to stimulate trigger points/meridians to treat disorders including PMS, stress and fatigue, headache, arthritis, insomnia, depression, digestive disorders, backache. History of reflexology, preparing herbal foot soaks, reflexology foot massage instruction/practice, and walks in Bastyr's reflexology path. Prerequisites: BC3134, BC3135, BC3136 (or concurrent w/BC3136), or equivalent A&P series

OM9314 TCM Sports Medicine 2**1 credit**

This course covers the theories, techniques and treatments of TCM sports medicine. The class focuses on providing ancillary treatment for fractures of the ulna, radius (with subluxation of the radial capitulum), wrist joint, metacarpal thumb joint, hip joint, patella, fibular capitulum, ankle joint, fifth metatarsal bone, phalangeal joints of the toe and the ankle joint. Prerequisite: Admission to AOM

OM9316 Advanced Five Element**2 credits**

This course is a sequel to Five Element for students who wish to learn more practical clinical applications of the integrated Five Element acupuncture theory originating from a TCM foundation. Topics covered include: energetic blocks to treatment, use of command points, spirit of the points, pulse diagnosis, and refinement of diagnosis by color, sound, odor and emotion. Prerequisites: OM5805, OM9306

OM9317 Thai Massage 1	1 credit
This course covers the theories and techniques of Thai massage. Classes focus on introducing the first 5 of the 10 Thai massage meridians and massage techniques and procedures on the feet, legs, neck and back. Prerequisites: BC3113 or BC3134 or BC5124	
OM9318 Thai Massage 2	1 credit
This course covers the theories and techniques of Thai massage. Classes focus on introducing the last 5 of the 10 Thai massage meridians and massage techniques and procedures used on the face, abdomen, arms and fingers. Prerequisites: BC3134 or BC3113 or BC5124	
Tui Na 2-5	
Tui Na is a therapeutic form of massage based on the principles of Chinese Medicine. The focused nature of Tui Na in terms of precise manual technique and focus on specific problem resolution make it an excellent clinical therapy. The Tui Na series provides students an opportunity to work on specific hand/finger techniques that make this massage form remarkably effective.	
OM9322 Tui Na 2	1 credit
See description above. The Tui Na techniques covered in this course include: shaking, squeezing, striking, regulating, bending, splashing, scratching, sweeping, locking, swinging, gathering, separating and rotating techniques. Prerequisite: OM4315	
OM9323 Tui Na 3	1 credit
See description preceding OM9322. The Tui Na techniques covered in this course include trembling, pinching, clenching, flicking, pressing, tapping, dry-clean hair movement, brushing, plucking, stepping and stretching techniques. Prerequisite: OM4315	
OM9324 Tui Na 4	1 credit
See description preceding OM9322. There are many advanced Tui Na techniques that can enhance resolution of pain. This course gives students an opportunity to apply previously learned advanced Tui Na techniques with a variety of common clinical conditions including headache, TMJ, upper extremities, carpal tunnel syndrome, wrist pain, injury of lower extremities including the gastrocnemius muscle, ankle sprains and traumatic synovitis. Prerequisite: OM4315	
OM9325 Tui Na 5	1 credit
See description preceding OM9322. There are many advanced Tui Na techniques that can enhance resolution of pain. This course gives students an opportunity to apply previously learned advanced Tui Na techniques with a variety of common clinical conditions including pain in the scapula, mid and low-back areas, prolapsed disc conditions, injury to the superior cluneal nerve and trauma with the piriform muscle. External herbal applications also covered. Prerequisite: OM4315	
OM9330 TCM Nutrition Lab 1	2 credits
This nutrition/cooking lab focuses on the application of Chinese herbs in Chinese cooking. Students shop for the menu of the day and learn how to choose good quality ingredients. The course covers the use of food and herbs in TCM as they relate to various diseases. One kind of soup and several dishes are made for lunch each session. Prerequisite: None	
OM9400 Tai Chi 2	1 credit
This course offers further explorations with different styles and varieties of tai chi to further enhance health and well being (tai chi advanced). Prerequisite: OM5442 or permission of dean	
OM9402 Qi Gong 2	1 credit
The manipulation of one's energetic core is further explored and expanded as a valuable tool to use with patients in the health care setting. Prerequisite: OM4406 or permission of dean	
OM9403 Tai Chi Sword	1 credit
This form, known as "Swimming Dragon," utilizes the classic weapon style from the Yang family tai chi chuan to stimulate the Yin energy. Course includes history of the form and yin/yang foundation theory and presents the difference between the weapon form and the bare hand form. Students learn the 37 classical movements. Prerequisite: OM4118 or OM5120 or permission of the dean	
OM9404 Tai Chi Saber	1 credit
This form, known as "Jumping Tiger," utilizes the classic weapon style from the Yang family tai chi chuan to stimulate the Yang energy. Course includes history of the form and yin/yang foundation theory and presents the difference between the weapon form and the bare hand form. Students learn the 13 classical movements. Prerequisite: OM4118 or OM5120 or permission of the dean	
OM9420 Specialized Approaches in Acupuncture Therapy: Acupuncture Detox Training	2 credits
This course provides an overview of the field of chemical dependency treatment and the role of acupuncture and includes an overview of the biochemistry of chemical dependency, outpatient treatment strategies for safely detoxifying and aftercare. This course is the didactic portion of a larger certification program offered by the National Acupuncture Detoxification Association (NADA). Upon completion of this course and an outside clinical rotation, students are eligible to work as acupuncturists in chemical dependency treatment facilities upon graduation/licensure. Prerequisite: OM5805 or permission of dean	

Clinical Internship 1-4 Elective

Students may take Clinical Internship shifts as elective credit by permission of the dean.

OM9801 Clinical Internship 1 (fall)**2 credits**

See description above. Prerequisite: Permission of dean

OM9802 Clinical Internship 2 (winter)**2 credits**

See description preceding OM9801. Prerequisite: Permission of dean

OM9803 Clinical Internship 3 (spring)**2 credits**

See description preceding OM9801. Prerequisite: Permission of dean

OM9804 Clinical Internship 4 (summer)**2 credits**

See description preceding OM9801. Prerequisite: Permission of dean

OM9820 Advanced Intern Shift**2 credits**

This clinic shift provides entering DAOM students an opportunity to refresh their general clinical skills under the supervision and evaluation of AOM senior clinical faculty. Students are required to demonstrate the competencies of a final term master's student. Failure to demonstrate a grade of Achieved Competency in this shift may require a repeat of the shift under the guidelines of a learning contract. Prerequisite: Admission to the DAOM program

Physical Medicine

Dean Neary, ND, Department Chair

Hydrotherapy/Physiotherapy Lecture and Lab

This two (2) course sequence begins with a lecture class and is followed by a skills lab, which prepares students for hydrotherapy/physiotherapy therapeutics in the clinic. Topics covered in the class include the principles of nature cure and hydrotherapy, as well as specific techniques such as constitutional hydrotherapy. The physiotherapy portion covers the physiotherapy devices used in practice, such as ultrasound, diathermy, electrical stimulation, ultraviolet and infrared, and low-level laser therapy (LLL).

PM5301 Hydrotherapy/Physiotherapy Lecture**2 credits**

See description above. Prerequisite: BC5122

PM5305 Hydrotherapy/Physiotherapy Lab**1 credit**

See description preceding PM5301. Prerequisite: PM5301

PM5310 Myofascial Analysis**1.5 credits**

In this class students learn skills they will use through the rest of the physical medicine series at Bastyr University. Students identify and palpate anatomical landmarks, assess the physical structure of a patient's body, and formulate an understanding of the biomechanical basis for movement. Students also learn the basics of myofascial release techniques, Swedish massage, and how to instruct patients to stretch hypertonic muscles. Pre/Corequisite: BC3113 or BC5122

Naturopathic Manipulation 1-4

This four (4) course sequence in naturopathic manipulation emphasizes structure and gait analysis, evaluation of musculoskeletal conditions, differential diagnosis, assessment and treatment. A comprehensive approach to therapeutic protocols utilizing appropriate physical medicine modalities is emphasized.

PM6300 Naturopathic Manipulation 1**2 credits**

See description above. This course includes structural analysis and gait analysis. Students are introduced to various forms of soft tissue manipulation, such as muscle energy, strain/counterstrain, trigger point therapy, and craniosacral manipulation. Prerequisites: BC5124, PM5310

PM7301 Naturopathic Manipulation 2**3 credits**

See description preceding PM6300. Evaluation of soft tissue pathologies, differential diagnoses and rationale for use of soft tissue manipulation are covered. Soft tissue treatment — primarily muscle energy technique — is taught in the context of therapeutic massage, neuromuscular technique and strain/counterstrain. Osseous manipulation is introduced. Prerequisite: PM6300

PM7302 Naturopathic Manipulation 3**3 credits**

See description preceding PM6300. General osseous manipulation in uncomplicated cases is covered. The course focuses primarily on spinal manipulation. Treatment protocols emphasize a well-rounded approach, including the appropriate use of osseous and soft tissue manipulation, physiotherapy and hydrotherapy. Prerequisites: PM7301, PM7305

PM7303 Naturopathic Manipulation 4**3 credits**

See description preceding PM6300. This course covers osseous manipulation in more complicated cases requiring extensive evaluation, including indications for the use of diagnostic testing, such as radiography, CT and MRI. Extremity manipulation is also taught. Prerequisite: PM7302

PM7305 Orthopedics	2 credits
This course reviews the assessment of the musculoskeletal system and diagnosis of orthopedic conditions. Prerequisite: NM6224 Corequisite: PM7301	
PM7341 Sports Medicine/Therapeutic Exercise	2 credits
Diagnosis and treatment of sports injuries likely to be seen by a general practice naturopathic physician are covered. Methods of fitness testing, exercise prescription and the use of exercise as therapy are taught. Prerequisite: PM7301	
Bastyr Center for Natural Health: Physical Medicine Shifts 1-4	
Students are required to take four (4) physical medicine shifts during their clinical training. Each physical medicine shift involves faculty-supervised provision of naturopathic physical medicine. Massage, hydrotherapy, physiotherapy, soft tissue manipulation and naturopathic osseous manipulation therapies are the emphasized clinical skills. Students' competency in assessment skills and the application of physical medicine modalities are assessed through their supervisor evaluations. Additionally, students complete sequential clinical competencies throughout their physical medicine clinical experiences. Prerequisite: Clinic eligibility	
PM7801 Physical Medicine 1 (Patient Care 18)	2 credits
See description above. Prerequisite: See above	
PM7802 Physical Medicine 2 (Patient Care 19)	2 credits
See description preceding PM7801. Prerequisite: PM7801	
PM8801 Physical Medicine 3 (Patient Care 20)	2 credits
See description preceding PM7801. Prerequisite: PM7802	
PM8802 Physical Medicine 4 (Patient Care 21)	2 credits
See description preceding PM7801. Prerequisite: PM8801	
PM9300 Massage Intensive	6 credits
This course is cosponsored with the Bellevue Massage School Center For Healing Arts. Students interested in further information may meet with an advisor evaluator in the registrar's office or with a department program coordinator to discuss the availability of the program and prerequisite requirements. This course cannot be audited.	
PM9301 Traditional Naturopathic Medicine Series: Advanced Constitutional Hydrotherapy 1	2 credits
Advanced clinical application of constitutional hydrotherapy. Topics include clinical pearls, clinical management of the healing reaction (or crisis), use of specific gravity, heart sounds, celiac plexus, adjunctive hydro and physiotherapy techniques and case studies. This course includes laboratory application. This course may be audited. Prerequisites: NM5131, PM5301, PM5305	
PM9307 Abdomen 1 Visceral Manipulation	2 credits
This is a beginning level course, which covers the fundamentals of visceral manipulation as applied to the liver, gall bladder, stomach, duodenum, jejunoleum and the colon. The training is very precise and true to the body of work and research brought forth by both Dr. Barral and Alain Gehin. Prerequisite: Must be registered for at least one clinic shift. This course cannot be audited.	
PM9310 Massage	1.5 credits
The intention of the class is to teach the student how to be comfortable when touching in a therapeutic setting. Through massage techniques, the student is taught how to palpate tissues to discover tissue changes and how to treat those changes. The class focuses on Swedish massage indications, contraindications and techniques, and introduces other soft tissue assessment and treatment techniques. This course cannot be audited. Prerequisite: BC3113 or BC3134 or BC5122	
Craniosacral Therapy 1-2	
These courses are designed as an introduction to the theory and practice of craniosacral therapy. The theory is based on the physiological principle that the flow of fluid within the body is important in health and that structure and function are directly related to one another in health and disease. Methods for evaluation and treatment of the entire body are described, observed and practiced. The student learns a 10-step protocol for therapeutic application. This course cannot be audited.	
PM9311 Craniosacral Therapy 1	3 credits
See description above. This course cannot be audited. Prerequisites: (ND) BC5124 and PM5310; (NTR, ExSc, HS) PM5310 or PM9310 and BC3163; (AOM) BC3136 and PM5310 or PM9310	
PM9315 Craniosacral Therapy 2	3 credits
See description preceding PM9311. This course cannot be audited. Prerequisite: PM9311	

Counseling and Health Psychology

Charles E. Smith, PhD, Department Chair

The prerequisite of “senior standing” means that the student has successfully completed a minimum of 45 credits in the Bastyr health psychology program.

PS3114 Developmental Psychology**4 credits**

This course examines the stages of human psychological development and the corresponding tasks, issues, and challenges inherent in each stage. Additionally, it examines learning styles across the life span and implications for adult learning. Concepts such as modeling, separation anxiety, moral reasoning and gender constancy are considered. The roots and patterns of attachment, early socialization, and sex and gender roles as part of psychosocial and moral development are explored in relation to theorists such as Piaget, Erikson, Bowlby and Kohlberg. Prerequisite: None

PS3123 Health Psychology 1**4 credits**

This course serves as an introduction to the study of undergraduate health psychology at Bastyr University. The course provides students with opportunities to improve the skills needed for a successful experience at Bastyr. These skills include the ability to work cooperatively in small groups, the ability to find and use library resources in psychology and related modalities, the ability to critically read and think about research articles, and the ability to use American psychological writing and reference style. This course also introduces students to the biopsychosocial model of health and illness. Prerequisite: Admission into the Health Psychology major

PS3124 Health Psychology 2**4 credits**

This course continues the examination of the biopsychosocial model of health and illness. The impact of psychosocial variables such as social support and coping are covered and students learn about methods for identifying and changing maladaptive health-related behaviors. The psychological and behavioral components of illnesses such as chronic pain, cancer and heart disease are examined. Prerequisite: PS3123

PS3126 Psychology of Personality**4 credits**

This course offers an understanding and working knowledge of basic theories of personality, including those of Freud, Adler, Jung, Miller, Rogers, Maslow, and Mahler. Assessment tools such as the MBTI, projective techniques such as the TAT, and taxonomies of personality traits are examined. Students also critically explore coping patterns and mental health as a result of personality differences. The concept of self via humanistic psychology and social learning theory are contrasted with a psychodynamic approach to personality. Prerequisite: None

PS3127 Foundations of Counseling for Dietitians**3 credits**

This course highlights how the building of a therapeutic relationship with a client is a basic foundation for the delivery of quality care by a dietitian. Particular strategies and interventions are highlighted that will likely prove beneficial for dietitians and clients establishing good rapport, collaborating for treatment goal setting, and pursuing realistic behavior change. Opportunities for practice with these techniques are provided. Prerequisite: Admission to DPD program or permission of instructor

PS3128 Psychology of Sports and Exercise**2 credits**

This is an introduction to sports and exercise behaviors of both individuals and groups. Topics include cognitive and behavioral strategies, personality profiles, performance enhancement, motivation theory, and exercise initiation, adoption, and maintenance as they apply to various dimensions of physical performance. This course may be taught using an online format. Prerequisite: Introductory psychology course

PS3129 Abnormal Psychology**4 credits**

This course provides an overview and historical background of abnormal behavior, including present day categories of abnormal behavior, symptomology, etiology and treatment. Historical perspectives related to the current conception of psychopathology as disease are the focus of this course. Subcategories of the pathology model are analyzed, as well as modern classification. Prerequisite: None

PS3131 Learning, Cognition and Behavior**4 credits**

This course provides an introduction to historical and contemporary behavioral and cognitive theories and research about how we learn. Topics such as memory, thinking, problem solving, behavior acquisition and extinction, and reinforcement are explored. The course also explores the ways in which information is gathered from the external world, organized and stored in memory. Prerequisite: None

PS3133 Introduction to Statistics**4 credits**

In this course, statistical procedures are examined within the context of behavioral sciences. Statistical concepts such as probability, correlation and regression, analysis of variance, binomial and normal distributions, hypothesis testing and estimation are explored. Nonparametric statistics, application of binomial and normal distribution, chi-square tests and linear regression theory are addressed. Methods by which statistical concepts and formulas can be applied to the research of behavior are discussed. Experience with the statistical package for the social sciences (SPSS) is included. Prerequisite: None

PS3134 Research Methods in Psychology**4 credits**

This course covers the basic scientific methods used in psychological research. Research issues such as formulating hypotheses and operational definitions, validity and reliability are introduced, and descriptive, correlation, experimental and quasi experimental research designs are discussed. Prerequisite: Admission into the Health Psychology major

PS3147 Myth, Ritual and Health**3 credits**

The role of mythology in culture is examined, and the impact of ritual and initiation on health and human development is explored. Indigenous healing practices and modern healing approaches, as well as the role of illness as a transformative process, are examined. Prerequisite: None

PS3149 Spirituality and Health**3 credits**

This course provides an introduction to the spirituality and health series by reviewing theoretical and historical perspectives as well as current thinking on the relationship between psychology, spirituality and health and the forces behind the separation of scientific medicine and spirituality. Students examine concepts such as the place of humans in the natural world and consciousness research and learn to use tools such as meditation that focus on the reintegration of mind, body and spirit to achieve health and wellness. Prerequisite: None

PS3601 Psychology of Nourishment**3 credits**

In this course the student explores the personal and psychological components of nutrition and nourishment including his/her relationship to food and eating, one's own sources of psychological nourishment and the impact of dietary changes on family dynamics. Students study the role of nourishment as it applies to developmental models. This course contrasts psychosocial stages of development with specific diets and food trends. Prerequisite: Introductory psychology course

PS3615 Health and Oriental Medicine**3 credits**

This course explores the practice of Oriental medicine and its relationship to Western psychology. Special attention is given to the influences of qi gong, Taoist and five element tradition. Psychological health is examined from an energetic perspective, congruent with Oriental medicine's philosophy of approaching emotional problems as a result of an imbalance. The five element tradition is explored in the context of maintaining health and wellness and contrasted with traditional Western concepts of balance. Prerequisite: None

PS3901, PS3902, PS3903 Independent Study**variable credit**

Independent study provides the student an opportunity to study an area of interest in psychology not included in the regular curriculum. Both the topic and the resource person must be approved by the psychology department chair. To begin independent study, the student must have completed 45 credits in psychology. Prerequisite: Permission of department chair

PS4101 Social Psychology**4 credits**

Using the perspective of social psychology, this course examines issues such as attitude change, interpersonal attraction and behavior, prejudice, attribution theory, aggression, conformity and inter/intragroup behavior, group process, leadership and social cognition. Prerequisite: None

PS4102 Ethical Issues in Psychology**3 credits**

This course provides an introduction to global ethical philosophies and professional ethics in psychology, including practical application of ethical principles as they relate to contemporary psychological and biomedical issues. Topics such as informed consent, professional boundaries, confidentiality, ethics in research and dual relationships are emphasized. Students learn principles of ethical decision making including autonomy and beneficence. Theoretical concepts are applied to personal, professional and global issues through the use of case studies. Prerequisite: Introductory psychology course

PS4106 Multicultural Psychology**3 credits**

This course explores diversity and similarity among human beings. An emphasis is placed on students' exploring their own backgrounds and biases to become better equipped at understanding and fighting racism, sexism, and other inequities and bigotries. Topics such as treatment of diversity and diversity impact on health are a focus. Students are expected to contribute personal reactions and evidence attempts at personal growth in multicultural understanding. Prerequisite: None

PS4109 Human Sexuality**3 credits**

This course is designed to provide an overview of human sexuality. Students increase their knowledge, comfort, and personal insight in topics like sex research, sexual anatomy, gender roles, sexual orientation, sexually transmitted infections, and sexuality education. This course examines sexuality from personal, historical and cultural perspectives. Prerequisite: None

PS4112 Creating Wellness**3 credits**

This course explores wellness comprehensively, including study of its physical, mental, emotional, behavioral, social and spiritual dimensions. We address the shifting paradigm of medical models from technocratic to biopsychosocial to holistic and look at how this shift is affecting traditional areas of study. The focus of this course is on biological-psychological interactions and the mind-body connection — how we stay healthy, how we become resilient and how we create well-being. The emerging field of positive psychology is also discussed. Prerequisite: None

PS4113 Holistic Interventions in Addictions**2 credits**

This course offers a comprehensive study of approaches to treatment and case management, designed to offer an integrated approach in dealing with individuals who struggle with addictions. Modalities such as acupuncture, use of herbs and complementary and alternative medical practices for treatment of addictions are explored. Prerequisite: Introductory psychology course

PS4117 Experimental Psychology**4 credits**

This class focuses on the fundamentals of experimental design in psychology. Special attention is given to formulating hypotheses and operational definitions, data collection, analyses and interpretation. Students select, define and measure appropriate variables. Topics such as sensory and perceptual processes, attention and reaction time, as well as learning and memory, may be explored in the context of laboratory psychology. Prerequisites: PS3133, PS3134

PS4124 Biological Psychology	5 credits
This course provides a comprehensive introduction to the structure and functions of the human nervous system and investigates the biological basis of the senses, emotion and sleep. Topics such as hunger and thirst, sexual behavior, memory and language may also be explored. Prerequisite: None	
PS4126 Research Proposal	2 credits
In this course students write the proposal for their senior research project. They review background literature, formulate hypotheses and operational definitions, and develop study procedures. Applications for Bastyr Institutional Ethics Review Board approval for empirical studies are also completed. Prerequisite: PS3133, PS3134	
PS4128 Research Project	5 credits
The research project offers students the opportunity to explore a topic within the field of psychology and complete a literature review or empirical study on that topic under the direction of a psychology faculty member. Students present a hypothesis and methodology for testing and carry out a project. This course is equivalent to a senior thesis. Prerequisites: PS3133, PS3134, PS4117, PS4126	
PS4129 Research Presentation	3 credits
The purpose of this course is to provide students with the opportunity to develop and deliver a conference-style presentation on the specific research topic they explored in PS4128. Prerequisite: PS4128	
PS4149 Psychology and World Religions	5 credits
This course examines the central beliefs, traditions and practices of the five major world religions (Christianity, Judaism, Islam, Buddhism, and Hinduism) as well as a variety of additional religions. The personal and cultural roles of religion as they relate to wellness and health care are discussed. Prerequisite: none	
PS4150 Healing: Self, Society and World	3 credits
The final course in the Spirituality and Health series integrates information from the previous four courses and helps students extend their knowledge and skills toward community building, environmental and social change and personal service. Prerequisites: PS3139, PS3147, PS4149	
PS4501 SPSS Lab	.5 credits
The SPSS lab course is designed for those undergraduate psychology students who have already completed an introduction to statistics course but lack training in the use of the statistical package for the social sciences (SPSS). The course introduces students to the fundamentals of creating data sets, labeling and manipulating variables and testing hypotheses using various statistical commands in SPSS. Students gain hands-on experience with using SPSS on PC computers. This course is normally scheduled in the same quarter as Introduction to Statistics. Prerequisite: Introductory statistics course	
PS4610 Special Topics in Health Care	3 credits
Contemporary issues in health care as they relate to psychology are explored in this seminar-style course. Topics such as the environment of the health care industry, complementary medicine, the biopsychosocial model of health care and holistic psychological interventions are examined. Prerequisite: None	
PS4800 Practicum in Psychology	variable credit
This course provides students with the opportunity for practical experience in a variety of community settings related to psychology and health. Practicum sites are arranged by the student and must be approved by the instructor. A maximum of one practicum site experience is allowed per quarter. One credit equals 33 hours of practicum-related work over the course of an academic quarter. Maximum of two credits per quarter. Prerequisite: Satisfactory completion of 30 credits in the BS in psychology program	
PS4901, PS4902, PS4903 Independent Study	variable credit
Independent Study provides the student an opportunity to study an area of interest in health psychology not included in the regular curriculum. (An independent study cannot substitute for or be used to repeat a course offered in the prescribed curriculum.) It is the responsibility of the student to enlist a qualified resource person to guide the independent study. The counseling and health psychology department chair must approve both the topic and the resource person. To begin independent study, the student must have completed 45 credits in residence. Prerequisite: Permission of department chair	
PS5110 Fundamentals of Counseling: Group Dynamics	3 credits
This course introduces students to the basic principles of group psychotherapy and includes both an experiential and didactic component. Theories of group development and research issues are also reviewed. Prerequisite: PS5301 or permission of instructor	
PS5113 Theories of Counseling & Psychotherapy	3 credits
This course covers the major theoretical approaches to counseling and psychotherapy, including psychoanalysis, cognitive-behavioral therapy, client-centered, gestalt and solution-focused. Case studies, role-plays, student-led discussion groups and videos supplement readings and lecture. Prerequisite: PS5301	
PS5115 Fundamentals of Counseling: Systems, Families and Couples	4 credits
This course covers an overview of the development of the field of family therapy and an introduction to the theory and practice of the major "schools." Additional issues to be covered include medical family therapy, critiques of the major models, and culturally sensitive assessment and treatment with diverse families. Case studies, role plays and videos supplement readings and lecture. Prerequisite: Admission to MSN/CHP or permission of instructor	

PS5202 Psychopathology and Biomedical Conditions**3 credits**

This is a course in psychopathology that focuses on refining diagnostic skills and reviewing current empirical and theoretical literature on the biopsychosocial etiology of mental disorders. A special emphasis is placed on co-morbid psychopathologies related to acute and chronic biomedical conditions such as pain syndromes, gastrointestinal disorders, spinal cord injury, cardiovascular disease, cancer, stroke, HIV and AIDS, and Alzheimer's disease. Prerequisite: Admission to graduate studies and concurrent enrollment in PS6315 for MSN/CHP only

PS5205 Patient Communications**3 credits**

This course covers the fundamentals of counseling, including essential counselor characteristics, basic communication and interview skills, the establishment of a therapeutic/wellness alliance, proficiency in stimulating health and nourishment, and suicide assessment and referral. Prerequisite: Intern status or permission of the dean

PS5301 Fundamentals of Counseling: Basic Skills**3 credits**

This course covers the fundamentals of counseling, including essential counselor characteristics, basic communication and interview skills, the establishment of a therapeutic/wellness alliance, proficiency in stimulating health and nourishment, and suicide assessment and referral. The theory and research in common factor models of psychotherapy are emphasized. Prerequisite: Admission to graduate studies

PS5901, PS5902, PS5903 Independent Study**variable credit**

Independent Study provides the student an opportunity to study an area of interest in health psychology not included in the regular curriculum. (An independent study cannot substitute for or be used to repeat a course offered in the prescribed curriculum.) It is the responsibility of the student to enlist a qualified resource person to guide the independent study. The counseling and health psychology department chair must approve both the topic and the resource person. Prerequisite: Permission of department chair

PS6100 Motivational Interviewing**2 credits**

This is an advanced interviewing course designed to help students further develop their therapeutic skills at motivating clients for treatment and increasing treatment compliance. Students practice motivational interviewing in class. Prerequisites: Admission to graduate program or permission of chair

PS6105 Diversity and Multicultural Issues in Health Psychology**3 credits**

This course addresses multicultural issues in the practice of psychology through investigating the fundamental levels of awareness, knowledge and skills necessary to competently serve diverse populations. The multiple dimensions of identity, including race, ethnicity, religion, socioeconomic status, gender, disability and sexual orientation, are explored in the context of development, assessment and interventions. Prerequisite: Admission to graduate studies or permission of instructor

PS6130 Psychological Testing**3 credits**

This course covers general principles of assessment and basic psychometrics and emphasizes basic research and interpretation skills for common personality, behavior and cognitive/intellectual assessments. Prerequisites: PS5202, PS5301, PS6315

PS6207 Counseling for Eating Disorders**2 credits**

This course studies the entire spectrum of disordered eating, including anorexia, bulimia and restricted eating. Course emphasis is on the psychological, social, and behavioral patterns of restrictive eating and the counseling issues, techniques and interventions that interrupt these and lead toward individual and family health and healing. This course includes a counseling lab. Prerequisites: PS5205 (AOM) or PS5210 (NTR) or PS7203 (ND) or PS5113, PS5115, PS5301(MSN/CHP)

PS6303 Sexuality and Sex Therapy**2 credits**

This course examines the role of sexuality in human functioning, contemporary cultural/psychosexual development and its impact on psychological health, sexual dysfunction and treatment, sexual abuse, and sexuality and spirituality. This course is required for midwifery certification. Prerequisite: PS6306 or permission of instructor

Naturopathic Counseling 1-3

Naturopathic Counseling is at the heart of the practice of naturopathic medicine. This three (3) course sequence integrates the principles of naturopathic medicine with counseling skills, holistic counseling interventions, and the practice of general medicine, with attention to body/mind/spirit interactions.

PS6305 Naturopathic Counseling 1**3 credits**

See description above. This course covers introductory counseling skills in light of the principles of naturopathic medicine, including therapeutic counselor qualities; communication and interview skills; the establishment and utilization of the wellness alliance; proficiency in stimulating health and well being; and suicide assessment, treatment and referral. Students create a videotape demonstrating basic counseling skills and principles. (ND only) Prerequisite: PS5103

PS6306 Naturopathic Counseling 2**3 credits**

See description preceding PS6305. Building on Naturopathic Counseling 1, this course offers more specific focus and skill building related to those counseling interventions whose effectiveness is supported empirically. Collaborative treatment planning is also addressed as part of an orientation to the clinical counseling shift. Students conduct ongoing counseling in a lab setting with live role models. See PS7315 for Naturopathic Counseling 3. Prerequisite: PS6305

PS6310 Nutrition and Pharmacology in Mental Health	3 credits
This course is designed to study nutritional and pharmacological imbalances in mental health disorders and the relationship between nutrition, brain biochemistry and mental health. Nutritional and psychotropic interventions and their efficacy for mental health disorders are also examined. Prerequisites: BC5118, BC5132, and PS5202 or permission of instructor	
PS6315 Counseling Adults 1: Assessment and Treatment	3 credits
This course utilizes a biopsychosocial counseling approach for assessment and treatment of adults with mental disorders and chronic illness. Students learn intake interviewing and basic counseling skills within a health psychology foundation, in preparation for their first clinic shift. The course also focuses on principles and processes for health behavior change. Key theoretical approaches and their clinical application are covered. Prerequisite: concurrent enrollment in PS5202 or permission of instructor	
PS6317 Counseling Adults 2: Assessment and Treatment	3 credits
This advanced counseling course utilizes a biopsychosocial counseling and integrative approach for the assessment and treatment of adults with mental disorders and terminal illness. A primary focus is on counseling for grief and loss and includes techniques for assisting such individuals toward greater interpersonal effectiveness with partners, family members, and other significant persons. This course also focuses on integrating various theoretical systems and approaches to counseling with hands-on skill development in advanced counseling techniques. Prerequisite: PS6315	
PS6323 Assessment and Treatment of Children/Adolescents in Health Psychology	3 credits
This is an introductory course on child and adolescents' psychotherapies. It uses an integrated model of child therapy in a family context, which includes psychodynamic, cognitive-behavioral and systems perspectives. This course also explores various therapeutic modalities, using case studies to explore childhood disorders such as ADHD, autism, diabetes, depression and eating disorders. Prerequisite: PS6315 or permission of instructor	
PS6901, PS6902, PS6903 Independent Study	variable credit
Independent study provides the student an opportunity to study an area of interest in health psychology not included in the regular curriculum. (An independent study cannot substitute for or be used to repeat a course offered in the prescribed curriculum.) It is the responsibility of the student to enlist a qualified resource person to guide the independent study. The counseling and health psychology department chair must approve both the topic and the resource person. Prerequisite: Permission of department chair	
PS7101 Professional, Ethical and Legal Issues	3 credits
This course explores the ethical and legal issues relevant to the practice of psychology, including such topics as confidentiality, ethical competence, privilege and multiple relationships. Ethical issues concerning private practice, licensing, certification and forensics are also covered. Principles of ethical decision-making are given specific attention. Prerequisite: Admission to graduate studies	
PS7103 Mind Body Techniques for Stress Reduction	3 credits
This course is designed to explore various techniques, including, but not limited to, progressive muscle relaxation, meditation, mindfulness, imagery, visualization and biofeedback in the process of stress reduction and management. Prerequisite: Admission to MSN/CHP or permission of instructor	
PS7105 Alcohol and Substance Abuse	2 credits
This course explores mental health counseling history, professional standards, ethical issues and legal codes and examines alcohol and substance abuse from a biological, cultural, historical, psychological, social and nutritional perspective. Focus is on counseling, treatment interventions, behavioral management, and community referral resources. Prerequisite: Admission to graduate studies	
PS7110 Advanced Statistics and Computer Lab	3 credits
This course is required for students electing to do a psychology thesis. Students use statistical computer packages for statistical procedures covered in TR5100 and TR5104. As time permits, more advanced statistical procedures such as discriminant and factor analysis are also presented. The lab teaches students how to create data sets, label and manipulate variables and run statistical procedures using various statistical commands. Prerequisites: TR5100, TR5104 or permission of instructor	
PS7115 Developing and Evaluating Counseling Programs	3 credits
This is a capstone clinical class for students where they apply their research knowledge and group counseling skills to develop an eight-week group program for our Bastyr clinic or their community site. The students work in teams to develop the curriculum. Basic tenets of program evaluation are also covered. Prerequisite: Admission to MSN/CHP, PS5110, PS7803, Clinic Shift 3 or permission of instructor	
PS7121 Thesis Advisement 1	2 credits
This course is the first in the sequence of three courses for thesis advisement. Students form a committee and meet with their committee members to plan and implement a research project of sufficient complexity and scope in an appropriate subject area in psychology. Corequisite or prerequisite: PS7110	
PS7122 Thesis Advisement 2	2 credits
Continuation of Psychology Thesis 1. Prerequisite: PS7121	
PS7123 Thesis Advisement 3	2 credits
Continuation of Psychology Thesis 2. Prerequisite: PS7122	

PS7129 Career Counseling	3 credits
This course explores career counseling theories, history and various approaches to career development. It serves to provide an introduction to the field of career counseling through consideration of both traditional and contemporary career development and vocational choice theories and their applications to counseling. Clinical interventions, tests and assessment instruments relevant to this field are explored; cultural issues are given specific attention in this process. Prerequisite: PS7801, PS7811	
PS7200 Psychological Assessment	2 credits
This course trains students to make clinical assessments of psychological disease using the DSM-IV and, accordingly, to make judgments regarding which patients are appropriate for counseling at the University's clinic and within the practice of naturopathy. Referral resources and procedures are discussed. Special emphasis is given to the recognition and impact of mental disorders in primary care. Prerequisite: PS6306 (concurrent with clinic shifts) or permission of instructor	
PS7203 Addictions and Disorders	2 credits
This course examines the nature and treatment of the following addictions and disorders from a physiological, psychological, nutritional and naturopathic perspective: alcoholism, substance abuse, anorexia, bulimia and compulsive eating. Naturopathic scope of practice in the treatment and management of addictions and eating disorders is identified, as well as community referral resources. Prerequisite: PS6306 (concurrent with clinic shifts) or permission of instructor	
PS7315 Naturopathic Counseling 3	2 credits
See description preceding PS6305. The focus of this course is the recognition and consideration of psychological aspects in the practice of general medicine, including empirically proven health psychology strategies and naturopathic medicine therapeutics (i.e., nutrition, botanicals) for treating mental and emotional conditions. Topics include but are not limited to the following: assessing and promoting patient motivation and readiness, naturopathic diagnosis and treatment of psychological conditions secondary to medical problems, and family dynamics in general medical presentations. Prerequisite: PS6306 (concurrent with clinic shifts)	
PS7801 Clinic Shift 1: Nutrition/Clinical Health Psychology	2 credits
This directly supervised clinical experience occurs at Bastyr Center for Natural Health and emphasizes exposure to psychotherapy, diagnostic interviewing and diagnostic formulation for adults. Prerequisites: PS5110, PS5301	
PS7802 Clinic Shift 2: Nutrition/Clinical Health Psychology	2 credits
This shift is a supervised nutrition practicum, emphasizing nutritional assessment, nutritional counseling, interviewing and chart documentation. Prerequisites: PS5301, PS5110, PS7801	
PS7803 Clinic Shift 3: Nutrition/Clinical Health Psychology	2 credits
This directly supervised experience is the integrated counseling and nutrition shift at Bastyr Center for Natural Health. Students hone group and individual counseling skills and nutritional counseling skills by providing nutritional and health behavior change counseling and group co-facilitation for an eight-week weight and lifestyle management psychoeducational group, called Weigh to Go. This experience is supervised by a psychologist and nutritionist. Prerequisites: PS5110, PS5301, PS7802	
PS7805 MSN/CHP Practicum 1	2 credits
Students in the MSN/CHP program receive supervised experience in a clinical setting where both nutrition and mental health counseling skills can be practiced and honed with licensed professionals from each specialty. Practicum experiences are arranged at community locations to provide students with varied opportunities and a diverse client population. As students progress from MSN/CHP Practicum 1 to 3, the level of responsibility and independence increases and different skills with a variety of clients are learned. Prerequisite: Admission to MSN/CHP program, PS7801, PS7802, PS7803	
PS7806 MSN/CHP Practicum 2	2 credits
A continuation of MSN/CHP Practicum 1. Prerequisite: PS7801, PS7802, PS7803 and PS7805	
PS7807 MSN/CHP Practicum 3	2 credits
A continuation of MSN/CHP Practicum 2. Prerequisite: PS7801, PS7802, PS7803 and PS7806	
PS7811 Practicum Seminar 1: Nutrition/Clinical Health Psychology	1 credit
In this seminar, students present cases for which they have already received supervision at external practicum sites and discuss issues related to professional development. Field placement at those sites emphasizes exposure to psychotherapy, especially health psychology, diagnostic interviewing and diagnostic formulation. Prerequisite: concurrent enrollment in PS7805	
PS7812 Practicum Seminar 2: Nutrition/Clinical Health Psychology	1 credit
A continuation of Practicum Seminar 1. Prerequisite: PS7811, concurrent enrollment in PS7806	
PS7813 Practicum Seminar 3: Nutrition/Clinical Health Psychology	1 credit
A continuation of Practicum Seminar 2. Prerequisite: PS7812, concurrent enrollment in PS7807	

PS7901, PS7902, PS7903 Independent Study**variable credit**

Independent Study provides the student an opportunity to study an area of interest in counseling psychology not included in the regular curriculum. (An independent study cannot substitute for or be used to repeat a course offered in the prescribed curriculum.) It is the responsibility of the student to enlist a qualified resource person to guide the independent study. The counseling and health psychology department chair must approve both the topic and the resource person. Prerequisite: Permission of department chair

Bastyr Center for Natural Health - Counseling Specialty Shift**2 credits**

This required counseling shift in Bastyr Center for Natural Health provides an opportunity for naturopathic medicine students to counsel patients and receive individual supervision from the clinic counseling supervisor. The shift is limited to six students each quarter and affords ample attention to the development of each clinician's counseling skills. All naturopathic medicine students are required to take one counseling specialty shift. Students register for a Patient Care Shift through the ND program. See course listings for NM7820-NM7829 and NM8830-NM8836. Additional counseling shifts are available as electives, on a space available basis. See PS9801-PS9804. Prerequisites: PS6305, PS6306, PS7200

PS8110 Counseling in Chronic Pain and Chronic/ Terminal Illness**3 credits**

AOM doctoral level, first year. This course covers the assessment and intervention skills found to be effective in counseling those with chronic pain, a chronic illness or a terminal prognosis. Specific focus is on how to offer assistance for the emotional, social, behavioral, and cognitive aspects of an ongoing pain problem or a chronic/terminal illness. Consideration is given to the role of counseling in the overall management of a patient by a collaborative interdisciplinary care team. Prerequisite: Admission to DAOM program or permission of dean

PS9103 Ecopsychology**2 credits**

This course introduces the student to the basic principles of the developing field of ecopsychology. This class explores evolutionary perspectives on, as well as social implications for, the merger of ecology and psychology. In addition, applications of ecopsychology within a variety of health and healing settings are examined, and an overview of the science of systems theory is intended to provide a perspective on how science has informed the study of ecopsychology. Prerequisite: None

PS9105 Psychoneuroimmunology**2 credits**

This course deals with the dynamic interplay between consciousness and the immune, nervous, and endocrine systems. The potential of the mind to enhance or suppress hormonal and immune function are examined. Newly evolving research on the efficacy of PNI are reviewed in relation to the progression and treatment of cancer, heart disease, AIDS, autoimmune disease and psychological disorders. Students develop skills utilizing mind-body interventions. Prerequisite: BC4114 or BC5132 or BC6204 or permission of instructor

PS9106 Psychology of Dreams**2 credits**

This class explores how waking and dreaming realities interrelate with each other and what is to be gained by exploring this interrelationship. Augmenting the theories of Western psychology with historical and cross-cultural perspectives, dreams are investigated in a setting that integrates academic understanding with direct experience. This includes discussion on how to better remember dreams, how to work with one's own dreams and how to bridge dreams with waking life in an engaged manner. Prerequisite: None

PS9107 Introduction to Visualization and Imagery**2 credits**

The development of imagery and visualization practices can enrich and empower our lives. This course explores the images and symbols inherent within us and ways to use these images for self-exploration. Students learn ways to use visualization and imagery for spiritual growth and awareness. Prerequisite: None

PS9112 Aromatherapy and the Psyche**2 credits**

This elective explores the relationship between aromas and the psyche from a clinical perspective. As well as exploring their own reaction to aromas through experiential work, students learn about the impact specific aromas have on depression, autism, Alzheimer's disease and bereavement, and learn how to use clinical aromatherapy as a tool in clinical practice. Prerequisite: None

PS9120 Counseling, Intuition and Spirituality**2 credits**

This elective course examines spiritual practices that can be incorporated into counseling sessions and introduces the student to forms of spiritual healing congruent with naturopathic principles. Special focus on integrating spirituality and care of the soul as a principle of wellness and well-being. Prerequisite: PS5205 or PS6306

PS9301 Clinical Biofeedback**2 credits**

This course reviews the clinical application of biofeedback techniques, emphasizing multimodality assessment and integration with counseling and holistic health care. Modalities/instrumentation discussed and demonstrated include electromyograph (EMG), electrodermograph (EDG), thermal biofeedback, heart and breathing rate feedback, and neurofeedback with EEG monitoring. Research findings for biofeedback treatment of various conditions are discussed. Students may take advantage of in-class experience with biofeedback monitoring as well as supervised practice in attaching sensors and operating equipment. Prerequisite: Admission to Bastyr degree program

PS9401 Advanced Counseling**3 credits**

This course is designed to strengthen previous training in counseling, specifically, in the etiology of presenting problems, the use of diagnostic decision trees, and the application of treatment approaches in a clinical environment. The course facilitates experiential learning by focusing on case studies and role plays. Prerequisite: Permission of department chair

PS9405 Medical Hypnotherapy**2 credits**

This weekend intensive course includes an introduction to hypnosis, its history, and the specific vocabulary of the field, as well as an introduction to some basic techniques, in-class practice sessions with those techniques, and in-class group discussions to devise possible hypno-therapeutic strategies for various clinical applications. Prerequisite: ND students or permission of instructor

Counseling Elective Shifts 1-4 - Clinic

Students have the opportunity to take counseling shifts as elective credit once the required counseling shift is satisfactorily completed.

PS9801 Patient Care Elective (fall)**2 credits**

See description above. Prerequisite: Permission of department chair and clinic counseling supervisor

PS9802 Patient Care Elective (winter)**2 credits**

See description preceding PS9801. Prerequisite: Permission of department chair and clinic counseling supervisor

PS9803 Patient Care Elective (spring)**2 credits**

See description preceding PS9801. Prerequisite: Permission of department chair and clinic counseling supervisor

PS9804 Patient Care Elective (summer)**2 credits**

See description preceding PS9801. Prerequisite: Permission of department chair and clinic counseling supervisor

Didactic Program in Dietetics

Doris Piccinin, MS, RD, CDE, MSN/DPD Director

Elizabeth Kirk, PhD, RD, BSN/DPD Director

RD4105 Introduction to Dietetics**1 credit**

This course builds upon written and oral communication skills to prepare senior dietetic students for success in obtaining a dietetic internship. Topics covered include resume and cover letter writing skills in preparation for the internship and careers. Students utilize a variety of media to build upon interviewing skills and portfolio presentation. The code of ethics for dietitians and emotional intelligence are highlighted to help students succeed in their internships and careers. Methods for dietetic registration and continuing education are also discussed. Prerequisite: Admission to the BSN/DPD program

RD4120 Perspectives in Leadership and Management**3 credits**

Skills and roles of a “manager” versus a “leader” are delineated. Theories of management are reviewed, and the functions, skills and tools of management are explored. Human resource management techniques are introduced, as well as labor relations, law and financial management. Students study program planning, assessment, and quality improvement and are introduced to health care systems. The impact of effective leadership on the dietetics profession is discussed, and students assess leadership abilities. Prerequisite: Admission to BSN/DPD program

RD4130 Quantity Food Production**3 credits**

Cross listed as TR4132. This course introduces the food service industry and quantity food production. Major types of food service operations are identified, and trends which impact food service systems are explored. Students are introduced to the steps of quantity food production: procurement, receiving, storage, preparation, distribution and service. Potential hazards and related safe food-handling practices are identified. Development of standardized recipes and institutional menus are practiced, with marketing theory and techniques introduced. Students are introduced to standard food service equipment, kitchen sanitation and safety. Prerequisite: Admission to BSN/DPD program

Medical Nutrition Therapy 1-3

In this three-course sequence, students learn the principles of the nutrition care process, nutrition assessment, including anthropometric measurements, nutrient-specific laboratory data, drug-nutrient-herb interactions, direct clinical observations, guidelines for both prevention and therapeutic dietary planning, nutrient intake analyses and evaluation, and complementary nutritional therapies. Interpreting medical terminology and implementing the nutrition care process, including documentation in the medical records, are included.

RD4301 Medical Nutrition Therapy 1: Assessment and Diagnosis**5 credits**

This course introduces nutrition assessment and diagnosis terminology utilizing the Nutrition Care Process. Medical terminology, abbreviations and standardized language for the Nutrition Care Process are practiced. Both allopathic and natural medicine perspectives are offered, including food-as-medicine, whole-foods menu writing and disease prevention strategies. Anthropometric, biochemical, clinical observation and client history, and dietary history and assessment measures are included. Students begin medical documentation practice using out-patient based case studies. Prerequisite: Admission to BSN/DPD program. Corequisites: BC4114, TR4107

RD4302 Medical Nutrition Therapy 2: Chronic Disease Management**5 credits**

See description preceding RD4301. This course is a continuation of MNT I. Students continue to practice nutrition assessment and diagnosis terminology to manage a variety of chronic health conditions, including cancer, kidney disease, liver disease and others. Nutrition intervention strategies utilize both allopathic and natural medicine perspectives. Students further develop their assessment and documentation skills from MNT I to a level adequate for entry into their Clinical Practicum. Prerequisites: RD4301 and admission to BSN/DPD. Corequisite: TR4108

RD4303 Medical Nutrition Therapy 3: Critical Care**3 credits**

This course prepares dietetic students for the clinical rotation of an internship. Course content emphasizes acute and critical care disorders, and enteral and parenteral nutrition using case studies. Students must be enrolled in this course in order to sit for the DPD exit exam. Prerequisite/corequisite: RD4302 and admission to BSN/DPD program

RD4802 Clinical Dietetic Practicum**2 credits**

This course is designed to prepare students in the BSN/DPD program for dietetic internship. Clinical dietetic practicum provides the student with direct patient contact, requiring the student to manage consultations and assume primary responsibility for nutritional interventions. Activities may include group teaching, experience with “standardized” patients and one-to-one nutrition counseling sessions. Students enrolled in this practicum are referred to as clinic “secondaries” where each student works in a team with other students (under faculty supervision) for consultation management and nutritional interventions. Prerequisites: RD4302, TR4207 and admission to BSN/DPD program. Corequisite: RD4303

RD6105 Introduction to Dietetics**1 credit**

This course builds upon written and oral communication skills to prepare senior dietetic students for success in obtaining a dietetic internship. Topics covered include resume and cover letter writing skills in preparation for the internship and careers. Students utilize a variety of media to build upon interviewing skills and portfolio presentation. The code of ethics for dietitians and emotional intelligence are highlighted to help students succeed in their internships and careers. Methods for dietetic registration and continuing education are also discussed. Prerequisite: Admission to the MSN/DPD program

Food Service Management 1-3

In this three (3) course sequence taught at the graduate level, students learn about the food service industry, basic budgeting and accounting principles, quantity food production, marketing, quality improvement, safety and sanitation, regulations, and staffing. Using a managerial and systems approach to food service organizations, students combine theory and practice, develop business and marketing plans, and explore techniques of effective leadership and communication essential to becoming an effective manager.

RD6131 Food Service Management 1**2 credits**

See description above. This course, the first of a three-part series, introduces the student to the food service industry. Students develop a business plan in which they create the concept, organizational structure, initial operational budget, menu and marketing plan of a specific food service operation. Students gain knowledge in quantity food production principles, including procurement, production, distribution, service, sanitation and safety. Students learn HACCP standards of quality in food service production facilities. Emphasis is placed on quality control and business management. Prerequisite: Admission to MSN/DPD program

RD6135 Food Service Management 2**2 credits**

See description preceding RD6131. This course is a continuation of Food Service Management 1. Students continue to learn the principles of quantity food production. Using the initial business plan concept, students develop models for ordering, receiving, inventory, staffing, orientation, training and labor schedules. Human resource management, facilities management, leadership and effective communication continue to be highlighted. Prerequisite: RD6131 and admission to MSN/DPD

RD6140 Food Service Management 3**2 credits**

See description preceding RD6131. This course, the third of a three-part series, continues to focus on the management of food service systems, including personnel and financial resources. Working with diverse populations, labor unions and managing within legal regulations are emphasized. Students gain hands-on experience in a capstone project through the planning and implementation of an on-campus catering event. Prerequisite: RD6135 and admission to MSN/DPD

RD6403 Medical Nutrition Therapy**3 credits**

This course prepares dietetic students for the clinical rotation of an internship. Course content emphasizes acute and critical care disorders and enteral and parenteral nutrition using case studies. Students must be enrolled in this course in order to sit for the DPD exit exam. Prerequisites: TR5321 and admission to MSN/DPD program

Nutrition

Debra Boutin, MS, RD, Department Chair

BS in Nutrition major (TR) courses and MS Nutrition (TR) courses below. For course numbers and descriptions for the Dietetic Internship (DI), Didactic Program in Dietetics (RD), and Exercise Science and Wellness (EX), see alphabetical listings.

TR2101 Introduction to Human Nutrition	3 credits
This course introduces a basic understanding of the fundamentals of human nutrition with a whole foods perspective. Topics include the functions and food sources of carbohydrates, lipids, protein, water, vitamins and minerals. Dietary reference intakes (DRI), the food guide pyramid and other standard nutrition guidelines (both national and international) are reviewed. Food labels, nutrient intake analyses and basic nutrition assessment methods are presented and practiced. Energy balance and weight management issues are reviewed. This may be offered as an online course. Prerequisite: None	
TR3111 Nutrition Throughout Life	3 credits
This course introduces the essentials of normal human nutrition throughout the life span: pregnancy, infancy, childhood, adolescence, mature adulthood and older adulthood. A hybrid model of instruction is introduced, using classroom and online delivery of course content. Prerequisite: TR2101 or equivalent	
TR3115 Introduction to Food Science	2 credits
This course is an introduction to areas of food science and includes a discussion of the laws relating to food, including labeling laws and the role of regulatory agencies. The course also includes an overview of food additives and food processing. Prerequisite: BC3124 Corequisite: BC4117 or permission of instructor	
TR3117 Experimental Foods Lecture	4 credits
The course introduces students to the composition and the chemical and physical properties of foods; it includes a discussion of the interaction, reaction and evaluation of foods due to formulation, processing and preparation. Topics include water, carbohydrates, fruits and vegetables, fats and oils, animal foods and, in addition, relevant pigments, emulsifiers, and sweeteners are discussed. Prerequisites: BC4117, TR3115 Corequisite: BC4118	
TR3118 Experimental Foods Lab	1 credit
In this laboratory class, students utilizes chemical, physical and sensory techniques to identify and characterize major and minor components in food systems. Topics parallel those discussed in the lecture with an applied focus. A whole foods perspective is incorporated into these laboratory exercises. Prerequisites: BC4117, TR3115 Corequisite: BC4118	
TR3131 Culinary Skills 1: Basics	2 credits
Students develop knife skills and are introduced to the basics of creating stocks, sauces, soups and stews. Vegetable cookery is practiced, as well as the fundamentals of working with animal proteins, including eggs, meat, fish and fowl. Bean and grain cookery are reviewed. Flatbread and quick bread methods are introduced. Students begin developing original recipes. Prerequisites: TR4103/5101, current Food Handler's Permit	
TR3132 Culinary Skills 2: Applications	2 credits
Students practice baking skills including yeasted breads, pies, cakes and cookies. Students practice preparation of larger cuts of meat, marinades and vegetarian proteins. Creating a portfolio of original recipes continues. Class culminates in presentation of an original main entrée, side dishes and dessert. Prerequisites: TR3131, current Food Handler's Permit	
TR3141 Therapeutic Cooking 1: Maintaining Health	2 credits
The focus of this course is on food and diet in promoting health. Students learn how to design, adapt and prepare dishes, meals and remedies that are health-supportive for individuals or groups with acute illnesses, elevated needs and lifestyle challenges. Prerequisite: TR4103/5101	
TR3142 Therapeutic Cooking 2: Illness and Recovery	2 credits
The focus of this course is on food and diet as medicine for illness and recovery. Students learn how to design, adapt and prepare dishes, meals and remedies that are health-supportive for individuals or groups with specific chronic medical conditions, elevated needs and lifestyle challenges. Prerequisite: TR3141	
TR3152 Cooking Demonstration	2 credits
This course is designed to give students the skills and practice they need to be able to do cooking demonstrations or teach classes for the public. During the course each student designs a cooking class that emphasizes whole foods. Students practice-teach parts of their class, learn how to assist other teachers and evaluate their peers. Proposal writing and marketing are discussed. Final student demonstrations are presented for an invited audience. Prerequisite: TR4103/5101	
TR3153 Writing About Food and Health	2 credits
This course prepares students for a full-time, part-time or freelance career in food writing. Students learn how to differentiate the basic structures and style for writing books, magazine/newspaper articles, academic journals, websites (such as zines), and blogs, compose a proposal suitable for editors and publishers, and practice writing for specific audiences. Researching timely topics and creating fresh perspectives are encouraged. This course cannot be audited. Prerequisite: Admission into the BSN culinary arts program or permission of program director	
TR3163 The Business of Cooking	3 credits
Personal chefing, private chefing, catering and food delivery services are in demand. This course helps students devise a business plan to pursue one of these occupations. Marketing, licensing and accounting are covered. Students also learn about interviewing and intake skills as well as how to purchase, store and deliver food. Prerequisite: admission into the BSN culinary arts program or permission of program director	

TR4100 Intro to Research Methods	3 credits
This course, designed for students in nutrition and exercise science, is an introduction to research methods. Included are the basic concepts of scientific method, statistics, epidemiology and research methodology. Students also practice applied research skills such as use of the library and Internet, evaluation of research literature and scientific writing, and design and conduct their own research projects. Critical thinking case studies are discussed in class and used in take-home exercises. A portion of this course may be taught online. Prerequisite: Intermediate algebra, TR2101 or equivalent	
TR4103 Whole Foods Production	3 credits
Cross listed as TR5101. This course covers the identification, labeling and selection of foods from nature to point of purchase. The lab portion of class completes the cycle from store to table with a weekly cooking practicum. Students develop familiarity with minimally processed foods and use these foods to build culinary skills. Fundamental cooking techniques, recipe writing and menu planning are stressed. Prerequisite: None	
TR4107 Advanced Nutrition Principles 1	4 credits
This course is the first of a two-course series. Biochemical and physiological principles related to macro- and micronutrients and vitamins are the focus of this class. Structure, function, digestion, absorption, food sources, requirements, nutrient interactions, deficiencies and toxicity of selected macro- and micronutrients are discussed. General principles are stressed. Prerequisites: BC3163, BC4118, and introductory nutrition course	
TR4108 Advanced Nutrition Principles 2	2 credits
This is a continuation of Advanced Nutrition Principles 1. Biochemical and physiological principles related to elements (minerals) are the focus of this class. Digestion, absorption, food sources, requirements, function, nutrient interactions, deficiencies and toxicity of selected micronutrients are discussed. General principles are stressed. Prerequisites: TR4107	
TR4113 Nutritional Supplements and Herbs	3 credits
This course explores the natural products industry including the history, regulation and labeling laws of the industry in the U.S. Safety, manufacturing, and formulation techniques, delivery form, general applications of nutritional supplements, functional foods and herbs are presented. Prerequisites: TR3111 or equivalent, TR4107. Corequisite: TR4108	
TR4117 Nutrition, Physical Activity and Disease	5 credits
This course offers a systems approach to nutrition and physical activity-related disease, especially chronic disease. General pathophysiology of each condition is introduced, and the role of nutrition and physical activity is discussed, with emphasis on prevention and maintaining wellness. Prerequisites: BC3163, TR3111, TR4108, TR4205	
TR4118 Cultural Perspectives on Foods	2 credits
This course is a survey of present and past food practices around the globe, with emphasis on diverse cultural groups in the U.S. The socioeconomic and political factors in food selection are examined. Multicultural and interdisciplinary perspectives are used to broaden the understanding of basic nutrition. Extensive use is made of audiovisual materials. Prerequisite: TR2101 or equivalent	
TR4126 Community Nutrition/Nutrition Education	5 credits
This course examines the principles of public health, community nutrition, epidemiology, health care systems, legislation and nutrition policy. Additionally, this course reviews effective oral and written communication skills, covering principles of nutrition education including teaching/learning methods for target audiences, writing instructional goals and objectives, preparing appropriate nutrition education materials and evaluating nutrition education programs. Prerequisite: TR4108, TR4118	
TR4132 Quantity Food Production	3 credits
Cross listed as RD4130. This course introduces the food service industry and quantity food production. Major types of food service operations are identified, and trends that impact food service systems are explored. Students are introduced to the steps of quantity food production: procurement, receiving, storage, preparation, distribution and service. Potential hazards and related safe food-handling practices are identified. Development of standardized recipes and institutional menus are practiced, with marketing theory and techniques introduced. Students are introduced to standard food service equipment, kitchen sanitation and safety. Prerequisite: Admission into the BSN culinary arts program	
TR4133 Culinary Skills 3: Creations	2 credits
Creative cuisine is emphasized, with the course culminating in a presentation dinner prepared and served by the students. A variety of appetizers and hors d'oeuvres, advanced entrée preparation, and dessert forms are covered. Students practice garnishing, presentation and plating of food. Ethnic and regional cuisines are introduced, as well as methods for preserving foods. Prerequisites: TR3132, current Food Handler's Permit	
TR4140 Ecological Aspects of Nutrition	2 credits
This course is an introduction to ecological issues in nutrition. Students gain an understanding of environmental issues related to food technology, water use and food production systems, including organic and sustainable agriculture. The regulation of these areas is also discussed. Prerequisite: None	
TR4205 Nutritional Analysis and Assessment	3 credits
This course presents different methods used for assessment and screening of nutritional status for the purpose of promoting health. The use of anthropometric, dietary, clinical and biochemical measures are emphasized. Alternative methods of nutritional assessment are introduced. Prerequisites: TR3111 or equivalent, TR4107. Corequisite: TR4108	

TR4207 Nutritional Counseling	2 credits
This course introduces advanced interviewing techniques used in nutritional counseling. Students explore their personal nutritional counseling style through role play, visualization and other counseling techniques. Students build an understanding of the complexities of diet and compliance issues. Prerequisites: Admission to DPD, introductory psychology course, PS3127	
TR4805 Nutrition Education Practicum	2 credits
This course provides the opportunity for students to develop practical experience in nutrition education through presentations and preceptorships. This course may be taken in any quarter, except summer, during year 2. Prerequisite: Completion of junior year, permission of instructor	
TR4820 Culinary Practicum	4 credits
This course enables students to obtain practical experience in one or more of the student's area of interest related to whole foods. Students work under the supervision of an approved preceptor to further their skills and experience. Prerequisites: completion of TR3132 and TR3142, current Food Handler's Permit	
TR4901, TR4902, TR4903 Independent Study	variable credit
Credits may be applied to the nutrition elective requirement. Students focus on areas of interest not covered in the regular curriculum. Competencies and learning objectives are developed with a faculty sponsor or approved preceptor. Independent Study cannot substitute for core courses offered on campus. Students must be in good academic standing and may take a maximum of four (4) credits. Prerequisite: Permission of program chair	
TR5100 Biostatistics	4 credits
This is an introductory course in biostatistics with an emphasis on understanding and interpreting the common statistical methods used in health sciences research. Topics discussed include presentation and summarization of data, probability, inferential statistics, methods for comparisons of means and proportions, methods for measurement of association, prediction and multivariate statistical methods. Prerequisite: One course in intermediate algebra. MSA and MSAOM students are only eligible with permission of chair.	
TR5101 Whole Foods Production	3 credits
Cross listed as TR4103. This course covers the identification, labeling and selection of foods from nature to point of purchase. The lab portion of class completes the cycle from store to table with a weekly cooking practicum. Students develop familiarity with minimally processed foods and use these foods to build culinary skills. Fundamental cooking techniques, recipe writing and menu planning are stressed. Prerequisite: None	
TR5104 Research Methods in Health Sciences	3 credits
This course covers the major research methodologies used in health sciences research. Building on the information in TR5100, this course covers the major epidemiologic and experimental methods used in health sciences. Qualitative and quantitative methods are discussed. The emphasis is on the design and interpretation of research studies. Prerequisites: TR5100, admission to MS nutrition or DAOM program or permission of chair	
TR5115 Food Science	5 credits
This course is an overview of food science for nutritionists. The composition and the chemical and physical properties of the major food groups are the focus. Food formulation, processing and preparation are emphasized. The technological, safety and regulatory aspects of food and food additives are also discussed. Prerequisite: Admission to MS nutrition, TR5140	
TR5120 Advanced Nutrition: Macronutrients	5 credits
Nutritional biochemistry of the macronutrients, including integrated metabolism, is discussed. Macronutrient digestion, biological requirements, absorption and metabolism are emphasized. Students apply these principles to various dietary and metabolic states. Prerequisites: Five quarter credits of nutrition, one 300 or 400 level biochemistry course or equivalent, admission to MS nutrition	
TR5124 Advanced Nutrition: Micronutrients	5 credits
Nutritional biochemistry of the micronutrients (vitamins and minerals) is discussed, including chemical structures, nomenclature, dietary sources, functions, bioavailability, metabolism, evidence for requirements, potential deficiency and toxicity, interaction with other nutrients and assessment of nutritional status. Prerequisites: TR5120, admission to MS nutrition	
TR5128 Applied Research Skills	3 credits
This course emphasizes gaining skills required to plan and execute research studies in health sciences. Topics covered include scientific writing, literature review skills, developing hypotheses, human ethics in research and scientific presentation skills. A research proposal is developed as part of this class. Prerequisites: TR5100, TR5104, admission to the MSN or DAOM program	
TR5132 Applied Statistical Analysis	2 credits
This course emphasizes practical skills: data management, data analysis, SPSS and/or other statistical programming. More advanced statistical procedures such as multivariate and factor analysis are also presented. Students learn how to create data sets, label and manipulate variables, and run statistical procedures using various statistical commands in lab. Prerequisite: TR5128 or permission of instructor	

TR5136 Nutrition in the Life Cycle	3 credits
Physiological, metabolic, interpersonal and developmental relationships to nutrition are explored through the various stages in the life cycle, including infancy, childhood, young adulthood, pregnancy, mature adulthood and older adulthood. Prerequisite: Admission to MS nutrition program and introductory nutrition course	
TR5140 Advanced Nutrition: Bioactive Compounds in Foods	3 credits
There are biologically active compounds, found mainly in plant foods (sometimes called phytochemicals), that are not nutrients or human metabolites and that have potentially important effects on human physiology. This course reviews the current evidence on these compounds, including chemical structure and nomenclature, biological effects, food sources, absorption and metabolism, potential therapeutic uses, and toxicity. Examples of compounds to be discussed: bioflavonoids, carotenoids, tocopherols/tocotrienols, plant sterols, pre/probiotics, indoles/glucosinolates and alkenyl cysteine sulfoxides. Prerequisites: UG - TR4108; grad - TR5124; ND - TR6311 or equivalents	
TR5207 Nutritional Counseling	2 credits
This course introduces advanced interviewing techniques used in nutritional counseling. Students explore their personal nutritional counseling style through role play, visualization and other counseling techniques. Students build an understanding of the complexities of diet and compliance issues. Prerequisites: PS5301, admission into MSN/DPD program or permission of DPD director	
TR5320 Nutrition Assessment and Therapy 1	5 credits
This course introduces disease prevention, nutrition assessment and therapeutic interventions, including both traditional and natural medicine approaches. Medical terminology and abbreviations, using food-as-medicine, whole foods menu writing, nutritional screening and assessment with documentation for the medical record utilizing case studies are included. Anthropometric, biochemical, client history, physical findings, and food and nutrition-related history indicators are defined, interpreted and applied. Anemia, dysbiosis, food allergies and sensitivities, upper and lower GI diseases, cardiovascular disease, diabetes, hypertension, and obesity are covered. Prerequisites: BC5118, TR5120, TR5136. Corequisite: BC5132, TR5124	
TR5321 Nutrition Assessment and Therapy 2	5 credits
This course is a continuation of Nutrition Assessment and Therapy 1. Students continue to practice application of nutrition assessment and intervention therapies. Oral/dental and bone health, cancer, HIV/AIDS, neurological diseases, dysphagia, pulmonary disease, chronic kidney disease, endocrine imbalance, detoxification and biotransformation, inflammatory diseases, biliary and liver disease are covered. Assessment of normal pediatric nutrition is introduced. Nutrition intervention strategies using both traditional and natural medicine approaches are practiced. Prerequisites: BC5132, TR5124, TR5320; for DPD only - TR5207	
TR5803 Nutrition Clinic Entry	1 credit
This class covers clinic requirements, procedures and policies including both clinic-wide and nutrition shift issues. Focus is on topics such as team care philosophy, CPR, medical documentation, and HIPPA training. Prerequisites: TR5207 or PS5301, TR5320, admission into MSN/DPD or MSN/CHP program, or permission of instructor. Corequisite: TR5321 or PS6315	
TR5901, TR5902, TR5903 Independent Study	variable credit
Credits may be applied to the nutrition elective requirement. Students focus on areas of interest not covered in the regular curriculum. Competencies and learning objectives are developed with the help of an instructor or approved preceptor. Independent Study cannot substitute for core courses offered on campus. Students must be in good academic standing and may take a maximum of four (4) credits. Prerequisites: Permission of program chair, admission to MS nutrition program	
TR6100 Nutritional Supplementation	4 credits
This course focuses on the nutritional and physiological value of supplements and herbal products as applied to wellness promotion and chronic disease management. Production, safety and regulation of supplements and herbs are discussed. Students learn basic botanical concepts, terms, and pharmacology. Prerequisites: TR5140, TR5321	
TR6105 Nutrition and Dietary Systems	3 credits
This course introduces AOM students to the importance of nutrients, foods and diets for prevention, health maintenance, and health promotion. This course provides students with a basic understanding of the fundamentals of human nutrition, including macro, micro and accessory nutrient concepts. A critical analysis of Western and non-Western dietary systems is presented. Students learn to do nutritional assessment for their patients. Prerequisite: AOM internship eligibility	
TR6111 Contemporary Nutrition: Global and Ecological Issues	2 credits
This is the first class in a three-course series that focuses on the importance of food and food choice in a broad context. Interactions between food choice and ecology, including such areas as food technology, water use and sustainable agriculture, are discussed. Food security and world hunger are included. Prerequisite: Admission to MS nutrition program	
TR6114 Thesis	variable to 12 credits
Students form a committee and meet with their committee members to plan and implement a research project of sufficient complexity and scope in an appropriate subject area. Twelve (12) credits are necessary to meet the requirement for scholarly activity mandated for graduation with a master's degree. Thesis requirements are detailed in the Bastyr University nutrition program <i>Master's Thesis Handbook</i> . Prerequisites: TR5100, TR5104, TR5128	

TR6116 Thesis Seminar**1 credit**

This course is designed to assist students in developing skills important in performing thesis research. The format varies, but examples of activities include: presentation of thesis proposals, problem solving, reviewing recent scientific literature, and learning and practicing applicable methods (e.g., research design, research budgets, IRB applications, statistical and data analysis techniques, oral and written presentation). This one-credit class needs to be taken for three separate quarters, starting with the first quarter students enroll in thesis credits. Prerequisites: TR5100, TR5104, TR5128, TR6114 (corequisite)

TR6122 Contemporary Nutrition: Community and Culture**3 credits**

This is the second class in a three-course series that examines public health, community nutrition and health care systems. Students begin to assess the needs of a community, outlining the background to a public health grant that will be completed in TR6133. Students explore publicly funded nutrition programs, comparing and contrasting effective community nutrition education in affecting dietary behavior change and critically evaluating effective interventions in communities with different cultural backgrounds. Prerequisites: Admission to MS nutrition program, TR6111

TR6133 Contemporary Nutrition: Public Health**3 credits**

This is the third class in a three-course series that culminates in development of a public health grant. Students explore funding sources for public health nutrition grants and explore both historical perspectives and emerging trends in nutrition policy, as they gain an understanding of the role of the community nutritionist in advocating and securing public health funds to support community nutrition interventions. Prerequisite: Admission to MS nutrition program, TR6122

TR6199 Thesis Continuation**0 credits**

This course is used when a student is still working on a thesis but has already registered for the required number of thesis credits. One credit of tuition is charged. Prerequisite: TR6114 (12 credits)

TR6310 Foods, Dietary Systems and Assessment**3 credits**

This course introduces students to the importance of foods and diets for prevention, health maintenance and health promotion. A critical analysis of Western and non-Western diet systems is presented. Students learn to do a basic food and diet assessment for their patients. Nutrition in naturopathic primary care, co-management and referral are discussed. The place of eating, foods and diet systems and interventions is considered in the context of naturopathic clinical theory, the therapeutic order and clinical practice, including an introduction to natural hygiene and public health perspectives. An introduction to macronutrients transitions students into TR6311. Prerequisites: BC5103 and BC5106

TR6311 Macro and Micronutrients**3 credits**

This course gives an overview of the metabolism, absorption, transport functions, requirements (deficiencies and toxicities), food sources, nutrient-nutrient interactions, and general therapeutic uses of various macro- and micronutrients. This course is required for students pursuing the naturopathic medicine degree. Prerequisites: BC5103, BC5106, BC5124, TR6310

Clinic Nutrition Practicum 1-2

Students in the MSN/DPD and MSN/CHP tracks receive supervised experience in the clinical setting. Nutritional assessment, client counseling, interviewing and chart documentation are emphasized in skill development. Supervisor feedback and self-evaluation are used to help identify and develop individual areas of focus. Activities may include, but are not limited to, observation of experienced practitioners, group teaching, experience with "standardized" patients and one-to-one nutrition counseling sessions. The practicum may occur on campus or at Bastyr Center for Natural Health. As students progress from Clinic Nutrition Practicum 1 to Clinic Nutrition Practicum 2, the level of individual responsibility increases. In Clinic Nutrition Practicum 1, there is a greater emphasis on observation and skill building. The student's role in direct client contact increases in Clinic Nutrition Practicum 2, where students are expected to take more of a leadership role in nutrition consults, with client interviewing, diet assessment, nutrition intervention and medical documentation.

TR6811 Clinic Nutrition Practicum 1**2 credits**

See description above. Prerequisites: for DPD - BC5132, TR5136, TR5207, TR5321, TR5803; for MSN/CHP - BC5132, PS5301, PS5202, TR5803, PS6315, TR5136, TR5321, meeting criteria for professional behavior and attitudes or permission of nutrition clinic coordinator

TR6812 Clinic Nutrition Practicum 2**2 credits**

See description above. Prerequisite: TR6811 and meeting criteria for professional behavior and attitudes

TR6901, TR6902, TR6903 Independent Study**variable credit**

Credits may be applied to the nutrition elective requirement. Students focus on areas of interest not covered in the regular curriculum. Competencies and objectives are developed with a faculty sponsor or approved preceptor. Independent Study cannot substitute for core courses offered on campus. Students must be in good academic standing and may take a maximum of four (4) credits. Prerequisite: Permission of program chair

TR7311 Maternal and Infant Nutrition**3 credits**

This course presents topics relevant to nutrition of the mother and child from preconception through infancy. Topics include nutritional needs before and during pregnancy and lactation, dietary recommendations, breast milk composition, food introduction for infants, and identification of nutritional risk in infants. Concepts are applied using case studies and class discussion. This course is required for the naturopathic midwifery program. Prerequisites: ND students currently enrolled in clinic shifts or second year MS nutrition students

Diet and Nutrient Therapy 1-2

This two (2) course series builds on the Food, Dietary Systems and Assessment and Macro and Micronutrients courses. Diet and Nutrient Therapy courses discuss the clinical uses, physiological and pharmacological effects of individual nutrients. Dietary management and nutrient therapy for the prevention and treatment of specific diseases and conditions are thoroughly covered. The clinical use of nutrient supplementation is discussed from the standpoint of both prevention and therapeutic interventions. Clinical indications and current research on a variety of specific nutrients are emphasized. These courses are required for students pursuing the naturopathic medicine degree.

TR7411 Diet and Nutrient Therapy 1**3 credits**

See description above. This course specifically outlines the clinical uses, physiological and pharmacological effects of individual nutrients and specific diets for specific diseases and conditions. Prerequisite: TR5321 or TR6311

TR7412 Diet and Nutrient Therapy 2**3 credits**

See description preceding TR7411. This course specifically discusses the nutritional management of specific disease conditions by detailing the clinical indications and current research on various specific nutrients and diets for specific diseases and conditions. Prerequisite: TR7411

TR8401 Nutrition Issues in Cancer Care**3 credits**

This course provides an analysis of the nutritional needs of the cancer patient, including the role of nutritional supplementation, management of clinical side effects of cancer treatment and an introduction to whole foods nutritional strategies. Students are taught to recognize and triage potential nutritional deficiencies in patients as well as analyze the dietary protocols often utilized in cancer treatment planning. Prerequisites: BC7105, OM7412, admission to DAOM or permission of AOM dean, or second year of MS nutrition program

TR9106 Quilliascut Culinary Farm Experience**2 credits**

This is a one-week, onsite course at the Quilliascut Farm near Colville, WA. Students have a unique opportunity to experience the farm-to-table connection first hand. Participants milk goats, make cheese, help care for farm animals, transplant vegetables and harvest produce from the gardens. Visits to neighboring organic farms and presentations of current farm and food topics give an understanding of the implications of buying seasonal and local. Students work with a chef to prepare lunch and dinner using only ingredients from the garden and products from local farms. Retreat participants stay at the farm school, with bunkhouse-style lodging, shared bathrooms and a professional kitchen. Prerequisite: TR4103 or TR5101

TR9107 Ayurvedic Nutrition – Principles and Practices**2 credits**

Students learn the fundamentals of Ayurvedic nutrition which includes the use of the six tastes for balancing digestion and metabolism. Students practice preparation of individualized nutrition plans for the various Ayurvedic body types using common herbs and spices.

Special Topics in Nutrition 1-2

These special topics, offered periodically, explore trends, developments and specific topical areas in human nutrition. Topics vary and are not necessarily offered every year.

TR9511 Special Topics in Nutrition 1**2 credits**

See description above. Prerequisite: Variable according to topic

TR9512 Special Topics in Nutrition 2**2 credits**

See description preceding TR9511. Prerequisite: Variable according to topic

TR9801-9804 Clinic Practicum Elective**2 credits**

This course allows nutrition students to gain extra clinical experience beyond what is required for graduation. For other student clinicians, this course provides an opportunity to observe medical nutrition therapy and to participate in collaborative care of patients. The role of the student is decided by the supervisory faculty and varies depending on the student's prior experience. This elective may not count toward clinic requirements for clinic students. Prerequisite: Open to all students who have completed at least one nutrition clinic shift (TR6811) or permission of nutrition clinic program coordinator

Directions to Bastyr Campus and Bastyr Center

BASTYR UNIVERSITY
14500 Juanita Drive NE
Kenmore, Washington 98028-4966
425.823.1300

BASTYR CENTER FOR NATURAL HEALTH
3670 Stone Way North
Seattle, WA 98103
206.834.4100

DRIVING DIRECTIONS TO BASTYR CENTER FOR NATURAL HEALTH

FROM I-5 (NORTH OR SOUTH)

1. Take the 45th Street exit just north of Hwy. 520 and turn to the west.
2. Proceed west on 45th Street to Stone Way.
3. Turn left onto Stone Way and proceed approximately seven blocks south. The clinic is located at 3670 Stone Way North at the southeast corner of Stone Way and North 38th Street.
4. Parking is available on the street. Underground parking is reserved for patients.

DRIVING DIRECTIONS TO BASTYR CAMPUS

SOUTHBOUND ON I-5 (FROM VANCOUVER, B.C.)

1. Take EXIT 177 (Lake Forest Park) onto Ballinger Road NE.
2. Follow Ballinger Road NE for about 3 miles to Hwy 522, also called Bothell Way.
3. Turn LEFT on Hwy 522/Bothell Way to 68th Avenue NE in Kenmore.
4. Turn RIGHT on 68th Ave NE, which becomes Juanita Drive NE, and follow it south to sign on the right indicating Bastyr University (NE 145th).
5. Turn RIGHT and follow drive until it forks. Continue straight ahead until you reach Bastyr University.

NORTHBOUND ON I-5 (FROM PORTLAND)

1. Take EXIT 175 (NE 145th) and turn RIGHT at the end of the exit ramp onto NE 145th.
2. Follow NE 145th to Hwy 522/Bothell Way.
3. Follow instructions #3-5 above.

SOUTHBOUND ON I-405

1. Take EXIT 23/Hwy 522 (third Bothell exit).
2. Follow Hwy 522 west to 68th Ave NE in Kenmore.
3. Turn LEFT; continue on 68th Ave NE which becomes Juanita Drive NE. Follow it south to sign on the RIGHT indicating Bastyr University.
4. Turn RIGHT and follow drive until it forks. Continue straight ahead until you reach Bastyr University.

NORTHBOUND ON I-405

1. Take EXIT 20A (NE 116th) and turn LEFT at the end of the exit ramp onto NE 116th (this is a northbound exit only).
2. Follow NE 116th to the second signal light (98th Ave NE) and continue through this intersection. You are now on Juanita Drive NE.
3. Follow Juanita Drive NE for 4 miles to sign on your LEFT indicating Bastyr University (NE 145th).
4. Turn LEFT and follow drive until it forks. Continue straight ahead until you reach Bastyr University.

FEDERAL REFUND REQUIREMENTS

The refund schedule below has been established in keeping with federal refund requirements for students withdrawing from school:

Week of the Quarter	% Refund for Course	% Refund for Complete
	Withdrawals ¹	Withdrawals ²

1 st	100%	100%
2 nd	90%	90%
3 rd	50%	80%
4 th	50%	70%
5 th	25%	60%
6 th	25%	50%
7 th through 8 th	0	0

Refunds related to course and full withdrawal from summer quarter are different and published in the summer quarter academic calendar, available on MyBU. After the first week of the quarter, course withdrawals are accompanied by a “W” grade on the transcript (except in the case of courses that have not yet begun).

¹All courses (including weekend intensive courses) follow this refund schedule. Courses may not be dropped after the course has ended (example: weekend intensive and non-traditionally scheduled courses). Courses may only be added in the first week of the quarter (with the exception of weekend intensive courses). In order to manage patient scheduling, the University strongly discourages students from dropping clinic shifts. Students who drop a clinic shift before the quarter may be assessed a financial penalty. Once the quarter has begun, there is no refund for shift withdrawals (except in the case of family or medical emergencies). Please see the clinic registration staff, in the registrar’s office, for more information regarding clinic shift changes.

²Calculated by hand.

Calendar Notes

¹In fall quarter only, first-year naturopathic medicine classes begin a week earlier to accommodate midterms week, when students take exams but do not have other scheduled classes. Midterms week is 10/18-22/10.

²During interim clinic, all clinic services run normally. Interim clinic is required; exceptions must be approved in advance. Students staff the shifts in which they were registered, in the quarter just ended.

³During clinic closure, the clinic does not offer patient visits, but appointment phones and dispensary are open (except when one of the clinic closure days falls on a paid holiday). Appointment phones and dispensary hours may be altered from their standard operating hours. The clinic is closed on all official holidays.

⁴Bastyr community day is focused on the health and well-being of members of the Bastyr community. Activities are scheduled for the afternoon and classes and clinic shifts are cancelled from 12 noon - 5 p.m. so that members of the community can participate.

⁵Although religious holidays are NOT official University holidays, the University’s policy is to attempt to accommodate the observance of religious practices. Students are responsible for the material covered but will not have religious absences count against any attendance requirement. Students observing such holidays are required to notify faculty during the first week of classes and find substitutes for clinic shifts affected. Students should follow the “reschedule exam” procedures in the event an exam falls on a religious holiday.

The following are the major religious holidays in the coming academic year (holidays that occur during break periods are not listed): Jewish (holidays begin at sunset of the first day listed and continue through sunset of the final day listed): 9/8-9/10, 9/17-18/10. Christian: 4/22/11, 4/24/11. Bastyr University schedules clinical training and occasional required courses or intensives on weekends. Students who have religious restrictions against attending classes on weekends must contact their program chair, in advance, when such a conflict occurs. Efforts will be made to resolve such conflicts, but a resolution cannot be guaranteed.

Revised: July 2010

The calendar is subject to change without notice.

Academic Calendar For 2010-2011

	FALL 2010	WTR 2011	SP 2011	SU 2011
